POSTAL LIFE BUILDING

# The Open Door in Life-Insurance

INSURANCE PROTECTION
POSTAL LIFE INSURANCE COMPANY
HEALTH CONSERVATION

The Postal Life is the only company that opens its doors to the public so that those desiring sound insurance-protection at low cost can deal **directly** for it, either personally or by correspondence.

Whether you call or write, you make a **guaranteed** saving corresponding to the agent's **first-year** commission, less the moderate advertising charge. This first-year commission ranges up to

## *40% of the premium on whole-life policies*

In **subsequent** years, you save the Renewal Commission other companies pay their agents, namely, 7½%, and you also receive an Office-Expense Saving of 2%, making up the

## *Annual Dividend of 9½% Guaranteed in the Policy*

If you were to call at the office of any other company, or write to it, you might secure insurance, of course, but not **direct**; the policy would go to you through some **agent** or **agency** that would get the commission. **You** wouldn't get it.

In fact, the **other** company wouldn't be permitted to give it to you, unless everyone else got it: it would be **illegal discrimination.**

The Postal Life, however, dispenses entirely with agents. Its policyholders—**all of them alike**—get the benefit of the saving thus effected by **direct** insurance.

**STRONG POSTAL POINTS**

**First:** *Standard policy reserves*, now $10,000,000. *Insurance in force* nearly $50,000,000.

**Second:** *Old-line legal-reserve insurance* — not fraternal or assessment.

**Third:** *Standard policy provisions*, approved by the State Insurance Department.

**Fourth:** Operates under *strict State requirements* and subject to the United States postal authorities.

**Fifth:** *High medical standards* in the selection of risks.

**Sixth:** *Policyholders' Health Bureau* provides one free medical examination each year, if desired.

Such is the POSTAL way: the door is open to **you**. Call at the company's offices, if convenient, or write **now** and find out the exact sum it will pay you at your age—the **first** year and **every other.**

## *See How Easy It Is*

In writing simply say: *"Mail me insurance particulars for my age as per WORLD ALMANAC."*

In your letter be sure to give
1. **Your Full Name.**
2. **Your Occupation.**
3. **The Exact Date of your Birth.**

No agent will be sent to visit you: the Postal Life employs no agents.

*Postal Life Insurance Company*

**Wm. R. Malone, President**

**35 Nassau Street New York**

*President*—Alfred Wagstaff. *Vice-President*—James Grant Wilson. *Secretary*—Richard Welling. *Treasurer*—Henry Bergh. *General Manager*—William K. Horton. *Superintendent*—Thomas F. Freel. Headquarters, Madison Avenue and Twenty-sixth Street, New York.

# Occurrences During Printing.

SOME months are occupied in printing a volume so bulky as THE WORLD ALMANAC, and it is necessarily put to press in parts or "forms." Changes are in the mean time occurring. Advantage is taken of the going to press of the last form of the First Edition to insert information of the latest possible date, which is done below. The readers of the ALMANAC are requested to observe these additions, corrections and changes, and it would be well to make note of them on the pages indicated.

34. Table of Memorable Dates—Opening of Panama Canal to navigation not likely before May 1, 1914, owing to continued slides in the Culebra cut.

112. Parcel Post—On December 6 the Interstate Commerce Commission granted permission to the Post-Office Department to increase the weight limit for the first and second zones from twenty pounds to fifty pounds and to increase the weight limit in all the other zones from eleven to twenty pounds. The Commission approved reductions of rates in many of the zones.

192 and 450. Interstate Commerce Commission—Commissioner Marble died. His successor not appointed when ALMANAC went to press. Commissioner Prouty resigned.

194-209. Railroad Systems of United States—William W. Finley, President of the Southern Railway, died November 25. T. M. Emerson, President of the Atlantic Coast Line, died November 25. William C. Brown, President of New York Central Railroad, resigned and is succeeded by Alfred H. Smith.

210. Railway Accidents, United States—During the quarter ended June 30, 1913, the casualties of all classes reported by steam railway companies were as follows: Train accidents, killed, 152; injured, 3,417. Other than train accidents (including accidents to employés while at work, to passengers getting on or off cars, to trespassers and others), killed, 2,286; injured, 16,868. Industrial accidents (accidents not involved in train operation, but occurring to railway employés, other than trainmen, on railway premises), killed, 97; injured, 29,626. Total, killed, 2,535; injured, 49,911. As compared with returns for the corresponding quarter of 1912, the above figures show, for train accidents, an increase of 4 in the number of persons killed and of 123 injured; for other than train accidents, an increase of 132 killed and of 2,618 injured, and for industrial accidents, an increase of 4 killed and of 5,542 injured, making a total increase, all classes, of 140 in the number killed and of 8,283 in the number injured. Fatal accidents on British railways in 1912 numbered 1,011, while 8,700 persons were injured. Consul-General Griffiths adds that fatalities were 59 less and injuries 355 more than in 1911.

214. Railroad Speed—On November 25 a special train, consisting of a locomotive and two cars, ran from Washington, D. C., to Jersey City, 226 miles, in four hours, the fastest trip ever made between the two cities.

280. The New York State Legislature, at its extraordinary session early in December, passed a law providing for direct primaries; a law establishing the Massachusetts ballot system; a law providing for the direct election of United States Senators; a law providing for workmen's compensation; and a law providing for a special election in the Spring of 1914, to determine the question of whether or not delegates to a Constitutional Convention shall be elected in November, 1914, at the general election. Lastly, a law was passed to pay the expenses of the Sulzer impeachment trial; the total cost of the trial being $169,000; of which the lawyers of the State were to be paid $60,000; the lawyers of ex-Governor Sulzer $40,000; the Managing Board $50,000, and there were incidental expenses amounting to $19,000. The sum of $1,600,000 was appropriated also, mostly to pay deficiences in State departments left by former administrations.

325. Running—A. A. U. Junior National Six-mile Cross Country Championship race, held at New York City, November 29, won by S. J. Leslie, Long Island A. C.; time—34m. 42s.; second, G. Strobino, unattached, 34m. 49s.; third, A. Roth, Mohawk A. C., 35m. 14s. Team points: New York A. C., 26; Long Island A. C., 48; Mohawk A. C., 51. Senior championship race, same course and distance, December 6, won by A. R. Kiviat, Irish-American A. C.; time—33m. 52s.; second, S. J. Leslie, Long Island A. C., 34m. 12s.; third, W. Kyronen, unattached, 34m. 57s. Team points: Irish-American A. C., 32; New York A. C., 32; Long Island A. C., 58.

336. Rowing—Princeton eight-oared varsity crew defeated Yale varsity eight in 1 5-8 mile race at Carnegie Lake, Princeton, N. J., by one length. Time—Princeton, 9m. 39 1-5s.; Yale, 9m. 46 2-5s.

347. Tennis—World's covered court championships, held at Stockholm, Sweden, November, final rounds. Singles—A. F. Wilding defeated M. Germot, 5—7, 6—2, 6—3, 6—1. Ladies—Miss H. Aitchison defeated Mme. Fenwick, 6—4, 6—2. Men's doubles—M. Decugis and M. Germot defeated H. Kleinschroth and C. Bergmann, 7—5, 2—6, 7—9, 6—3, 6—1; Mixed doubles—M. Decugis and Mme. Fenwick defeated G. Setterwall and Mrs. Fick, 7—5, 12—10.

352. Boxing—Jess Willard vs. George Rodel, ten-round draw, P. V., Milwaukee, Wis., November 17. "Gunboat" Smith defeated Sam Langford, twelve rounds, R. V., Boston, Mass., November 18. "Packey" McFarland defeated Harry Brewer, eight rounds, P. V., Windsor, Ont., November 26. Johnny Dundee defeated Charlie White, ten rounds, P. V., New Orleans, La., November 27. Joe Rivers defeated Leach Cross, twenty rounds, R. V., Los Angeles, Cal., November 27. Jess Willard defeated Carl Morris, ten rounds, P. V., New York City, December 3. "Packey" McFarland defeated Harry Tremble, eight rounds, P. V., St. Louis, Mo., December 5. Georges Carpentier knocked out "Bombardier" Wells, one round, London, England, December 8. Jack Britton defeated "Packey" McFarland, ten rounds, P. V., Milwaukee, Wis., December 8. "Battling" Levinsky defeated Jim Flynn, ten rounds, P. V., New York City, December 9. Mike Gibbons knocked out "Wildcat" Ferns, two rounds, New Orleans, La., December 10.

381. Bicycle Racing—Six day bicycle race held at Boston, Mass., November 1-8, won by Joe Fogler and Iver Lanson, with 1,359 miles, 5 laps; second, Frank McNamara and Ed. Root; third, Percy Lawrence and Harry Magin; all tied at finish, decided by mile sprint race. Six day bicycle race held at New York City December 8-13, won by Joe Fogler and Alfred Goullet with 2,751 miles; second, Magin and Lawrence; third, Root and McNamara; fourth, Drobach and Halstead; fifth, Verri and Brocco; sixth, Hill and Ryan, all tied at finish, decided by mile sprint race.

401. Billiards—William Hoppe defeated Calvin Demarest in 18.2 balk line championship match, at New York City, November 17, 500 to 294 points. High run—Hoppe, 121; Demarest, 115; average, Hoppe, 21 17-23; Demarest, 12 18-23. Benjamin Allen defeated Charles Weston in pocket billiard (pool) championship match at Kansas City, Mo., December 3-4-5, 600 to 411 points.

426. Heads of Governments—On December 11 Dr. Arthur Hoffmann was elected President of Switzerland for 1914. President Victoria, of the Dominican Republic, resigned November 28.

OCCURRENCES DURING PRINTING—*Continued.*

427. Ministries of Principal European Countries—The French Ministry resigned December 2, and on December 8, Senator Gaston Doumergue, Radical-Socialist, succeeded in forming the following new ministry: Premier and Minister of Foreign Affairs—Gaston Doumergue; Minister of the Interior—Rene Renoult; Minister of Justice—Blenvenu Martin; Minister of War—Joseph J. B. E. Noulens; Minister of Marine—Ernest Monis; Minister of Finance—Joseph Caillaux; Minister of Public Instruction—Rene Viviani; Minister of Commerce—Louis J. Malvy; Minister of Public Works—Fernand David; Minister of the Colonies—Albert F. Lebrun; Minister of Agriculture—Maurice Raynaud; Minister of Labor—Albert Metin.

661. Record of Events—On December 15, by a vote of more than two to one, the House Immigration Committee favorably reported the Burnett Immigration bill, with its stringent provisions barring from entry into the United States all Asiatics, militant suffragettes, advocates of sabotage and anarchists. The literacy test, requiring aliens to read or write one language, was also included. (See also "Immigration" on page 180.)

664. Death Roll of 1913—On December 5, Lieut.-Col. David du Bose Gaillard, director of the engineering work in the Culebra Cut division of the Panama Canal, died at Baltimore from cranial disease, aged 54 years. On December 6, Phoebe Couzins, first woman lawyer in the United States, died at St. Louis, Mo., from debility, aged 72 years. On December 6, Cardinal Luigi Oreglia, of the Sacred College, died at Rome, aged 85 years. On December 6, Rear-Admiral Kossuth Niles, U. S. N. (retired), died at New York from heart disease, aged 64 years.

## MOTHERS' PENSIONS.

The State of New Jersey in April, 1913, passed "An act to promote home life for dependent children." The first section of the act will give an idea of the general scope. "1. Any widow who is the mother of a child or children under the age of 16, and who is unable to support them and to maintain her home may present a petition for assistance to the Court of Common Pleas of the county wherein she resides."

In connection with country-wide discussion of the education and best development of the child has come within the past few years many definite steps for preserving to the child the benefits gained only from proper home influences. In the belief that separation of mother and child necessarily works to the detriment of the child's development, many States have enacted legislation that will enable mothers too poor to maintain their children, to keep them at home instead of placing them in various institutions. This is being done through a pension or allowance system. Thirteen State Legislatures have passed these so-called "widows' pension" laws, the greater part of them within the last year. A number of cities have provided similar aid by municipal ordinances. The first bill introduced in the New York State Legislature passed the lower house, but failed in the Senate.

In Illinois the provision, which is a section of the juvenile law, was passed two years ago, and went into operation July 1, 1911. California and Colorado followed. Since January 1, 1913, eleven more States—Washington, Utah, South Dakota, Idaho, Minnesota, Iowa, Nebraska, Ohio, New Jersey and Pennsylvania—have passed similar laws. In addition, Missouri has authorized Kansas City to adopt the system. Wisconsin, without definite enactment, has been conducting a similar enterprise in a limited way, and in three other States city ordinances or the powers bestowed upon State boards have established therein the principal of widows' pensions. Similar laws are now being considered by seven other States.

## NOTIFICATION TO THE PRESIDENT-ELECT AND VICE-PRESIDENT-ELECT OF THEIR ELECTION.

THE DETERMINATION OF THE RESULT OF THE 1912 PRESIDENTIAL ELECTION WAS AS FOLLOWS:

Feb. 12, 1913, the two Houses being assembled in the Hall of the House of Representatives for the count of the electoral vote, and the count having been duly made and certified to, and the announcement thereof made to the two Houses assembled, the statement of the Tellers closed in these words:

"This announcement of the state of the vote by the President of the Senate shall be deemed a SUFFICIENT DECLARATION OF THE PERSONS ELECTED PRESIDENT AND VICE-PRESIDENT OF THE UNITED STATES, each for the term beginning March 4, 1913, and shall be entered, together with a list of the votes, on the Journals of the Senate and the House of Representatives.

"The count of the electoral vote having been completed, and the result announced, the joint meeting of the two Houses was dissolved; and

"The Senate returned to its Chamber."

# The Currency Bill.

THE main provisions of the proposed currency bills as perfected at the time the ALMANAC went to press by the two factions in the Senate Banking and Currency Committee, were as follows:

*The Democratic bill:* Authors, Carter Glass, Congressman of Virginia, Chairman of House Committee on Banking and Currency, and Senator Robert L. Owen of Oklahoma.

Eight regional reserve banks, governed by directors, of whom a majority shall represent the member banks. The stock to be subscribed by State and National Banks and Trust Companies.

A Federal Reserve Board of nine members, including the Secretary of the Treasury, having power to remove any director or officer of a regional bank.

Redemption of circulating notes in gold and lawful money at any regional bank, or in gold alone by the Federal Reserve Board.

An Organization Committee to divide the country into regions and inaugurate the new system.

*The Republican and Hitchcock bill:*

Four regional reserve banks, governed by nine directors, of whom the Government shall name five and the bank four. The stock to be subscribed by the public and underwritten by the banks.

A Federal Reserve Board of nine members, including the Secretary of the Treasury.

Redemption of notes to be in gold alone.

Organization Committee abolished and its work conferred on Federal Reserve Board.

The bill had not been enacted into law when the ALMANAC was being printed

# The World.

## JOSEPH PULITZER.

**April 10, 1847 ✠ October 29, 1911.**

NINETEEN hundred and thirteen brought to the United States a new President; to New York State a great disgrace, an impeached Governor; to the State grafters promises of swift retribution for the misdeeds of years; to New York City the overwhelming defeat of Tammany and the election of the whole Fusion ticket; to the people at large a parcel post and a new tariff law to reduce their financial burdens.

An unbroken thread through the warp and woof of the year's record is the work of THE WORLD: aiding the right whenever help could be given; throwing the bright light of publicity on those who would work in the dark, so that all the people might read and sit in judgment in that highest court—the Court of Public Opinion.

### THE ANTI-TAMMANY MAYORALTY CAMPAIGN.

THE Mayoralty campaign in New York City was one of the most remarkable and certainly one of the most bitterly fought in the history of the municipality. The air was electric with personalities, charges and counter-charges, and the fight against Tammany welded for the time as Fusionists political elements as diverse as fire and water. It promised to be a three-cornered fight with added complications, but death entered the campaign at its start, and one candidate dropped politics forever.

On the firing line was THE WORLD, battling for good government; and to this end was against Tammany Hall and Tammany's candidate, Edward E. McCall. It was for Fusion and John Purroy Mitchel, Democratic and Fusion candidate, who won by over 120,000 plurality. It was against Mayor Gaynor's Independent nomination and candidacy, regarding him as "Murphy's Assistant Candidate," as all he could hope to do was cut down the Fusion majority and thus help Tammany.

John Purroy Mitchel, Collector of the Port of New York, was nominated on the Fusion ticket August 1. The Progressives and the Republican Committee gave their support to the ticket, and the Independence League named Mr. Mitchel for Mayor despite his previous refusal of their nomination. Edward E. McCall, Chairman of the Public Service Commission, was designated as the organization candidate, and Mayor Gaynor announced that he would be an independent candidate. His nomination for Mayor followed. It was a picturesque and unusual ceremony, not resembling the regulation way of deciding on a candidate for high office.

Mayor Gaynor stood on the City Hall steps and accepted the nomination "from the people" as represented by "numerous organizations formed to further his candidacy." A crowd gathered around him. Flags were flying. Everywhere were banners bearing this statement of fact:

"I have been Mayor."

These banners seemed to many, that sunny day, to be a strange, prophetic omen. They spoke only of the past. Not one bore a legend for the future, though the exercises of the day were full of promise of achievement.

The Mayor accepted the nomination by assailing Tammany and the men who had failed to renominate him as the organization candidate. It was a characteristic address. The next day he sailed for Europe. One week from the day the prophetic banner was carried aloft in City Hall Park, it might have stood at his head and feet, descriptive of his last years. Once more the people saw him in City Hall. This time they filed past him silently, a throng of 100,000. The flags were at half-mast. Mayor Gaynor had died at sea.

Two candidates were left, and one issue—Tammany. Charges and counter-charges of graft followed each other in swift succession. Through it all THE WORLD fought in a straight line—against Tammany and all that it stands for; and against its Mayoralty candidate, E. E. McCall.

In the beginning THE WORLD said editorially: "In designating E. E. McCall as the organization candidate for Mayor, Murphy is practically nominating himself. Mr. McCall is one of the "elder statesmen" of Tammany Hall who are the confidential advisers of the Boss. He was put on the bench by Tammany and his judicial record was the record of a Tammany Judge. He was made Chairman of the Public Service Commission by Governor Sulzer through an understanding with Murphy. It was reported then that Mr. McCall's promised reward was to be the Democratic nomination for Mayor."

And again: "The people of New York can never get rid of Murphy by electing Murphy's candidates."

Mr. McCall seriously disapproved of THE WORLD'S arguments and voiced his objections in acrimonious attacks on THE WORLD and on Mr. Ralph Pulitzer, personally.

When attacking Mr. Mitchel, his opponent, in a campaign speech, Mr. McCall likened the former to Polonius "with the Pulitzers acting for him the rôle of Hamlet" and complained bitterly that Mr. Mitchel "says that I am Murphy's man."

THE WORLD iterated the charge, showing by past history that a man nominated by Tammany belongs wholly to the organization. Mr. McCall in reply described THE WORLD'S opposition to Tammany and Tammany's candidate as "the degradation of decent journalism" and promised that "If I am elected Mayor, I will use every ounce of my power, officially and personally, to drive THE WORLD and Mr. Pulitzer "out of business."

THE WORLD thus replied editorially: "Tammany bosses and Tammany office-holders have been consecrating themselves to this delectable task for the last thirty years, and we wear their hatred as a badge of journalistic honor."

"Tammany is in a rage because the issue is Tammany. This explains the bitterness of the contest, the fury of McCall and the Tammany ring that forced him into the spotlight," explained THE WORLD.

And it gave one hundred reasons why Fusion should win—a half page editorial that was a forceful, incisive resume of its anti-Tammany arguments and facts. This practically ended THE

WORLD's valuable Mayoralty campaign of education in practical politics as demonstrated by Tammany Hall.

Election morning THE WORLD said editorially to the voters: "This is the most important election that New York has known since the days of Tweed.

"With an overwhelming majority at the polls and aggressive work by the District-Attorney, the decision can be made final. It is the highest privilege of every voter to make this a day of retribution for the shameless system that organized corruption has entrenched in Tammany Hall."

And the voters read and silently replied. Their answer was John Purroy Mitchel, Mayor of the city of New York and the whole Fusion ticket.

## THE NEW DEMOCRACY.

"A New Democracy on Trial" was the heading of THE WORLD'S editorial page on the morning of March 4.

"Woodrow Wilson's inauguration as President marks the beginning of a political epoch. The United States has entered upon a new phase of popular government," THE WORLD said that morning. "This country is passing through the first radical process of political readjustment that it has known since the civil war. Indeed, there have been only four such periods since the establishment of the Republic. One came when the Federalist principle of government was submerged by Democracy under the leadership of Jefferson. Another came when this democracy, under the leadership of Jackson, took physical possession of the machinery of government. The third came when the forces of freedom under the leadership of Lincoln destroyed the theory of secession and obliterated human slaves." * * *

"Upon Woodrow Wilson rests a larger measure of political responsibility than has rested upon any other President since Lincoln. If his administration fails the Democratic party will go the way of the Republican party. * * * It is no holiday task to which Woodrow Wilson sets his hand. * * *

"But of vastly greater moment than any individual in the Cabinet, or all of them combined, is the method by which the Cabinet was obviously organized. Here is the first concrete example of Mr. Wilson's attitude toward the Presidency—his first official interpretation of his office and duties.

"Whether strong or weak in its various elements, this is no Cabinet of political trade and barter. It was fashioned by no political boss. It was fashioned to placate neither sordid political interests nor sordid financial interests. Every member stands on his own merits, as Woodrow Wilson sees these merits. His only concessions are concessions to locality and geography. * * *

"A President capable of performing his task in this spirit may sometimes go astray in his judgment of man, but he has given to the country a convincing proof of his political sincerity.

"The dynamic fact of the Wilson Administration is that the American people have at the head of their Government a man who is as honest intellectually as all Presidents have been honest morally. This man is not only honest intellectually but he has a trained mind that is accustomed to dealing with complicated questions. He knows how to think and he knows how to translate his thought into action. * * * Back of it all he is a Democrat—not a partisan Democrat, but a Democrat with ideas and ideals. * * *

"His administration may fail to accomplish all that is expected of it. * * *

"But if the American people give to Mr. Wilson the support that he has earned, we do not believe that he will fail in the greater achievements to which he is pledged."

President Wilson in his inaugural address said on March 4: "No one can mistake the purpose for which the nation now seeks to use the Democratic party. It seeks to use it to interpret a change in its own plans and point of view." * * *

"The great Government we loved has too often been made use of for private and selfish purposes, and those who used it had forgotten the people. * * *

"Our duty is to cleanse, to reconsider, to restore, to correct the evil without impairing the good, to purify and humanize every process of our common life without weakening or sentimentalizing it." * * *

"Justice, and only justice, shall be our motto. * * *

"Our work is a work of restoration. * * *

"We shall restore, not destroy." * * *

"This is not a day of triumph; it is a day of dedication. Here muster not the forces of party but the forces of humanity. Men's hearts wait upon us; men's lives hang in the balance; men's hopes call upon us to say what we will do. Who shall live up to the great trust? Who dares fail to try?

"I summon all honest men, all patriotic, all forward-looking men to my side, God helping me, I will not fail them, if they will but counsel and sustain me."

Great words, inspired by fine and noble purpose.

## THE WORLD FOR HONEST STATE GOVERNMENT.

THE WORLD made determined effort in this year 1913 to secure wise, honest government for the great State of New York; a government for all the people, so that she might not be a shamed outcast in the sisterhood of States.

On the morning of Jan. 2 THE WORLD said editorially:

"Admirable in tone and temper and purpose are Gov. Sulzer's first speech and his first message to the Legislature. The Governor speaks the language of sincerity and service.

"After nearly thirty years of almost uninterrupted boss rule in this State it is no easy task to re-establish representative self-government. Gov. Sulzer's utterances prove that he appreciates the magnitude of his work and the responsibility that rests upon him. The great obstacles that confront him are within his own party. The grave menace to his administration is within the Democratic organization. * * * No Governor can successfully battle single handed against a boss intrenched as Murphy is intrenched, *and in so far as Gov. Sulzer strives to carry out his pledges, he deserves the unqualified support of every honest citizen, whether Democrat or Republican or Progressive.*"

Thus did THE WORLD show it was ready to support as Governor of the State of New York the William Sulzer whose message gave promise that he would do all in his power to secure good, honest State government. It stood ready to help him in all ways that were right; not because he was William Sulzer but because he seemed from his promises to be the idealist in politics—a man who stood for truth, uprightness, honor; a man striving for public good; a Democrat in the finest sense; one who would endeavor as Governor to emulate the deeds of Democracy's great statesmen of the past.

The fight for a pure State Government for all the people is THE WORLD'S own fight, as it was throughout the years of Joseph Pulitzer's ownership. With a Governor who would pledge himself to high ideals, and fulfil his pledges as far as was in his power much might be accomplished.

THE WORLD approved William Sulzer's pledges. It was with him—if he walked in the trail he had blazed with high-sounding words.

Jan. 3 THE WORLD commented editorially: "Mr. Sulzer has been criticised for some of his organization appointments, and perhaps justly so. * * * We believe, nevertheless, that Gov. Sulzer has begun his work in the right spirit, whatever mistakes he may have made. * * * He has shown a clear understanding of the problems before him and a very firm grasp of his office. Whatever errors of judgment may be charged against him, he is making it fairly plain that the Governor of New York is William Sulzer and that the State Capital is in Albany. This in itself is an excellent beginning."

Thus from the beginning did THE WORLD make the fact clear, that its aim and end was to insure good State government. The personality in the Governor's chair was merely an incident.

THE WORLD wrote on Jan. 4: "John A. Dix thought the Boss of Tammany Hall was more powerful than the Governor of New York, and this made the Boss of Tammany Hall more powerful than the Governor of New York. William Sulzer thinks the Governor of New York is more powerful than the Boss of Tammany Hall, and this makes the Governor of New York more powerful than the Boss of Tammany Hall.

"*Everything depends upon the Governor's point of view.* A forceful, intelligent Governor can always make himself the leader of his party if he wishes. THE WORLD congratulates Mr. Sulzer on his determination to be the leader of the Democratic party in New York. This is one of the most important duties that a Governor can perform.

"What the Democratic party needs in this State is leadership. It followed Murphy throughout the Dix administration only because Dix was weak enough to acknowledge Murphy as his overlord. Had Dix boldly proclaimed that he was the leader of the party Murphy would have done the Governor's bidding as meekly as Kelly did Cleveland's bidding. Governors like Tilden and Cleveland and Hill had no serious trouble with Tammany bosses, and while these men were Governor, no Tammany boss was supreme in the Democratic councils of the State."

Matters at Albany soon were responsible for the following printed in THE WORLD'S editorial column April 12:

"President Wilson is having no trouble at Washington because Washington knows that he means what he says.

"Gov. Sulzer is having much trouble at Albany because Albany does not know that he means what he says.

"When President Wilson tells Congress that the tariff must be reformed to destroy graft and privilege and extortion and monopoly profits everbody knows that the President will fight it out on that line if it takes four years.

"When Gov. Sulzer tells the Legislature that it must reform the Stock Exchange and give New York an honest Direct Primary law, nobody knows whether he intends to fight or to compromise with Wall Street and Tammany Hall.

"The great fact of Woodrow Wilson's leadership is its courage and clearness of purpose. * * *

"But Gov. Sulzer is lost in a fog of uncertainty. New York is not sure of him. The Legislature is not sure of him."

NEW YORK STATE'S SHAME.

This editorial had no reference, however, to revelations that became public later on. When the Frawley committee began to probe the Governor's election expenses, and it was openly stated the committee would show that the money received for election expenses was far in excess of $5,460, the amount Gov. Sulzer declared in his sworn statement, THE WORLD refused to believe. It was inconceivable that New York's Governor was capable of such an act, in violation of the statute law. But when the accusations were made before the committee and evidence to support them followed THE WORLD said:

"Gov. Sulzer cannot afford to ignore the campaign-fund accusations made against him. Neither can he afford to make his testimony dependent upon a summoning of Murphy for examination. Murphy is not Governor of New York. * * * There is a wide difference between the Governor of New York and the Boss of Tammany Hall in the matter of campaign funds.

"The only sensible course for the Governor to pursue is to meet these accusations."

The Governor talked volubly, but he failed to explain.

Aug. 1 THE WORLD said: "*The whole truth, Governor.* Nobody can destroy Gov. Sulzer except Gov. Sulzer. Murphy cannot do it. Tammany cannot do it. No conspiracy can do it.

"If Gov. Sulzer will remember this and act accordingly he can save himself from much trouble, his friends from much embarrassment, and the government of New York from downright calamity.

"Mr. Sulzer's duty is to meet Tammany's charges with cold, dispassionate facts, not with hysterical denunciation. Facts are more eloquent than adjectives and infinitely more convincing. * * *

"Asking Murphy what he did with his campaign fund does not answer the question whether the Governor suppressed contributions to his own campaign fund in violation of the statute.

"The Governor cannot vindicate himself by refusing to testify. Such charges against a Governor are charges that have to be disproved."

And again Aug. 4: "Gov. Sulzer owes it to the people to give information fully, frankly, and cheerfully upon all matters that may be pertinent to the public business."

Aug. 7 there was printed an imperative demand by THE WORLD: "*The Governor must answer.* The Frawley committee has dragged to light campaign contributions aggregating $5,025 which were made to William Sulzer personally and which he did not account for in his sworn statement of receipts and expenditures.

"The committee is now trying to prove that the Governor confiscated a large part of his campaign fund and used the money to buy railroad stock in Wall Street.

"These are ugly charges. They are charges which, unless disproved, would destroy public confidence in any officer of the Government and end his public usefulness. It is needless to say that Gov. Sulzer must meet them. He cannot dispose of them by making counter-charges.

"*The honor of the State is involved and the Governor must answer.*

"The time has now come when only William Sulzer can save William Sulzer."

Still no reply from the Governor.

Aug. 8 THE WORLD to William Sulzer: "*Explain or* RESIGN. Unless William Sulzer is prepared to make a full and satisfactory explanation of the campaign-fund charges the sooner he resigns the Governorship of New York the better.

"On the evidence as it stands the Frawley committee will surely recommend his impeachment.

"The issue cannot be evaded by attacking Murphy, or even by proving that Murphy ought to be in Sing Sing.

"Nothing that Murphy has ever done or ever could do could justify the things that William Sulzer is alleged to have done.

"Murphy might be the most degraded and loathsome human being on earth, but that would not excuse a Governor of New York for having appropriated a large part of his campaign fund to buy railroad stocks in Wall Street.

"It should not be necessary to say this to the Chief Magistrate of the greatest State in the Union. Unless Gov. Sulzer vindicates himself at once he is past vindication. There are no 'facts' he need wait for. Without waiting for all the mortifying details that the committee is dragging to light he knows whether the main accusations against his integrity are true or false.

"If they are false, he needs no time to prepare a defence. If they are true, let him resign his high office and SPARE THE STATE OF NEW YORK THE SHAME AND SCANDAL OF IMPEACHMENT."

Accompanying this editorial was a dramatic cartoon: A lonely shore: a big stock ticker standing on the bank beside the quicksand—"Campaign Fund Scandal"—into which William Sulzer had sunk till he was half buried. He was still going down. One clenched fist grasped the slipping sand, the other reached up and clung desperately to the flimsy ticker tape, which unravelled at his touch. Over all was darkness lit by a cloud-streaked moon. A few birds were flying in a straight line—away.

The Frawley investigating committee ended its sessions Aug. 9, after showing by documentary

evidence and witnesses that William Sulzer had received thousands of dollars for campaign purposes more than the $5,460 he had declared in his sworn statement, both cash and checks having been used to purchase stocks. Gov. Sulzer's Wall Street transactions with three brokerage firms, so far as brought out by records and testimony, showed a total of $72,424.28, dating from Jan. 1, 1912. The major amount of payments was made after he became a candidate for Governor and was elected to that office. All along he claimed to be a poor man.

Commenting upon the complete showing before the committee, of which this is only a part, THE WORLD said Aug. 9: "The best thing Gov. Sulzer can do is resign and spare the State of New York further shame and humiliation. His case now is beyond explanation. Possibly William Sulzer can live down these revelations, but Gov. Sulzer cannot live them down. The painful process of rehabilitation belongs to private life.

"*The only public service that it is still in the Governor's power to render is to resign before the inevitable machinery of impeachment is set in motion.*"

The Assembly's impeachment of Gov. William Sulzer for "wilful and corrupt conduct in office and for high crimes and misdemeanors"—adopted by a vote of 79 to 45—was formally recorded in the Senate Aug. 13.

The essential accusations in the articles of impeachment were: "That William Sulzer, Governor of the State of New York, made a false and fraudulent report to the Secretary of State, under his oath, as required by law, that the total contributions in aid of his campaign as candidate for the office of Governor were $5,460 and no more; and

"Whereas, in truth and in fact the amount was greatly in excess of said sum to the personal knowledge of said Sulzer; and such report further showing or tending to show—

"That he converted to his own private use contributions given in aid of his said election for the purchase of securities or other private uses."

William Sulzer was convicted by the High Court of Impeachment on three of the four articles of impeachment, voted upon Oct. 16. The three counts were in brief, filing with the Secretary of State a false statement of campaign contributions; perjury in making affidavit that this statement was true; misdemeanor in suppressing testimony by deceit, fraud, threats and menaces.

The next morning he was removed from office in the following words addressed to the members of the Court of Impeachment by Chief Judge Cullen:

"The respondent, William Sulzer, having been convicted by the vote of more than two-thirds of the members of this court on the first, second and fourth articles of impeachment, and the court having resolved that for the offences for which he is convicted the respondent be removed from office, it is the judgment of the court and it is now the duty of the President to declare that for these offences the said William Sulzer, Governor of the State, be and is hereby removed from the said office of Governor."

## HIGHWAY GRAFTERS IN THE SPOTLIGHT.

"Government by Blackmail," as THE WORLD described it editorially, was shaken to its foundations in New York State during the last months of 1913, developments that were startling revelations following each other with the speed of a moving-picture film. This was due to the fact that District-Attorney Whitman was conducting a John Doe inquiry before Chief Magistrate McAdoo, following the trail of canal and highway graft, investigating evidence tending to confirm the charges that canal and road contractors paid both willing and unwilling tribute to Tammany.

THE WORLD, during the State campaign, made an investigation into the State Highways department and showed the vast sum expended; the waste and unnecessary expense. District-Attorney Whitman's John Doe inquiry is the logical outcome of THE WORLD'S showing, which clearly pointed to the conditions now being revealed. In none of the big cases handled by the District-Attorney did he encounter the deep and powerful opposition that he has met in this political graft investigation. High officeholders of both the Federal and State Governments, prominent lawyers, wealthy business men and the politicians and contractors on whose relations he has been trying to throw a light, have met his every move by subtle underground counter moves calculated to block him and prevent progress toward complete exposure. Every witness is an unwilling one.

Among results of the John Doe inquiry Everett P. Fowler has been indicted by the Grand Jury on a charge of extortion; an indictment was voted against James K. McGuire, former Mayor of Syracuse, a close friend of Charles F. Murphy and Richard Croker, on the charge of trying to compel a corporation to contribute to the campaign.

Arthur A. McLean, of Newburgh, treasurer of the Democratic State Committee, has been indicted for accepting campaign contributions from a corporation, and a further indictment was found against Fowler for soliciting such contributions.

James W. Osborne was appointed by Gov. Glynn as a special investigator into all the charges made during the recent campaign in New York. Mr. Osborne was appointed as a Special Deputy Attorney-General by Gov. Glynn. Among statements that came before him for investigation were those made by a Wyoming County Chairman. They were to the effect that he had thirty-one men sign payrolls for highway work never done, this being at the behest of the "man higher up." Every additional fact gleaned gives confirmation to the original investigation made by THE WORLD. And the work is only begun of following the trail of graft.

## LEGISLATION TO CORRECT EVILS.

Disclosures of THE WORLD of evils in the commission merchant business resulted in the indictment of several commission merchants, officials of the National League of Commission Merchants and allied associations. This led to an attempt to get remedial legislation. The Cole bill was the result. It was backed by THE WORLD and was designed to put out of business dishonest commission merchants who prey on the farmer as well as the consumer. This bill was passed without a dissenting vote by the Senate.

Assemblyman Cole said: "THE WORLD has done splendid work in exposing the crooked commission men. Its labors bore fruit at the psychological moment. Its effect has been most beneficial. Now, instead of opposition, we are meeting with co-operation from the commission men's association."

THE WORLD, early in March, began its exposure of dishonest commission men which ended on the one hand in the indictment of six of the dealers and on the other hand in the passage at Albany of the Cole bill.

THE WORLD showed in detail how the "fire insurance companies have fostered incendiarism in New York." It charged that "probably one-fourth or more of the fire losses in this city can be ascribed to their careless practices in writing insurance." The facts in this statement were proved conclusively by experiments made by members of the Fire Department." THE WORLD iterated its charges, and asked for "strict legal restraints" for the companies as in Germany. In its demand for legislation Assemblyman Walker's bill to "break the arson trust" was approved, THE WORLD making the point emphatic that "it should receive the prompt attention of the Legislature."

Ratification of the Income Tax amendment to the Constitution by three-fourths of the States, followed a thirty-year campaign by THE WORLD to this end. It kept alive interest in all parts of the country with the result that strong pressure was brought to bear in both Congress and the State Legislature. There was great rejoicing in Congress when the announcement was made February 3. It immediately became evident that enormous revenues, estimated from $60,000,000 to $100,000,000

a year could now be obtained by levying this tax, thus offsetting to that extent reduction in duties covered by proposed tariff revision.

## THE WORLD'S WORK FOR TARIFF REVISION.

Eternal vigilance has been the watchword of THE WORLD on the question of tariff revision. Not an opportunity has been missed during the year to reveal the efforts and methods of the selfish monopolists who were determined to prevent honest tariff revision.

To expose the workings of the tariff lobby that was determined to prevent a Democratic revision of the tariff and defeat its purpose, THE WORLD devoted earnest, active effort. How well it succeeded is matter of record in Government archives.

Events which led up to THE WORLD'S action in the interest of tariff revision moved swiftly. They are in brief as follows: The Underwood Tariff bill, which President Wilson sanctioned as being an honest revision of the tariff downward, was passed through the House, May 8. It was the lowest tariff measure since the Walker bill, which antedated the civil war. The proposed cut of $70,000,000 under the existing revenues was to be met by the new Income Tax law.

Senator Simmons, Chairman of the Finance Committee, thus outlined the situation: "A gigantic lobby is at work in Washington trying to defeat the schedules in the Underwood bill. I have been in the Senate for some years and in all my experience I have never seen such efforts put forward by the representatives of the various interests to disregard the will of the people expressed at the polls last November."

President Wilson then took public action in the effort to exterminate the lobby. In an official statement he excoriated the lobby then at work in Washington to defeat certain schedules in the Underwood Tariff bill. In part he said:

"I think that the public ought to know the extraordinary exertions being made by the lobby in Washington to gain recognition for certain alterations of the Tariff bill. Washington has seldom seen so numerous, so industrious, so insidious a lobby. * * *

"There is every evidence that money without limit is being spent to sustain this lobby. * * *

"It is thoroughly worth the while of this country to take knowledge of this matter. *Only public opinion can check and destroy it.* The Government in all its branches ought to be relieved from this intolerable burden. * * *

"I know that in this I am speaking for the members of the two houses, who would rejoice as much as I would to be released from this unbearable situation."

"Expose the lobby" at once demanded THE WORLD editorially, dwelling on the reasons for such action. "Why not investigate?" it questioned. The Senate promptly voted the most drastic investigation of its own members and the lobbyists ever made of the United States Senate, as its reply to the challenges received.

The result was the Senate lobby investigating committee. Testimony was taken but nothing particularly new developed. Work on the tariff schedules continued. Matters dawdled along for a month.

Then THE WORLD took action, in the interest of tariff reform, and in response to the call for aid from President Wilson.

It turned over to the Overman lobby investigating committee Col. Martin M. Mulhall, for ten years a lobbyist, field worker and strike breaker for the National Association of Manufacturers. Throughout that time he "was constantly active, though deliberately inconspicuous, in his daily undertakings and achievements of the lobby." He had given THE WORLD his personal narrative of these activities and turned over to it his voluminous correspondence, which gave the corroborative proof to the narrative.

These combined established the following facts:

That the National Association of Manufacturers has a membership of 225 organizations, embracing 4,000 individual members, employing more than 5,000,000 of persons, and representing an approximate capital of $10,000,000,000 and claims to be a non-political business and trade organization.

That, in reality, this association has for more than ten years secretly played an important and frequently decisive part in promoting tariff, labor and general business legislation favorable to its own interests.

That, together with a "paper organization" called the National Council for Industrial Defence, it has also maintained a lobby at Washington for the purpose of defeating all legislation hostile to its own interests.

That, for these purposes it has always sought, and often managed to secure control of the Committee on Labor and the Committee on the Judiciary of both the Senate and the House of Representatives.

That the National Association of Manufacturers was solely responsible for the creation of the Tariff Commission during the Taft Administration, the object of the association being to forestall revision of the then existing tariff.

Col. Mulhall gave the names of the men who received financial reward for services rendered for political purposes. His story was backed up by more than 20,000 letters, telegrams, reports, expense accounts, all corroborative memoranda. It was an amazing story revealing the secrets of the lobby at the capital of the Nation.

## LOBBY DRIVEN FROM THE DOORS OF CONGRESS.

Col. Mulhall's story, first told in the columns of THE WORLD, was re-told even more fully, before the Overman lobby investigating committee, which subpoenaed him to appear, repeat his statements and answer any question that might be asked of him—as THE WORLD intended should be done.

Among the charges made by Col. Mulhall was this: That the N. A. M. put on its "black list" members of Congress who worked for legislation it did not want and succeeded in retiring many of them to private life.

As a lobbyist Col. Mulhall stated he spent $200,000. Under orders he helped re-elect legislative friends of the association and fought Congressmen who were on its "black list," he made payments of money to Legislators who voted on bills as the association dictated; for the N. A. M. he bought union labor leaders and sought to enlist the aid of clergymen in wage controversies; he stated that an agent of the N. A. M. plotted to break up the American Federation of Labor by bribing its leading officers and said seventy-five pages in the House of Representatives acted as spies for the lobby under the direction of the chief, who was in the lobby's pay. The above are only a few of the startling charges made by the lobbyist. He furnished the names of the men involved and his letters and other data gave the proof of the statements made.

At Senator Overman's request the voluminous mass of correspondence was turned over to him by THE WORLD as the basis for the committee's investigation. He announced promptly that he would subpoena all those involved in the Mulhall narrative and correspondence.

THE WORLD'S exposure of the secrets of the powerful lobby of the National Association of Manufacturers stirred official Washington as it has not been stirred in years. The facts brought to light changed the entire programme of the Senate lobby investigating committee.

On all sides men named in the Mulhall charges, appearing from day to day in THE WORLD, were busy explaining and denying.

The lobby that was working to defeat the Underwood Tariff bill was defeated. Even before the committee began hearing Col. Mulhall's testimony THE WORLD'S revelations assured that fact.

The House of Representatives next voted without a dissenting voice to begin a searching lobby investigation independently of the Senate investigation. Thus two investigations of the Mulhall charges were made, the Senate committee beginning the work, all the Mulhall documents having been turned over to this committee by THE WORLD. Senator Reed was the Mulhall inquisitor before the Overman committee. The lobby probe went deep into funds spent in the capital, names of statesmen of high and low degree; commanding political bosses and their subservient heelers; disloyal trade unionists, and men of established business integrity, as well as of prominence in the National Association of Manufacturers were dragged to the surface by the probe of the committee into the Mulhall papers. And Col. Mulhall identified and explained letters, telegrams and reports. Great was the turmoil in Congressional circles caused by the Mulhall charges.

The lobbyist's cross-examination ended with not one document out of nearly 5,000 being impeached. "The Mulhall documents speak for themselves. The case rests on the letters and papers; the story has not been broken down," said Senator Reed of the committee.

The House Committee had as its star witness James A. Emery, commander-in-chief of the Washington lobby forces and general counsel for the National Association for Industrial Defence. He was confronted with some of his own correspondence, which had been requisitioned by the committee. This correspondence corroborated Mulhall's letters; showed attempts to influence tariff and currency legislation; and contained a plan intended to influence President Wilson. The reading and discussion of this correspondence compelled many admissions on the part of Mr. Emery to substantiate statements contained in the papers turned over to THE WORLD by Col. Mulhall and surrendered by it to Congress.

"I have read practically every letter produced by Col. Mulhall and I have no reason to question the authenticity of a single one," James A. Emery testified.

Louis Seibold of THE WORLD staff told the committee that THE WORLD paid $10,000 for the use of the Mulhall data and paid Col. Mulhall to do certain work in connection with the printing of the matter; that THE WORLD published the Mulhall correspondence because it "provided valuable information and evidence regarding undesirable conditions that had long been suspected as existing at Washington, which was obtainable in no other way.

"That THE WORLD believed it was rendering a public service by printing the disclosures contained in the correspondence."

Col. Mulhall testified before both House and Senate committees intermittently for eight weeks. He was excused by the House lobby investigating committee September 5.

The Underwood-Simmons Tariff bill passed the Senate September 9 by a vote of 44 to 37. A majority of seven was more than had been expected.

President Wilson said: "A fight for the people and for free business, which has lasted a long generation through, has at last been won, handsomely and completely."

Yes, the fight was won, and won without the annoyance of a lobby. It will ever be historic because of that fact—due to THE WORLD and its Mulhall revelations. "Mulhall's story and the documents by which it was supported drove the mercenaries from the doors of Congress, relieved honest members of their importunities and put subservient members upon their good behavior" said THE WORLD when summing up results.

The Senate adopted the conference report by a vote of 36 to 17, October 2. President Wilson signed the Tariff bill the following day.

Thus the first promise of the Democratic party was fulfilled in less than a year after the election.

While Col. Mulhall was continuing his testimony in August the Clapp bill was being approved by the Senate Committee on Privileges and Elections. This bill, the outcome of THE WORLD'S exposures through Mulhall and others of the campaign activities of the National Association of Manufacturers, prohibits any person or corporation from sending into another State money to be used in Federal elections for any purpose other than certain legitimate campaign expenses specified in the measure.

## SUCCESS OF THE PARCEL POST SYSTEM.

The Parcel Post system went into effect Jan. 1, 1913, inaugurating a new era in the development of the United States Post-Office Department. THE WORLD'S expert in economics long had given the best in the way of suggestion, advice and information in the effort to induce the Post-Office Department to inaugurate this system. Proving that THE WORLD'S arguments were sound and logical, the system was a success from the start throughout the United States. That all the rules were given detailed publicity accounted in large part for the fact that the innovation worked so smoothly from the beginning. THE WORLD printed all the regulations, made a point of informing the public fully in order to reduce any possible trouble to a minimum. Thus there were no rejections of parcels by the General Post-Office in New York, the public being well informed on the rules. Two hundred parcels were received at the General Post-Office at 4 P. M. Of the parcels in the first day's business 4,083 were for local delivery. A total of 330 were handled during the two morning hours at the branch stations. Three hundred and sixty-three outgoing parcels were handled the first day in Washington. The total sale of stamps amounted to $60.

## WALL STREET AND THE BANKERS.

Reform the Stock Exchange; compel it to stop gambling with the deposits in national and State banks. Let Wall Street gamble if it chooses, provided it gambles with its own money. Put an end to "bookmaking tactics." Do not waste time discussing "minor reforms in the presence of unequal law, but concentrate all effort against the fundamental wrong which is privilege."

Thus may THE WORLD'S fight against Wall Street methods be summarized.

THE WORLD said editorially Jan. 5: "The Stock Exchange is favored because, unlike other financial institutions, it is not incorporated. It is favored because by the laws of the State usury may be practised there and gambling debts collected. Wash sales, short sales, over-certification of checks and other abuses naturally spring from these conditions. The law is bent and twisted in behalf of Wall Street."

The compulsory incorporation of the New York Stock Exchange before Sept. 1, 1913, along lines suggested by THE WORLD, was provided for in one of three bills designed to correct the evils of speculation. These were introduced in the Legislature in February. Of eleven bills presented to the Legislature designed to correct evils of speculation in the New York Stock Exchange eight were passed and three killed. The Incorporation bill is still to be fought for. The other bills suggested by THE WORLD were passed.

"THE NEW YORK WORLD," said Assemblyman Levy, "has done excellent work in championing this legislation. It is to be commended."

THE WORLD'S work of enlightening the general public on the ramifications of the banking and currency question in these United States, and throwing light on the inner workings, was continued during the year with vigor.

That THE WORLD'S arguments against concentration of power in the financial world in the hands of a few men are logical and based on facts received striking confirmation when President George F. Baker of the First National Bank testified before the Pujo committee. Mr. Untermyer's questions

and the banker's replies are taken from the verbatim report of the hearings taken by THE WORLD and printed Jan. 4.

Q. I suppose you would see no harm, would you, in having the control of credit, as represented by the control of banks and trust companies, still further concentrated? Do you think that would be dangerous? A. I think it has gone about far enough.

Q. Do you think it would be dangerous to go further? A. It might not be dangerous, but still it has gone about far enough. In good hands, I do not see that it would do any harm. If it got into bad hands it would be very bad.

Q. If it got into bad hands it would wreck the country? A. Yes, but I do not believe it would get into bad hands. * * *

Q. I am not speaking of incompetent hands. We are speaking of this concentration which has come about and the power that it brings with it getting into the hands of very ambitious men, perhaps not over-scrupulous. You see a peril in that, do you not? A. Yes.

Q. So that the safety, if you think there is safety in the situation, really lies in the personnel of the men? A. Very much.

Q. Do you think that is a comfortable situation for a great country to be in? A. Not entirely.

With these important admissions the lawyer was entirely satisfied. His examination stopped and the committee excused the banker from further testifying.

Pages might be written showing why THE WORLD has made a systematic effort to reveal the hidden transactions of the banking business, but this section of Mr. Baker's testimony as an illuminant is all that is necessary. And this testimony is so much the stronger because it came from within—was the final word of one of the bankers most vitally interested; one of the two men—the late J. Pierpont Morgan being the other—whose flotations represented in figures $1,368,258,000.

Woodrow Wilson, then President-elect, when speaking before the Chicago Commercial Club Jan. 11, thus tersely added his confirmation to all that THE WORLD had printed: "I am not indicting the banking methods of America. Our banking system does not need to be indicted. It has been convicted."

## JUSTICE COHALAN'S "VINDICATION."

THE WORLD printed in May the J. A. Connolly charges that Supreme Court Justice Daniel Florence Cohalan, the legal and political advisor of Charles F. Murphy, took a note for $4,000, when the two men were personal friends, the return for it to be a lucrative political post for Connolly. Justice Cohalan failed to keep that promise made more than two years before Connolly's charges. Threatened with action at law, Justice Cohalan surrendered the note, as the alternative offered him, the note with the estoppel affidavit that accompanied it was surrendered to Lyman E. Warren, attorney for Connolly. Back of this note was a series of transactions during the years 1904, 1905 and 1906 between Connolly and Justice Cohalan which involved the payment of various sums to the latter by Connolly, aggregating $3,940.55. Connolly claimed that D. F. Cohalan demanded and obtained from him 55 per cent. of the net profits on all city work that came to Connolly's company through Cohalan's political influence and the payments made to him were calculated on this basis; and that their friendship ceased when D. F. Cohalan demanded $1,500 more than Connolly calculated was due him.

The Grievance Committee of the Bar Association held a meeting on the matter of the charges preferred against Justice Cohalan by Connolly. They decided to proceed immediately with an inquiry on the charges, and the circumstances surrounding them. The Bar Association Grievance Committee as a first step obtained from THE WORLD the necessary documents in the case and asked THE WORLD to give such assistance as was possible in the efforts on the part of the committee to get at the facts.

This request, coming from the most influential legal investigating body in the city of New York, was granted. THE WORLD turned over to the committee a number of papers and photographs of documents connected with the Cohalan charges.

Justice Cohalan ignored the Bar Association's request to appear before the committee, declaring that the association had no jurisdiction over the subject matter of the charges and that he would present the matter to the Governor. The Bar Association Committee held its investigation and the report confirmed every charge made against Justice Cohalan. He in turn requested the Governor to submit the accusations made against him to the Legislature. This was done by Governor Sulzer in a special message, together with the report of the Grievance Committee of the Bar Association, dealing with the charges of John A. Connolly, the former friend and business associate of Supreme Court Justice Daniel F. Cohalan. The Legislature ordered a trial before the Joint Judiciary Committee. William D. Guthrie, representing the Bar Association, threw an unexpected shot into the Tammany camp when he arrived in Albany to attend the sessions of the committee. In behalf of the Bar Association he framed a specific set of charges, charging Justice Cohalan with being a party to three unlawful conspiracies; and in conclusion called upon the Justice to show cause why he should not be removed because of the allegations. The legislative committee received Mr. Guthrie's charges. These brought the facts presented into the activities of Justice Cohalan as a member of the Supreme Court bench. The trial speedily followed. Justice Cohalan admitted on the witness stand "that he made a great mistake; that the money he paid Connolly was blackmail and that he was willing to pay it to hush up the charge made when Connolly brought suit, for the sake of his party."

When all the testimony was in the Bar Association was satisfied that it had made out a complete case. William D. Guthrie in a cold, calm, merciless presentation of the case demanded the removal of Justice Cohalan "in the best interests of the whole State."

Assemblyman Hinman, Republican, made a strong speech urging that the charges be upheld. It was of the utmost importance he argued, "that Judges should furnish no just ground for suspicion.

"The acts admitted by Justice Cohalan," he continued, "are the familiar devious methods of practical politics, against which the community is justly revolting, such acts do not result in honest service to the city and no one knows it better than Mr. Cohalan himself. The light of the greatly elevated standard of political thought of to-day brands him as notoriously unfit to sit as Judge."

The committee's report recommended that the case be dismissed though admitting that Justice Cohalan made a "mistake."

The "vindication" was effected by the votes of 143 Legislators in favor of the Joint Judiciary Committee's report as against 26 who held he should be removed from the Supreme Court bench. The totals include the votes of both Senate and Assembly.

## SUBWAY CONTRACT JOKERS.

That the public will have a 5-cent fare to Coney Island is due to THE EVENING WORLD. That this change will go into effect on the subway upon the completion of the West End and Culver lines—the estimated time for building being eighteen months—is due to the alertness of THE WORLD in the matter of the subway contracts. The joker which provided for the continuance of a 10-cent fare until 1917 was first revealed by THE WORLD and was bared in detail in the protest against the contracts published Jan. 20. Under the draft of the contract upon which the public hearing was held the Coney 5-cent fare did not go into effect until the completion of the West End and Culver lines and the connection of the Brighton Beach line in a Coney Island terminal. This would have meant a delay of at least three years. The change was made when sitting as a committee of the whole the

Public Service Commission gave final consideration, with Chairman Willcox as its head, of the pending contracts for the operation of the subway. When the revised contracts were made public it was found that nineteen changes "of utmost importance to the city" were made; eleven of these were embodied in THE WORLD'S protest of Jan. 20 and only four originated with the majority of the Public Service Commission. Of these changes THE WORLD said: By the knocking out of these eleven jokers there will be saved:

| | |
|---|---|
| By price fixed for the Steinway tunnel | $535,000 |
| By barring real estate that has already been bought | 1,000,000 |
| By fixing depreciation charge | 3,241,000 |
| By one payment for equipment instead of two | 35,000,000 |
| **Total** | $39,776,000 |

## EVENING WORLD ACTIVITIES. ITS TAXICAB VICTORY.

The long fight THE EVENING WORLD made for lower taxicab rates was won June 2. On that date Mayor Gaynor signed the ordinance passed by the Board of Aldermen. The measure became effective August 1. The fight for lower rates, for the abolition of the private stands, and for the better supervision of cab service generally, had been carried on by THE EVENING WORLD for three years. Abuses in New York were shown, and methods in other cities in this country and in Europe were shown in detail. Practically all that time there were remedial measures pending in the Board of Aldermen. Proof of the methods of the taxicab companies was carried to the District-Attorney. Then a Grand Jury investigation began, after which the Aldermanic committee became active.

The Grand Jury investigation threw a great light on the taxicab business in New York City. It was shown that the free cab rides to city officials given by the Yellow Taxicab Company alone amounted to $25,000 a year. Hotel men and others who have free privileges to grant, ran the free riding account of this up to $200,000 per year. It was shown by THE EVENING WORLD that a total of almost $400,000 was paid out by the different companies every year in rental to the hotels for the private stand privileges—private stand privileges on public streets; streets that belong to the city. And this big rental the public paid in the end. The long fight by THE EVENING WORLD to end old abuses and secure a just ordinance brought evidence to light of systematic graft by hotel keepers at the public's expense; and evidence of secret inducements held out to Aldermen and other officials to prevent the passage of a reasonable ordinance.

Mayor Gaynor appointed a commission to study the situation and draft an ordinance. A member of the staff of THE EVENING WORLD was appointed to the commission and aided in the drafting of the ordinance that was recommended to the Board of Aldermen. When the Grand Jury investigation awakened the Aldermen to the fact that they would have to act swiftly, the measure they passed embodied in it all the main reforms long urged by THE EVENING WORLD and embodied in the ordinance which the Mayor submitted to the Aldermen.

The ordinance went into effect August 1, but was fought by the taxicab companies, physically and in the courts. It was declared constitutional August 20 by Supreme Court Justice Seabury in a decision in which he set aside a temporary injunction obtained by the taxicab concerns and hotels. An amendment to the new ordinance was passed by the Board of Aldermen November 11. This amendment called for the striking out of one phrase in the ordinance. Had this been done the old fraudulent practices would again have been possible. Under the old law an agent of the drivers was privileged to go into railroad stations and steamship wharves to solicit passengers. These often became victims of extortion and were often carried to wrong destinations. Under the new law "no person shall solicit passengers for public hack or hacks upon the streets and highways of the city of New York except the driver of a public hack when sitting upon the driver's box of his vehicle."

The amendment was to strike out the last eight words. THE EVENING WORLD brought the attention of Mayor Gaynor's commission to this point. This matter was referred to THE EVENING WORLD by several agencies. One of them was the Traveler's Aid Society, of which John Wanamaker is President and Cardinal Farley Vice-President. Orin Baker, General Secretary of the society, strongly complimented THE EVENING WORLD: "That THE EVENING WORLD has acted in the matter of obtaining protection from the city government is a prime step forward," he said. "If strict rules were enforced by which people would not be overcharged and drivers could be put under heavy penalties for such crimes, it would not only aid the work of this society but lift burdens from similar societies."

November 21 a decision of the Appellate Division of the Supreme Court affirmed the denial of Justice Seabury to continue an injunction restraining the city from enforcing the ordinance demanded by THE EVENING WORLD and passed by the Board of Aldermen. The lawyers for the taxi companies immediately announced that they would carry the private hack-stand proposition to the Court of Appeals. As to further attempts to thwart in other particulars the carrying out of the new law they were undecided. In reply to their determination to repeat their efforts to set aside the law is the fact that THE EVENING WORLD thus pledged itself when the fight was won: "Taxicab monopoly and taxicab privilege are done for. But the movement for an increasingly better, cheaper and more popular taxicab service must still go on. Only watchful regulation, inspection and experiment will develop the system into what it should be.

"This newspaper will continue to fight as it has fought to make the taxicab more and more a cheap conveyance for the people—easily available, within the reach of everybody."

## LOWER TELEPHONE RATES. NO TOLL GATES.

To compel the greedy telephone monopoly to give New York City a just telephone rate is an EVENING WORLD fight that will not cease until full justice is won for the subscribers. This matter was taken up in earnest in 1913. Some amazing facts concerning the telephone service have been gleaned, the New York Telephone Company's policy of secrecy, notwithstanding.

THE EVENING WORLD has shown that New York City is being overtaxed $6,000,000 a year in its telephone rates; that it contributes 95 per cent. of the net profits of the New York Telephone Company's operations covering all New York State and half of New Jersey; that New York City yielded in 1912 $16,400,000 net profits to the telephone company; that this city's telephone rates are the highest in the United States.

THE EVENING WORLD asks "a maximum five-cent rate for all New York City. Wipe out the toll gate extortions."

THE EVENING WORLD'S baby contests have been a popular feature with the mothers. There has been much rivalry over the prizes which were given throughout the Summer and the live question as to the relative beauty and good points of the infants.

THE SUNDAY WORLD walking clubs formed by the boys and girls in the public schools have grown in size and numbers and made new records during the year. Hundreds of medals have been distributed as prizes. These clubs are doing a great work for the young, teaching them the value of systematic exercise in the open air and bringing them into closer touch with nature than is ever possible if their open air recreation consists wholly of playing in city streets.

THE SUNDAY WORLD in co-operation with the School Garden Association of New York gave prizes to public school children for proficiency in garden and other nature study work.

Field day prizes were also given to create an interest in athletics.

# Bureau of Social Hygiene.

## ITS ORIGIN, WORK AND PLANS.

(The following statement was given out for publication by John D. Rockefeller, Jr., on January 27, 1913.)

THE Bureau of Social Hygiene came into existence about two years ago, as a result of the work of the Special Grand Jury appointed to investigate the white slave traffic in New York City, which served during the first half of the year 1910. One of the recommendations made by it in the presentment handed up at the termination of its labors was that a public commission be appointed to study the social evil. The foreman of that body subsequently gave careful consideration to the character of the work which might properly be done by such a commission and the limitations under which it would operate. In this connection, separate, personal conferences were held with over a hundred leading men and women in the city, among whom were lawyers, physicians, business men, bank Presidents, Presidents of commercial organizations, clergymen, settlement workers, social workers, labor leaders and reformers. These conferences developed the feeling that a public commission would labor under a number of disadvantages, such as the fact that it would be short lived; that its work would be done publicly; that at best it could hardly do more than present recommendations. The conviction also grew that the main reason why more permanent results had not been obtained by the various organizations which had dealt with the subject of the social evil during the past ten or fifteen years was that most of them were temporary. While active, they materially improved the situation, but as their efforts were relaxed there came the inevitable return to much the same conditions as before. The forces of evil are never greatly alarmed at the organization of investigating or reform bodies, for they know that they are generally composed of busy people, who cannot turn aside from their own affairs for any great length of time to carry on reforms, and that sooner or later their efforts will cease, and the patient denizens of the underworld and their exploiters can then reappear and continue the traffic as formerly.

So the conviction grew that in order to make a real and lasting improvement in conditions, a permanent organization should be created, the continuation of which would not be dependent upon a temporary wave of reform, nor upon the life of any man or group of men, but which would go on, generation after generation, continuously making warfare against the forces of evil. It also appeared that a private organization would have, among other advantages, a certain freedom from publicity and from political bias which a publicly appointed commission could not so easily avoid.

Therefore, as the initial step, in the Winter of 1911 the Bureau of Social Hygiene was formed. Its present members are Miss Katharine Bement Davis, Superintendent of the New York State Reformatory for Women at Bedford Hills, New York; Paul M. Warburg, of the firm of Kuhn, Loeb and Company; Starr J. Murphy, of the New York bar; and John D. Rockefeller, Jr. As the work develops, new members may be added.

One of the first things undertaken by the bureau was the establishment at Bedford Hills, adjacent to the reformatory, of a laboratory of social hygiene, under Miss Davis's direction. In this laboratory it is proposed to study from the physical, mental, social and moral side each person committed to the reformatory. This study will be carried on by experts and each case will be kept under observation for from three weeks to three months, as may be required. When the diagnosis is completed, it is hoped that the laboratory will be in position to recommend the treatment most likely to reform the individual, or, if reformation is impossible, to recommend permanent custodial care. Furthermore, reaching out beyond the individuals involved, it is believed that thus important contributions may be made to a fuller knowledge of the conditions ultimately responsible for vice. If this experiment is successful, the principle may prove applicable to all classes of criminals and the conditions precedent to crime, and lead to lines of action not only more scientific and humane but also less wasteful than those at present followed.

In entering upon its labors, the bureau regarded it of fundamental importance to make a careful study of the social evil in this country and in Europe, feeling that this problem, like any other great and difficult one, can be intelligently approached only by means of a thorough and complete knowledge of all the factors involved, as well as all the methods and experiences of other cities and countries in dealing with it. Arrangements were made, therefore, in the early part of last Winter to secure the services of George J. Kneeland, who had directed the Chicago Vice Commission investigation. Since that time, Mr. Kneeland, with a corps of assistants, has been making a thorough and comprehensive survey of the conditions of vice in New York City. This survey has covered not only houses of prostitution, Raines Law hotels, disorderly saloons, cafes, and restaurants, massage parlors and other places where vicious people congregate, but also the personal histories of some two thousand prostitutes; and a study of all the case records for one year of a great majority of the hospitals and dispensaries in New York City, with a view to ascertaining the prevalence of venereal diseases and their ratio to all other diseases. Mr. Kneeland's report is now in progress of preparation and will be published within the next two months.

At the same time the bureau enlisted the services of Abraham Flexner, whose reports on the medical schools in this country and in Europe are so well known, to study the social evil and the various methods of dealing with it in the leading cities of Europe. Mr. Flexner spent the greater part of a year abroad, making a searching and exhaustive inquiry into the subject, and is now working on his report, which will be ready for publication this Winter.

These studies are to be followed by others, in those cities in the United States where different conditions exist or where special methods of dealing with the social evil have been introduced, the object being to become familiar with all phases of the subject and all methods of handling it which have been tried in this country and in Europe.

Based upon all of these studies, which will probably be published by December of this year, it is the hope of the bureau that there may be devised a practical plan for dealing with the social evil in New York City—a plan which public opinion can be brought to support.

In conclusion, it cannot be too strongly emphasized that the spirit which dominates the work of the bureau is not sensational or sentimental or hysterical; that it is not a spirit of criticism of public officials; but that it is essentially a spirit of constructive suggestion and of deep scientific as well as humane interest in a great world problem.

Chairman of the Bureau of Social Hygieue, John D. Rockefeller, Jr., P. O. Box 579, New York City.

# Game Laws of the

## CLOSE SEASON FOR GAME

THE following table shows the close season for all game in the United States, with the exception of mountain sheep and goat and a few unimportant species. Where no dates are given kind of game does not exist, or close season at all times. Local laws, where operative, should be consulted.

The first date of the close season and the first date of the open season are given.

| 50 | Wisconsin | Dec. 1–Nov. 11 (12) | At all times | Feb. 1–Oct. 10 (12) | Feb. 1–Sept. 10 (12) | To Oct. 1, 1915 |
| 51 | Wyoming | Nov. 1–Oct. 1 | At all times | ..... | ..... | To Sept. 25, 1915 |

1 Elk only. 2 Cow and calf moose, all year. 3 Moose, caribou, bison or buffalo, all the year. 4 Prairie chicken, closed season all year. Oklahoma, Nov. 1–Sept. 1. 6 Female protected all the year. 7 Moose and antelope, males only, elk until 1925. 8 Rail—Connecticut, Dec. 1–Sept. 16. 9 Deer raised in private preserves may be killed at any time. 10 Certain species. 11 Deer raised in inclosure for market may be killed Oct. 1–Feb. 1. 12 Local exceptions. 14 Except Fentress County, Dec. 1–Jan. 1. 18 Except July. 19 Sundays and Mondays are also closed seasons for ducks and other waterfowl. 21 Swan, all year; Duck, Jan. 1–Sept. 1. 23 Except June 15–Sept. 15. 27 Between Nov. 24 and Jan. 1, hunting with dog and ferret only. 28 Cock pheasant may be killed Nov. 1–Feb. 1, under permit. 29 Residents of the State may kill rabbits on their own land at any time. 30 Grouse to 1920. Prohibitory laws against hunting doves and robins exist in nearly all States. Sale of game during close season is prohibited in most States. License fees from non-residents required in some States.

(a) Female deer and elk and deer without horns protected at all times. (b) Except deer without horns. Non-resident not permitted to kill. (d) Game animals or birds may be killed at any time for food or clothing by native Indians or Esquimaux, or by miners or explorers in need of food, but game so killed cannot be shipped or sold.

*NEW YORK. Dates for deer hunting apply to Adirondack region only; rest of State no open season. (Exceptions). Ulster, Orange and Sullivan Counties, Nov. 16–Nov. 1. Fawns at all times. Hunting with dogs, traps, or devices of any kind prohibited.

WILD BIRDS—Catching, killing, or the possession of live or dead, and robbing of nests prohibited at all times—except English sparrow, hawk, crow, owl, and blackbird.

Hunting and shooting on Sunday prohibited.

Export of game or birds taken in the State is prohibited.

## FISH LAWS, NEW YORK STATE, OPEN SEASON.

**Trout**—May 1 to August 31. Minimum length, six inches. Not more than ten pounds of trout may be taken or transported by one person in one day. Trout must not be taken by any other method than angling.

# Several States, 1914.

IN THE UNITED STATES.

Open season may be found by reversing dates. The difficulty of securing absolute accuracy in a table of this kind is very great, and absence in laws of many States of express legislation as to inclusion or exclusion of date upon which seasons open and close makes exactness almost an impossibility.

Compiled and corrected to October 15, 1913.

**Lake Trout and Whitefish.**—Lake trout not less than fifteen inches in length, and whitefish not less than twelve inches in length, may be taken and possessed from April 1 to September 30, both inclusive. Otsego whitefish, commonly called Otsego bass, not less than nine inches in length, may be taken and possessed from January 1 to October 31, both inclusive. A person may take by angling not to exceed ten lake trout in one day, but whenever two or more persons are angling from the same boat they may take not to exceed fifteen in one day. Whitefish may be taken in any number or quantity. Lake trout and whitefish may be taken in Lakes Erie and Ontario in any number or quantity at any time, and when so taken may be possessed.

**Black Bass.**—June 16 to November 30, inclusive. Minimum length, ten inches. Limit per day to one person, fifteen; to a boat, two or more persons, twenty-five; bass must not be taken by any other method than angling.

**Pickerel and Pike.**—May 1 to March 1, inclusive. Pike, minimum length, ten inches. Pickerel, minimum length (St. Lawrence River), twenty inches.

**Pike Perch.**—Not less than twelve inches in length may be taken and possessed in any number or quantity from May 1 to March 1, both inclusive.

**Masculonge.**—June 16 to December 31, inclusive. Must not be taken through the ice. Minimum length, twenty-four inches.

**Striped Bass** less than twelve inches in length shall not be intentionally taken or possessed.

**Smelt or Icefish.**—Smelt or icefish not less than six inches in length may be taken from the inland waters of the State in any number or quantity at any time.

**Frogs.**—Bullfrogs, green frogs and spring frogs, may be taken in any manner, possessed, bought and sold from June 1 to March 31, both inclusive. They shall not be taken, possessed, bought or sold at any other time.

(Long Island, Open Season.)

**Trout.**—April 1 to August 31, inclusive.

**Rainbow Trout.**—April 16 to September 30, inclusive.

NOTE.—The State Fish and Game Laws apply where not in conflict with the Long Island provisions.

## Church Fasts.

THE Roman Catholic Days of fasting are the forty days of Lent, the Ember Days, the Fridays of the four weeks in Advent, and certain vigils or evenings prior to the greater feasts, while all Fridays of the year are days of abstinence from flesh meat. In the American Episcopal Church the days of fasting or abstinence to be observed, according to the Book of Common Prayer, are the forty days of Lent, the Ember Days, the three Rogation Days, and all the Fridays of the year except Christmas Day. In the Greek Church the four principal fasts are those in Lent, the week succeeding Whitsuntide, the fortnight before the Assumption, and forty days before Christmas.

## Ember and Rogation Days.

EMBER and Rogation Days are certain periods of the year devoted to prayer and fasting. Ember Days (twelve annually) about the beginning of the four seasons, and are the Wednesday, Friday, and Saturday after the first Sunday in Lent, in Spring; after the feast of Pentecost (Whit Sunday), Summer; after the festival of the Holy Cross, Autumn; and after the festival of St. Lucia, Winter. Ember Weeks are the weeks in which the Ember Days appear.

Rogation Days occur on the Feast of St. Mark, April 25, and on the three days immediately preceding Ascension Day.

## Divisions of Time.

THE interval between two consecutive transits of a fixed star over any meridian or the interval during which the earth makes one absolute revolution on its axis is called a *Sidereal* Day, and is invariable, while the interval between two consecutive transits of the Sun over any meridian is called an *Apparent* Solar Day, and its length varies from day to day by reason of the variable motion of the earth in its orbit and the inclination of this orbit to the equator on which time is measured.

A *Mean* Solar Day is the average or mean of all the apparent solar days in a year. *Mean Solar Time* is that shown by a well-regulated clock or watch, while *Apparent Solar Time* is that shown by a well-constructed sun-dial; the difference between the two at any time is the *Equation of Time*, and may amount to 16 minutes and 21 seconds. The Astronomical Day begins at noon and the Civil Day at the preceding midnight. The Sidereal and Mean Solar Days are both invariable, but one day of the latter is equal to 1 day, 3 minutes, and 56.555 seconds of the former.

The interval during which the earth makes one absolute revolution round the Sun is called a *Sidereal Year*, and consists of 365 days, 6 hours, 9 minutes, and 9.6 seconds, which is invariable.

The Tropical Year is the interval between two consecutive returns of the Sun to the Vernal Equinox. If this were a fixed point, the Sidereal and Tropical Years would be identical; but in consequence of the disturbing influence of the Moon and planets on the spheroidal figure of the earth, the Equinox has a slow, retrograde mean motion of 50″.26 annually, so that the Sun returns to the Equinox sooner every year than he otherwise would by 20 minutes 23.6 seconds; the Tropical Year, therefore, consists of 365 days, 5 hours, 48 minutes, and 46 seconds. The Tropical Year is not of uniform length; it is now slowly decreasing at the rate of .595 second per century, but this variation will not always continue.

Julius Cæsar, in B.C. 45, was the first to reform the calendar by ordering that every year whose date number is exactly divisible by 4 contain 366 days, and all other years 365 days. The intercalary day was introduced by counting the *sixth* day before the Kalends of March *twice;* hence the name bissextile, from bis, twice, and sex, six. He also changed the beginning of the year from 1st of March to the 1st of January, and also changed the name of the fifth month (Quintilis) to July, after himself. The average length of the Julian year is therefore 365¼ days, which, however, is too long by 11 minutes and 14 seconds, and this would accumulate in 400 years to about three days. The Julian Calendar continued in use until A.D. 1582, when the date of the beginning of the seasons occurred 10 days later than in B.C. 45, when this mode of reckoning time was introduced.

The Gregorian Calendar was introduced by Pope Gregory XIII. with the view of keeping the Equinox to the same day of the month. It consists of 365 days, but every year exactly divisible by 4 and the centurial years which are exactly divisible by 400 contain 366 days; and if in addition to this arbitrary arrangement the centurial years exactly divisible by 4,000 contain 366 days, the error in the Gregorian system will amount to only one day in about 200 centuries. If, however, 31 leap years were intercalated in 128 years, instead of 32 as at present, the calendar would be practically exact and the error would not amount to more than a day in 100,000 years. The length of the mean Gregorian Year may therefore be set down at 365 days, 5 hours, 49 minutes, 12 seconds. The Gregorian Calendar was introduced into England and her colonies in 1752, at which time the Equinox had retrograded 11 days since the Council of Nice in A.D. 325, when the festival of Easter was established and the Equinox occurred on March 21; hence September 3, 1752, was called September 14, and at the same time the commencement of the legal year was changed from March 25 to January 1, so that the year 1751 lost the months of January and February and the first 24 days of March. The difference between the Julian and Gregorian Calendars is now 13 days. Russia and the Greek Church still employ the Julian Calendar for civil and ecclesiastical purposes.

## Standard Time.

PRIMARILY, for the convenience of the railroads, a standard of time was established by mutual agreement in 1883, by which trains are run and local time regulated. According to this system, the United States, extending from 65° to 125° west longitude, is divided into four time sections, each of 15° of longitude, exactly equivalent to one hour, commencing with the 75th meridian. The first (eastern) section includes all territory between the Atlantic Coast and an irregular line drawn from Detroit to Charleston, S. C., the latter being its most southern point. The second (central) section includes all the territory between the last-named line and an irregular line from Bismarck, N. D., to the mouth of the Rio Grande. The third (mountain) section includes all territory between the last-named line and nearly the western borders of Idaho, Utah, and Arizona. The fourth (Pacific) section covers the rest of the country to the Pacific Coast. Standard time is uniform inside each of these sections, and the time of each section differs from that next to it by exactly one hour. Thus at 12 noon in New York City (eastern time), the time at Chicago (central time) is 11 o'clock A.M.; at Denver (mountain time), 10 o'clock A.M., and at San Francisco (Pacific time), 9 o'clock A.M. Standard time is 16 minutes slower at Boston than true local time, 4 minutes slower at New York, 8 minutes faster at Washington, 19 minutes faster at Charleston, 28 minutes slower at Detroit, 18 minutes faster at Kansas City, 10 minutes slower at Chicago, 1 minute faster at St. Louis, 28 minutes faster at Salt Lake City, and 10 minutes faster at San Francisco.

# Table of Days Between Two Dates.

A TABLE OF THE NUMBER OF DAYS BETWEEN ANY TWO DAYS WITHIN TWO YEARS.

| Day Mo. | Jan. | Feb. | Mar. | April. | May. | June. | July. | Aug. | Sept. | Oct. | Nov. | Dec. |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 1 | 1 | 32 | 60 | 91 | 121 | 152 | 182 | 213 | 244 | 274 | 305 | 335 |
| 2 | 2 | 33 | 61 | 92 | 122 | 153 | 183 | 214 | 245 | 275 | 306 | 336 |
| 3 | 3 | 34 | 62 | 93 | 123 | 154 | 184 | 215 | 246 | 276 | 307 | 337 |
| 4 | 4 | 35 | 63 | 94 | 124 | 155 | 185 | 216 | 247 | 277 | 308 | 338 |
| 5 | 5 | 36 | 64 | 95 | 125 | 156 | 186 | 217 | 248 | 278 | 309 | 339 |

| 12 | 377 | 408 | 436 | 467 | 497 | 528 | 558 | 589 | 620 | 650 | 681 | 711 |
| 13 | 378 | 409 | 437 | 468 | 498 | 529 | 559 | 590 | 621 | 651 | 682 | 712 |
| 14 | 379 | 410 | 438 | 469 | 499 | 530 | 560 | 591 | 622 | 652 | 683 | 713 |
| 15 | 380 | 411 | 439 | 470 | 500 | 531 | 561 | 592 | 623 | 653 | 684 | 714 |
| 16 | 381 | 412 | 440 | 471 | 501 | 532 | 562 | 593 | 624 | 654 | 685 | 715 |
| 17 | 382 | 413 | 441 | 472 | 502 | 533 | 563 | 594 | 625 | 655 | 686 | 716 |
| 18 | 383 | 414 | 442 | 473 | 503 | 534 | 564 | 595 | 626 | 656 | 687 | 717 |
| 19 | 384 | 415 | 443 | 474 | 504 | 535 | 565 | 596 | 627 | 657 | 688 | 718 |
| 20 | 385 | 416 | 444 | 475 | 505 | 536 | 566 | 597 | 628 | 658 | 689 | 719 |
| 21 | 386 | 417 | 445 | 476 | 506 | 537 | 567 | 598 | 629 | 659 | 690 | 720 |
| 22 | 387 | 418 | 446 | 477 | 507 | 538 | 568 | 599 | 630 | 660 | 691 | 721 |
| 23 | 388 | 419 | 447 | 478 | 508 | 539 | 569 | 600 | 631 | 661 | 692 | 722 |
| 24 | 389 | 420 | 448 | 479 | 509 | 540 | 570 | 601 | 632 | 662 | 693 | 723 |
| 25 | 390 | 421 | 449 | 480 | 510 | 541 | 571 | 602 | 633 | 663 | 694 | 724 |
| 26 | 391 | 422 | 450 | 481 | 511 | 542 | 572 | 603 | 634 | 664 | 695 | 725 |
| 27 | 392 | 423 | 451 | 482 | 512 | 543 | 573 | 604 | 635 | 665 | 696 | 726 |
| 28 | 393 | 424 | 452 | 483 | 513 | 544 | 574 | 605 | 636 | 666 | 697 | 727 |
| 29 | 394 | .... | 453 | 484 | 514 | 545 | 575 | 606 | 637 | 667 | 698 | 728 |
| 30 | 395 | .... | 454 | 485 | 515 | 546 | 576 | 607 | 638 | 668 | 699 | 729 |
| 31 | 396 | ... | 455 | .... | 516 | .... | 577 | 608 | ... | 669 | . . | 730 |

The above table applies to ordinary years only. For leap year, one day must be added to each number of days after February 28.

EXAMPLE.—To find the number of days between June 3, 1900, and February 16, 1901: The figures opposite the third day in the first June column are 154; those opposite the sixteenth day in the second February column are 412. Subtract the first from the second product—*i. e.*, 154 from 412, and the result is 258, the number of days between the two dates.

# Easter Sunday.

A TABLE SHOWING THE DATE OF EASTER SUNDAY IN EACH YEAR OF THE NINETEENTH AND TWENTIETH CENTURIES.

1801—April 5.

JANUARY 1. NEW YEAR'S DAY: In all States (including District of Columbia, Porto Rico and Alaska), except Arkansas and Massachusetts. (In Maine a bank holiday only legally).

JANUARY 8. ANNIVERSARY OF THE BATTLE OF NEW ORLEANS: In Louisiana.

JANUARY 19. LEE'S BIRTHDAY: In Florida, Georgia, North Carolina, South Carolina, Virginia, Alabama, Mississippi and Arkansas.

FEBRUARY. MARDI-GRAS: In the parish of Orleans, Louisiana.

FEBRUARY 12. GEORGIA DAY: In Georgia.

FEBRUARY 12. LINCOLN'S BIRTHDAY: In California, Colorado, Connecticut, Delaware, Illinois, Iowa, Indiana, Kansas, Michigan, Minnesota, Montana, Nevada, New Jersey, New York, North Dakota, Oregon, Pennsylvania, South Dakota, Utah, Washington, West Virginia and Wyoming.

FEBRUARY 22. WASHINGTON'S BIRTHDAY: In all the States, District of Columbia, Porto Rico and Alaska.

FEBRUARY 24, 1914. MARDI-GRAS DAY, SHROVE TUESDAY: In Alabama and Florida (in counties having a carnival).

MARCH. First Wednesday prior to Spring election at which Circuit Judges are elected and in counties and cities where offices are filled at Spring election in Michigan.

MARCH (Third Tuesday). PRIMARY ELECTION DAY: (every Presidential year) in North Dakota.

MARCH 2. ANNIVERSARY OF TEXAN INDEPENDENCE: In Texas.

MARCH 4. INAUGURATION DAY: In District of Columbia in years when a President of the U. S. is inaugurated.

MARCH 22. EMANCIPATION DAY: In Porto Rico.

APRIL (First Monday in 1916 and every four years thereafter). PRESIDENTIAL PRIMARY: In Michigan.

APRIL 10, 1914. GOOD FRIDAY: In Alabama, Connecticut, Delaware, Florida, Louisiana, Maryland, Minnesota, New Jersey, Pennsylvania, Porto Rico, Tennessee.

APRIL 12. HALIFAX INDEPENDENCE RESOLUTIONS: In North Carolina.

APRIL 13. THOMAS JEFFERSON'S BIRTHDAY: In Alabama.

APRIL 19. PATRIOTS' DAY: In Maine and Massachusetts.

APRIL 21. ANNIVERSARY OF THE BATTLE OF SAN JACINTO: In Texas.

APRIL 26. CONFEDERATE MEMORIAL DAY: In Alabama, Florida, Georgia and Mississippi.

MAY 10. CONFEDERATE MEMORIAL DAY: In North Carolina and South Carolina.

MAY (Second Friday). CONFEDERATE DAY: In Tennessee.

MAY 20. ANNIVERSARY OF THE SIGNING OF THE MECKLENBURG DECLARATION OF INDEPENDENCE: In North Carolina.

MAY 30. DECORATION DAY: In all the States (and District of Columbia, Porto Rico and Alaska), except Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, and Texas.

JUNE 3. JEFFERSON DAVIS'S BIRTHDAY: In Florida, Georgia, Alabama, Mississippi, Texas, Arkansas and South Carolina. In Louisiana, known as "Confederate Memorial Day." In Virginia, in public schools.

JUNE 11. KAMEHAMEHA DAY: In Ter. Hawaii.

JUNE 15. PIONEER DAY: In Idaho.

JUNE (Last Wednesday). PRIMARY ELECTION DAY: In North Dakota.

JULY 4. INDEPENDENCE DAY: In all the States, and District of Columbia, Porto Rico and Alaska.

JULY 10. ADMISSION DAY: In Wyoming.

JULY 24. PIONEERS' DAY: In Utah.

JULY 25. LANDING OF AMERICAN TROOPS: Porto Rico.

JULY (Fourth Saturday). PRIMARY ELECTION DAY: In Texas.

AUGUST. PRIMARY ELECTION DAY: In Missouri. In Michigan (last Tuesday in August preceding every general November election).

AUGUST 1. COLORADO DAY: In Colorado.

AUGUST 16. BENNINGTON BATTLE DAY: In Vermont.

SEPTEMBER 7, 1914. LABOR DAY: In all the States (and District of Columbia and Alaska). In Louisiana, observed in Orleans Parish.

SEPTEMBER. PRIMARY ELECTION DAY: In Wisconsin, First Tuesday. In Oregon, even years.

SEPTEMBER (Third Saturday). REGATTA DAY: In Territory of Hawaii.

SEPTEMBER 9. ADMISSION DAY: In California.

SEPTEMBER 12. "OLD DEFENDERS' DAY": In Baltimore, Md.

SEPTEMBER (Second Monday). ELECTION DAY: In Arkansas, Maine.

OCTOBER 12. COLUMBUS DAY: In Alabama, Arkansas, California, Colorado, Connecticut, Delaware, Idaho, Illinois, Indiana, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Pennsylvania, Rhode Island, Vermont, Washington.

OCTOBER 18. ALASKA DAY. In Alaska.

OCTOBER 31. ADMISSION DAY: In Nevada.

NOVEMBER 1. ALL SAINTS' DAY: In Louisiana.

NOVEMBER (first Friday). PIONEER DAY: In Montana, observed in public schools.

NOVEMBER 3. GENERAL ELECTION DAY: In Alabama, Alaska, Arizona, California, Colorado, Delaware, Florida, Idaho, Illinois, Indiana, Iowa, Louisiana, Maine, Maryland, Michigan, Minnesota, Missouri, Montana, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, (from 5.30 A.M. to 9 A.M. only), Oklahoma, Oregon, Pennsylvania, Rhode Island, (biennially in even years) South Carolina, South Dakota, Tennessee, Texas, Virginia, West Virginia, Washington, Wisconsin and Wyoming, in the years when elections are held therein. In 1914 in States holding such elections the date is November 3.

NOVEMBER 26, 1914. THANKSGIVING DAY (usually the last Thursday in November): Is observed in all the States, and in the District of Columbia, Porto Rico and Alaska, though in some States it is not a statutory holiday.

DECEMBER 25. CHRISTMAS DAY: In all the States and District of Columbia, Porto Rico and Alaska.

Sundays and Fast Days are legal holidays in all the States which designate them as such.

There are no statutory holidays in Mississippi, but by common consent the Fourth of July, Thanksgiving and Christmas are observed. In New Mexico, Washington's Birthday, Decoration Day, Labor Day, Flag Day (June 14) and Arbor Day are holidays when so designated by the Governor. In South Carolina, Thursday of Fair Week is a legal holiday.

ARBOR DAY is a legal holiday in many States, although in some it is observed as designated by the Governor.

Every Saturday after 12 o'clock noon is a legal holiday in California in public offices, Illinois (in cities of 200,000 or more inhabitants), Maryland, Michigan, New York, New Jersey, Ohio, Pennsylvania, Rhode Island, Virginia, the District of Columbia (for banking purposes), and in New Orleans, La., and Charleston, S. C.; in Louisiana in all cities exceeding 10,000 inhabitants; in Missouri in cities of 100,000 or more inhabitants; in Tennessee, for State and county officers, and in Colorado during June, July and August; in Indiana, first Saturday in June to last Saturday in October, inclusive, for all public offices in counties having a county-seat of 100,000 population or more; in New Hampshire in State offices.

There is no national holiday, not even the Fourth of July. Congress has at various times appointed special holidays. In the second session of the Fifty-third Congress it passed an act making Labor Day a public holiday in the District of Columbia, and it has recognized the existence of certain days as holidays for commercial purposes, but, with the exception named, there is no general statute on the subject. The proclamation of the President designating a day of Thanksgiving only makes it a legal holiday in the District of Columbia and the Territories.

* At places marked * the time noted is in the morning of the following day.

(a) "Eastern" includes: New York, Boston, Philadelphia, Baltimore, Washington, Richmond, Norfolk, Charleston, Buffalo, Pittsburgh, Montreal, Quebec, Ottawa, Toronto, etc.

(b) "Central" includes: Chicago, St. Louis, Minneapolis, St. Paul, Milwaukee, Kansas City, Omaha, Indianapolis, Cincinnati, Cleveland, Detroit, New Orleans, Memphis, Savannah, Pensacola, Winnipeg, etc.

(c) "Mountain" includes: Denver, Leadville, Colorado Springs, Helena, Regina (N. W. T.), etc.

(d) "Pacific" includes: San Francisco, Portland (Oregon), Victoria, Vancouver, Tacoma, Seattle, etc.

# Old English Holidays.

THESE holidays, with their names, had their origin in mediæval England when the State religion was that of the Church of Rome, and they are still observed generally or in some parts of Britain.

JANUARY 6. TWELFTH DAY, or Twelfth-tide, sometimes called Old Christmas Day, the same as Epiphany. The previous evening is Twelfth Night, with which many social rites have long been connected.

FEBRUARY 2. CANDLEMAS: Festival of the Purification of the Virgin. Consecration of the lighted candles to be used in the church during the year.

FEBRUARY 14. OLD CANDLEMAS: St. Valentine's Day.

MARCH 25. LADY DAY: Annunciation of the Virgin. April 6 is old Lady Day.

JUNE 24. MIDSUMMER DAY: Feast of the Nativity of John the Baptist. July 7 is old Midsummer Day.

JULY 15. ST. SWITHIN'S DAY. There was an old superstition that if rain fell on this day it would continue forty days.

AUGUST 1. LAMMAS DAY: Originally in England the festival of the wheat harvest. In the Church the festival of St. Peter's miraculous deliverance from prison. Old Lammas Day is August 13.

SEPTEMBER 29. MICHAELMAS: Feast of St. Michael, the Archangel. Old Michaelmas is October 11.

NOVEMBER 1. ALL-HALLOWMAS: All hallows, or All Saints' Day. The previous evening is All hallow-e'en, observed by home gatherings and old-time festive rites.

NOVEMBER 2. ALL SOULS' DAY: Day of prayer for the souls of the dead.

NOVEMBER 11. MARTINMAS: Feast of St. Martin. Old Martinmas is November 23.

DECEMBER 28. CHILDERMAS: Holy Innocents' Day.

Lady Day, Midsummer Day, Michaelmas, and Christmas are quarter (rent) days in England, and Whitsunday, Martinmas, Candlemas, and Lammas Day in Scotland.

Shrove Tuesday, the day before Ash Wednesday, and Maundy Thursday, the day before Good Friday, are observed by the Church. Mothering Sunday is Mid-Lent Sunday, in which the old rural custom obtains of visiting one's parents and making them presents.

# The Magnetic Poles.

THE geographical poles of the earth are the extremities of the imaginary line passing through its centre of gravity and about which it revolves, and are therefore symmetrically located with regard to the equator.

The magnetic poles, however, are not coincident with the geographical poles, nor are they diametrically opposite to each other. Prior to the recent attempt of Amundsen to determine the north magnetic pole, the only other was by Capt. James Ross in June, 1831, who found the dip of the magnetic needle to be 89° 59′ .5, in latitude 70° 5′ .2 N. and longitude 96° 45′ .8 W., which is in King William Land, Canada. The result of Amundsen's observations has not yet been published by the Norwegian authorities.

The position of the south magnetic pole has been located in latitude 72° 23′ S. and longitude 154° E., by Prof. Edward David and Mr. Douglas Marson, members of Lieut. Shackleton's expedition to the South Pole, which left New Zealand on January 1, 1908.

By reason of the annual variation of the magnetic needle, it is believed that the magnetic poles are not stationary, but have a slow motion around the geographical poles. The subject is shrouded in mystery and constitutes one of the many as yet unsolved problems in terrestrial physics.

# Table of Memorable Dates.

B. C.
1183 Fall of Troy.
1082 Era of the Great Pyramid.
878 Carthage founded.
776 Olympic Era began.
753 Foundation of Rome.
588 Jerusalem taken by Nebuchadnezzar.
536 Restoration of the Jews under Cyrus.
509 Expulsion of Tarquins from Rome.
480 Xerxes defeated Greeks at Thermopylæ.
55 Cæsar conquered Britain.
4 Birth of Jesus Christ.

A. D.
29 The Crucifixion.
70 Jerusalem was destroyed by Titus.
313 Constantine converted to Christianity
410 The Romans abandoned Britain.
827 Egbert, first king of all England, Oct. 14.
1066 Battle of Hastings, Norman Conquest
1096 The Crusades began.
1172 Ireland was conquered by Henry II.
1215 King John granted Magna Charta, June 15.
1265 First Representative Parliament in England.
1415 Battle of Agincourt, Oct. 25.
1431 Joan of Arc was burnt, May 30.
1453 Constantinople taken by the Turks.
1455 The Wars of the Roses began.
1462 The Bible was first printed at Mentz.
1471 Caxton set up his printing press.
1486 The feuds of York and Lancaster ended.
1492 Columbus discovered America, Oct. 12
1517 The Reformation began in Germany.
1519 Cortez began the conquest of Mexico.
1535 The first English Bible printed.
1539 Monasteries were closed in England.
1558 Accession of Queen Elizabeth, Nov. 17
1565 Revolt of the Netherlands began.
1565 St. Augustine, Florida, settled.
1572 The St. Bartholomew Massacre, Aug. 24
1588 The Spanish Armada defeated, July.
1600 East India Company first chartered.
1603 Union of England and Scotland.
1605 The Gunpowder Plot in England.
1607 Jamestown, Va., was settled.
1609 Hudson River first explored.
1616 Shakespeare died, April 23.
1618 Thirty Years' War in Germany began.
1620 Pilgrims by the Mayflower landed.
1623 Manhattan Island settled.
1634 Maryland settled by Roman Catholics
1636 Rhode Island settled by Roger Williams.
1640 Cromwell's Long Parliament assembled.
1649 Charles I. was beheaded, Jan. 30.
1653 Oliver Cromwell became Lord Protector.
1660 Restoration of the Stuarts.
1664 New York conquered from the Dutch.
1664 The great plague of London.
1666 The great fire of London began Sept. 2.
1679 Habeas Corpus Act passed in England.
1682 Pennsylvania settled by William Penn.
1685 Revocation of the Edict of Nantes.
1688 James II. abdicated, Dec. 11.
1690 Battle of the Boyne, July 1.
1690 First newspaper in America; at Boston.
1704 Gibraltar was taken by the English.
1713 Peace of Utrecht, April 11.
1714 Accession of House of Hanover, Aug. 1
1715 First Jacobite Rebellion in Great Britain; the second in 1745.
1720 South Sea Bubble.
1745 Battle of Fontenoy, April 30.
1756 Black Hole Suffocation in Calcutta.
1757 Clive won Battle of Plassey in India.
1759 Canada was taken from the French.
1765 Stamp Act enacted.
1773 Steam engine perfected by Watt.
1773 Tea destroyed in Boston Harbor, Dec. 16.
1775 Battle of Lexington, April 19.
1775 Battle of Bunker Hill, June 17.
1776 Declaration of Independence, July 4.
1777 Burgoyne's surrender, Oct. 17.
1779 Capt. Cook was killed, Feb. 14.
1781 Cornwallis' surrender at Yorktown, Oct. 19.
1788 First settlement in Australia, Jan. 26.
1789 The French Revolution began July 14
1789 Washington first inaug'ted President
1793 Cotton-gin invented by Whitney.
1793 Louis XVI. of France executed, Jan. 21
1796 Vaccination discovered by Jenner.
1798 The Irish Rebellion.
1799 Bonaparte declared First Consul, Nov. 10.
1801 Union of Great Britain and Ireland, Jan. 1.
1803 Louisiana purchased from the French
1804 Bonaparte became Emperor of France
1805 Battle of Trafalgar; death of Nelson.
1807 Fulton's first steamboat voyage.
1812 Second war with Great Britain.
1812 The French expedition to Moscow.
1813 Perry's victory on Lake Erie, Sept. 10.
1814 The printing machine invented.
1814 Scott's "Waverley" published.
1815 Battle of New Orleans, Jan. 8.
1815 Battle of Waterloo, June 18.
1819 First steamship crossed the Atlantic.
1820 Missouri Compromise adopted.
1823 Monroe Doctrine declared, Dec. 2.
1828 First passenger railroad in U. S.
1830 Revolution in France, Orleanist succession.
1832 S. Carolina Nullification Ordinance.
1835 Morse invented the telegraph.
1835 Seminole War in Florida began.
1837 Accession of Queen Victoria, June 20
1845 Texas annexed.
1846 Sewing machine completed by Howe.
1846 The Irish Potato Famine.
1846 British Corn laws repealed, June 26.
1846 War with Mexico began.
1848 French Revolution. Republic succeeded.
1848 Gold discovered in California, Sept.
1851 Gold discovered in Australia, Feb. 12
1851 First International Exhibition, London.
1852 Louis Napoleon became Emperor.
1853 Crimean War began.
1854 Japan opened by Commodore Perry.
1857 The Great Mutiny in India.
1857 The Dred Scott decision.
1857 First Atlantic cable message, Aug. 4.
1859 John Brown's raid into Virginia.
1860 South Carolina seceded, Dec. 20.
1861 Emancipation of the Russian serfs.
1863 Lincoln's Emancipation Proclamation, Jan. 1.
1863 Battle of Gettysburg, July 1-3.
1865 Lee surrendered at Appomattox, April 9.
1865 Pres. Lincoln assassinated, April 14.
1867 Maximilian of Mexico executed.
1867 The Dominion of Canada established
1869 Financial "Black Friday" in N. Y., Sept. 24.
1870 Franco-German War began, July 19.
1870 French capitulated at Sedan, Sept. 1.
1870 Rome became the capital of Italy.
1871 The German Empire re-established.
1871 The Irish Church was disestablished.
1871 The great fire in Chicago, Oct. 8-11.
1872 The great fire in Boston, Nov. 9.
1876 Prof. Bell perfected the telephone.
1876 Centennial Exposit'n at Philadelphia
1881 President Garfield shot, July 2.
1888 Great Blizzard in Eastern part of U. S., March 11-14.
1889 Brazil became a Republic.
1889 Johnstown, Pa., flood, May 31.
1893 World's Fair at Chicago.
1894 Chinese-Japanese War began.
1895 Cuban Revolution began, Feb. 20.
1897 The Turkish-Greek War.
1898 The Spanish-American War.
1899 Universal Peace Conference.
1899 The South African War began.
1900 Boxer Insurrection in China.
1900 The Galveston tornado, Sept. 8.
1901 Death of Queen Victoria.
1901 Assassination of President McKinley
1902 Martinique destroyed by volcano.
1903 Republic of Panama established.
1904 The Great Fire in Baltimore, Feb. 7.
1904 The Russo-Japanese War began.
1906 San Francisco earthquake and conflagration.
1908 American Battleship fleet nearly circumnavigated the Globe.
1908 Great Earthquake in Southern Italy.
1909 The North Pole discovered, April 6.
1910 Republic of Portugal established.
1911 The Italian-Turkish War began.
1911 The South Pole discovered, Dec. 14.
1911 China proclaimed a Republic.
1912 Steamship Titanic wrecked, April 14.
1912 Balkan War began.
1913 Panama Canal opened to navigation.
1913 Ohio and Indiana floods, March 25-27.
1913 Rebellion in Mexico.

# The French Revolutionary Era.

In September, 1793, the convention decreed that the common era should be abolished in all civil affairs, and that the new French era should begin on September 22, 1792, the day of the true autumnal equinox, and that each succeeding year should begin at the midnight of the day on which the true autumnal equinox falls. The year was divided into twelve months of thirty days each. In ordinary years there were five extra days, from the 17th to the 21st of our September, and at the end of every fourth year was a sixth complimentary day. This reckoning was first used on November 22, 1793, and was continued until December 31, 1805, when it was discontinued, and the Gregorian calendar, used throughout the rest of Europe, was resumed. The following were the dates for the year 1804, the last complete year of this style of reckoning:

| | | | | | |
|---|---|---|---|---|---|
| Vendemiaire | (Vintage), | September 23 to October 22. | Germinal | (Budding), | March 22 to April 21. |
| Brumaire | (Foggy), | October 23 to November 22. | Floreal | (Flowery), | April 21 to May 20. |
| Frimaire | (Sleety), | November 22 to December 21. | Prairial | (Pasture), | May 21 to June 20. |
| Nivose | (Snowy), | December 22 to January 21. | Messidor | (Harvest), | June 20 to July 19. |
| Pluviose | (Rainy), | January 21 to February 20. | Thermidor | (Hot), | July 20 to August 19. |
| Ventose | (Windy), | February 20 to March 19. | Fructidor | (Fruit), | August 19 to September 18. |

The months were divided into three decades of ten days each, but to make up the 365 five were added at the end of September: Primidi, dedicated to Virtue; Duodi, to Genius; Tridi, to Labor; Quartidi, to Opinion, and Quintidi, to Rewards. To Leap Year, called Olympic, a sixth day, September 22 or 23, Sextidi, "the day of the Revolution," was added.

To each tenth day, thirty-six in all, were assigned thirty-six "Fetes Decadaires," decreed by the National Convention on the eighteenth Prairial, in honor of the Supreme Being and Nature, the Human Race, the French People, Benefactors of Humanity, Martyrs for Liberty, Liberty and Equality, the Republic, Liberty of the World, Love of Country, Hatred of Tyrants and Traitors, Truth, Justice, Modesty, Glory and Immortality, Friendship, Frugality, Courage, Good Faith, Heroism, Disinterestedness, Stoicism, Love, Conjugal Fidelity, Paternal Love, Maternal Tenderness, Filial Piety, Infancy, Childhood, Manhood, Old Age, Sickness, Agriculture, Industry, Our Ancestors, Our Posterity, Goodness.

Dec. 25-26. Battle of Trenton, N. J., 1776.
Dec. 28. Woodrow Wilson born, 1856.

# Ready-Reference Calendar.—1.

*For ascertaining the Day of the Week for any given Time from the Beginning of the Christian Era to the Year 2200.*

---

*RULE.—To the day of the Month, add Factors for Month, Century, and Year, and divide the total by 7.*

If there is no remainder the day is Sunday.
" 1 is the remainder " Monday.
" 2 " " Tuesday.
" 3 " " Wednesday.
" 4 " " Thursday.
" 5 " " Friday.
" 6 " " Saturday.

Should the total be less than 7, it is to be taken as a remainder.

EXAMPLE:

Week-day of Washington's Birthday, February 22, 1914.

| Day. | | Month. | | Century. | | Year. | | |
|---|---|---|---|---|---|---|---|---|
| 22 | + | 5 | + | 5 | + | 3 | = | 35 |

35 divided by 7 leaves 0 remainder, therefore the day will be *Sunday*.

MONTHS.
For Leap years figures in heavier type to be taken.

| | Jan. | Feb. | Mar. | Apl. | May | June | July | Aug. | Sept. | Oct. | Nov. | Dec. |

NOTE.—The letters in the list of "*Years* from 1753 to 1952" refer to the table headed with the *Months*, the figures in which refer to the same figures at the head of the table of *Days*. For example: To know on what day July 4, 1914, will fall look for 1914 in the table of *Years*. The letter "*a*" is attached. Look for the same letter in the table of *Months* and in a parallel line under July is the figure 3, which directs to column 3 in the table of *Days* below, in which it will be seen that July 4 falls on Saturday.

## Ritualistic Calendar.

COLORS FOR THE ALTAR IN USE IN RITUALISTIC EPISCOPAL CHURCHES IN THE UNITED STATES.

*White.*—From the First Service (First Vespers) of Christmas Day to the Octave of Epiphany, inclusive (except on the Feasts of Martyrs); on Maundy Thursday (for the celebration), from the First Service of Easter Day to the Vigil of Pentecost (except on Feasts of Martyrs and Rogation Days); on Trinity Sunday, Conversion of St. Paul, Purification, Annunciation, St. John Baptist, St. Michael, St. Luke, All Saints, Saints who are not Martyrs, and Patron Saints (Transfiguration and Dedication of Church).

*Red.*—From First Vespers of Pentecost to the First Vespers of Trinity Sunday (which includes Ember Days), Holy Innocents (if on a Sunday), and Feasts of all Martyrs.

*Violet.*—From Septuagesima to Maundy Thursday (Easter Eve); Advent Sunday to Christmas Eve; Vigils, Ember Days (except in Whitsun Week), and Rogation Days, Holy Innocents (unless on Sunday). *Black.*—Good Friday and at funerals. *Green.*—All other days.

These regulations as to colors are general. A more minute code changing with each year is published in the church almanacs.

# Our Moon.

Of all the secondary planets the earth's satellite is by far the most interesting and important. The moon completes her circuit around the earth in a period whose mean or average length is 27 days 7 hours 43.2 minutes; but in consequence of her motion in common with the earth around the sun, the mean duration of the lunar month, that is, the time from new moon to new moon, is 29 days 12 hours 44.05 minutes, which is called the moon's synodical period. If the earth were motionless in space the moon's orbit would be nearly an ellipse, having the earth in one of the foci; hence her distance from the earth varies during the course of a lunar month. Her mean distance from the earth is 238,850 miles. Her maximum distance, however, may reach 252,830 miles, and the least distance to which she can approach the earth is 221,520 miles. Her diameter is 2,162 miles, and if we deduct from her distance from the earth the sum of the two radii of the earth and moon, viz., 3,962 and 1,081 miles, respectively, we shall have for the nearest approach of the surfaces of the two bodies 216,477 miles. Her orbit is a very intricate one, because the earth in moving around the sun carries the moon along with it; hence the latter is sometimes within and sometimes without the earth's orbit. Its form is that of a serpentine curve, always *concave* toward the sun, and inclined to the plane of the earth's orbit at an angle of 5° 9′, in consequence of which our satellite appears sometimes above and sometimes below the plane of the earth's orbit, through which she passes twice in a revolution. These points or positions are called nodes, and no two consecutive nodes occupy positions diametrically opposite on the lunar orbit. The nodes have a retrograde motion, which causes them to make an entire revolution in 18 years, 218 days, 21 hours, 22 minutes and 46 seconds. This motion was well known to the ancients, who called it the Saros, and was made use of by them in roughly predicting eclipses.

The moon always presents the same face to us, as is evident from the permanency of the various markings on its surface. This circumstance proves that with respect to the earth she revolves on an axis, and the time of rotation is exactly equal to the time of revolution around the earth, viz., 27.32166 days. The moon's axis is not perpendicular to the plane of her orbit, but deviates therefrom by an angle of about 6° 41′. In consequence of this fact, and of the inclination of the lunar orbit to that of the ecliptic, the poles of the moon lean alternately to and from the earth. When the north pole leans toward the earth we see somewhat more of the region surrounding it, and somewhat less when it leans the contrary way. This displacement is known by the name of libration in latitude.

The moon's motion on her axis is uniform, but her angular velocity in her orbit is subject to slight variations by reason of the form of her orbit; hence it happens that we sometimes see a little more of the eastern or western edge at one time than at another. This phenomenon is known as libration in longitude.

The moon's surface contains about 14,685,000 square miles, or nearly four times the area of Europe. Her volume is 1-49 and her mass 1-81 that of the earth, and hence her density is about 3-5 that of the earth, or about 3 2-5 that of water. At the lunar surface gravity is only 3-20 of what it is at the earth, and therefore a body which weighs 20 pounds here would weigh only 3 pounds there.

The centre of gravity of the earth and moon, or the point about which they both actually revolve in their course around the sun, lies *within* the earth; it is 1,063 miles below the surface.

The attractive force of the moon acting on the water of our oceans is mainly instrumental in raising them into protuberances or tides in such a manner as to give the total mass a spheroidal figure whose principal axis would continually coincide with the line joining the centres of the earth and moon, but in consequence of the resistance which this movement of the water encounters from continents and islands, as well as from the liquid molecules themselves, the tidal wave can never arrive at any place until about one hour after the moon has crossed the meridian of the place.

The moon has no atmosphere and no water. The suddenness with which stars are occulted by the moon is regarded as a conclusive proof that a lunar atmosphere does not exist, and the spectroscope furnishes negative evidence of the same character.

In remote ages the lunar surface was the theatre of violent volcanic action, being elevated into cones and ridges exceeding 20,000 feet high, and at other places rent into furrows or depressions of corresponding depth. The lunar volcanoes are now extinct. A profound silence reigns over the desolate and rugged surface. It is a dead world, utterly unfit to support animal or vegetable life.

## THE EARTH'S ATMOSPHERE.

The earth's sensible atmosphere is generally supposed to extend some forty miles in height, probably further, but becoming at only a few miles from the surface of too great a tenuity to support life. The condition and motions of this aerial ocean play a most important part in the determination of climate, modifying, by absorbing, the otherwise intense heat of the sun, and, when laden with clouds, hindering the earth from radiating its acquired heat into space. —*Whitaker.*

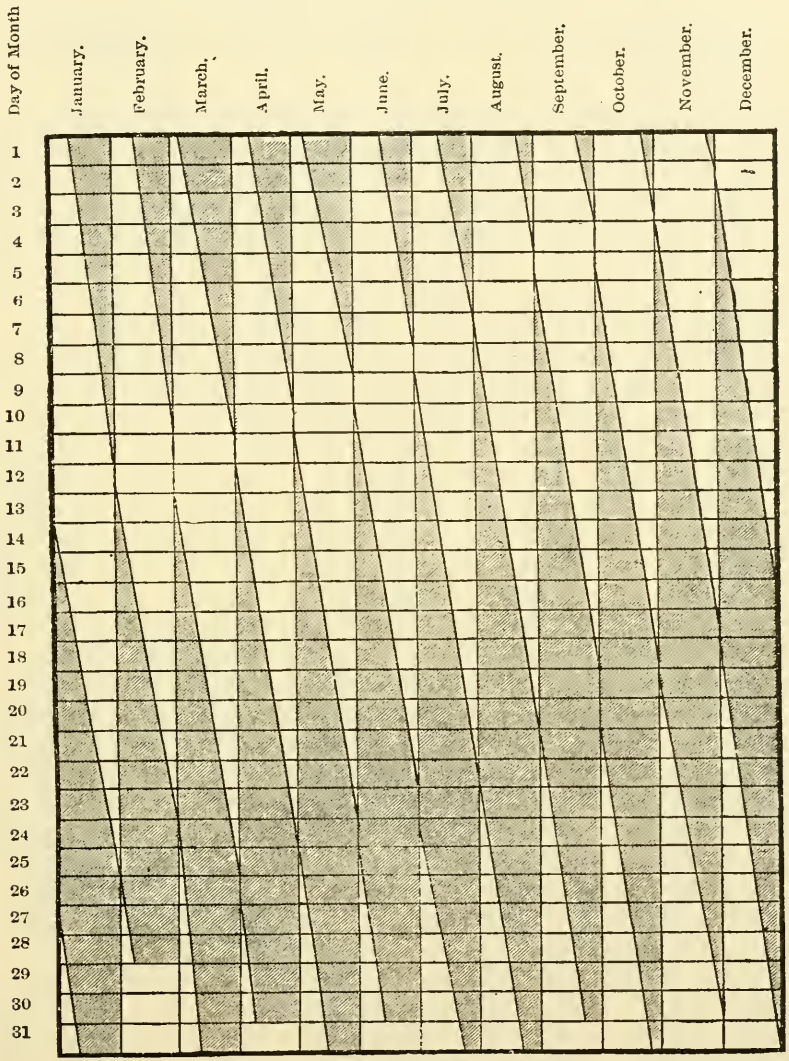
# Moonlight Chart, 1914.



EXPLANATION.—The white spaces show the amount of moonlight each night. January 4, February 3, etc., the moon sets at or near midnight when the former portion of the night has moonlight; January 12, February 11, etc., full moon when moonlight lasts the whole night; January 19, February 17, etc., when the moon rises at or near midnight when the latter half of the night has moonlight; January 26, February 24, etc., new moon, no moonlight during the whole night.

# Pole Star.

MEAN TIME OF TRANSIT (AT WASHINGTON) AND POLAR DISTANCE OF POLARIS.

From June 16 to August 1 both the upper and lower transits take place during daylight. The azimuth at the time of greatest Eastern or Western elongation can be easily computed from the formula:

$$\sin A = \frac{\sin p}{\cos l}$$

where $A$ denotes the azimuth, $p$ the polar distance, and $l$ the latitude of the place.

DATE OF GREATEST ELONGATION.

To find the time of greatest Eastern or Western elongation, let $H$ denote the hour angle, and $l$ and $p$ as before, then we shall have

$$\cos H = \tan p \tan l.$$

And the hour angle in *mean time* is

$$H_m = H^\circ \times 0.0664846.$$

This quantity, $H_m$, added to or subtracted from the time of transit given above, according to the elongation required, will give the *mean time* of the *greatest* elongation at any place whose north latitude is $l$.

# Star Table.

FOR IDENTIFYING THE PRINCIPAL FIXED STARS.

| Name of Star. | Declination | On Meridian. Upper. | Lower. | Name of Star. | Declination | On Meridian Upper. | Lower. |
|---|---|---|---|---|---|---|---|
| | ° ′ | H. M. | H. M. | | ° ′ | H. M. | H. M. |
| α Andromedæ (Alpher'z) | + 28 36 | − 1 18 0 | +10 40.0 | α Leonis (Regulus) | + 12 24 | + 8 40.1 | +20 38.1 |
| γ Pegasi (Algenib) | + 14 42 | − 1 13.2 | +10 44.8 | α Virginis (Spica) | − 10 42 | +11 56.5 | +23 54.5 |
| α Cassiopeiæ (Schedir) | + 56 3 | − 0 42.2 | +11 15.8 | α Bootis (Arcturus) | + 19 38 | +12 47.5 | + 0 45.5 |
| α Arietis | + 23 3 | + 0 40.0 | +12 38.0 | β Ursæ Minoris | + 74 31 | +13 27.5 | + 1 25.5 |
| β Persei (Algol) | + 40 37 | + 1 39.9 | +13 37.9 | α Coronæ Borealis | + 27 1 | +13 49 7 | + 1 47.7 |
| α Tauri (Aldebaran) | + 16 20 | + 3 8.2 | +15 6.2 | α Scorpii (Antares) | − 26 14 | +14 59.3 | + 2 57.3 |
| α Aurigæ (Capella) | + 45 54 | + 3 47 6 | +15 45 1 | α Lyræ (Vega) | + 38 42 | +17 9 3 | + 5 7.3 |
| α Orionis (Betelguese) | + 7 23 | + 4 27 6 | +16 25 6 | α Aquilæ (Altair) | + 8 38 | +18 21.4 | + 6 19 4 |
| α Canis Majoris (Sirius) | − 16 36 | + 5 18.4 | +17 16.4 | α Cygni (Deneb) | + 44 58 | +19 13.5 | + 7 11.5 |
| α Geminorum (Castor) | + 32 5 | + 6 5.7 | +18 3.7 | α Cephei | + 62 13 | +19 51.5 | + 7 49.5 |
| β Geminorum (Pollux) | + 28 14 | + 6 16.6 | +18 14.6 | α Aquarii | − 0 45 | +20 35.8 | + 8 33.8 |
| α Canis Minor (Procyon) | + 5 27 | + 6 11.6 | +18 9.6 | α Piscis Australis | − 30 5 | +21 27.1 | + 9 25.1 |
| | | | | α Pegasi (Markab) | + 14 44 | +21 34.7 | + 9 32.7 |

To find the time of the star's transit add or subtract, according to the sign, the numbers in the second column of figures to the date of the transit of the pole star given above. Thus, for α Andromedæ February 1, Lower Transit of Pole Star is 4 h. 45 m. 4 s. A. M., to which add 10 h. 40 m. and we have 3 h. 25 m. 4 s. P. M.; for December 1, we find 7 h. 31 m. 22 s. P. M., etc.

APPROXIMATE PARALLAX AND DISTANCE IN LIGHT-YEARS OF SOME OF THE PRINCIPAL FIXED STARS.

By light-years is to be understood the number of years light requires to travel from the star to us.

| | Parallax. | Light-Years. | | Parallax. | Light-Years. |
|---|---|---|---|---|---|
| | ″ | | | ″ | |
| Polaris (Pole Star) | 0.073 | 45 | α Lyræ (Vega) | 0.140 | 23 |
| α Aurigæ (Capella) | 0.046 | 71 | 61 Cygni | 0.348−0 564 | 6−8 |
| α Canis Majoris (Sirius) | 0.233 | 15 | β Cassiopeiæ | 0 187 | 17 |
| α Canis Minoris (Procyon) | 0 123 | 27 | γ Draconis | 0.127 | 26 |
| α Bootis (Arcturus) | 0.127 | 28 | 85 Pegasi | 0.054 | 60 |
| α Centauri | 0.916 | 3.6 | | | |

The determination of stellar parallax is one of the most difficult and refined problems in practical or observational astronomy. It is to find the angle which the semi-diameter of the earth's orbit subtends at the star—an angle always very small, as seen from the above table, and which cannot be measured directly, but by various processes too complicated to be explained here.

# Astronomical Phenomena for the Year 1914.

ASTRONOMICAL SIGNS AND SYMBOLS.

| | | | | | |
|---|---|---|---|---|---|
| ☉ | The Sun. | ♂ | Mars. | ☌ | Conjunction. |
| ☾ | The Moon. | ♃ | Jupiter. | □ | Quadrature. |
| ☿ | Mercury. | ♄ | Saturn. | ☍ | Opposition. |
| ♀ | Venus. | ♅ | Uranus. | ☊ | Ascending Node. |
| ⊕ | The Earth. | ♆ | Neptune. | ☋ | Descending Node. |

Two heavenly bodies are in "conjunction" (☌) when they have the same *Right Ascension*, or are on the *same meridian, i. e.*, when one is due *north* or *south* of the other; if the bodies are near each other as seen from the earth, they will rise and set at the same time; they are in "opposition" (☍) when in opposite quarters of the heavens, or when one rises just as the other is setting. "Quadrature" (□) is half way between conjunction and opposition. By "greatest elongation" is meant the greatest apparent *angular* distance from the sun; the planet is then generally most favorably situated for observation. Mercury can only be seen with the naked eye at this time. When a planet is in its "ascending" (☊) or "descending" (☋) node it is crossing the plane of the earth's orbit. The term "Perihelion" means nearest, and "Aphelion" furthest, from the sun. An "occultation" of a planet or star is au eclipse of it by some other body, usually the moon.

## I.—ECLIPSES.

In the year 1914 there will be four eclipses, two of the sun and two of the moon, as follows:

1. An annular eclipse of the sun February 24, invisible in North America, visible as a very small partial eclipse in the southern part of Patagonia and the eastern coast of New Zealand. The path of the annulus lies wholly in the Antarctic and South Pacific Oceans.

2. A partial eclipse of the moon March 11-12, visible in the United States.

| PLACES. | Moon Enters Shadow. | Middle of Eclipse. | Moon Leaves Shadow. |
|---|---|---|---|
| | D. H. M. | H. M. | D. H. M. |
| Boston | March 11 9 57.5 P.M. | 11 28.6 P.M. | March 12 12 59.7 A.M. |
| New York | 11 9 46.0 P.M. | 11 17.1 P.M. | 12 12 48.2 A.M. |
| Philadelphia | 11 9 40.7 P.M. | 11 11.8 P.M. | 12 12 42.9 A.M. |
| Washington | 11 9 33.3 P.M. | 11 4.6 P.M. | 12 12 35.7 A.M. |
| Charleston | 11 9 22.3 P.M. | 10 53.4 P.M. | 12 12 24.5 A.M. |
| Cincinnati | 11 9 4.1 P.M. | 10 35.2 P.M. | 12 12 6.3 A.M. |
| Chicago | 11 8 51.4 P.M. | 10 22.5 P.M. | 11 11 53.6 P.M. |
| St. Louis | 11 8 41.0 P.M. | 10 12.1 P.M. | 11 11 43.2 P.M. |
| New Orleans | 11 8 41.6 P.M. | 10 12.7 P.M. | 11 11 43.8 P.M. |
| Houston | 11 8 20.4 P.M. | 9 51.5 P.M. | 11 11 22.5 P.M. |
| Denver | 11 7 42.0 P.M. | 9 13.1 P.M. | 11 10 44.2 P.M. |
| Ogden | 11 7 14.0 P.M. | 8 45.1 P.M. | 11 10 16.2 P.M. |
| Los Angeles | 11 6 45.8 P.M. | 8 16.9 P.M. | 11 9 48.0 P.M. |
| San Francisco | 11 6 32.1 P.M. | 8 3.2 P.M. | 11 9 34.3 P.M. |

Magnitude of eclipse, 0.916. Moon's diameter=1. on northern limb.

3. A total eclipse of the sun August 20-21, visible as a small partial eclipse in eastern portion of Canada and the northeastern part of the United States.

The eclipse will not be visible west or south of a line drawn through or near Rapid City, Manitoba; Devil's Lake and Fargo, N. Dak.; Redwood Falls, Minn.; Peoria, Ill.; Indianapolis, Ind.; Harrisonburg, Va., and Washington, D. C. The first contact of the penumbra with the earth takes place in the middle of James's Bay (the southern part of Hudson Bay), and the last on the east coast of Africa, about four degrees north of the equator.

The path of the total eclipse begins at sunrise in the Arctic Ocean, lat. 71°.4 and long. 121°.2 W. It moves northeast and then east, crosses Northern Greenland and then southeast, passing north of Jan Mayen (Arctic Ocean), crosses the North Atlantic and the middle of Norway and Sweden, the north end of the Baltic Sea, enters Russia, passing almost directly over Kieff, crosses the east end of the Black Sea, traverses eastern Turkey in Asia, Persia and ends at sunset near Lahkpat in Western India, lat. 23°.75 N. and long. 70°.6 E., having traversed 191°.8 of longitude.

The greatest duration of totality is 2 minutes and 14 seconds, which occurs in Russia, lat. 54° 9′ N. and long. 27° 18′ E.

In Western Ohio and the eastern shore of Michigan, the middle of the eclipse will take place at sunrise.

The dates of beginning and ending for the following places in the United States and Canada are given below:

| PLACES. | Eclipse Begins. | Eclipse Ends. | Angle of Position. Begins. | Angle of Position. Ends. |
|---|---|---|---|---|
| | D H. M. | H. M. | ° | ° |
| New York | Aug. 21 5 34.6 A.M. | 6 8.9 A.M. | 4.1 E. | 38.3 E. |
| Boston | 21 5 41.1 A.M. | 6 30.0 A.M. | 2.5 W. | 46.1 E. |
| Portland | 21 5 42.3 A.M. | 6 37.8 A.M. | 5.6 W. | 49.7 E. |
| Halifax, N. S. | 21 6 10.6 A.M. | 7 9.4 A.M. | 5.1 W. | 51.2 E. |
| St. John's, Newfoundland | 21 6 54.1 A.M. | 8 13.7 A.M. | 10.9 W. | 61.9 E. |
| Quebec | 21 5 32.2 A.M. | 6 45.7 A.M. | 15.9 W. | 60.3 E. |

The position angles are reckoned from the north point of sun's limb.

4. A partial eclipse of the moon, September 3-4, invisible in the United States east of the Rocky Mountains.

At San Francisco the eclipse will begin September 4, 4h. 6.6m. A.M.; at Los Angeles, 4h. 23.3m. A.M., the moon setting with the eclipse on it.

ASTRONOMICAL PHENOMENA FOR THE YEAR 1914.—*Continued.*

## II.—A TRANSIT OF MERCURY.

There will be a transit of Mercury over the sun's disk November 7, partly visible in the eastern portions of the United States and the Dominion of Canada, the sun rising with the planet on it.

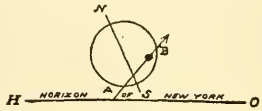
The angle of position at the last external contact is 105°.2 from the north point of the sun's limb toward the west. The nearest approach of the centres of the sun and planet is 10′ 31″—about two-thirds of sun's semi-diameter. The motion of the planet is retrograde, that is to say, from east to west or from left to right as we stand facing the sun. The accompanying diagram represents the position of the planet on the sun's disk shortly after sunrise as seen from New York, but it will serve with sufficient accuracy for the mere purpose of observation, for all other places in the above list. H O represents the horizon, N S a portion of a meridian through the sun's centre, and A B the direction of the planet's motion.



All the dates in the eclipses and in the transit of Mercury are given in *local mean time*.

The next transits of Mercury will occur in May, 1924 and November, 1927.

MEAN solar parallax, 8″.80. Nutation constant, 9″.21.
Aberration constant, 20″.47. Annual precession, 50″.2564.
Obliquity of the ecliptic, 23° 27′ 8″.26—0″.4684 (t—1900).
Annual diminution of obliquity, 0″.4684.
Moon's equatorial horizontal parallax, 57′ 2″.68.
Moon's mean distance from the earth (centre to centre), 238,850 miles.
Sun's mean distance from the earth (astronomical unit), 92,894,800 miles.
Velocity of light, 186,320 miles per second.
Light travels unit of distance—viz. 92,894,800 miles in 498.566 seconds.
Length of the Year—Tropical (equinox to equinox), 365.2421988 days.
Sidereal or absolute revolution, 365.2563604 days.
Anomalistic (from perihelion to perihelion), 365.2596413 days.

Length of the Day—Sidereal, 23 hours 56 minutes 4.091 seconds (mean solar time). Mean solar, 24 hours 3 minutes 56.555 seconds (sidereal time).

Length of the Month—Synodical (from new moon to new moon), 29 days 12 hours 44 minutes 2.8 seconds. Tropical, 27 days 7 hours 43 minutes 4.7 seconds. Sidereal (absolute revolution), 27 days 7 hours 43 minutes 11.5 seconds. Anomalistic (from perigee to perigee), 27 days 13 hours 18 minutes 33.1 seconds.

Dimensions of the Earth—Equatorial radius, 3963.23 miles. Polar radius, 3949.79 miles. Eccentricity of the oblate spheroid, 0.0822718.

# Halley's Comet.

OF the great number of comets which have temporarily visited our solar system or have become permanent members of it none has surpassed Halley's in historical associations. It has a record dating back to B. C. 240; its visitations spread alarm and consternation throughout Europe during the Middle Ages; was the first whose return was predicted by an Astronomer Royal of England, and will therefore, for these reasons, be an object of great scientific interest for all time. For the information of those who appreciate such matters the following are the elements of its orbit as deduced from the last visitation:

Perihelion Passage 1910, April, 19.67, Greenwich Mean Time.

Eccentricity = 0.967281.
Semi-axis major = 17.9468.
Perihelion distance = 0.58720.
Inclination to the plane of the earth's orbit = 17° 47′ 18″.
Longitude of the ascending node = 57° 16′ 12″.
Distance from perihelion to node = 111° 42′ 16″
Daily motion (mean) = 46″.669.
Period = 74.424 years.*
Motion, retrograde.

The semi-axis major and the perihelion distance are expressed in terms of the earth's mean distance from the sun, taken as unity. See also article on Halley's Comet and on Comets in ALMANACS of 1910 and 1911.

* The periodic time varies considerably by reason of the attraction of the planets. Its average duration is about 76.5 years.—J. M.

# Kosmical Changes in the Earth.

BY J. MORRISON, M. D., PH. D.

In this short paper we purpose to notice very briefly a few of the most noted convulsions to which the earth has been subjected since the advent of man. Pre-eminently among these stands "the Flood," which occurred in prehistoric times and is commonly believed to have drowned the world, destroying all living things, both animal and vegetable, except Noah and his family and the contents of the "Ark."

The Mosaic record of this appalling catastrophe is meagre, deficient in detail, contradictory and inconsistent with the physical sciences.

A general or universal deluge could not, in the nature of things, have taken place. There must have been, however, a partial deluge, the result of natural forces and not at all due to the cause assigned by the Hebrew writer who very imperfectly recorded the current traditions of his time.

The Hebrew chronology is unquestionably erroneous. The dates assigned to the Mosaic creation and the Flood are incorrect. The geology of the rocky pages of the earth's surface proves that many millions of years elapsed before the earth was reduced to a condition fit for the reception of man.

Four geologic ages, each embracing hundreds of millions of years, have already passed away. We are now in the Quaternary or Post-Tertiary age, which was ushered in by an extraordinary upheaval of the Arctic Zone, resulting in what is called the Glacial Period, which very probably lasted at least two hundred thousand years. The Glacial Period was succeeded by a long interval of comparative repose, during which the Champlain strata of rocks were laid down at the bottom of the ocean, after which followed the Drift Period, of unknown duration, but it is probable that these three subdivisions of the Quaternary age have already existed for at least a million of years. During the Drift Period primeval man appeared on the scene; his advent was certainly not less than 20,000 years before the Christian era. Archaeological researches in recent times fully confirm this moderate estimate, and the Flood took place fully 10,000 years prior to the same era.

The Biblical account of the Creation as well as of the Flood is an allegory. The Scriptures do not and never were intended to teach the natural sciences.

We shall now inquire into what really did take place on the earth at or about that time. Historical, archaeological, geographical and biological researches point unmistakably to a partial flood or deluge of water which, in all probability, destroyed millions of our race, not by reason of their wickedness but by the forces of nature.

Kritias, one of the most trustworthy Greek historians of antiquity, informs us in his work on Timaeus that his grandfather, Kritias, had been told by Solon, the great Greek legislator, of some remarkable events in Greek history which he learned from the Egyptian priests at Sais, whose records antedate the Biblical flood by many centuries.

Plato, another ancient Greek historian, whose veracity has never been questioned, left on record a tolerably full account of some events that transpired in the remote past. We unfortunately possess only a fragment of Plato's writings on this subject. His account breaks off very abruptly in the middle of a sentence; the remainder is irretrievably lost.

The records of both historians relate to the existence and destruction of a large continental island in the Atlantic Ocean situated between America on the west and Europe and Africa on the east and known by the name of Atlantis.

This large island or continent must have enjoyed a delightful climate, being partly within the tropics and partly in the southern portion of the north temperate zone. It was possibly the original home and nursery of the human race. In the course of time it became very populous, rich and powerful; it established numerous colonies in Europe, Asia and Africa, and especially along the shores of the Mediterranean. America, too, was also colonized from the same source. It became the nucleus or centre of a vast empire embracing a large portion of all the continents and carried on an enormous commerce with all its colonial possessions. A quarrel having arisen between the Athenian colonists and the mother country, the latter made war on the Athenians, who repulsed or defeated the invaders, an achievement which, the account states, was regarded as the most glorious event hitherto gained by that valiant little nation. Disputes with other colonies soon after arose, and while the Atlanteans were making preparations on a huge scale to invade their rebellious colonies a tremendous earthquake occurred, during which the island of Atlantis with its millions of population sank beneath the briny waves of the Atlantic Ocean. Such is in substance the account given by Plato of this lost continental island.

The subsidence of the island was no doubt accompanied by terrific thunderstorms, tornadoes, volcanic eruptions, etc.

The Biblical account states that "the fountains of the great deep were broken up," which does not accord with the opinion generally held that the earth was drowned by an excessive fall of rain during forty days. The island may have broken into fragments and the water come gushing up from below until the tops of the highest mountains were completely submerged. The inrush of water toward the sinking island would render escape in ships or boats rather difficult, but tradition has it that certain persons escaped, known by the name of Deucalion and his wife Pyrrha, among the ancient Greeks and Romans, and by Noah and his family among the Hebrews. This appalling event must have struck terror into the inhabitants of the adjacent portions of Europe and Africa, who abandoned their homes and emigrated eastward to what are now known as Asiatic Turkey, Persia, Afghanistan, India, etc. And thus Portugal, Spain, Italy and the north and west of Africa remained uninhabited for many thousands of years, until they were subsequently re-explored and recolonized by the Phoenicians, Greeks and Trojans. The inhabitants of what is now called America scattered farther to the north and the south, and many of them may have attempted to escape in ships over the Pacific Ocean and may have colonized the Sandwich and other islands there; but whatever they did they were regarded by those who escaped from Atlantis as having perished along with the Atlanteans, and accordingly remained for probably ten thousand years forgotten and unknown until discovered by Columbus in 1492.

Ancient Troy was destroyed by the Greeks in 1184 B. C. Many of the dispersed Trojans sailed away westward and finally settled in Italy, which they found almost uninhabited, covered with extensive forests and numerous remains of towns, cities, temples and monuments, which were antiquities more than a thousand years before the Christian era.

The Roman historians gave to these ancient inhabitants the name of Etruscans, but tradition and history are silent as to whence they came or whither they went. They were no doubt the descendants of the original colonists of Atlantis who abandoned their homes by reason of the terrible convulsions to which their country was subjected.

The sinking of Atlantis must have caused several extensive faults or cracks in the earth's crust. One of these extends along the northern part of the Mediterranean, through the southern portions of Portugal, Italy, Greece and Asiatic Turkey, for this region has been notorious for its kosmic disturbances since the dawn of history. It is very probable that the volcanoes Aetna, Vesuvius and Stromboli were born at this very time. Sicily too was snapped or broken off from continental Italy and the Strait of Messina, Scylla and Charybdis are still silent witnesses of this great seismic disturbance. A tradition of this event existed among the ancient Greeks and Romans; the former founded a colony there which subsequently came under the Roman dominion and was called Rhegium, from the

KOSMICAL CHANGES IN THE EARTH.—*Continued.*

Greek verb "rhegnumi," to break off. This terrible catastrophe, so destructive to a portion of our race and so shocking to the civilization of that period, was also far reaching in its remote effects. It, in all probability, caused tremendous upheavals or volcanic eruptions in remote regions of the world; it changed the position of the earth's axis and therefore also of the poles and the latitude of places; it deluged some regions quite remote from the original site of disturbance and consequently caused to some extent a new distribution of land and water, aud, lastly, it contributed to shorten the length of our solar day.

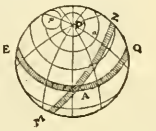
Now, in order that the reader may understand the full significance of a change in the position of the centre of gravity of a revolving body, the following simple illustration may suffice:

The centre of gravity of any body or mass of matter is that point within it from which, if suspended, it would remain at rest in any position in which it might be placed.

Take a small telescope two or three feet long with three or four draw tubes in it, draw it out to the fullest extent and suspend it by a string so that it will balance or remain horizontal. Push in the tube containing the eye piece as far as it will go; it will not now remain horizontal, but the large end will fall because the position of the centre of gravity has been changed, although the weight of the instrument has neither been increased nor diminished, but a change in the distribution of the matter has been made. Pushing in the remaining tubes would make a still further change in the centre of gravity several inches from its original position. The same change takes place in every mass of matter when a different distribution is made of its substance.

When a plastic sphere—such as the earth once was—revolves on an axis it takes the form of an oblate spheroid—that is to say, a sphere which has been flattened at the poles and bulged out, or protuberant, along the equatorial regions. This is due to the centrifugal force, which is greatest at the equator and gradually decreases as we recede therefrom, becoming zero at the poles. The equatorial diameter of the earth is twenty-six miles longer than the polar. The full significance of this statement will be better appreciated by saying that if the earth ceased to revolve or became stationary so far as the axial rotation is concerned, the water in the oceans along the equatorial regions or between the tropics would flow toward the north and south until perfect sphericity was obtained so far as relates to the portions covered with water, and the intra-tropical portions would stand up above the general level of the ocean from at least five to ten or twelve miles and the polar regions and the greater if not all of the temperate zones would be submerged in some places many miles under water.

Now, the submersion of such a large body of land as Atlantis must have changed the position of the centre of gravity of the earth, and as the axis of rotation must, by the laws of motion, pass through this point, there must have been a very considerable movement of the poles—perhaps 10° or 12°—and of course the equator would take a new position, resulting in floods or deluges in certain localities, as will be evident from the annexed diagram.



Let *P* be the pole at any time and *E Q* a narrow portion of the equatorial belt of water. Now, if through some great kosmic disturbance such as the submersion of Atlantis the pole is moved to *p*, the equatorial belt will take the position *M N* and there will evidently be a flood at the opposite points *M* and *N* as far from the original equator as the pole has been moved, while at the points of intersection (one of which is shown at *A*) there will be no flood at all, but there will of course be more or less disturbance at all other intermediate points.

Concurrent, then, with this great catastrophe there were tremendous deluges at opposite points on the globe far distant from Atlantis, and accordingly many countries may have been permanently inundated and many millions of people may have perished of whose existence we have not even a tradition. It is very probable that at this time the entire crust or surface of the earth settled down more or less, thereby shortening the diameter of the earth and thus increasing the force of gravity.

The point *a* (in the diagram) is considerably nearer the new equator than the old one and therefore will experience a great change in its climate and latitude and also in its fauna and flora, while the point *c*, equally distant from the new and old equators, will experience no such change. This is in actual agreement with what really happened at some remote period. Great Britain, for instance, formerly enjoyed a much warmer climate than it does now and possessed a different fauna and flora, as shown by the fossil remains of animals and plants long extinct in that region, while other places similarly situated are known to have sustained no change whatever.

From time immemorial the sidereal day or the interval during which the earth performs one absolute revolution on its axis, has been regarded as invariable, but owing to the nature of the circumstances on which it depends this assumption cannot be true.

According to the accepted cosmogony, the earth at one time filled the moon's orbit and the duration of its axial rotation could not have differed much from the moon's present sidereal period—viz., 27 days 7 hours. As the cooling proceeded rapidly by the radiation of heat, contraction of volume would ensue, or, in other words, a shortening of the axes of the earth, with consequent accelerated axial rotation in accordance with well known dynamical principles.

During this immensely long interval, extending over many millions of years, the sidereal revolution of the earth on its axis has varied from 27 days to 24 sidereal hours. It can be shown mathematically that a reduction of only two feet in the earth's radius will shorten the day by about the 1-125 of a second. This continual shortening of our day, due to the slow settling down of the earth's crust as manifested during every earthquake, is a disturbing factor in astronomy and chronology. Thus, the recorded dates of ancient eclipses—that of Thales for example—cannot be verified on the assumption that the sidereal day is a constant and invariable interval. During the time of Thales the sidereal day may have been many seconds or even minutes longer than at present.

The fall of Atlantis does not entirely depend on the fragmentary accounts given by Kritias and Plato as received from the Egyptian priests, but also on many geographical and archaeological facts which cannot be explained on any other hypothesis. There is in the Atlantic Ocean an extensive plateau occupying the position Atlantis is supposed to have had. The Bermudas and Azores are probably remains of it, the former completely submerged and subsequently completed as islands by the coral insect, as they are the only coral islands in the North Atlantic, and the latter of volcanic formation and containing when discovered a peculiar species of hawk found nowhere else, and hence the name hawk islands, from acor, a hawk. The Canary islands may also be remnants; when discovered they were inhabited by dogs—hence the name, from Canis, a dog. Whence came these dogs? Most probably from Atlantis. The ancient inhabitants of Peru, Yucatan, Central America and Mexico were in many respects similar to the ancient Egyptians; their architecture, their pyramids and monuments, their temples, their religion, their mode of disposing of the dead, and, lastly, their written language, were almost identical with those of ancient Egypt, which must be regarded as very strong evidence that these people had a common origin and a common history.

Moreover, remains of animals and plants have been found in Northern Siberia, the north and west of Europe, including Great Britain which proves that these regions once enjoyed a tropical, or at least a subtropical, climate—a fact which can only be explained by a change in the position of the earth's axis and therefore also of the poles. Such a movement would change the boundaries of the various zones and also the climate, and that such a change took place very suddenly is shown by

KOSMICAL CHANGES IN THE EARTH.—*Continued.*

the fact that the remains of subtropical animals, with the hair and flesh on the bones, have been found entombed in ice in Northern Siberia, now on the confines of the Frigid Zone. Their icy tomb preserved them from the oxidizing action of the air for an immensely long time. These animals were suddenly overtaken by an Arctic Winter; they had no time to migrate, but congealed where they stood, and, rapidly enveloped in snow and ice, they have at last revealed to man the mighty convulsions of our globe in prehistoric times.

To enumerate all the disturbances—elevations and depressions—to which the earth has been subjected would be an endless task. We pause to mention briefly two or three which have occurred in historic times. During the time of the Patriarch Abraham the ancient cities of Sodom and Gomorrah went down in a mighty convulsion and the Dead Sea was formed, now more than 1,000 feet below the level of the Mediterranean. These cities and a large tract of country around them, embracing, too, almost the entire valley of the Jordan, owed their destruction to their environment and not to their wickedness, as the ignorant suppose. The Jordan, which formerly flowed into the Gulf of Akaba, the northeastern extremity of the Red Sea, was arrested in its course and now finds an outlet in the Dead Sea.

In November, 1755, about 60,000 people perished when a portion of the city of Lisbon sank beneath the briny waves of the Atlantic Ocean. The city of Port Royal in Jamaica, West Indies, shared the same fate.

Kosmical disturbances as elevations and depressions of considerable magnitude are continually taking place on the western coast of South America, on the shores of Hudson Bay, in Northwestern India and numerous other places—all of which change more or less the centre of gravity of the earth and therefore also of the poles. A change of 101 feet in the position of the poles would cause a change of one second of arc in the latitude of places situated on the meridian passing through the old and new positions of the poles, while on places situated 90 degrees from this meridian no change would take place.

From this brief discussion, it is evident that kosmical changes—some of them of prodigious magnitude—have always operated and are continually operating to change the structural and dynamical features of our globe, and thus it is that "change and decay in all around we see" throughout the entire realm of material creation.

# Facts About the Earth.

According to Clark, the equatorial semi-diameter is 20,926,202 feet=3963.296 miles, and the polar semi-diameter is 20,854,895 feet=3950.738 miles. One degree of latitude at the pole=69.407 miles. One degree of latitude at the equator=68.704 miles.

POPULATION OF THE EARTH BY CONTINENTS.

| Continental Divisions. | Area in Square Miles. | Inhabitants. Number. | Inhabitants. Per Sq. Mile. | Continental Divisions. | Area in Square Miles. | Inhabitants. Number. | Inhabitants. Per Sq. Mile. |
|---|---|---|---|---|---|---|---|
| Africa | 11,513,579 | 170,000,000 | 14.76 | Australasia | 3,456,290 | 8,000,000 | 2.31 |
| America, N. | 8,037,714 | 110,000,000 | 13.68 | Europe | 3,754,282 | 400,000,000 | 106.54 |
| America, S. | 6,851,306 | 35,000,000 | 5.10 | Polar Reg. | 4,970,265 | 300,000 | 0.06 |
| Asia | 17,057,666 | 900,000,000 | 52.76 | Total | 55,641,102 | 1,623,300,000 | 29.22 |

The estimate in areas in the above table is the newest made by a competent geographer and is by Professor Supan of Gotha in his work entitled "Bevolkerung der Erde." It varies considerably from previous estimates. Central America and the West Indies are included in the estimate for North America. The estimate of population is from Whitaker's (London) Almanack for 1912, excepting that of the Polar Region.

Ravenstein's estimate of the earth's fertile region, in square miles, is 28,269,200; steppe, 13,901,000; desert, 4,180,000; polar regions, 4,888,800.

The population of the earth at the death of the Emperor Augustus, estimated by Bodio, was 54,000,000. The population of Europe hardly exceeded 50,000,000 before the fifteenth century.—*Mulhall.*

The proportion of females to 1,000 males in 1901 was: Great Britain, 1,062; France, 1,033; Germany, 1,032; United States, 959.—*Webb-Mulhall.*

The area and cubic contents of the earth, according to the data of Clark, given above, are: Surface, 196,971,984 square miles; cubic contents, 259,944,035,515 cubic miles.

Murray (Challenger expedition) states the greatest depth of the Atlantic Ocean at 27,366 feet; Pacific Ocean, 30,000 feet; Indian Ocean, 18,582 feet; Southern Ocean, 25,200 feet; Arctic Ocean, 9,000 feet. The United States Collier Nero obtained a depth of 31,614 feet in the Pacific Ocean, near Guam, November 14, 1899. The Atlantic Ocean has an area, in square miles, of 24,536,000; Pacific Ocean, 50,309,000; Indian Ocean, 17,084,000; Arctic Ocean, 4,781,000; Southern Ocean, 30,592,000.

HIGHEST AND LOWEST CONTINENTAL ALTITUDES.

| | Highest Point. | Elevation (ft.). | Lowest Point. | Below Sea Level (ft.). |
|---|---|---|---|---|
| North America | Mount McKinley, Alaska | 20,300 | Death Valley, California | 276 |
| South America | Mount Aconcagua, Chile-Argentina | 23,080 | Sea level | ..... |
| Europe | Mont Blanc, France | 15,782 | Caspian Sea, Russia | 86 |
| Asia | Mount Everest, India-China | 29,002 | Dead Sea, Palestine | 1,290 |
| Africa | Kibo Peak, German East Africa | 19,320 | Desert of Sahara | 150 |
| Australia | Mount Koscinsko, New South Wales | 7,328 | Lake Torrens, South Australia | 25 |

POPULATION OF THE EARTH ACCORDING TO RACE.
(Based on latest estimate by John Bartholomew, F. R. G. S., Edinburgh.)

| Race. | Location. | Number. | Race. | Location. | Number. |
|---|---|---|---|---|---|
| Indo-Germanic or Aryan (white) | Europe, Persia, etc. | 625,000,000 | Hottentot and Bushman (black) | South Africa | 150,000 |
| Mongolian or Turanian (yellow and brown) | Greater part of Asia | 630,000,000 | Malay and Polynesian (brown) | Australasia & Polynesia | 35,000,000 |
| Semitic or Hamitic (white) | North Africa, Arabia | 65,000,000 | American Indian (red) | North & So. America | 15,000,000 |
| Negro and Bantu (black) | Central Africa | 150,000,000 | Total | | 1,520,150,000 |

For population of the earth according to creed, see Religious Statistics.

The human family is subject to fifty principal governments. As to their form they may be classified as follows: *Absolute monarchies*, Abyssinia, Afghanistan, Morocco, Siam; *Limited monarchies*, Albania, Austria-Hungary, Belgium, British Empire, Bulgaria, Denmark, Germany, Greece, Italy, Japan, Montenegro, Netherlands, Norway, Persia, Roumania, Russia, Servia, Sweden, Spain, Turkey; *Republics*, Argentina, Bolivia, Brazil, Chile, China, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, France, Guatemala, Hayti, Honduras, Liberia, Mexico, Nicaragua, Panama, Paraguay, Peru, Portugal, Salvador, Switzerland, United States of America, Uruguay, Venezuela. Besides these are the undefined despotisms of Central Africa and a few insignificant independent States.

The average duration of human life is about 33 years. One-quarter of the people on the earth die before age 6, one-half before age 16, and only about 1 person of each 100 born lives to 65.

EUROPEAN LANGUAGES SPOKEN.

| Languages. | Number of Persons Spoken by. 1801. | Number of Persons Spoken by. 1911. | Proportion of the Whole. 1801. | Proportion of the Whole. 1911. | Languages. | Number of Persons Spoken by. 1801. | Number of Persons Spoken by. 1911. | Proportion of the Whole. 1801. | Proportion of the Whole. 1911. |
|---|---|---|---|---|---|---|---|---|---|
| English | 20,520,000 | 160,000,000 | 12.7 | 27.3 | Portuguese | 7,480,000 | 25,000,000 | 4.7 | 4.3 |
| French | 31,450,000 | 70,000,000 | 19.4 | 11.9 | Russian | 30,770,000 | 100,000,000 | 19.0 | 17.1 |
| German | 30,320,000 | 130,000,000 | 18.7 | 22.2 | | | | | |
| Italian | 15,070,000 | 50,000,000 | 9.3 | 8.6 | Total | 161,800,000 | 585,000,000 | 100.0 | 100.0 |
| Spanish | 26,190,000 | 50,000,000 | 16.2 | 8.6 | | | | | |

These estimates (that for 1801 being by Mulhall) exhibit the superior growth of the English language.

## Races of Mankind.

THE following is compiled from the arrangement by Ethnologist Figuier and others:

WHITE RACE.

| | | |
|---|---|---|
| European Branch. | Teutonic Family | Scandinavians, Germans, English. |
| | Latin Family | French, Spaniards, Italians, Moldo-Wallachians. |
| | Slavonian Family | Russians, Finns, Bulgarians, Servians, Magyars, Croats, Tchecks, Poles, Lithuanians. |
| | Greek Family | Greeks, Albanians. |
| Aramean Branch. | Libyan Family | Egyptians, Berbers. |
| | Semitic Family | Arabs, Jews, Syrians. |
| | Persian Family | Persians, Afghans, Kurds, Armenians, Ossetines. |
| | Georgian Family | Georgians. |
| | Circassian Family | Circassians, Mingrellans. |

YELLOW RACE.

| | | |
|---|---|---|
| Hyperborean Branch. | Lapp Family | Samoiede, Kamtschadale, Esquiman, Tenissian, Jukaghirite, and Koriak Families. |
| Mongolian Branch. | Mongol Family | Mongols, Kalmucks, Buriats. |
| | Tunguse Family | Tunguses, Manchus. |
| | Turk Family | Turcomans, Kirghis, Nogays, Osmanlis. |
| | Yakut Family | Yakuts. |
| Sinaic Branch. | Chinese Family | Chinese. |
| | Japanese Family | Japanese. |
| | Indo-Chinese Family | Burmese, Siamese. |

BROWN RACE.

| | | |
|---|---|---|
| Hindoo Branch. | Hindoo Family | Sikhs, Jats, Rajpoots, Mahrattas, Bengalese, Cingalese. |
| | Malabar Family | Malabars, Tamals, Telingas. |
| Ethiopian Branch. | Abyssinian Family | Abyssinians, Berabras, Gallas. |
| | Fellan Family | Fellans. |
| Malay Branch. | Malay Family | Malays, Javanese, Battas, Bougis, Maccassars, Dyaks, Togals. |
| | Polynesian Family | Maoris, Tongas, Tahitians, Pomotonans, Marquesans, Sandwichians. |
| | Micronesian Family | Ladrone, Caroline, and Mulgrave Islanders. |

RED RACE.

| | | |
|---|---|---|
| Southern Branch. | Andian Family | Quichuas (or Incas), Antis, Andians, Araucanians. |
| | Pampean Family | Patagonians, Puelches, Charruas, Tobas, Moxas, Abipons, etc. |
| | Guarani Family | Guaranis, Bocotudos. |
| Northern Branch. | Southern Family | Aztecs, Mayas, Lencas, Othomis, Tarascas, etc. |
| | Northeastern Family | Cherokees, Hurons, Iroquois, Sioux, Apaches, Comanches, Creeks, etc. |
| | Northwestern Family | Chinooks, Digger Indians, Nootkans, etc. |

BLACK RACE.

| | | |
|---|---|---|
| Western Branch. | Caffre Family | |
| | Hottentot Family | |
| | Negro Family | |
| Eastern Branch | Papuan Family | Fijians, New Caledonians, etc. |
| | Andaman Family | Andamans, Australians. |

## Earthquake Areas of the Earth.

MAJOR DE MONTESSUS DE BALORE, after years of labor, has drawn up a catalogue of 130,000 shocks, of which trustworthy details have been procured, and this indicates with some scientific accuracy how the symptoms of seismic activity are manifested over the earth's surface. The period of observation includes generally the last fifty years; but there is no reason to suppose that a longer time would materially affect the proportionate numbers. The appended figures, drawn from M. de Montessus's statistics, will give an idea of the general result:

| AREA. | Earthquakes. | AREA. | Earthquakes. | AREA. | Earthquakes. |
|---|---|---|---|---|---|
| Scandinavia | 646 | Greece | 10,306 | United States, Atlantic coast | 937 |
| British Isles | 1,139 | Russia | 258 | Mexico | 5,586 |
| France | 2,793 | Asia Minor | 4,451 | Central America | 2,739 |
| Spain and Portugal | 2,656 | India | 813 | West Indies | 2,561 |
| Switzerland | 3,895 | Japan | 27,562 | South America | 8,081 |
| Italy | 27,672 | Africa | 179 | Java | 2,155 |
| Holland and North Germany | 2,326 | Atlantic Islands | 1,704 | Australia and Tasmania | 83 |
| Sicily | 4,331 | United States, Pacific coast | 4,467 | New Zealand | 1,925 |

The most shaken countries of the world are Italy, Japan, Greece, South America (the Pacific coast), Java, Sicily, and Asia Minor. The lands most free from these convulsions are Africa, Australia, Russia, Siberia, Scandinavia, and Canada. As a rule, where earthquakes are most frequent they are most severe. But to this general statement there are exceptions—Indian shocks, though less numerous, being often very disastrous. Loss of life in many cases depends, however, on density of population rather than on the intensity of the earth movement. Numerically, also, France has registered more seismic tremors than Spain and Portugal, but France in historic times has experienced no earthquake disaster approaching the havoc wrought by the one calamity at Lisbon.

# The Geological Strata.

THE strata composing the earth's crust is divided by most geologists into two great classes: 1. Those generally attributed to the agency of water. 2. To the action of fire; which may be subdivided as follows: (*a*) Aqueous formations, stratified, rarely crystalline (sedimentary or fossiliferous rocks; metamorphic or unfossiliferous). (*b*) Igneous formations, unstratified, crystalline (volcanic, as basalt; plutonic, as granite).

The geological record is classified into five main divisions or periods: 1. The Archæan, lifeless and dawn of life. 2. The Palæozoic (ancient life). 3. The Mesozoic (middle life). 4. The Cenozoic (recent life). 5. Quaternary, the age in which man's first appearance is indicated.

| Periods. | | Eras. | | Series. | Subdivisions. |
|---|---|---|---|---|---|
| Quaternary Period. | Age of Primeval Man. | Quaternary or Post Tertiary. | | 3. Recent.<br>2. Champlain.<br>1. Glacial | Pleistocene. |

# Table of Magnetic Declinations

Or Variation of Compass for January, 1914—With the Annual Change between 1905 and 1910 for the Principal Places in the United States.

A plus (+) sign to the annual change denotes that the declination is increasing, and a minus (—) sign the reverse.

(Specially prepared for The World Almanac in the Office of the United States Coast and Geodetic Survey.)

## Rules for Foretelling the Weather.

ADAPTED FOR USE WITH ANEROID BAROMETERS.

A RISING BAROMETER.

A RAPID rise indicates unsettled weather.

A gradual rise indicates settled weather.

A rise with dry air and cold increasing in Summer indicates wind from the northward; and if rain has fallen, better weather may be expected.

A rise with moist air and a low temperature indicates wind and rain from the northward.

A rise with southerly winds indicates fine weather.

A STEADY BAROMETER.

With dry air and seasonable temperature indicates a continuance of very fine weather.

A FALLING BAROMETER.

A rapid fall indicates stormy weather.

A rapid fall with westerly wind indicates stormy weather from the northward.

A fall with a northerly wind indicates storm, with rain and hail in Summer, and snow in Winter.

A fall with increased moisture in the air, and heat increasing, indicates wind and rain from the southward.

A fall with dry air and cold increasing in Winter indicates snow.

A fall after very calm and warm weather indicates rain with squally weather.

The barometer rises for northerly winds, including from northwest by north to the eastward for dry, or less wet weather, for less wind, or for more than one of these changes, except on a few occasions, when rain, hail, or snow comes from the northward with strong wind.

The barometer falls for southerly wind, including from southeast by south to the westward, for wet weather, for stronger wind or for more than one of these changes, except on a few occasions, when moderate wind, with rain or snow, comes from the north ward.

The above printed rules are in use by the Seawanhaka Corinthian Yacht Club of New York.

DURATION OF DIFFERENT KINDS OF WEATHER IN THE SEVERAL STORMS—VICINITY OF NEW YORK.

| CRITICAL WINDS. | Clear Hours. | Cloudy Hours. | Rain Hours. | Clearing Hours. |
|---|---|---|---|---|
| South to Southwest | 9 | 8 | 8.3 | 14 |
| South to Southeast | 14 | 13.4 | 15.6 | 15.4 |
| East to Northeast | 20 | 17.6 | 31 | 20.6 |

### WEATHER WISDOM.

**SUNSET COLORS.**—A gray, lowering sunset, or one where the sky is green or yellowish-green, indicates rain. A red sunrise, with clouds lowering later in the morning, also indicates rain.

**HALO (SUN DOGS).**—By halo we mean the large circles, or parts of circles, about the sun or moon. A halo occurring after fine weather indicates a storm.

**CORONA.**—By this term we mean the small colored circles frequently seen around the sun or moon. A corona growing smaller indicates rain; growing larger, fair weather.

**RAINBOWS.**—A morning rainbow is regarded as a sign of rain; an evening rainbow of fair weather.

**SKY COLOR.**—A deep-blue color of the sky, even when seen through clouds, indicates fair weather; a growing whiteness, an approaching storm.

**FOGS.**—Fogs indicate settled weather. A morning fog usually breaks away before noon.

**VISIBILITY.**—Unusual clearness of the atmosphere, unusual brightness or twinkling of the stars, indicate rain.

**FROST.**—The first frost and last frost are usually preceded by a temperature very much above the mean.

### OBJECTS VISIBLE AT SEA-LEVEL IN CLEAR WEATHER.

The following table shows the distance at sea-level at which objects are visible at certain elevations.

| ELEVATION—FEET. | Miles. | ELEVATION—FEET. | Miles. | ELEVATION—FEET. | Miles. |
|---|---|---|---|---|---|
| 1 | 1.31 | 30 | 7.25 | 90 | 12.25 |
| 5 | 2.96 | 35 | 7.83 | 100 | 13 23 |
| 6 | 3.24 | 40 | 8 37 | 150 | 16.22 |
| 7 | 3.49 | 45 | 8 87 | 200 | 18.72 |
| 8 | 3.73 | 50 | 9.35 | 300 | 22.91 |
| 9 | 3.96 | 60 | 10.25 | 500 | 29.58 |
| 10 | 4.18 | 70 | 11.07 | 1,000 | 33.41 |
| 20 | 5.92 | 80 | 11.83 | 1 mile | 96.10 |
| 25 | 6.61 | | | | |

# Normal Temperature and Rainfall.

TABLE SHOWING THE NORMAL TEMPERATURE FOR JANUARY AND JULY, AND THE NORMAL ANNUAL PRECIPITATION AT WEATHER BUREAU STATIONS IN EACH OF THE STATES AND TERRITORIES, ALSO THE HIGHEST AND LOWEST TEMPERATURES EVER REPORTED FROM EACH OF SAID STATIONS, TO JANUARY 1, 1913.
(Prepared in the office of the Chief of the Weather Bureau, U. S. Department of Agriculture, for THE WORLD ALMANAC for 1914.)

| Minnesota | Mesabi Range (St. Louis Co.) | 1,920 | Washington | Mt. Rainier (Pierce Co.) | 14,363 |
| Mississippi | Holly Springs (Marshall Co.) | 600 | West Virginia | Spruce Knob (Pendleton Co.) | 4,800 |
| Missouri | Taum Sauk Mt. (Iron Co.) | 1,750 | Wisconsin | Rib Hill (Marathon Co.) | 1,940 |
| | | | Wyoming | Gannett Peak (Fremont Co.) | 13,785 |

The lowest point of dry land in United States is in Death Valley, Cal., 276 feet below sea level.

NOTE.—The above table was prepared for THE WORLD ALMANAC by the Topographic branch of the United States Geological Survey. It should be stated in connection with this table that it presents only points whose heights are matters of record, and that in several cases in the high mountain region of the far West and the Pacific Slope it is thought there may be higher points within the State or Territory whose heights are not yet known with accuracy, and consequently cannot be given.

This table was revised by the United States Geological Survey to October 1, 1913.

# Weather Flags

## OF THE WEATHER BUREAU, U. S. DEPARTMENT OF AGRICULTURE.

THE Weather Bureau furnishes, when practicable, for the benefit of all interests dependent upon weather conditions, the "Forecasts" which are prepared daily at the Central Office in Washington, D. C., and certain designated stations. These forecasts are telegraphed to stations of the Weather Bureau, railway officials, postmasters, and many others, to be communicated to the public by telegraph, telephone and mail or by means of flags or steam whistles. The flags adopted for this purpose are five in number, and of the forms and colors indicated below:

EXPLANATION OF WEATHER FLAGS.

| No. 1. White Flag. | No. 2. Blue Flag. | No. 3. White and Blue Flag. | No. 4. Black Triangular Flag. | No. 5. White Flag with black square in centre. |
|---|---|---|---|---|
| Fair weather. | Rain or snow. | Local rain or snow. | Temperature. | Cold wave. |

When number 4 is placed above number 1, 2 or 3, it indicates warmer; when below, colder; when not displayed, the temperature is expected to remain about stationary. During the late Spring and early Fall the cold-wave flag is also used to indicate anticipated frosts.

WHISTLE SIGNALS.

A warning blast of from fifteen to twenty seconds' duration is sounded to attract attention. After this warning the longer blasts (of from four to six seconds duration) refer to weather, and shorter blasts (of from one to three seconds duration) refer to temperature; those for weather are sounded first.

| Blasts. | Indicate. | Blasts. | Indicate. |
|---|---|---|---|
| One long | Fair weather. | One short | Lower temperature. |
| Two long | Rain or snow. | Two short | Higher temperature. |
| Three long | Local rain or snow. | Three short | Cold wave. |

By repeating each combination a few times, with intervals of ten seconds, liability to error in reading the signals may be avoided.

As far as practicable the forecast messages are telegraphed at the expense of the Weather Bureau; but if this is impracticable, they are furnished at the regular commercial rates and sent "collect." In no case are the forecasts sent to a second address in any place, except at the expense of the applicant.

Persons desiring to display the flags or sound the whistle signals for the benefit of the public should communicate with the Weather Bureau officials in charge of the central stations of their respective States, which are as follows:

Alabama, Montgomery.
Arizona, Phœnix.
Arkansas, Little Rock.
California, San Francisco.
Colorado, Denver.
Florida, Jacksonville.
Georgia, Atlanta.
Idaho, Boisé.
Illinois, Springfield.
Indiana, Indianapolis.
Iowa, Des Moines
Kansas, Topeka.
Kentucky, Louisville.
Louisiana, New Orleans.
Maryland, Baltimore (for Delaware and Maryland).
Massachusetts, Boston (for New England).
Michigan, Grand Rapids.
Minnesota, Minneapolis.
Mississippi, Vicksburg.
Missouri, Columbia.
Montana, Helena.
Nebraska, Lincoln.
Nevada, Reno.
New Jersey, Trenton.
New Mexico, Santa Fé.
New York, Ithaca.
North Carolina, Raleigh.
North Dakota, Bismarck.
Ohio, Columbus.
Oklahoma, Oklahoma.
Oregon, Portland.
Pennsylvania, Philadelphia.
South Carolina, Columbia.
South Dakota, Huron.
Tennessee, Nashville.
Texas, Houston.
Utah, Salt Lake City.
Virginia, Richmond.
Washington, Seattle.
West Virginia, Parkersburg.
Wisconsin, Milwaukee.
Wyoming, Cheyenne.

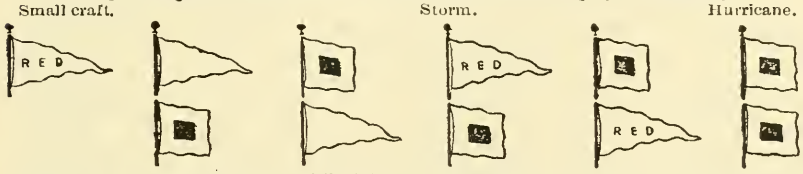
# The Ancient and Modern Year.

THE Athenians began the year in June, the Macedonians in September, the Romans first in March and afterward in January, the Persians on August 11, the ancient Mexicans on February 23, the Mohammedans in July. The Chinese year, which begins early in February, is similar to the Mohammedan in having 12 months of 29 and 30 days alternately; but in every nineteen years there are seven years which have 13 months. This is not quite correct, and the Chinese have therefore formed a cycle of 60 years, in which period 22 intercalary months occur.

# Small Craft, Storm and Hurricane Warnings

**OF THE WEATHER BUREAU, U. S. DEPARTMENT OF AGRICULTURE.**

All square flags shown here are red with black centre when displayed as warnings.



*Small Craft Warning*—A red pennant indicates that moderately strong winds are expected.

*Storm Warning*—A red flag with a black centre indicates that a storm of marked violence is expected.

The pennants displayed with the flags indicate the direction of the wind; white, westerly; red, easterly. The pennant above the flag indicates that the wind is expected to blow from the northerly quadrants; below, from the southerly quadrants.

By night a red light indicates easterly winds, and a white light below a red light westerly winds.

*Hurricane Warning*—Two red flags with black centres, displayed one above the other, indicate the expected approach of a tropical hurricane, and also one of those extremely severe and dangerous storms which occasionally move across the Lakes and Northern Atlantic coast.

Neither small craft nor hurricane warnings are displayed at night.

# Velocity of Winds in the United States.

AVERAGE hourly velocity of the wind at selected stations of the United States Weather Bureau, also the highest velocity ever reported for a period of five minutes (Prepared by Chief of the U. S. Weather Bureau, and revised to January 1, 1913, for THE WORLD ALMANAC.)

# Loss by Lightning in the United States.

THE Weather Bureau of the United States Department of Agriculture in October, 1900, issued a bulletin giving these facts: In 1899 the total number of strokes of lightning which caused damage was 5,527; number of buildings injured, 6,256; value of property lost, $3,016,520; number of deaths by lightning during the year, 563; number of persons injured, 820; number of live stock killed in the fields, 4,251; value, $129,955. These are the latest available statistics.

The Chronicle Fire Tables record 3,012 fires caused by lightning in the United States in 1902, the property loss occasioned thereby being $3,396,810. These are the latest reported statistics on the subject.

HIGH-TIDE TABLES—*Continued.*

TIME OF HIGH WATER AT POINTS ON THE ATLANTIC COAST.

The local time of high water at the following places may be found approximately for each day by adding to or subtracting from the time of high water at Governor's Island, N. Y., the hours and minutes annexed.

| | | H. | M. | | | H. | M. |
|---|---|---|---|---|---|---|---|
| Albany, N. Y. | add | 9 | 31 | New Haven, Ct. | add | 3 | 1 |
| Annapolis, Md. | add | 8 | 57 | New London, Ct. | add | 1 | 22 |
| Atlantic City, N. J. | sub. | | 20 | Newport, R. I. | sub. | | 22 |
| Baltimore, Md. | add | 10 | 52 | Norfolk, Va. | add | | 58 |
| Bar Harbor, Me. | add | 2 | 46 | Norwich, Ct. | add | 2 | 0 |
| Beaufort, S. C. | sub. | | 8 | Old Point Comfort, Va. | add | | 39 |
| Block Island, R. I. | sub. | | 34 | Philadelphia, Pa. | add | 5 | 41 |
| Boston, Mass. | add | 3 | 22 | Plymouth, Mass. | add | 3 | 12 |
| Bridgeport, Ct. | add | 3 | [illegible] | Point Lookout, Md. | add | 4 | 49 |
| Bristol, R. I. | sub. | | 14 | Portland, Me. | add | 3 | 10 |
| Cape May, N. J. | add | | 10 | Portsmouth, N. H. | add | 3 | 16 |
| Charleston, S. C. | sub. | | 42 | Poughkeepsie, N. Y. | add | 3 | 51 |
| Eastport, Me. | add | 3 | 0 | Providence, R. I. | add | | 7 |
| Fernandina, Fla. | sub. | | 18 | Richmond, Va. | add | 8 | 48 |
| Gloucester, Mass. | add | 2 | 55 | Rockaway Inlet, N. Y. | sub. | | 25 |
| Hell Gate Ferry, East River, N. Y. | add | 1 | 53 | Rockland, Me. | add | 3 | 1 |
| Isles of Shoals, N. H. | add | 3 | 11 | Rockport, Mass. | add | 2 | 50 |
| Jacksonville, Fla. | add | | 37 | Salem, Mass. | add | 3 | 9 |
| Key West, Fla. | add | 1 | 24 | Sandy Hook, N. J. | sub. | | 32 |
| League Island, Pa. | add | 5 | 23 | Savannah, Ga. | add | | 7 |
| Marblehead, Mass. | add | 3 | 2 | Southport (Smithville), N. C. | sub. | | 43 |
| Nahant, Mass. | add | 3 | 2 | Vineyard Haven, Mass. | add | 3 | 36 |
| Nantucket, Mass. | add | 4 | 21 | Washington, D. C. | add | 12 | 1 |
| Newark, N. J. | add | | 54 | Watch Hill, R. I. | add | | 42 |
| New Bedford, Mass. | sub. | | 10 | West Point, N. Y. | add | 2 | 47 |
| Newburyport, Mass. | add | 3 | 16 | Wilmington, N. C. | add | 1 | 0 |

EXAMPLE—To find the approximate time of high tide at Atlantic City, N. J., on any day, find first the time of high water at New York under the desired date, and then subtract 20 minutes, as in the above table; the result is the time of high water required.

AVERAGE RISE AND FALL OF TIDE.

| Places | Feet. | Inches. | Places. | Feet. | Inches | Places. | Feet. | Inches. |
|---|---|---|---|---|---|---|---|---|
| Baltimore, Md. | 1 | 3 | New London, Ct. | 3 | 9 | San Diego, Cal. | 3 | 7 |
| Boston, Mass. | 9 | 8 | New Orleans, La. | None | None | Sandy Hook, N. J. | 4 | 7 |
| Charleston, S. C. | 5 | 1 | Newport, R. I. | 9 | 8 | San Francisco, Cal. | 4 | 9 |
| Eastport, Me. | 18 | 2 | New York, N. Y. | 4 | 4 | Savannah, Ga. | 6 | 5 |
| Galveston, Tex. | 1 | 1 | Old Point Comf't, Va. | 2 | 5 | Seattle, Wash. | 12 | 2 |
| Key West, Fla. | 1 | 2 | Philadelphia, Pa. | 6 | 0 | Tampa, Fla. | 2 | 2 |
| Mobile, Ala. | 1 | 2 | Portland, Me. | 9 | 1 | Washington, D.C. | 2 | 9 |

Highest tide at Eastport, Me., 218 inches. Lowest tide at Galveston, Tex., 13 inches.

# Lifeboat Requirements.

As announced by the United States Steamboat Inspection Service in Bureau Circular of June 29, 1912, and as amended in circular letter of September 13, 1912:

All pleasure steamers, and all other steamers over 150 tons, but not exceeding 750 tons, limited by their certificates of inspection to routes not more than 15 miles from any harbor, shall not be required to have more than one of the lifeboats to be of 180 cubic feet capacity. Nothing, however, in this proviso shall exempt any such steamer from carrying the aggregate cubic feet of lifeboat capacity required by the rules.

All steamers other than steamers carrying passengers, except as otherwise provided for in the rules, must be equipped with lifeboats of sufficient capacity to accommodate at one time all persons on board. One-half of such equipment may be in approved liferafts or approved collapsible lifeboats

Ocean steamers carrying passengers must be equipped with lifeboats of sufficient capacity to accommodate at one time all persons on board, including passengers and crew. One-half of such lifeboat equipment may be in approved liferafts or approved collapsible lifeboats.

Coastwise steamers carrying passengers must be equipped with lifeboats of sufficient capacity to accommodate at one time all persons on board, including passengers and crew: Provided, however, that such steamers navigating during the interval from the fifteenth day of May to the fifteenth day of September in any one year, both dates inclusive, will be required to be equipped with lifeboats of only such capacity as will be sufficient to accommodate at one time at least 60 per cent. of all persons on board, including passengers and crew; two-thirds of such required lifeboat equipment throughout the year may be in approved liferafts or approved collapsible lifeboats.

Lake, bay and sound steamers carrying passengers and navigating the waters of the lakes, bays and sounds tributary to the Pacific coast, the Atlantic coast south of the 33d parallel of north latitude and the Gulf of Mexico must be equipped with lifeboats of sufficient capacity to accommodate at one time at least 30 per cent. of all persons on board, including passengers and crew: Provided, however, that such steamers navigating routes lying at all points within a distance of five miles from land, or over waters whose depth is not sufficient to entirely submerge the vessel in case of disaster, will be required to be equipped with lifeboats of only such capacity as will be sufficient to accommodate at one time at least 10 per cent. of all persons on board, including passengers and crew. Three-fourths of the lifeboat capacity required on lake, bay and sound steamers may be in approved liferafts or approved collapsible lifeboats.

River steamers carrying passengers must be equipped with lifeboats of sufficient capacity to accommodate at one time at least 10 per cent. of all persons on board, including passengers and crew. Three-fourths of such lifeboat equipment may be in approved liferafts or approved collapsible lifeboats.

The navigation of ferry boats must be confined to the ferry routes specified in the certificate of inspection, but such vessels may be permitted under excursion permits, to go beyond their authorized routes with passengers only, or without such permit to lighten or relieve vessels in distress. When any ferry boat leaves her ferry route and carries passengers she shall be required to carry the same officers, crew, and equipment, as required of other steamers carrying passengers.

# A Table of Principal American Rivers.

| Names. | Sources. | Mouths. | Length Miles. |
|---|---|---|---|
| Alabama | Junction of Coosa and Talapoosa, Ala | Mobile River | 176 |
| Alleghany | Allegany County, N. Y | Ohio River | 460 |

* At Buffalo. The record in the above table is kept by the State Superintendent of Public Works.

# Seed Planting in the United States.

(Compiled from reports of the Department of Agriculture.)

| Kind of Crop. | Date of Planting. | Best Soil. | Amount of Manure per Acre. | Amount of Seed per Acre (1). | Weeks to Maturity. |
|---|---|---|---|---|---|
| NEW ENGLAND. | | | | | |
| Corn | May 10 to 30 | Sandy or clay loam | 8 to 12 tons | 8 to 12 qts | 14-17 |
| Wheat | Fall or Spring | Clay loam | 18 tons | 2 bush | 20 |
| Oats | Apr. to May | Strong loam | 6 to 8 tons | 2 to 3 bush | 11-15 |
| Barley | Apr. to June 20 | Strong loam | 7 to 8 tons | 2 to 3 bush | 10-15 |
| Rye | Apr. to May, Sept. | Medium loam | 7 to 8 tons | 5 to 6 pecks | 40 |
| Buckwheat | June 1 to 20 | Light loam | 4 to 6 tons | 1 to 1¼ bush | 10-15 |
| White beans | May to June | Sandy loam | 7 to 8 tons | 8 to 16 qts | 8-14 |
| Potatoes | Apr. 15 to May 1 | Rich loam | 15 to 20 tons | 8 to 20 bush | 12-20 |
| Turnips | July 1 to Aug. 3 | Sandy loam | 10 tons | 1 lb | 10 |
| Mangels | Apr. 15 to May 5 | Strong heavy loam | 8 to 15 tons | 4 to 6 lbs | 17-22 |
| Tobacco | Seed bed Apr | Sandy loam | 8 to 12 tons | | 9-12 |
| Hay | | | | | |
| MIDDLE STATES. | | | | | |
| Corn | Apr. 20 to May 30 | Medium loam | 8 to 12 tons manure | 6 to 8 qts | 16-18 |
| Wheat | Sept. 20 to Oct. 20 | Loam | 8 tons; 300 lbs. fer. | 2 bush | 41-43 |
| Oats | Mar. to May | Moist clay loam | 8 tons; 300 lbs. fer. | 2 to 2½ bush | 16-17 |
| Barley | Mar. to May | Clay loam | 8 tons; 300 lbs. fer. | 2 to 2½ bush | 13-16 |
| Rye | Sept. 1 to Oct. 1 | Sand or gravel loam | 8 tons; 300 lbs. fer. | 1½ bush | 40-43 |
| Buckwheat | June to July | Loam | 5 tons | ½ to 1½ bush | 8-10 |
| White beans | May to June | Sandy loam | 8 tons | 1½ bush | 13-14 |
| Potatoes | Mar. to May | Loam | 10 to 18 tons | 8 to 15 bush | 14-22 |
| Sweet potatoes | May to June | Sandy loam | | 10 to 12 bush | 10-15 |
| Cabbage | Mar. to July | Clay or sandy loam | 300 to 600 lbs. fer. | 4 to 8 oz | 8-15 |
| Turnips | July | Loam | | 2 to 5 lbs | 10-12 |
| Mangels | May | Loam | 10 to 20 tons | 10 to 15 bush | 15-18 |
| Flax | May | Limestone loam | | 20 qts | 8-10 |
| Tobacco | Seed bed Mar | Sandy loam | Commercial fer. | | 15-20 |
| Hay, timothy | Aug. to Oct | Clay loam | | 6 to 8 qts | |
| Hay, clover | Feb. to Apr. | Clay loam | | 6 qts | |
| CENTRAL AND WESTERN STATES. | | | | | |
| Corn | Apr. 1 to June 1 | Black or sandy loam | 5 to 10 tons | 6 qts | 16-20 |
| Wheat | Fall or Spring | Strong loam | 8 tons | 2 bush | 40-42 |
| Oats | Apr. 1 to May 1 | Clay loam | 8 tons | 2 to 3 bush | 12-14 |
| Barley | Fall or Spring (1). | Clay loam | 8 tons | 2 bush | 11-13 |
| Rye | Sept. 1 to 30 | Light loam | 8 tons | 1 to 2 bush | 35-40 |
| Buckwheat | June | Clay loam | 5 tons | 1 to 2 bush | 10-12 |
| White beans | May 10 to June 10. | Clay loam | 8 tons | 1½ bush | 12 |
| Potatoes | Mar. 15 to June 1 | Sandy loam | 5 to 10 tons | 5 to 10 bush | 10-20 |
| Turnips | July 15 to Aug. 30. | Loam or muck | 8 to 10 tons | 1 to 6 lbs | 10-16 |
| Mangels | Apr. 1 to May 15 | Sandy loam | 8 to 12 tons | 6 to 8 lbs | 22-24 |
| Flax | Mar 15 to May 15. | Loam | 10 to 15 tons | 2 to 3 pecks | 15-20 |
| Tobacco | Seed bed, Mar | Sandy loam | 8 to 10 tons | Oz. to 6 sq. rd. | 15-18 |
| Hay | Apr. to May | Clay loam | 10 tons | 8 to 15 lbs | |
| SOUTHERN STATES. | | | | | |
| Cotton | Feb. to May 15 | Sandy loam (2) | | 1 to 3 bush | 20-30 |
| Corn | Feb. to June | Rich loam | 10 bush. cot. seed | 8 qts | 18-20 |
| Wheat | Sept. to Nov | Clay loam (2) | 8 tons | 2 bush | 43 |
| Oats | Feb., May, Sept. | Clay loam (2) | 8 to 10 tons | 2½ bush | 17 |
| Barley | Apr. to May | Clay loam (2) | 8 to 10 tons | 2½ bush | 17 |
| Rye | Sept. to Oct | Clay loam (2) | 10 tons | 1½ bush | 43 |
| White beans | Mar. to May | Light loam | 8 tons | 1 to 2 bush | 7-8 |
| Cabbage | Oct., Mar. to May. | Light loam | 6 to 10 tons | ¼ to ½ lbs | 14 |
| Watermelons | Mar. 1 to May 10 | Rich, light loam | 5 tons; 300 lbs. fer. | 2 to 7 lbs | 16-20 |
| Onions | Feb. 1 to Apr. 10 | Loam or muck | | | 16-24 |
| Potatoes | Jan., Feb. to Apr. | Light loose loam | 8 to 12 tons | 8 to 10 bush | 11-15 |
| Sweet potatoes | May to June | Sandy loam | | 10 to 12 bush | 12-15 |
| Pumpkins | Apr. 1 to May 1 | Rich, light loam | | 4 to 7 lbs | 17-20 |
| Tomatoes | Jan. 1 to Feb. 19 | Rich, sandy loam | | 4 to 9 oz | 14-20 |
| Turnips | Feb., Aug., Apr. | Rich, light loam | | 2 to 6 lbs | 8-12 |
| Tobacco | Seed bed, Mar | Sandy loam | 8 to 15 tons | oz. to 6 sq. rd. | 18-20 |
| Cow peas | May 1 to July 15 | Sandy loam | 200 to 300 lbs. phos. | 2 to 5 pecks | 6-8 |

(1) The standard varieties of seed planted in the several sections of the United States are as follows: Corn—New England, leaming, sanford, flint; Middle States, leaming, white dent, yellow dent; Central and Western States, leaming, sanford flint, white dent; Southern States, hickory king, goardseed, Cox prolific. Wheat—Middle States, fultz; Central and Western States, fultz, poole, fife; Southern States, fulcaster. Oats—New England, white; Middle States, white, black; Central and Western States, gray Norway, silver mine, Russian; Southern States, Texas rustproof. Barley—Middle States, mansbury; Southern States, Tennessee Winter. Rye—New England, white; Middle States, white, Winter; Central and Western States, Winter; Southern States, excelsior Winter, Buckwheat—Middle States, silver hull; Central and Western States, silver hull. Potatoes—New England, green mountain, carmen 3, rose; Middle States, rose, carmen 3, rural 2; Central and Western States, hebron, rural, early rose, early Ohio. Tobacco—Central and Western States, yellow prior, Spanish, white burley. Hay, clover—Middle States, medium red. Sweet Potatoes—Middle States, yellow Jersey; Southern States, yellow Jersey. Cotton—Southern States, Texas stormproof. Spring wheat is to some extent grown in Ohio, Indiana, Illinois and many other States. It matures in eighteen to twenty weeks

(2) In Texas the black loam is a good soil for cotton, corn, wheat and most other field crops.

# Metric System of Weights and Measures.

THE METRIC SYSTEM has been adopted by Mexico, Brazil, Chile, Peru, etc., and except Russia and Great Britain, where it is permissive, by all European nations. Various names of the preceding systems are, however, frequently used: In Germany, ½ kilogram = 1 pound; in Switzerland, 3-10 of a metre = 1 foot, etc. If the first letters of the prefixes *deka, hecto, kilo, myria*, from the Greek, and *deci, centi, mili*, from the Latin, are used in preference to our plain English, 10, 100, etc., it is best to employ capital letters for the multiples and small letters for the subdivisions, to avoid ambiguities in abbreviations: 1 dekametre or 10 metres = 1 dm.; 1 decimetre or 1-10 of a metre = 1 dm.

The METRE, unit of length, is nearly the ten-millionth part of a quadrant of a meridian, of the distance between Equator and Pole. The International Standard Metre is, practically, nothing else but a length defined by the distance between two lines on a platinum-iridium bar at 0° Centigrade, deposited at the International Bureau of Weights and Measures, Paris, France.

The LITRE, unit of capacity, is derived from the weight of one kilogram pure water at greatest density, a cube whose edge is one-tenth of a metre and, therefore, the one-thousandth part of a metric ton.

The GRAM, unit of weight, is a cube of pure water at greatest density, whose edge is one-hundredth of a metre, and, therefore, the one-thousandth part of a kilogram, and the one-millionth part of a metric ton.

---

The Metric System was legalized in the United States on July 28, 1866, when Congress enacted as follows:

"The tables in the schedule hereto annexed shall be recognized in the construction of contracts, and in all legal proceedings, as establishing, in terms of the weights and measures now in use in the United States, the equivalents of the weights and measures expressed therein in terms of the metric system, and the tables may lawfully be used for computing, determining, and expressing in customary weights and measures the weights and measures of the metric system."

The following are the tables annexed to the above:

MEASURES OF LENGTH.

| Metric Denominations and Values. | | Equivalents in Denominations in Use. | |
|---|---|---|---|
| Myriametre | 10,000 metres. | 6.2137 | miles. |
| Kilometre | 1,000 metres. | 0.62137 | mile, or 3,280 feet 10 inches. |
| Hectometre | 100 metres. | 328 | feet 1 inch. |
| Dekametre | 10 metres. | 393 7 | inches. |
| Metre | 1 metre. | 39.37 | inches. |
| Decimetre | 1-10 of a metre. | 3.937 | inches. |
| Centimetre | 1-100 of a metre. | 0.3937 | inch. |
| Millimetre | 1-1000 of a metre. | 0.0394 | inch. |

MEASURES OF SURFACE.

| Metric Denominations and Values. | | Equivalents in Denominations in Use. | |
|---|---|---|---|
| Hectare | 10,000 square metres. | 2.471 | acres. |
| Are | 100 square metres. | 119.6 | square yards. |
| Centare | 1 square metre. | 1,550 | square inches. |

MEASURES OF CAPACITY.

| Metric Denominations and Values. | | | Equivalents in Denominations in Use. | |
|---|---|---|---|---|
| Names. | Number of Litres. | Cubic Measure. | Dry Measure. | Liquid or Wine Measure. |
| Kilolitre or stere. | 1,000 | 1 cubic metre | 1 308 cubic yards | 264.17 gallons. |
| Hectolitre | 100 | 1-10 of a cubic metre | 2 bush. and 3.35 pecks | 26.417 gallons. |
| Dekalitre | 10 | 10 cubic decimetres | 9.08 quarts | 2.6417 gallons. |
| Litre | 1 | 1 cubic decimetre | 0.908 quart | 1.0567 quarts. |
| Decilitre | 1-10 | 1-10 of a cubic decimetre. | 6.1022 cubic inches | 0.845 gill. |
| Centilitre | 1-100 | 10 cubic centimetres | 0.6102 cubic inch | 0.338 fluid ounce. |
| Millilitre | 1-1000 | 1 cubic centimetre | 0.061 cubic inch | 0.27 fluid dram. |

METRIC SYSTEM—*Continued.*

## WEIGHTS.

| Metric Denominations and Values. | | | Equivalents in Denominations in Use. |
|---|---|---|---|
| Names. | Number of Grams. | Weight of What Quantity of Water at Maximum Density. | Avoirdupois Weight. |
| Miller or tonneau | 1,000,000 | 1 cubic metre | 2204.6 pounds. |
| Quintal | 100,000 | 1 hectolitre | 220.46 pounds. |
| Myriagram | 10,000 | 10 litres | 22.046 pounds. |
| Kilogram or kilo | 1,000 | 1 litre | 2.2046 pounds. |
| Hectogram | 100 | 1 decilitre | 3.5274 ounces. |
| Dekagram | 10 | 10 cubic centimetres | 0.3527 ounce. |
| Gram | 1 | 1 cubic centimetre | 15.432 grains. |
| Decigram | 1-10 | 1-10 of a cubic centimetre | 1.5432 grains. |
| Centigram | 1-100 | 10 cubic millimetres | 0.1543 grain. |
| Milligram | 1-1000 | 1 cubic millimetre | 0.0154 grain. |

## TABLES FOR THE CONVERSION OF METRIC WEIGHTS AND MEASURES INTO CUSTOMARY UNITED STATES EQUIVALENTS AND THE REVERSE.

From the legal equivalents are deduced the following tables for converting United States weights and measures:

METRIC TO CUSTOMARY. CUSTOMARY TO METRIC.

### Linear Measure.

| *Metres=Ins.* | *Metres=Feet.* | *Metres=Yards.* | *Kilometres=Miles.* | *Ins.=Centimetres* | *Feet=Metres.* | *Yards=Metres.* | *Miles=Kilometres.* |
|---|---|---|---|---|---|---|---|
| 1= 39.37 | 1= 3.28083 | 1=1.093611 | 1=0.62137 | 1= 2.54 | 1=0.304801 | 1=0.914402 | 1= 1.60935 |

## THE METRIC SYSTEM SIMPLIFIED.

The following tables of the metric system of weights and measures have been simplified as much as possible for THE WORLD ALMANAC by omitting such denominations as are not in practical, everyday use in the countries where the system is used exclusively.

### TABLES OF THE SYSTEM.

**Length.**—The denominations in practical use are millimetres (mm.), centimetres (cm.), metres (m.), and kilometres (km.).

10 mm. = 1 cm.; 100 cm. = 1 m.; 1,000 m. = 1 km. NOTE.—A decimetre is 10 cm.

**Weight.**—The denominations in use are grams (g.), kilos* (kg.), and tons (metric tons).

1,000 g. = 1 kg.; 1,000 kg. = 1 metric ton.

**Capacity.**—The denominations in use are cubic centimetres (c. c.) and litres (l.).

1,000 c. c. = 1 l. NOTE.—A hectolitre is 100 l. (seldom used).

Relation of capacity and weight to length: A cubic decimetre is a litre, and a litre of water weighs a kilo.

### APPROXIMATE EQUIVALENTS.

A metre is about a yard; a kilo is about 2 pounds; a litre is about a quart; a centimetre is about ½ inch; a metric ton is about same as a ton; a kilometre is about ⅝ mile; a cubic centimetre is about a thimbleful; a nickel weighs about 5 grams.

### PRECISE EQUIVALENTS.

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| 1 acre | = .40 | hectare | .4 047 | 1 mile | = 1.6 | kilometres | 1.609 |
| 1 bushel | = 35. | litres | 35. 24 | 1 millimetre | = .039 | inch | .0394 |
| 1 centimetre | = .39 | inch | .3937 | 1 ounce (av'd) | = 28 | grams | 28.35 |
| 1 cubic centimetre | = .061 | cubic inch | .0610 | 1 ounce (Troy) | = 31 | grams | 31.10 |
| 1 cubic foot | = .028 | cubic metre. | .0283 | 1 peck | = 8.8 | litres | 8.809 |
| 1 cubic inch | = 16 | cubic cent. † | 16.39 | 1 pint | = .47 | litre | .4732 |
| 1 cubic metre | = 35 | cubic feet | 35.31 | 1 pound | = .45 | kilo | .4536 |
| 1 cubic metre | = 1.3 | cubic yards | 1.308 | 1 quart (dry) | = 1.1 | litres | 1.101 |
| 1 cubic yard | = .76 | cubic metre | .7645 | 1 quart (liquid) | = .95 | litre | .9464 |
| 1 foot | = 30 | centimetres | 30.48 | 1 sq. centimetre. | = .15 | sq. inch | .1550 |
| 1 gallon | = 3.8 | litres | 3.785 | 1 sq. foot | = .093 | sq. metre | .0929 |
| 1 grain | = .065 | gram | .0648 | 1 sq. inch | = 6.5 | sq. c'timetr's. | 6.452 |
| 1 gram | = 15 | grains | 15.43 | 1 sq. metre | = 1.2 | sq. yards | 1.196 |
| 1 hectare | = 2.5 | acres | 2.471 | 1 sq. metre | = 11 | sq. feet | 10.76 |
| 1 inch | = 25 | millimetres. | 25.40 | 1 sq. yard | = .84 | sq. metre | .8361 |
| 1 kilo | = 2.2 | pounds | 2.205 | 1 ton (2,000 lbs.) | = .91 | metric ton | .9072 |
| 1 kilometre | = .62 | mile | .6214 | 1 ton (2,240 lbs.) | = 1 | metric ton | 1.017 |
| 1 litre | = .91 | quart (dry) | .9081 | 1 ton (metric) | = 1.1 | ton (2,000 lbs.) | 1.102 |
| 1 litre | = 1.1 | quarts (liq'd) | 1.057 | 1 ton (metric) | = .98 | ton (2,240 lbs.) | .9842 |
| 1 metre | = 3.3 | feet | 3.281 | 1 yard | = .91 | metre | .9144 |

* Contraction for kilogram. † Centimetres.

# Minimum Weights of Produce.

THE following are minimum weights of certain articles of produce according to the laws of the United States:

| | Per Bushel. | | Per Bushel. | | Per Bushel. |
|---|---|---|---|---|---|
| Wheat | 60 lbs. | White Potatoes | 60 lbs. | Hungarian Grass Seed | 50 lbs. |
| Corn, in the ear | 70 " | Sweet Potatoes | 55 " | Timothy Seed | 45 " |
| Corn, shelled | 56 " | Onions | 57 " | Blue Grass Seed | 44 " |
| Rye | 56 " | Turnips | 55 " | Hemp Seed | 44 " |
| Buckwheat | 48 " | Dried Peaches | 33 " | Salt (see note below). | |
| Barley | 48 " | Dried Apples | 26 " | Corn Meal | 48 " |
| Oats | 32 " | Clover Seed | 60 " | Ground Peas | 24 " |
| Peas | 60 " | Flax Seed | 56 " | Malt | 34 " |
| White Beans | 60 " | Millet Seed | 50 " | Bran | 20 " |
| Castor Beans | 46 " | | | | |

SALT.—Weight per bushel as adopted by different States ranges from 50 to 80 pounds. Coarse salt in Pennsylvania is reckoned at 80 pounds, and in Illinois at 50 pounds per bushel. Fine salt in Pennsylvania is reckoned at 62 pounds, in Kentucky and Illinois at 55 pounds per bushel.

# Measures and Weights of Great Britain.

THE measures of length and the weights are nearly, practically, the same as those in use in the United States. The English ton is 2,240 lbs. avoirdupois, the same as the long ton, or shipping ton of the United States. The English hundredweight is 112 lbs. avoirdupois, the same as the long hundredweight of the United States. The English stone is usually equal to one-eighth hundredweigh of 112 lbs., or 14 lbs. avoirdupois. The metre has been legalized at 39.37079 inches, but the length of 39.370432 inches, as adopted by France, Germany, Belgium, and Russia, is frequently used. The Imperial gallon, the basis of the system of capacity, involves an error of about 1 part in 1,836; 10 lbs. of water = 277.123 cubic inches. (A late authority gives the weight of the Imperial gallon as 10.017 pounds and of the United States gallon as 8.345 pounds.)

The English statute mile is 1,760 yards or 5,280 feet. The following are measures of capacity:

| NAMES. | | Pounds of Water. | | Cubic Inches. | Litres. | United States Equivalents. |
|---|---|---|---|---|---|---|
| 4 gills | = 1 pint | 1.25 | | 34.66 | 0.56793 | 1.20032 liquid pints. |
| 2 pints | = 1 quart | 2.5 | | 69.32 | 1.13586 | 1.20032 " quarts. |
| 2 quarts | = 1 pottle | 5 | | 138.64 | 2.27173 | 2.40064 " " |
| 2 pottles | = 1 gallon | 10 | | 277.27 | 4.54346 | 1.20032 " gallons. |
| 2 gallons | = 1 peck | 20 | Dry measure | 554.55 | 9.08692 | 1.03152 dry pecks. |
| 4 pecks | = 1 bushel | 80 | | 2218.19 | 36.34766 | 1.03152 " bushels. |
| 4 bushels | = 1 coomb | 320 | | 8872.77 | 145.39062 | 4.12606 " " |
| 2 coombs | = 1 quarter | 640 | | 17745.54 | 290.7813 | 8.2521 " " |

A cubic foot of pure gold weighs 1,210 pounds; pure silver, 655 pounds; cast iron, 450 pounds; copper, 550 pounds; lead, 710 pounds; pure platinum, 1,220 pounds; tin, 456 pounds; aluminum, 163 pounds.

# Domestic Weights and Measures.

**Apothecaries' Weight:** 20 grains = 1 scruple; 3 scruples = 1 dram; 8 drams = 1 ounce; 12 ounces = 1 pound.

**Avoirdupois Weight** (short ton): 27 11-32 grains = 1 dram; 16 drams = 1 ounce; 16 ounces = 1 pound; 25 pounds = 1 quarter; 4 quarters = 1 cwt.; 20 cwt. = 1 ton.

**Avoirdupois Weight** (long ton): 27 11-32 grains = 1 dram; 16 drams = 1 ounce; 16 ounces = 1 pound; 112 pounds = 1 cwt.; 20 cwt. = 1 ton.

**Troy Weight:** 24 grains = 1 pennyweight; 20 pennyweights = 1 ounce; 12 ounces = 1 pound.

**Circular Measure:** 60 seconds = 1 minute; 60 minutes = 1 degree; 30 degrees = 1 sign; 12 signs = 1 circle or circumference.

**Cubic Measure:** 1,728 cubic inches = 1 cubic foot; 27 cubic feet = 1 cubic yard.

**Dry Measure:** 2 pints = 1 quart; 8 quarts = 1 peck; 4 pecks = 1 bushel.

**Liquid Measure:** 4 gills = 1 pint; 2 pints = 1 quart; 4 quarts = 1 gallon; 31½ gallons = 1 barrel; 2 barrels = 1 hogshead.

**Long Measure:** 12 inches = 1 foot; 3 feet = 1 yard; 5½ yards = 1 rod or pole; 40 rods = 1 furlong; 8 furlongs = 1 statute mile (1,760 yards or 5,280 feet); 3 miles = 1 league.

**Mariners' Measure:** 6 feet = 1 fathom; 120 fathoms = 1 cable length; 7½ cable lengths = 1 mile; 5,280 feet = 1 statute mile; 6,085 feet = 1 nautical mile.

**Paper Measure:** 24 sheets = 1 quire; 20 quires = 1 ream (480 sheets); 2 reams = 1 bundle; 5 bundles = 1 bale.

**Square Measure:** 144 square inches = 1 square foot; 9 square feet = 1 square yard; 30¼ square yards = 1 square rod or perch; 40 square rods = 1 rood; 4 roods = 1 acre; 640 acres = 1 square mile; 36 square miles (6 miles square) = 1 township.

**Time Measure:** 60 seconds = 1 minute; 60 minutes = 1 hour; 24 hours = 1 day; 7 days = 1 week; 365 days = 1 year; 366 days = 1 leap year.

## MEDICAL SIGNS AND ABBREVIATIONS.

℞ (Lat. Recipe), take; āā, of each; ℔, pound; ℥, ounce; ʒ, drachm; ℈, scruple; ♏, minim, or drop; O or o, pint; f℥, fluid ounce; fʒ, fluid drachm; as, ℥ss, half an ounce; ℥i, one ounce; ℥iss, one ounce and a half; ℥ij, two ounces; gr., grain; Q. S., as much as sufficient; Ft. Mist., let a mixture be made; Ft. Haust., let a draught be made; Ad., add to; Ad lib., at pleasure; Aq., water; M., mix; Mac., macerate; Pulv., powder; Pil., pill; Solv., dissolve; St., let it stand; Sum., to be taken; D., dose; Dil., dilute; Filt., filter; Lot., a wash; Garg., a gargle; Hor. Decub., at bed time; Inject., injection; Gtt., drops; ss, one-half; Ess., essence.

## TEXAS LAND MEASURE.

(Also used in Mexico, New Mexico, Arizona, and California.)

| | | | | |
|---|---|---|---|---|
| 26,000,000 | square varas (square of 5,099 | varas) = 1 league and 1 labor | = 4,605.5 | acres. |
| 1,000,000 | square varas (square of 1,000 | varas) = 1 labor | = 177.136 | acres. |
| 25,000,000 | square varas (square of 5,000 | varas) = 1 league | = 4,428.4 | acres. |
| 12,500,000 | square varas (square of 3,535.5 | varas) = ½ league | = 2,214.2 | acres. |
| 8,333,333 | square varas (square of 2,886.7 | varas) = ⅓ league | = 1,476.13 | acres. |
| 6,250,000 | square varas (square of 2,500 | varas) = ¼ league | = 1,107.1 | acres. |
| 7,225,600 | square varas (square of 2,688 | varas) | = 1,280 | acres. |
| 3,61[illegible],800 | square varas (square of 1,900.8 | varas) = 1 section | = 640 | acres. |
| 1,806,400 | square varas (square of 1,344 | varas) = ½ section | = 320 | acres. |
| 903,200 | square varas (square of 950.44 | varas) = ¼ section | = 160 | acres. |
| 451,600 | square varas (square of 672 | varas) = ⅛ section | = 80 | acres. |
| 225,800 | square varas (square of 475 | varas) = 1-16 section | = 40 | acres. |
| 5,645,376 | square varas (square of 75.137 | varas) = 4,840 square yards | = 1 | acre. |

To find the number of acres in any number of square varas, multiply the latter by 177 (or to be more exact, by 177⅛), and cut off six decimals.

1 vara = 33⅓ inches. 1,900.8 varas = 1 mile.

## WEIGHTS AND MEASURES OF THE PHILIPPINES.

| | | | | | |
|---|---|---|---|---|---|
| 1 pulgada (12 linea) | = .927 | inch. | 1 libra (16 onzo) | = 1.0144 | lb. av. |
| 1 pie | = 11.125 | inches. | 1 arroba | = 25.360 | lb. av. |
| 1 vara | = 33.375 | inches. | 1 catty (16 tael) | = 1. 94 | lb. av. |
| 1 gantah | = .8796 | gallon. | 1 pecul (100 catty) | = 139.482 | lb. av. |
| 1 caban | = 21.991 | gallons | | | |

# Knots and Miles.

THE **Statute Mile** is 5,280 feet.
The **British Admiralty Knot** or **Nautical Mile** is 6,080 feet.
The **Statute Knot** is 6,082.66 feet, and is generally considered the standard. The number of feet in a statute knot is arrived at thus: The circumference of the earth is divided into 360 degrees, each degree containing 60 knots or (360x60), 21,600 knots to the circumference. 21,600 divided into 131,385,456—the number of feet in the earth's circumference—gives 6,082.66 feet—the length of a standard mile.

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| 1 knot | = 1.151 miles | 4 knots = | 4.606 miles | 20 knots = | 23.030 miles | 600 feet | = 1 cable |
| 2 knots | = 2.303 miles | 5 knots = | 5.757 miles | 25 knots = | 28.787 miles | 10 cables | = 1 knot |
| 3 knots | = 3.454 miles | 10 knots = | 11.515 miles | 6 feet | = 1 fathom | | |

# Ancient Greek and Roman Weights and Measures

WITH AMERICAN EQUIVALENTS.

WEIGHTS.

The Roman libra or pound = 10 oz. 18 pwt. 13 5-7 gr., Troy.
The Attica mina or pound = 11 oz. 7 pwt. 16 2-7 gr., Troy.
The Attica talent (60 minæ) = 56 lbs. 11 oz. 0 pwt 17 1-7 gr., Troy.

DRY MEASURE.

The Roman modus = 1 pk. 2-9 pint.
The Attic chœnix = nearly 1½ pints.
The Attic medimnus = 4 pk. 6 1-10 pints.

LIQUID MEASURE.

The cotyle = a little over ½ pint.
The cyathus = a little over 1½ pints
The chus = a little over 6⅔ pints.

LONG MEASURE.

The Roman foot = 11 3-5 inches.
The Roman cubit = 1 ft. 5⅔ inches.
The Roman pace = 4 ft. 10 inches.
The Roman furlong = 604 ft. 10 inches.
The Roman mile = 4,835 feet.
The Grecian cubit = 1 ft. 6⅛ inches.
The Grecian furlong = 504 ft. 4 1-5 inches.
The Grecian mile = 4,030 ft.

MONEY.

The quadrans = 1 1-10 mills.
The as = 1 3-10 mills.
The sestertius = 3.58 + cents.
The sestertium (1,000 sestertii) = $35.80+.
The denarius = 14.35 + cents.
The Attic obolus = 2.39 + cents.
The drachma = 14.35 + cents.*
The mina (100 drachmæ) = $14.35+.
The talent (60 minæ) = $861.00+.
The Greek stater = aureus (same as the Roman †) = $3.58,79.
The stater = daricus = $7.16,66.

*The modern drachma equals 19.3 cents. † Did not remain, at all periods, at this value, but this is the value indicated by Tacitus.

BIBLICAL WEIGHTS REDUCED TO TROY WEIGHT.

| | Lbs. | Oz. | Pwt. | Gr. |
|---|---|---|---|---|
| The Gerah, one-twentieth of a Shekel | 0 | 0 | 0 | 12 |
| The Bekah, half a Shekel | 0 | 0 | 5 | 0 |
| The Shekel | 0 | 0 | 10 | 0 |
| The Maneh, 60 Shekels | 2 | 6 | 0 | 0 |
| The Talent, 50 manehs, or 3,000 Shekels | 125 | 0 | 0 | 0 |

# Electrical Units.

| Name. | Symbol. | Unit of | How Obtained. | CGS* | Equivalent. |
|---|---|---|---|---|---|
| Ohm | R | Resistance | The electrical resistance of a column of mercury 106 centimetres long and of 1 square millimetre section. | $10^9$ | 1 true ohm = 1.0112 British Association ohms. |
| Ampère | C | Current | Is that current of electricity that decomposes .0 009324 gramme of water per second. | $10^1$ | Deposits 1.118 milligrams of silver per second. |
| Volt | E | Electromotive force | One ampère of current passing through a substance having 1 ohm of resistance = 1 volt. | $10^8$ | .926 of a standard Daniel cell. |
| Coulomb | Q | Quantity | A current of 1 ampère during 1 second of time. | $10^1$ | Deposits 1.118 milligrams of silver. |
| Farad | K | Capacity | The capacity that a current of 1 ampère for 1 second (=1 coulomb) charges it to potential of 1 volt. | $10^9$ | 2.5 knots of D. U. S. cable. |
| Microfarad | " | | 1-millionth of farad. | $10^{15}$ | |
| Watt | Pw. | Power | Power of 1 ampère current passing through resistance of 1 ohm. | $10^7$ | .0013405 $\left(\text{or } \frac{1}{746}\right)$ of a horse power. |
| Joul | W.j. | Work | Is the work done by 1 watt of electrical power in 1 second. | $10^7$ | .238 unit of heat (Therm). |

*C. G. S. = Electro-magnetic units. Consult technical works in electricity.

# Foreign Moneys.

**English Money:** 4 farthings = 1 penny (*d*); 12 pence = 1 shilling (*s*); 20 shillings = 1 pound (£). 21 shillings = one guinea; 5 shillings = one crown.
**French Money:** 100 centimes = 1 franc.
**German Money:** 100 pfennig = 1 mark.
**Russian Money:** 100 copecks = 1 ruble.
**Austro-Hungarian Money:** 100 heller = 1 krone.
For United States equivalents, see table of "Value of Foreign Coins in U. S. Money."

# Table of Geometrical Progression.

(WHEREBY any questions of Geometrical Progression and of Double Ratio may be solved by Inspection, the Number of Terms not exceeding 56.)

# Standard Newspaper Measure.

THE Standard Newspaper Measure, as recognized and now in general use is 13 ems pica. The standard of measurement of all sizes of type is the "em quad," not the letter "m."

The basis of measurements adopted by the International Typographical Union is the lower-case alphabet, from "a" to "z" inclusive, and the ems used are the same body as the type measured.

The weight of a cubic foot of distilled water at a temperature of 60° F. is 1,000 ounces Avoirdupois, *very nearly*, therefore the weight (in ounces, Avoirdupois) of a cubic foot of any of the substances in the above table is found by multiplying the specific gravities by 10, thus:—one cubic foot of oak weighs 1,170 ounces; one cubic foot of marble 2,700 ounces, and so on.

* Compared with water.

## Freezing, Fusing, and Boiling Points.

| Substances. | Reaumur. | Centigrade. | Fahrenheit. | Substances. | Reaumur. | Centigrade. | Fahrenheit. |
|---|---|---|---|---|---|---|---|
| Bromine freezes at | — 17.6° | — 22° | — 7.6° | Silver fuses at | 800° | 1,000° | 1,832° |
| Olive oil freezes at | 8 | 10 | 50 | Sodium fuses at | 76.5 | 95.6 | 204 |
| Quicksilver freezes at | — 31.5 | — 39.4 | — 39 | Sulphur fuses at | 92 | 115 | 239 |
| Water freezes at | 0 | 0 | 32 | Tin fuses at | 182 | 228 | 442 |
| Bismuth metal fuses at | 211 | 264 | 507 | Zinc fuses at | 329.6 | 412 | 773 |
| Copper fuses at | 963 | 1,204 | 2,200 | Alcohol boils at | 63 | 74.4 | 167 |
| Gold fuses at | 1,105 | 1,380 | 2,518 | Bromine boils at | 50 | 63 | 145 |
| Iron fuses at | 1,230 | 1,538 | 2,800 | Ether boils at | 28.4 | 35.5 | 96 |
| Lead fuses at | 260 | 325 | 617 | Iodine boils at | 140 | 175 | 347 |
| Potassium fuses at | 50 | 62.5 | 144.5 | Water boils at | 80 | 100 | 212 |

Authorities vary on some of these points. The best are given.

**Tensile Strength** is the resistance of the fibres or particles of a body to separation. It is therefore proportional to their number, or to the area of its transverse section. The fibres of wood are strongest near the centre of the trunk or limb of a tree. * Tensile strength in pounds per square inch.

## The Capitol at Washington.

THE Capitol is situated in latitude 38° 53′ 20″.4 north and longitude 77° 00′ 35″.7 west from Greenwich. It fronts east, and stands on a plateau eighty eight feet above the level of the Potomac.

The entire length of the building from north to south is seven hundred and fifty-one feet four inches, and its greatest dimension from east to west three hundred and fifty feet. The area covered by the building is 153,112 square feet.

The dome of the original central building was constructed of wood, covered with copper. This was replaced in 1856 by the present structure of cast iron. It was completed in 1865. The entire weight of iron used is 8,909,200 pounds.

The dome is crowned by a bronze statue of Freedom, which is nineteen feet six inches high and weighs 14,985 pounds. It was modelled by Crawford. The height of the dome above the base line of the east front is two hundred and eighty-seven feet five inches. The height from the top of the balustrade of the building is two hundred and seventeen feet eleven inches. The greatest diameter at the base is one hundred and thirty-five feet five inches.

The rotunda is ninety-seven feet six inches in diameter, and its height from the floor to the top of the canopy is one hundred and eighty feet three inches.

The Senate Chamber is one hundred and thirteen feet three inches in length, by eighty feet three inches in width, and thirty-six feet in height. The galleries will accommodate one thousand persons.

The Representatives' Hall is one hundred and thirty-nine feet in length, by ninety-three feet in width, and thirty-six feet in height.

The southeast corner-stone of the original building was laid September 18, 1793, by President Washington with Masonic ceremonies. The corner-stone of the extensions was laid July 4, 1851, by President Fillmore.

The room now occupied by the Supreme Court was, until 1859, occupied as the Senate Chamber. Previous to that time the court occupied the room immediately beneath, now used as a law library.

## Lincoln's Gettysburg Speech.

(*Address at the Dedication of Gettysburg Cemetery, November* 19, 1863.)

FOURSCORE and seven years ago our fathers brought forth upon this continent a new nation, conceived in liberty, and dedicated to the proposition that all men are created equal.

Now we are engaged in a great civil war, testing whether that nation, or any nation so conceived and so dedicated, can long endure. We are met on a great battlefield of that war. We are met to dedicate a portion of it as the final resting-place of those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this.

But in a larger sense we cannot dedicate, we cannot consecrate, we cannot hallow this ground. The brave men, living and dead, who struggled here have consecrated it far above our power to add or detract. The world will little note nor long remember what we say here, but it can never forget what they did here. It is for us, the living, rather to be dedicated here to the unfinished work that they have thus far so nobly carried on. It is rather for us to be here dedicated to the great task remaining before us; that from these honored dead we take increased devotion to the cause for which they here gave the last full measure of devotion; that we here highly resolve that the dead shall not have died in vain; that the nation shall, under God, have a new birth of freedom, and that government of the people, by the people, and for the people, shall not perish from the earth.

## United States Coast and Geodetic Survey.

THE Coast and Geodetic Survey of the Department of Commerce is charged with the survey of the coasts of the United States and coasts under the jurisdiction thereof, and the publication of charts covering said coasts. This includes base measure, triangulation, topography, and hydrography along said coasts; the survey of rivers to the head of tide water or ship navigation, deep sea soundings, temperature and current observations along said coasts and throughout the Gulf and Japan streams, magnetic observations and researches and the publication of maps showing the variations of terrestrial magnetism; gravity research, determination of heights, the determination of geographic positions by astronomic observations for latitude, longitude and azimuth, and by triangulation to furnish reference points for State surveys and to co-ordinate Governmental surveys.

The results obtained are published in annual reports and in special publications; charts upon various scales, including sailing charts, general charts of the coast and harbor charts; tide tables issued annually in advance; coast pilots with sailing directions covering the navigable waters; notices to mariners issued weekly as a joint publication of the Coast and Geodetic Survey and the Bureau of Lighthouses and containing current information necessary for safe navigation; catalogues of charts and publications, and such other publications as may be required to carry out the organic law governing the survey.

# Constitution of the United States.

Preamble. WE, the people of the United States, in order to form a more perfect Union, establish justice, insure domestic tranquillity, provide for the common defence, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this CONSTITUTION for the United States of America.

## ARTICLE I.

Legislative powers. SECTION I. All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

House of Representatives. SECTION II. 1. The House of Representatives shall be composed of members chosen every second year by the people of the several States, and the electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State Legislature.

Qualifications of Representatives. 2. No person shall be a Representative who shall not have attained to the age of twenty-five years, and been seven years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State in which he shall be chosen.

Apportionment of Representatives. 3. Representatives and direct taxes shall be apportioned among the several States which may be included within this Union according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three-fifths of all other persons. The actual enumeration shall be made within three years after the first meeting of the Congress of the United States, and within every subsequent term of ten years, in such manner as they shall by law direct. The number of Representatives shall not exceed one for every thirty thousand, but each State shall have at least one Representative; and until such enumeration shall be made, the State of New Hampshire shall be entitled to choose 3; Massachusetts, 8; Rhode Island and Providence Plantations, 1; Connecticut, 5; New York, 6, New Jersey, 4; Pennsylvania, 8; Delaware, 1; Maryland, 6; Virginia, 10; North Carolina, 5; South Carolina, 5, and Georgia, 3.*

Vacancies, how filled. 4. When vacancies happen in the representation from any State, the Executive Authority thereof shall issue writs of election to fill such vacancies.

Officers, how appointed. 5. The House of Representatives shall choose their Speaker and other officers, and shall have the sole power of Impeachment.

Senate. SECTION III. [See Article XVII., Amendments.] 1. The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof, for six years; and each Senator shall have one vote.

Classification of Senators. 2. Immediately after they shall be assembled in consequence of the first election, they shall be divided as equally as may be into three classes. The seats of the Senators of the first class shall be vacated at the expiration of the second year, of the second class at the expiration of the fourth year, and of the third class at the expiration of the sixth year, so that one-third may be chosen every second year; and if vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State, the Executive thereof may make temporary appointment until the next meeting of the Legislature, which shall then fill such vacancies.

Qualifications of Senators. 3. No person shall be a Senator who shall not have attained to the age of thirty years, and been nine years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State for which he shall be chosen.

President of the Senate. 4. The Vice-President of the United States shall be President of the Senate, but shall have no vote unless they be equally divided.

5. The Senate shall choose their other officers, and also a President pro tempore, in the absence of the Vice-President, or when he shall exercise the office of President of the United States.

Senate a court for trial of impeachments. 6. The Senate shall have the sole power to try all impeachments. When sitting for that purpose, they shall be on oath or affirmation. When the President of the United States is tried the Chief Justice shall preside; and no person shall be convicted without the concurrence of two-thirds of the members present.

Judgment in case of conviction. 7. Judgment in cases of impeachment shall not extend further than to removal from office, and disqualification to hold and enjoy any office of honor, trust, or profit under the United States; but the party convicted shall nevertheless be liable and subject to indictment, trial, judgment, and punishment, according to law.

Elections of Senators and Representatives. SECTION IV. 1. The times, places, and manner of holding elections for Senators and Representatives shall be prescribed in each State by the Legislature thereof; but the Congress may at any time by law make or alter such regulations, except as to places of choosing Senators.

Meeting of Congress. 2. The Congress shall assemble at least once in every year, and such meeting shall be on the first Monday in December, unless they shall by law appoint a different day.

Organization of Congress. SECTION V. 1. Each House shall be the judge of the elections, returns, and qualifications of its own members, and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent members in such manner and under such penalties as each House may provide.

Rule of proceedings. 2. Each House may determine the rules of its proceedings, punish its members for disorderly behavior, and with the concurrence of two-thirds expel a member.

Journals of each House. 3. Each House shall keep a journal of its proceedings, and from time to time publish the same, excepting such parts as may in their judgment require secrecy; and the yeas and nays of the members of either House on any question shall, at the desire of one-fifth of those present, be entered on the journal.

Adjournment of Congress. 4. Neither House, during the session of Congress, shall, without the consent of the other, adjourn for more than three days, nor to any other place than that in which the two Houses shall be sitting.

Pay and privileges of members. SECTION VI. 1. The Senators and Representatives shall receive a compensation for their services, to be ascertained by law, and paid out of the Treasury of the United States. They shall in all cases, except treason, felony, and breach of the peace, be privileged from arrest during their attendance at the session of their respective Houses, and in going to and returning from the same; and for any speech or debate in either House they shall not be questioned in any other place.

Other offices prohibited. 2. No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States which shall have been created, or the emoluments whereof shall have been increased during such time; and no person holding any office under the United States shall be a member of either House during his continuance in office.

Revenue bills. SECTION VII. 1. All bills for raising revenue shall originate in the House of Representatives, but the Senate may propose or concur with amendments, as on other bills.

How bills become laws. 2. Every bill which shall have passed the House of Representatives and the Senate shall, before it become a law, be presented to the President of the United States; if he approve, he shall sign it, but if not, he shall return it, with his objections, to that House in which it shall have originated, who shall enter the objections at large on their journal, and proceed to reconsider it. If after such reconsideration two-thirds of that House shall agree to pass the bill, it shall be sent, together with the objections, to the other House, by which it shall likewise be reconsidered; and if approved by two-thirds of that House it shall become a law. But in all such cases the votes of both Houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the journal of each House respectively. If any bill shall not be returned by the President within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law in like manner as if he had signed it, unless the Congress by their adjournment prevent its return; in which case it shall not be a law.

* See Article XIV., Amendments.

Approval and veto powers of the President.

3. Every order, resolution, or vote to which the concurrence of the Senate and House of Representatives may be necessary (except on a question of adjournment) shall be presented to the President of the United States; and before the same shall take effect shall be approved by him, or being disapproved by him, shall be repassed by two-thirds of the Senate and the House of Representatives, according to the rules and limitations prescribed in the case of a bill.

Powers vested in Congress.

SECTION VIII. 1. The Congress shall have power:

To lay and collect taxes, duties, imposts, and excises, to pay the debts and provide for the common defence and general welfare of the United States; but all duties, imposts, and excises shall be uniform throughout the United States.

2. To borrow money on the credit of the United States.

3. To regulate commerce with foreign nations, and among the several States, and with the Indian tribes.

4. To establish an uniform rule of naturalization and uniform laws on the subject of bankruptcies throughout the United States.

5. To coin money, regulate the value thereof, and of foreign coin, and fix the standard of weights and measures.

6. To provide for the punishment of counterfeiting the securities and current coin of the United States.

7. To establish post-offices and post-roads.

8. To promote the progress of science and useful arts by securing for limited times to authors and inventors the exclusive rights to their respective writings and discoveries.

9. To constitute tribunals inferior to the Supreme Court.

10. To define and punish piracies and felonies committed on the high seas, and offences against the law of nations.

11. To declare war, grant letters of marque and reprisal, and make rules concerning captures on land and water.

12. To raise and support armies, but no appropriation of money to that use shall be for a longer term than two years.

13. To provide and maintain a navy.

14. To make rules for the government and regulation of the land and naval forces.

15. To provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions.

16. To provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States, reserving to the States respectively the appointment of the officers, and the authority of training the militia according to the discipline prescribed by Congress.

17. To exercise exclusive legislation in all cases whatsoever over such district (not exceeding ten miles square) as may, by cession of particular States and the acceptance of Congress, become the seat of Government of the United States, and to exercise like authority over all places purchased by the consent of the Legislature of the State in which the same shall be, for the erection of forts, magazines, arsenals, dry-docks, and other needful buildings.

18. To make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this Constitution in the Government of the United States, or in any department or officer thereof.

Immigrants, how admitted.

SECTION IX. 1. The migration or importation of such persons as any of the States now existing shall think proper to admit shall not be prohibited by the Congress prior to the year one thousand eight hundred and eight, but a tax or duty may be imposed on such importation, not exceeding ten dollars for each person.

Habeas corpus.

2. The privilege of the writ of habeas corpus shall not be suspended, unless when in cases of rebellion or invasion the public safety may require it.

Attainder.

3. No bill of attainder or ex post facto law shall be passed.

Direct taxes.

4. No capitation or other direct tax shall be laid, unless in proportion to the census or enumeration hereinbefore directed to be taken.

Regulations regarding customs duties.

5. No tax or duty shall be laid on articles exported from any State.

6. No preference shall be given by any regulation of commerce or revenue to the ports of one State over those of another, nor shall vessels bound to or from one State be obliged to enter, clear, or pay duties in another.

Moneys, how drawn.

7. No money shall be drawn from the Treasury but in consequence of appropriations made by law; and a regular statement and account of the receipts and expenditures of all public money shall be published from time to time.

Titles of nobility prohibited.

8. No title of nobility shall be granted by the United States. And no person holding any office of profit or trust under them shall, without the consent of the Congress, accept of any present, emolument, office, or title of any kind whatever from any king, prince, or foreign state.

Powers of States defined.

SECTION X. 1. No State shall enter into any treaty, alliance, or confederation, grant letters of marque and reprisal, coin money, emit bills of credit, make anything but gold and silver coin a tender in payment of debts, pass any bill of attainder, ex post facto law, or law impairing the obligation of contracts, or grant any title of nobility.

2. No State shall, without the consent of the Congress, lay any impost or duties on imports or exports, except what may be absolutely necessary for executing its inspection laws, and the net produce of all duties and imposts, laid by any State on imports or exports, shall be for the use of the Treasury of the United States; and all such laws shall be subject to the revision and control of the Congress.

3. No State shall, without the consent of Congress, lay any duty of tonnage, keep troops or ships of war in time of peace, enter into any agreement or compact with another State, or with a foreign power, or engage in war, unless actually invaded, or in such imminent danger as will not admit of delay.

## ARTICLE II.

Executive power, in whom vested.

SECTION I. 1. The Executive power shall be vested in a President of the United States of America. He shall hold his office during the term of four years, and, together with the Vice-President, chosen for the same term, be elected as follows:

Electors.

2. Each State shall appoint, in such manner as the Legislature thereof may direct, a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitle. in the Congress; but no Senator or Representative or person holding an office of trust or profit under the United States shall be appointed an elector.

Proceedings of electors.

3. [The electors shall meet in their respective States and vote by ballot for two persons, of whom one at least shall not be an inhabitant of the same State with themselves. And they shall make a list of all the persons voted for, and of the number of votes for each, which list they shall sign and certify and transmit, sealed, to the seat of the Government of the United States, directed to the President of the Senate. The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates and the votes shall then be counted. The person having the greatest number of votes shall be the President, if such number be a majority of the whole number of electors appointed, and if there be more than one who have such majority, and have an equal number of votes, then the House of Representatives shall immediately choose by ballot one of them for President; and if no person have a majority, then from the five highest on the list the said House shall in like manner choose the President. But in choosing the President, the vote shall be taken by States, the representation from each State having one vote. A quorum, for this purpose, shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. In every case, after the choice of the President, the person having the greatest number of votes of the electors shall be the Vice-President. But if there should remain two or more who have equal votes, the Senate shall choose from them by ballot the Vice-President.]*

Proceedings of the House of Representatives.

Time of choosing electors.

4. The Congress may determine the time of choosing the electors and the day on which they shall give their votes, which day shall be the same throughout the United States.

* This clause is superseded by Article XII., Amendments.

Qualifications of the President. 5. No person except a natural born citizen, or a citizen of the United States at the time of the adoption of this Constitution, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained to the age of thirty-five years and been fourteen years a resident within the United States.

Provision in case of his disability. 6. In case of the removal of the President from office, or of his death, resignation, or inability to discharge the powers and duties of the said office, the same shall devolve on the Vice-President, and the Congress may by law provide for the case of removal, death, resignation, or inability, both of the President and Vice-President, declaring what officer shall then act as President, and such officer shall act accordingly until the disability be removed or a President shall be elected.

Salary of the President. 7. The President shall, at stated times, receive for his services a compensation which shall neither be increased nor diminished during the period for which he shall have been elected, and he shall not receive within that period any other emolument from the United States, or any of them.

Oath of the President. 8. Before he enter on the execution of his office he shall take the following oath or affirmation:

"I do solemnly swear (or affirm) that I will faithfully execute the office of President of the United States, and will, to the best of my ability, preserve, protect, and defend the Constitution of the United States."

Duties of the President. SECTION II. 1. The President shall be Commander-in-Chief of the Army and Navy of the United States, and of the militia of the several States when called into the actual service of the United States; he may require the opinion, in writing, of the principal officer in each of the executive departments upon any subject relating to the duties of their respective offices, and he shall have power to grant reprieves and pardons for offences against the United States except in cases of impeachment.

May make treaties, appoint ambassadors, judges, etc. 2. He shall have power, by and with the advice and consent of the Senate, to make treaties, provided two-thirds of the Senators present concur; and he shall nominate, and by and with the advice and consent of the Senate shall appoint ambassadors, other public ministers and consuls, judges of the Supreme Court, and all other officers of the United States whose appointments are not herein otherwise provided for, and which shall be established by law; but the Congress may by law vest the appointment of such inferior officers as they think proper in the President alone, in the courts of law, or in the heads of departments.

May fill vacancies. 3. The President shall have power to fill up all vacancies that may happen during the recess of the Senate by granting commissions, which shall expire at the end of their next session.

May make recommendations to and convene Congress. SECTION III. He shall from time to time give to the Congress information of the state of the Union, and recommend to their consideration such measures as he shall judge necessary and expedient; he may, on extraordinary occasions, convene both Houses, or either of them, and in case of disagreement between them with respect to the time of adjournment, he may adjourn them to such time as he shall think proper; he shall receive ambassadors and other public ministers; he shall take care that the laws be faithfully executed, and shall commission all the officers of the United States.

How officers may be removed. SECTION IV. The President, Vice-President, and all civil officers of the United States shall be removed from office on impeachment for and conviction of treason, bribery, or other high crimes and misdemeanors.

## ARTICLE III.

Judicial power, how invested. SECTION I. The judicial power of the United States shall be vested in one Supreme Court, and in such inferior courts as the Congress may from time to time ordain and establish. The judges, both of the Supreme and inferior courts, shall hold their offices during good behavior, and shall at stated times receive for their services a compensation which shall not be diminished during their continuance in office.

To what cases it extends. SECTION II. 1. The judicial power shall extend to all cases in law and equity arising under this Constitution, the laws of the United States, and treaties made, or which shall be made, under their authority; to all cases affecting ambassadors, other public ministers, and consuls; to all cases of admiralty and maritime jurisdiction; to controversies to which the United States shall be a party; to controversies between two or more States, between a State and citizens of another State, between citizens of different States, between citizens of the same State claiming lands under grants of different States, and between a State, or the citizens thereof, and foreign States, citizens, or subjects.

Jurisdiction of the Supreme Court. 2. In all cases affecting ambassadors, other public ministers, and consuls, and those in which a State shall be party, the Supreme Court shall have original jurisdiction. In all the other cases before-mentioned the Supreme Court shall have appellate jurisdiction both as to law and fact, with such exceptions and under such regulations as the Congress shall make.

Rules respecting trials. 3. The trial of all crimes, except in cases of impeachment, shall be by jury, and such trial shall be held in the State where the said crimes shall have been committed; but when not committed within any State the trial shall be at such place or places as the Congress may by law have directed.

Treason defined. SECTION III. 1. Treason against the United States shall consist only in levying war against them, or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act, or on confession in open court.

How punished. 2. The Congress shall have power to declare the punishment of treason, but no attainder of treason shall work corruption of blood or forfeiture except during the life of the person attainted.

## ARTICLE IV.

Rights of States and records. SECTION I. Full faith and credit shall be given in each State to the public acts, records, and judicial proceedings of every other State. And the Congress may by general laws prescribe the manner in which such acts, records, and proceedings shall be proved, and the effect thereof.

Privileges of citizens. SECTION II. 1. The citizens of each State shall be entitled to all privileges and immunities of citizens in the several States.

Executive requisitions. 2. A person charged in any State with treason, felony, or other crime, who shall flee from justice, and be found in another State, shall, on demand of the Executive authority of the State from which he fled, be delivered up, to be removed to the State having jurisdiction of the crime.

Laws regulating service or labor. 3. No person held to service or labor in one State, under the laws thereof, escaping into another shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due.

New States, how formed and admitted. SECTION III. 1. New States may be admitted by the Congress into this Union; but no new State shall be formed or erected within the jurisdiction of any other State, nor any State be formed by the junction of two or more States, or parts of States, without the consent of the Legislatures of the States concerned, as well as of the Congress.

Power of Congress over public lands. 2. The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States; and nothing in this Constitution shall be so construed as to prejudice any claims of the United States, or of any particular State.

Republican government guaranteed. SECTION IV. The United States shall guarantee to every State in this Union a republican form of government, and shall protect each of them against invasion, and, on application of the Legislature, or of the Executive (when the Legislature cannot be convened), against domestic violence.

## ARTICLE V.

Constitution, how amended. The Congress, whenever two-thirds of both Houses shall deem it necessary, shall propose amendments to this Constitution, or, on the application of the Legislatures of two-thirds of the several States, shall call a convention for proposing amendments, which, in either case, shall be valid to all intents and purposes, as part of this Constitution, when ratified by the Legislatures of three-fourths of the several States, or by conventions in three-fourths thereof, as the one or the other mode of ratification may be proposed by the Congress; provided that no amendment which may be made prior to the year one thousand eight hundred and eight shall in any manner affect the first and fourth clauses in the Ninth Section of the First Article; and that no State, without its consent, shall be deprived of its equal suffrage in the Senate.

## ARTICLE VI.

Validity of debts recognized. 1. All debts contracted and engagements entered into before the adoption of this Constitution shall be as valid against the United States under this Constitution as under the Confederation.

Supreme law of the land defined.

2. This Constitution and the laws of the United States which shall be made in pursuance thereof and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land, and the judges in every State shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding.

Oath; of whom required and for what.

3. The Senators and Representatives before mentioned, and the members of the several State Legislatures, and all executive and judicial officers, both of the United States and of the several States, shall be bound by oath or affirmation to support this Constitution; but no religious test shall ever be required as a qualification to any office or public trust under the United States.

## ARTICLE VII.

Ratification of the Constitution.

The ratification of the Conventions of nine States shall be sufficient for the establishment of this Constitution between the States so ratifying the same.

# AMENDMENTS TO THE CONSTITUTION.

## ARTICLE I.

Religion and free speech.

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

## ARTICLE II.

Right to bear arms.

A well-regulated militia being necessary to the security of a free State, the right of the people to keep and bear arms shall not be infringed.

## ARTICLE III.

Soldiers in time of peace.

No soldier shall, in time of peace, be quartered in any house without the consent of the owner, nor in time of war but in a manner to be prescribed by law.

## ARTICLE IV.

Right of search.

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrants shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

## ARTICLE V.

Capital crimes and arrest therefor.

No person shall be held to answer for a capital or other infamous crime unless on a presentment or indictment of a grand jury, except in cases arising in the land or naval forces, or in the militia, when in actual service, in time of war or public danger; nor shall any person be subject for the same offence to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use without just compensation.

## ARTICLE VI.

Right to speedy trial.

In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defence.

## ARTICLE VII.

Trial by jury.

In suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury shall be otherwise re-examined in any court of the United States than according to the rules of the common law.

## ARTICLE VIII.

Excessive bail.

Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

## ARTICLE IX.

Enumeration of rights.

The enumeration in the Constitution of certain rights shall not be construed to deny or disparage others retained by the people.

## ARTICLE X.

Reserved rights of States.

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

## ARTICLE XI.

Judicial power.

The judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States, by citizens of another State, or by citizens or subjects of any foreign State.

## ARTICLE XII.

Electors in Presidential elections.

The electors shall meet in their respective States, and vote by ballot for President and Vice-President, one of whom at least shall not be an inhabitant of the same State with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice-President; and they shall make distinct lists of all persons voted for as President, and of all persons voted for as Vice-President, and of the number of votes for each, which list they shall sign and certify, and transmit, sealed, to the seat of the Government of the United States, directed to the President of the Senate; the President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted; the person having the greatest number of votes for President shall be the President, if such number be a majority of the whole number of electors appointed; and if no person have such majority, then from the persons having the highest numbers, not exceeding three, on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But in choosing the President, the votes shall be taken by States, the representation from each State having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. And if the House of Representatives shall not choose a President, whenever the right of choice shall devolve upon them, before the fourth day of March next following, then the Vice-President shall act as President, as in the case of the death or other constitutional disability of the President. The person having the greatest number of votes as Vice-President shall be the Vice-President, if such number be a majority of the whole number of electors appointed, and if no person have a majority, then from the two highest numbers on the list the Senate shall choose the Vice-President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice. But no person constitutionally ineligible to the office of President shall be eligible to that of Vice-President of the United States.

Vice-President.

## ARTICLE XIII.

Slavery prohibited.

1. Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

2. Congress shall have power to enforce this article by appropriate legislation.

CONSTITUTION OF THE UNITED STATES—*Continued.*

## ARTICLE XIV.

Protection for all citizens.

1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property without due process of law, nor deny to any person within its jurisdiction the equal protection of the laws.

Apportionment of Representatives.

2. Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for President and Vice-President of the United States, Representatives in Congress, the executive and judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male members of such State, being of twenty-one years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

Rebellion against the United States.

3. No person shall be a Senator or Representative in Congress, or elector of President and Vice-President, or holding any office, civil or military, under the United States, or under any State, who, having previously taken an oath, as a member of Congress, or as an officer of the United States, or as a member of any State Legislature, or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid and comfort to the enemies thereof. But Congress may, by a vote of two-thirds of each House, remove such disability.

The public debt.

4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection and rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations, and claims shall be held illegal and void.

5. The Congress shall have power to enforce by appropriate legislation the provisions of this article.

## ARTICLE XV.

Right of suffrage.

1. The right of the citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.

2. The Congress shall have power to enforce the provisions of this article by appropriate legislation.

## ARTICLE XVI.

Taxes on Incomes.

The Congress shall have power to lay and collect taxes on incomes, from whatever source derived, without apportionment among the several States, and without regard to any census or enumeration.

## ARTICLE XVII.

Senators elected by the people.

1. The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof, for six years; and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State Legislatures.

Filling of vacancies.

2. When vacancies happen in the representation of any State in the Senate, the executive authority of such State shall issue writs of election to fill such vacancies: Provided, That the Legislature of any State may empower the executive thereof to make temporary appointment until the people fill the vacancies by election as the Legislature may direct.

3. This amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as part of the Constitution.

## RATIFICATION OF THE CONSTITUTION.

The Constitution was ratified by the thirteen original States in the following order:

Delaware, December 7, 1787, unanimously.
Pennsylvania, December 12, 1787, vote 46 to 23.
New Jersey, December 18, 1787, unanimously.
Georgia, January 2, 1788, unanimously.
Connecticut, January 9, 1788, vote 128 to 40.
Massachusetts, February 6, 1788, vote 187 to 168.
Maryland, April 28, 1788, vote 63 to 12.
South Carolina, May 23, 1788, vote 149 to 73.
New Hampshire, June 21, 1788, vote 57 to 46.
Virginia, June 25, 1788, vote 89 to 79.
New York, July 26, 1788, vote 30 to 28.
North Carolina, November 21, 1789, vote 193 to 75.
Rhode Island, May 29, 1790, vote 34 to 32.

## RATIFICATION OF THE AMENDMENTS.

I. to X. inclusive were declared in force December 15, 1791.

XI. was declared in force January 8, 1798.

XII., regulating elections, was ratified by all the States except Connecticut, Delaware, Massachusetts, and New Hampshire, which rejected it. It was declared in force September 28, 1804.

XIII. The emancipation amendment was ratified by 31 of the 36 States; rejected by Delaware and Kentucky, not acted on by Texas; conditionally ratified by Alabama and Mississippi. Proclaimed December 18, 1865.

XIV. Reconstruction amendment was ratified by 23 Northern States; rejected by Delaware, Kentucky, Maryland, and 10 Southern States, and not acted on by California. The 10 Southern States subsequently ratified under pressure. Proclaimed July 28, 1868.

XV. Negro citizenship amendment was not acted on by Tennessee, rejected by California, Delaware, Kentucky, Maryland, New Jersey, and Oregon; ratified by the remaining 30 States. New York rescinded its ratification January 5, 1870. Proclaimed March 30, 1870.

XVI. Income tax amendment was ratified by all the States except Connecticut, Florida, Pennsylvania, Rhode Island, Utah and Virginia. Declared in force February 25, 1913.

XVII. Providing for the direct vote of United States Senators by the people, was ratified by all the States except Alabama, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Rhode Island, South Carolina, Utah and Virginia. Declared in force May 31, 1913.

# The National Flag.

THE official flag of the United States bears forty-eight white stars in a blue field, arranged in six rows of eight stars each. Two stars were added in 1912 by the admission of Arizona and New Mexico to the Union. The garrison flag of the Army is made of bunting, thirty-six feet fly and twenty feet hoist, thirteen stripes, and in the upper quarter, next the staff, is the field or "union" of stars, equal to the number of States, on blue field, over one-third length of the flag, extending to the lower edge of the fourth red stripe from the top. The storm flag is twenty feet by ten feet, and the recruiting flag nine feet nine inches by four feet four inches. The "American Jack" is the "union" or blue field of the flag. The Revenue Marine Service flag, authorized by act of Congress, March 2, 1799, was originally prescribed to "consist of sixteen perpendicular stripes, alternate red and white, the union of the ensign bearing the arms of the United States in dark blue on a white field." The sixteen stripes represented the number of States which had been admitted to the Union at that time, and no change has been made since. June 14, the anniversary of the adoption of the flag, is celebrated as Flag Day in a large part of the Union.

# Declaration of Independence.

IN CONGRESS JULY 4, 1776.

THE unanimous declaration of the thirteen United States of America. When in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitles them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed, That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shewn, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security. Such has been the patient sufferance of these Colonies; and such is now the necessity which constrains them to alter their former Systems of Government. The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute Tyranny over these States. To prove this, let Facts be submitted to a candid world.

He has refused his Assent to Laws, the most wholesome and necessary for the public good.

He has forbidden his Governors to pass Laws of immediate and pressing importance, unless suspended in their operation till his Assent should be obtained; and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other Laws for the accommodation of large districts of people, unless those people would relinquish the right of Representation in the Legislature, a right inestimable to them and formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable, and distant from the depository of their public Records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved Representative Houses repeatedly, for opposing with manly firmness his invasions on the rights of the people.

He has refused for a long time, after such dissolutions, to cause others to be elected; whereby the Legislative powers, incapable of Annihilation, have returned to the People at large for their exercise; the State remaining in the meantime exposed to all the dangers of invasion from without, and convulsions within.

He has endeavored to prevent the population of these States; for that purpose obstructing the Laws for Naturalization of Foreigners; refusing to pass others to encourage their migrations hither, and raising the conditions of new Appropriations of Lands.

He has obstructed the Administration of Justice, by refusing his Assent to Laws for establishing Judiciary Powers.

He has made Judges dependent on his Will alone, for the tenure of their offices, and the amount and payment of their salaries.

He has erected a multitude of New Offices, and sent hither swarms of Officers to harass our people, and eat out their substance.

He has kept among us, in times of peace, Standing Armies without the Consent of our legislature.

He has affected to render the Military independent of and superior to the Civil power.

He has combined with others to subject us to a jurisdiction foreign to our constitution, and unacknowledged by our laws; giving his Assent to their Acts of pretended Legislation:

For quartering large bodies of armed troops among us:

For protecting them, by a mock Trial, from punishment for any Murders which they should commit on the Inhabitants of these States:

For cutting off our Trade with all parts of the world:

For imposing Taxes on us without our Consent:

For depriving us in many cases, of the benefits of Trial by jury:

For transporting us beyond Seas to be tried for pretended offences:

For abolishing the free System of English Laws in a neighboring Province, establishing therein an Arbitrary government, and enlarging its Boundaries so as to render it at once an example and fit instrument for introducing the same absolute rule into these Colonies:

For taking away our Charters, abolishing our most valuable Laws, and altering fundamentally the Forms of our Governments:

For suspending our own Legislatures, and declaring themselves invested with power to legislate for us in all cases whatsoever.

He has abdicated Government here, by declaring us out of his Protection and waging War against us.

He has plundered our seas, ravaged our Coasts, burnt our towns, and destroyed the lives of our people.

He is at this time transporting large Armies of foreign Mercenaries to compleat the works of death, desolation and tyranny, already begun with circumstances of Cruelty & perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the Head of a civilized nation.

He has constrained our fellow-Citizens taken captive on the high Seas to bear Arms against their Country, to become the executioners of their friends and Brethren, or to fall themselves by their Hands.

He has excited domestic insurrections amongst us, and has endeavored to bring on the inhabitants of our frontiers, the merciless Indian Savages, whose known rule of warfare, is an undistinguished destruction of all ages, sexes and conditions.

In every stage of these Oppressions We have Petitioned for Redress in the most humble terms:

DECLARATION OF INDEPENDENCE—*Continued.*

Our repeated Petitions have been answered only by repeated injury. A Prince, whose character is thus marked by every act which may define a Tyrant, is unfit to be the ruler of a free people.

Nor have We been wanting in attentions to our British brethren. We have warned them from time to time of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations, which would inevitably interrupt our connections and correspondence. They too have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity, which denounces our Separation, and hold them, as we hold the rest of mankind, Enemies in War, In Peace Friends.

WE, THEREFORE, the REPRESENTATIVES of the UNITED STATES OF AMERICA, IN GENERAL CONGRESS, Assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the Name, and by authority of the good People of these Colonies, solemnly PUBLISH and DECLARE, That these United Colonies are, and of Right ought to be FREE AND INDEPENDENT States; that they are Absolved from all Allegiance to the British Crown, and that all political connection between them and the State of Great Britain is and ought to be totally dissolved; and that as FREE AND INDEPENDENT STATES, they have full Power to levy War, conclude Peace, contract Alliances, establish Commerce, and to do all other Acts and Things which INDEPENDENT STATES may of right do. And for the support of this Declaration, with a firm reliance on the protection of Divine Providence, We mutually pledge to each other our Lives, our Fortunes, and our sacred Honor.

SIGNERS OF THE DECLARATION OF INDEPENDENCE.

# Washington's Farewell Address.

## EXTRACTS FROM HIS ADDRESS COUNSELLING THE MAINTENANCE OF THE UNION—CONFINEMENT OF THE GENERAL GOVERNMENT TO ITS CONSTITUTIONAL LIMITATIONS, AND AVOIDANCE OF RELATIONS WITH FOREIGN POLITICAL AFFAIRS.

*(To the People of the United States on His Approaching Retirement from the Presidency.*

Here, perhaps, I ought to stop; but a solicitude for your welfare, which cannot end but with my life, and the apprehension of danger natural to that solicitude, urge me, on an occasion like the present, to offer to your solemn contemplation, and to recommend to your frequent review, some sentiments, which are the result of much reflection, of no inconsiderable observation, and which appear to me all-important to the permanency of your felicity as a people. These will be afforded to you with the more freedom, as you can only see in them the disinterested warnings of a parting friend, who can possibly have no personal motive to bias his counsel; nor can I forget, as an encouragement to it, your indulgent reception of my sentiments on a former and not dissimilar occasion.

Interwoven as is the love of liberty with every ligament of your hearts, no recommendation of mine is necessary to fortify or confirm the attachment.

### PRESERVATION OF THE UNION.

The unity of government, which constitutes you one people, is also now dear to you. It is justly so; for it is a main pillar in the edifice of your real independence—the support of your tranquillity at home, your peace abroad, of your safety, of your prosperity, of that very liberty which you so highly prize. But as it is easy to foresee that, from different causes and from different quarters, much pains will be taken, many artifices employed, to weaken in your minds the conviction of this truth; as this is the point in your political fortress against which the batteries of internal and external enemies will be most constantly and actively (though often covertly and insidiously) directed—it is of infinite moment that you should properly estimate the immense value of your national union to your collective and individual happiness; that you should cherish a cordial, habitual and immovable attachment to it; accustoming yourselves to think and speak of it as of the palladium of your political safety and prosperity; watching for its preservation with jealous anxiety; discountenancing whatever may suggest even a suspicion that it can, in any event, be abandoned; and indignantly frowning upon the first dawning of every attempt to alienate any portion of our country from the rest, or to enfeeble the sacred ties which now link together the various parts.

For this you have every inducement of sympathy and interest. Citizens by birth or choice of a common country, that country has a right to concentrate your affections. The name of America, which belongs to you in your national capacity, must always exalt the just pride of patriotism, more than any appellation derived from local discriminations. With slight shades of difference, you have the same religion, manners, habits, and political principles. You have, in a common cause, fought and triumphed together; the independence and liberty you possess are the work of joint counsels and joint efforts, of common dangers, sufferings, and successes.

### ENCROACHMENTS BY THE GOVERNMENT.

It is important, likewise, that the habits of thinking, in a free country, should inspire caution in those intrusted with its administration, to confine themselves within their respective constitutional spheres, avoiding, in the exercise of the powers of one department, to encroach upon another. The spirit of encroachment tends to consolidate the powers of all the departments in one, and thus to create, whatever the form of government, a real despotism. A just estimate of that love of power, and proneness to abuse it which predominates in the human heart, is sufficient to satisfy us of the truth of this position. The necessity of reciprocal checks in the exercise of political power, by dividing and distributing it into different depositories, and constituting each the guardian of the public weal, against invasions by the others, has been evinced by experiments, ancient and modern; some of them in our own country, and under our own eyes. To preserve them must be as necessary as to institute them. If, in the opinion of the people, the distribution or modification of the constitutional powers be, in any particular, wrong, let it be corrected by an amendment in the way which the Constitution designates. But let there be no change or usurpation; for though this, in one instance, may be the instrument of good, it is the customary weapon by which free governments are destroyed. The precedent must always greatly overbalance, in permanent evil, and partial or transient benefit which the use can, at any time, yield.

Observe good faith and justice toward all nations; cultivate peace and harmony with all; religion and morality enjoin this conduct; and can it be that good policy does not equally enjoin it? It will be worthy of a free, enlightened, and, at no distant period, a great nation, to give to mankind the magnanimous and too novel example of a people always guided by an exalted justice and benevolence. Who can doubt that, in the course of times and things, the fruits of such a plan would richly repay any temporary advantages which might be lost by a steady adherence to it? Can it be that Providence has not connected the permanent felicity of a nation with its virtue? The experiment, at least, is recommended by every sentiment which ennobles human nature. Alas! is it rendered impossible by its vices?

### ENTANGLEMENTS WITH FOREIGN POWERS.

Against the insidious wiles of foreign influence (I conjure you to believe me, fellow-citizens) the jealousy of a free people ought to constantly awake; since history and experience prove that foreign influence is one of the most baneful foes of republican government. But that jealousy to be useful, must be impartial; else it becomes the instrument of the very influence to be avoided, instead of a defence against it. Excessive partiality for one foreign nation, and excessive dislike for another, cause those whom they actuate to see danger only on one side, and serve to vell, and even second, the arts

of influence on the other. Real patriots, who may resist the intrigues of the favorite, are liable to become suspected and odious, while its tools and dupes usurp the applause and confidence of the people, to surrender their interests.

The great rule of conduct for us, in regard to foreign nations, is, in extending our commercial relations, to have with them as little political connection as possible. So far as we have already formed engagements, let them be fulfilled with perfect good faith. Here let us stop.

Europe has a set of primary interests, which to us have none, or a very remote relation. Hence she must be engaged in frequent controversies, the causes of which are essentially foreign to our concerns. Hence, therefore, it must be unwise in us to implicate ourselves, by artificial ties, in the ordinary vicissitudes of her politics, or the ordinary combinations and collisions of her friendships or enmities.

Our detached and distant situation invites and enables us to pursue a different course. If we remain one people under an efficient government, the period is not far off when we may defy material injury from external annoyance; when we may take such an attitude as will cause the neutrality we may at any time resolve upon, to be scrupulously respected; when belligerent nations, under the impossibility of making acquisitions upon us, will not lightly hazard the giving us provocation; when we may choose peace or war, as our interest, guided by justice, shall counsel.

PARTING COUNSELS.

In offering to you, my countrymen, these counsels of an old and affectionate friend, I dare not hope that they will make the strong and lasting impression I could wish, that they will control the usual current of the passions, or prevent our nation from running the course which hitherto has marked the destiny of nations; but if I may even flatter myself that they may be productive of some partial benefit, some occasional good; that they may now and then recur to moderate the fury of party spirit, to warn against the mischiefs of foreign intrigues, to guard against the impostures of pretended patriotism; this hope will be full recompense for the solicitude for your welfare by which they have been dictated.

United States, September 17, 1796. GEORGE WASHINGTON.

# The Monroe Doctrine.

"THE Monroe doctrine" was enunciated in the following words in President Monroe's message to Congress December 2, 1823:

"In the discussions to which this interest has given rise, and in the arrangements by which they may terminate, the occasion has been deemed proper for asserting, as a principle in which rights and interests of the United States are involved, that the American continents, by the free and independent condition which they have assumed and maintain are henceforth not to be considered as subjects for future colonization by any European power. * * * We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European power we have not interfered and shall not interfere. But with the governments who have declared their independence and maintain it, and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them or controlling in any other manner their destiny by any European power in any other light than as the manifestation of an unfriendly disposition toward the United States."

Secretary of State Olney in his despatch of July 20, 1895, on the Venezuelan Boundary Dispute said:

"It (the Monroe doctrine) does not establish any general protectorate by the United States over other American States. It does not relieve any American State from its obligations as fixed by international law, nor prevent any European power directly interested from enforcing such obligations or from inflicting merited punishment for the breach of them."

President Roosevelt in a speech in 1902 upon the results of the Spanish-American war, said:

"The Monroe doctrine is simply a statement of our very firm belief that the nations now existing on this continent must be left to work out their own destinies among themselves, and that this continent is no longer to be regarded as the colonizing ground of any European power. The one power on the continent that can make the power effective is, of course, ourselves; for in the world as it is, a nation which advances a given doctrine, likely to interfere in any way with other nations, must possess the power to back it up, if it wishes the doctrine to be respected."

---

The United States Senate on August 2, 1912, adopted the following resolution proposed by Senator Lodge, by a vote of 51 to 4, the negative votes being those of Senators Cummins of Iowa, McCumber of North Dakota, Percy of Mississippi, and Stone of Missouri,

"*Resolved.* That when any harbor or other place in the American Continent is so situated that the occupation thereof for naval or military purposes might threaten the communications or the safety of the United States, the Government of the United States could not see without grave concern the possession of such harbor or other place by any corporation or association which has such a relation to another Government, not American, as to give that Government practical power of control for national purposes."

This action of the Senate grew out of the report, that a stretch of territory bordering on Magdalena Bay, Mexico, might be acquired by the subjects of a foreign country, and thus through their control by their own national Government become the base of permanent naval or military occupation. In explanation of the resolution Senator Lodge said: "The declaration rests on a much broader and older ground than the Monroe doctrine. This resolution rests on the generally accepted principle that every nation has a right to protect its own safety; and if it feels that the possession of any given harbor or place is prejudical to its safety, it is its duty and right to intervene." The Senate added that the opening of the Panama Canal gave to Magdalena Bay an importance that it had never before possessed, as the Panama routes pass in front of it.

Not being a joint resolution requiring the concurrence of the House of Representatives and the signature of the President, the resolution adopted as above was an expression of opinion of the Senate only. The other house took no action.

# A National Memorial to Lincoln

## TO COST TWO MILLION DOLLARS.

THE Sixty-first Congress, third session, passed an act, approved February 9, 1911, "to provide a commission to secure plans and designs for a monument or memorial to the memory of Abraham Lincoln." The text of the act is as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That William H. Taft, Shelby M. Cullom, Joseph G. Cannon, George Peabody Wetmore, Samuel Walker McCall, *H. D. Money, and Champ Clark are hereby created a commission, to be known as the Lincoln Memorial Commission, to procure and determine upon a location, plan, and design for a monument or memorial in the city of Washington, District of Columbia, to the memory of Abraham Lincoln, subject to the approval of Congress.

SEC. 2. That in the discharge of its duties hereunder said commission is authorized to employ the services of such artists, sculptors, architects, and others as it shall determine to be necessary, and to avail itself of the services or advice of the Commission of Fine Arts, created by the act approved May 17, 1910.

SEC. 3. That the construction of the monument or memorial, herein and hereby authorized, shall be upon such site as shall be determined by the commission herein created, and approved by Congress, and said construction shall be entered upon as speedily as practicable after the plan and design therefor is determined upon and approved by Congress, and shall be prosecuted to completion, under the direction of said commission and the supervision of the Secretary of War, under a contract or contracts hereby authorized to be entered into by said Secretary in a total sum not exceeding two million dollars.

SEC. 4. That vacancies occurring in the membership of the commission shall be filled by appointment by the President of the United States.

SEC. 5. That to defray the necessary expenses of the commission herein created and the cost of procuring plans or designs for a memorial or monument, as herein provided, there is hereby appropriated the sum of fifty thousand dollars, to be immediately available.

SEC. 6. That said commission shall annually submit to Congress an estimate of the amount of money necessary to be expended each year to carry on the work herein authorized.

By joint resolution, approved February 1, 1913, Congress approved the plan, design and location for the memorial recommended by the commission.

The memorial is to be erected in Potomac Park on the axis of the United States Capitol and the Washington Monument, in accordance with plans prepared by Mr. Henry Bacon of New York City.

By Sundry Civil act of March 4, 1913, the sum of $300,000 was appropriated to commence the work of construction, which was begun in the Fall of 1913.

NOTE: *Thomas S. Martin, United States Senator from Virginia, was afterward appointed to fill the vacancy on the commission caused by the death of Senator Money.

# Telescopes.

THERE are two kinds of telescopes, viz., refracting and reflecting. In the former the rays of light are made to converge to a focus by lenses, while in the latter they are made to converge by being reflected from the surface of a slightly concaved, highly polished mirror.

The chief disadvantages of refracting telescopes are the chromatic and spherical aberrations of the lenses. In reflecting telescopes these aberrations can be done away with by using parabolic mirrors, but the great objection to the latter are the many mechanical difficulties that have to be overcome.

Owing to the travelling of the earth in its orbit and revolving about its axis, stars if viewed by a fixed telescope would soon disappear. It is thus necessary that a telescope be mounted so a star will always be in its field. This is accomplished by using an equatorial mounting.

In an equatorial mounting there are two axes, one called the "polar" that is parallel to the axis of the earth, and the other the "declination" at right angles to it. Hence, when a star is to be followed, the telescope is clamped in position, and by means of clockwork follows the star so it always remains in view.

The magnifying power of telescopes is generally expressed in diameters, the practical limit of power being 100 diameters per inch of diameter of the telescope. Thus the 36-inch telescope, at the Lick Observatory, may give a magnifying power of 3,600 diameters. But such high power can only be used in a very clear atmosphere, and consequently most astronomical observations are made at 1,000 diameters.

### REFRACTING TELESCOPES.

The largest in the world are in the United States. The one at Yerkes Observatory, Geneva Lake, Wis., has an object lens 40 inches in diameter with a focal length of 64 feet. The movable part of the instrument turning on the polar axis weighs about 12 tons, and the clock 1½ tons. Other large telescopes are the 36-inch at Lick Observatory, Mt. Hamilton, Cal., where many important astronomical discoveries have been made; the 26-inch at the U. S. Observatory, Washington, D. C., and the 24-inch belonging to Harvard University. There is a 30-inch refracting telescope at the Allegheny Observatory, Riverview Park, Pa.

Abroad, is the 30-inch at the Imperial Observatory, Pulkova (near St. Petersburg), Russia. This telescope has a platform at the lower end of the polar axis, from which observers can readily operate the instrument. The Meudon Observatory (near Paris, France) has a 32-inch, the Potsdam, Prussia, a 31-inch, and the Royal Observatory, at Greenwich, England, a 28-inch.

### REFLECTING TELESCOPES.

One of the most perfect instruments ever built is at Mt. Wilson Observatory, Cal. The mirror is silver on glass, 60 inches in diameter and weighs nearly a ton. The telescope is moved by electric motors in right ascension and declination. An important feature in this instrument is the different focal lengths that can be obtained. The 60-inch mirror has a 25-foot focus, but by a suitable arrangement of mirrors, it is possible to get focal lengths of 80, 100 and 150 feet. At the same observatory a 100-inch reflector is being constructed. There is a 36-inch reflector at Lick Observatory, Harvard University has a 28-inch, and at the Yerkes Observatory is a 24-inch.

Other notable reflectors are the Lord Rosse, at Birr Castle, Ireland, which has a mirror 72 inches in diameter of speculum metal and a focal length of 54 feet, a 48-inch at Melbourne, Australia, a 60-inch at Ealing, England, a 48-inch at Paris, France, and a 39-inch at Meudon, France.

# The Single Tax.

THE following statement of the single tax principle was written by Henry George, Sr.:

We assert as our fundamental principle the self-evident truth enunciated in the Declaration of American Independence, that all men are created equal and are endowed by their Creator with certain inalienable rights. We hold that all men are equally entitled to the use and enjoyment of what God has created and of what is gained by the general growth and improvement of the community of which they are a part. Therefore, no one should be permitted to hold natural opportunities without a fair return to all for any special privilege thus accorded to him, and that value which the growth and improvement of the community attaches to land should be taken for the use of the community; that each is entitled to all that his labor produces; therefore, no tax should be levied on the products of labor.

To carry out these principles, we are in favor of raising all public revenues for national, State, county, and municipal purposes by a single tax upon land values, irrespective of improvements, and of the abolition of all other forms of direct and indirect taxation.

Since in all our States we now levy some tax on the value of land, the single tax can be instituted by the simple and easy way of abolishing, one after another, all other taxes now levied and commensurately increasing the tax on land values until we draw upon that one source for all expenses of government, the revenue being divided between local government, State government, and the general government, as the revenue from direct taxes is now divided between the local and State governments, or by a direct assessment being made by the general government upon the States and paid by them from revenues collected in this manner. The single tax we propose is not a tax on land, and therefore would not fall on the use of land and become a tax on labor.

It is a tax not on land, but on the value of land. Thus it would not fall on all land, but only on valuable land, and on that not in proportion to the use made of it, but in proportion to its value—the premium which the user of land must pay to the owner, either in purchase money or rent, for permission to use valuable land. It would thus be a tax not on the use and improvement of land, but on the ownership of land, taking what would otherwise go to the owner as owner, and not as user.

In assessments under the single tax all values created by individual use or improvement would be excluded, and the only value taken into consideration would be the value attaching to the bare land by reason of neighborhood, etc., to be determined by impartial periodical assessments. Thus the farmer would have no more taxes to pay than the speculator who held a similar piece of land idle, and the man who on a city lot erected a valuable building would be taxed no more than the man who held a similar lot vacant. The single tax in short would call upon men to contribute to the public revenues not in proportion to what they produce or accumulate, but in proportion to the value of the natural opportunities they hold. It would compel them to pay just as much for holding land idle as for putting it to its fullest use. The single tax, therefore, would—

1st. Take the weight of taxation off the agricultural districts, where land has little or no value irrespective of improvements, and put it on towns and cities, where bare land rises to a value of millions of dollars per acre.

2d. Dispense with a multiplicity of taxes and a horde of tax-gatherers, simplify government, and greatly reduce its cost.

3d. Do away with the fraud, corruption, and gross inequality inseparable from our present methods of taxation, which allow the rich to escape while they grind the poor. Land cannot be hid or carried off, and its value can be ascertained with greater ease and certainty than any other.

4th. Give us with all the world as perfect freedom of trade as now exists between the States of the Union, thus enabling our people to share through free exchanges in all the advantages which nature has given to other countries, or which the peculiar skill of other peoples has enabled them to attain. It would destroy the trusts, monopolies, and corruptions which are the outgrowths of the tariff. It would do away with the fines and penalties now levied on any one who improves a farm, erects a house, builds a machine, or in any way adds to the general stock of wealth. It would leave every one free to apply labor or expend capital in production or exchange without fine or restriction, and would leave to each the full product of his exertion.

5th. It would, on the other hand, by taking for public use that value which attaches to land by reason of the growth and improvement of the community, make the holding of land unprofitable to the mere owner and profitable only to the user. It would thus make it impossible for speculators and monopolists to hold natural opportunities unused or only half used, and would throw open to labor the illimitable field of employment which the earth offers to man. It would thus solve the labor problem, do away with involuntary poverty, raise wages in all occupations to the full earnings of labor, make overproduction impossible until all human wants are satisfied, render labor-saving inventions a blessing to all, and cause such an enormous production and such an equitable distribution of wealth as would give to all comfort, leisure, and participation in the advantages of an advancing civilization, in securing to each individual equal right to the use of the earth. It is also a proper function of society to maintain and control all public ways for the transportation of persons and property, and the transmission of intelligence; and also to maintain and control all public ways in cities for furnishing water, gas, and all other things that necessarily require the use of such common ways.

# The American Peace and Arbitration League.

THE corporate purposes of the organization favor universal peace by conciliation and arbitration, through a permanent international court, arbitration treaties between all nations, and adequate armament for national security. *Honorary Presidents*—Woodrow Wilson, William H. Taft, and Theodore Roosevelt. *President*—Henry Clews. *Treasurer*—J. Van Vechten Olcott. *General Secretary*—Andrew B. Humphrey. Headquarters, 31 Nassau Street, New York City.

# United States Secret Service.

THE Secret Service Division of the Treasury Department is under the direction of Wm. J. Flynn, chief of the division. The service is principally engaged in detecting and prosecuting makers and dealers in counterfeit paper money and coin. Details are also furnished for the protection of the President of the United States.

The arrests of counterfeiters number about 400 annually; other arrests are for bribery, impersonating United States Government officers, perjury, and violating sections of the United States Revised Statutes relating to foreign and domestic obligations and coins.

*a* Figures of 1913 are somewhat preliminary and subject to revision. *b* Exclusive of Alaska and islands belonging to the United States. *c* Census figures, relating to Continental United States; the figures for 1913 represent an estimate. *d* Census figures. *e* True valuation of real and personal property. *f* 1904. *g* 1800 to 1850, outstanding principal of the public debt, January 1. *h* Figures for the years 1800 to 1850 include the total public debt. *i* 1912. *j* Gold and silver can not be stated separately prior to 1876. From 1862 to 1875, inclusive, gold and silver were not in circulation, except on the Pacific coast, where it is estimated that the average specie circulation was about $25,000,000, and this estimate is continued for the three following years under the head of gold. After that period gold was available for circulation. *k* As the result of a special investigation by the Director of the Mint, a reduction of $135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years, and on September 1, 1910, a reduction of $9,700,000 was made in the estimate of subsidiary silver. *l* Includes notes of Bank of United States; State-bank notes; demand notes of 1862 and 1863; fractional currency, 1870; Treasury notes of 1890, 1900 to date; and currency certificates, act of June 8, 1872-1900. *m* Includes value of buildings, $3,556,639,496. The Twelfth Census was the first to collect statistics of buildings on farms. *n* Includes value of buildings, $6,325,451,528. *o* 1910. *p* Data of the Department of Agriculture, representing wealth production on farms. *q* Exclusive of neighborhood industries and hand trades, included in years previous to 1905. *r* "Ordinary receipts" include receipts from customs, internal revenue, direct tax, public lands, and "miscellaneous," but do not include receipts from loans, premiums, Treasury notes, or revenues of Post-Office Department. *s* Includes corporation tax, $34,948,871 in 1913. *t* "Ordinary disbursements" include disbursements for War, Navy, Indians, pensions, payments for interest, and "miscellaneous," but do not include payments for premiums, principal of public debt, or disbursements for postal service paid from revenues thereof. *u* Imports for consumption after 1850. *v* Domestic exports only after 1860. *w* Includes canal boats and barges prior to 1880. *x* Figures relate to the Western Union only and after 1900 do not include messages sent over leased wires or under railroad contracts. *y* 1800 to 1850, inclusive, from census of 1880; from 1880 to 1900, inclusive, from Rowell's Newspaper Directory; after 1900, from Ayer's American Newspaper Annual. Figures for 1913 include outlying possessions. *z* Includes salaries for teachers and principals only. * 1850, total alien passengers arrived; 1850, 15 months ending December 31; after 1850, fiscal years ending June 30. † 1911.

# United States Geographic Board.

*Chairman*, Henry Gannett, Geological Survey, Department of the Interior; *Secretary*, Charles S. Sloane, Bureau of the Census, Department of Commerce; Frank Bond, General Land Office, Department of the Interior; Lt.-Col. John E. McMahon, General Staff, Department of War; Andrew Braid, Coast and Geodetic Survey, Department of Commerce; F. W. Hodge, Bureau of Ethnology, Smithsonian Institution; G. R. Putnam, Bureau of Light-Houses, Department of Commerce; Harry W. Zeigler, Government Printing Office; G. F. Cooper, Hydrographic Office, Department of the Navy; William McNeir, Department of State; C. Hart Merriam, Department of Agriculture; John S. Mills, Department of the Treasury; Charles W. Stewart, Library and Naval War Records Office, Department of the Navy; David M. Hildreth, Topographer, Post-Office Department; Goodwin D. Ellsworth, Post-Office Department.

By executive order of August 10, 1906, the official title of the United States Board on Geographic Names was changed to United States Geographic Board, and its duties enlarged. The board passes on all unsettled questions concerning geographic names which arise in the departments, as well as determining, changing, and fixing place names within the United States and its insular possessions, and all names hereafter suggested by any officer of the Government shall be referred to the board before publication. The decisions of the board are to be accepted by all the departments of the Government as standard authority. Advisory powers were granted the board concerning the preparation of maps compiled, or to be compiled, in the various offices and bureaus of the Government, with a special view to the avoidance of unnecessary duplication of work; and for the unification and improvement of the scales of maps, of the symbols and conventions used upon them and of the methods of representing relief. Hereafter, all such projects as are of importance shall be submitted to this board for advice before being undertaken.

## International Congress on Hygiene and Demography.

THE object of the congress is to extend the knowledge and improve the practice of hygiene, public health and vital statistics in the countries which participate. Naturally, these benefits accrue in largest measure to the country which is for the time being the host of the congress.

The work of the congress falls into two branches: First, an exhibition of the recent progress and the present condition of the public health movement in the co-operating countries; and secondly, a series of scientific meetings at which leading scholars of both hemispheres will report upon and discuss current questions of fundamental importance in the various fields. For the latter purpose the congress has been divided into nine sections as stated below. Each section holds daily meetings during the week of the congress and may propose resolutions regarding matters of practice or lines of desirable investigations. Such resolutions are referred without debate to the Permanent International Commission and come later before the closing session of the full congress.

American administrative work for public health is mainly in the hands of the State and city governments. The participation of these governments in the projected exhibition has been requested by Congress through the adoption of a joint resolution inviting the Governors of each of the States to appoint State committees, of not less than five members each, to co-operate with the Committee on Organization. Arrangements of this part of the congress have been placed in charge of Dr. J. W. Schereschewsky, of the United States Public Health Service.

The official languages for papers and discussions are English, French and German, but probably a majority of the participants will speak in English. The cordial co-operation, both of American representatives of State and city health work and of private organizations and individuals, is confidently anticipated.

Any person engaged in the study or practice of hygiene or demography may become a member of the congress, but the Committee on Organization reserves the right to withhold the privileges of membership in particular cases. The fee for membership is five dollars. Each member will receive a report of the transactions of the congress and of the protocol to be published after the adjournment of the congress.

The Permanent International Commission of the Congresses of Hygiene and Demography is made up of the representatives of twenty-one nations. The President is Dr. Max Rubner, Director of the Institute of Hygiene, Berlin, Germany; the Vice-President, Mr. S. N. D. North, late Director of the United States Census Bureau, and the Secretary-General, Dr. Johannes Nietner, of Berlin, Germany. The representatives of the United States on the Commission are, besides Mr. North, Dr. Rupert Blue, Surgeon-General of the Public Health Service; Dr. Hermann Biggs, of the New York City Dept. of Health, and Lieut.-Col. Walter D. McCaw, Surgeon-General's Library, Washington, D.C.

The Fourteenth International Congress was held at Berlin in 1907, and the Fifteenth at Washington, D. C., September, 1912. The decision as to the time and place of meeting of the Sixteenth Congress was left to the Permanent International Commission.

## The United States Census.

THE Constitution requires that a census of the United States shall be taken decennially. The First Census was taken in 1790 under the supervision of the President; subsequent censuses, to and including that of 1840, were taken under the supervision of the Secretary of State. In 1849 the supervision of the census was transferred to the newly organized Department of the Interior, and continued under the control of that department until the passage of the act of 1903, creating the Department of Commerce and Labor; by this act the Census Bureau was transferred to the new department. Congress, by act approved March 6, 1902, made the Census Bureau a permanent bureau of the Government.

The work of the Census Bureau is divided into two main branches, namely, the decennial census and special statistical inquiries, the latter mostly made in the intervals between the decennial censuses. The Thirteenth Decennial Census was taken as of date April 15, 1910. It covered the three main subjects—(1) population, (2) agriculture, and (3) manufactures, mines and quarries.

The results of this census are now being compiled and published, and have been used wherever available for the tables of the present ALMANAC. The aggregate cost of the census of 1910 when completed will be over $15,000,000. Of this amount $6,500,000 represents the cost of collecting the data through the employment of over 70,000 paid enumerators, besides supervisors, clerks, and special agents. The balance is the cost of tabulating and publishing the result. A more detailed account of the census of 1910 is given in the 1911 issue of THE WORLD ALMANAC.

The permanent work of the Census Bureau is provided for by the act of Congress approved March 6, 1902, and amendments thereto. These acts authorize and direct the Bureau to make statistical inquiries regarding the insane, feeble-minded, deaf and dumb, and blind; crime, pauperism and benevolence; deaths and births in the areas maintaining registration system; social and financial statistics of cities; wealth, debt and taxation; religious bodies; electric light and power, telephones and telegraphs, and street railways; transportation by water; cotton production, cotton consumed, imported, exported, and cotton on hand, and active cotton spindles; statistics of tobacco; and production of forest products. The statistics of deaths (which now cover a little over half of the country) of cities, and of production of cotton and forest products, are secured annually; the other statistics mentioned are taken usually at intervals of five or ten years, not, however, at the same time as the regular decennial censuses. The act of 1902 also provides for a census of manufactures in the fifth year intervening between the decennial censuses, and the new Thirteenth Census act further provides for a census of agriculture in 1915.

The Director of the Census is appointed by the President of the United States and receives a salary of $6,000 *per annum*. The present Director is William J. Harris of Georgia. The permanent office organization includes a chief clerk, William L. Austin; four chief statisticians; for Population, William C. Hunt; for Manufactures, William M. Steuart; for Finance and Municipal Statistics, Le Grand Powers; for Vital Statistics, Cressy L. Wilbur; a geographer, Charles S. Sloane, and eight chiefs of division. The entire number of employés in the Bureau at Washington is now about 640; in addition there are about 700 special agents employed intermittently in the Southern States for the collection of cotton statistics. The number of employés in Washington was greatly increased during the decennial census; on November 1, 1910, it was 3,565, in addition to field employés.

## White House Rules.

THE following rules have been arranged for the conduct of business at the Executive Offices during the Winter of 1913-14:

The Cabinet will meet on Tuesdays and Fridays from 11 A. M. until 1 P. M.

Senators and Representatives having business to transact will be received from 10.30 A. M. to 12 M., excepting on Cabinet days. In view of the pressure of business at the Executive Offices during the Congressional session it would greatly facilitate matters if Senators and Members could telephone for an appointment before calling, as many will have first made appointments in this way, and those calling without appointments are therefore necessarily delayed in seeing the President.

The East Room will be open daily, Sundays excepted, for the inspection of visitors, between the hours of 10 A. M. and 2 P. M.

JOSEPH P. TUMULTY, *Secretary to the President.*

## A TABLE OF LEADING ARTICLES IMPORTED INTO THE UNITED STATES OR INTO ANY OF ITS POSSESSIONS (EXCEPT PHILIPPINE ISLANDS, GUAM AND TUTUILA), GIVING RATES AT ENTRY BY THE NEW TARIFF ACT OF 1913 COMPARED WITH THE TARIFF ACT OF 1909.

(The following table covers only the articles of principal importance imported.)
(ad val.—ad valorem; n.s.p.f.—not specially provided for.)
* Effective March 1, 1914.

|---|---|---|
| SCHEDULE A—CHEMICALS, OILS AND PAINTS. | | |
| Acids, n.s.p.f. | 25 p.c. ad val. | 15 p.c. ad val. |
| Alcoholic compounds, n.s.p.f. | 60c. lb. and 25 p.c ad val. | 10c. lb. and 20 p.c. ad val. to 40c. lb. and 20 p.c. ad val. |
| Alkalies, alkaloids, and all chemical and medicinal compounds, preparations, mixtures and salts, and combinations thereof | 25 p.c. ad val. | 15 p.c. ad val. |
| Ammonia, carbonate of, and muriate of | 1½c. lb. | ¾c. lb. |
| Coal-tar products, not medicinal and not colors or dyes | Free list | 10 p.c. ad val. |
| Drugs | 1¼ c.lb.and 10 p.c. ad val. | 10 p.c. ad val. |
| Glue, value not above 10c. per pound | 2½c. lb. | 1c. lb. |
| Oil, castor, gals | 35c. gal. | 12c. gal. |
| Oil, olive in bottles, etc., gals | 50c. gal. | 30c. gal. |
| Oil, whale, gals | 8c. gal. | 5c. gal. |
| Opium, crude and not adulterated, containing 9 per cent. and over of morphia, lbs | $1.50 lb. | $3 lb. |
| Paints, colors, pigments, etc | 30 p.c. ad val. | 15 to 20 p.c. ad val. |
| Perfumery, cosmetics, containing alcohol | 60c. lb. and 50 p.c. ad val. | 40c. lb. and 60 p.c. ad val. |
| Perfumery, cosmetics, not containing alcohol | 60 p.c. ad val. | 60 p.c. ad val. |
| Soap, castile and unperfumed toilet soap | 1¼c. lb. | 10 p.c. ad val. |
| Soap, perfumed toilet | 50 p.c. ad val. | 30 p.c. ad val. |
| Soda, bicarbonate of | 5-8c. lb. | ¼c. lb. |
| Sponges, not advanced in value by chemical processes | 20 p.c. ad val. | 10 p.c. ad val. |
| Talcum | | 15 p.c. ad val. |
| SCHEDULE B—EARTHS, EARTHENWARE AND GLASSWARE | | |
| Cement | 8c. 100 lbs. | 10 p.c. ad val. |
| Earthenware, porcelain, decorated | 60 p.c. ad val. | 40 p.c. ad val. |
| Earthenware, common, not ornamented | 25 p.c. ad val. | 15 p.c. ad val. |
| Glassware, plain, decorated or cut | 60 p.c. ad val. | 45 p.c. ad val. |
| Marble, manufactures of, except for jewelry | 50 p.c. ad val. | 45 p.c. ad val. |
| Spectacles, eyeglasses, opera and field glasses, and frames for same | 50 p.c. ad val. | 35 p.c. ad val. |
| SCHEDULE C—METALS AND MANUFACTURES OF. | | |
| Iron, bar, n.s.p.f. | 6-10c. lb. | 5 p.c. ad val. |
| Steel, n.s.p.f. | Graduated rate | 15 p.c. ad val. |
| Automobiles, valued at $2,000 or more and automobile bodies. | | 45 p.c. ad val. |
| Automobiles valued at less than $2,000, and automobile chassis and finished parts of automobiles not including tires | 45 p.c. ad val. | 30 p.c. ad val. |
| Copper plates, n.s.p.f. | 2½c. lb. | 5 p.c. ad val. |
| Pens, metallic, except gold pens | 12c. gross | 8c. gross |
| Table and kitchen utensils, metal | 40 p.c. ad val. | 25 p.c. ad val. |
| Tin plates | 1 2-10c. lb. | 15 p.c. ad val. |
| Pins, not jewelry | 35 p.c. ad val. | 20 p.c. ad val. |
| Iron beams, girders, joists | Graduated rate | 10 p.c. ad val. |
| Cast iron pipe, andirons, plates, stove plates, hollow ware | 8-10c. lb. | 10 p.c. ad val. |
| Aluminum, and alloys of any kind in which it is the chief component, in crude form | 7c. lb. | 2c. lb. |
| Watch movements and watch cases, clocks and parts thereof | Graduated rate | 30 p.c. ad val. |
| Zinc in blocks, pigs or sheets | Graduated rate | 15 p.c. ad val. |
| SCHEDULE D—WOOD AND MANUFACTURES OF | | |
| Briar wood and similar wood unmanufactured | 15 p.c. ad val. | 10 p.c. ad val. |
| Paving posts, railroad ties, telephone, trolley and telegraph poles | 10 p.c. ad val. | 10 p.c. ad val. |
| House or cabinet furniture, and manufactures of wood or bark, n.s.p.f. | 35 p.c. ad val. | 15 p.c. ad val. |
| SCHEDULE E—SUGAR, MOLASSES AND MANUFACTURES OF. | | |
| Sugars and syrups of cane juice | Above 75 degrees polariscope 95-100 of 1c. per lb. and for each additional degree 35-1000 of 1c. per lb. | Not above 75 degrees polariscope 71-100 of 1c. per lb.; for every additional degree 26-1000 of 1c. per lb.* |
| Saccharin | 65c. lb. | 65c. lb. |
| Sugar cane in its natural state, or unmanufactured | 20 p.c. ad val. | 15 p.c. ad val. |
| Molasses, not above 40 degrees | 20 p.c. ad val. | 15 p.c. ad val. |
| Maple sugar and maple syrup | 4c. lb. | 3c. lb. |
| Glucose or grape sugar | 1½c. lb. | 1⅛c. lb. |
| Sugar candy, valued more than 15c. per pound | 50 p.c. ad val. | 25 p.c. ad val. |
| Sugar candy and all confectionery, n.s.p.f., valued at 15c. per pound or less | 4c. lb. and 15 p.c. ad val. | 2c. lb. |

Yarn, Angora goat hair, alpaca hair, etc., waste.

# Custom House Examination of Baggage.

The new Tariff provides for the exemption from duty of wearing apparel, etc., as shown in paragraph 642, as follows:

642. "Wearing apparel, articles of personal adornment, toilet articles, and similar personal effects of persons arriving in the United States; but this exemption shall include only such articles as were actually owned by them and in their possession abroad at the time of or prior to their departure from a foreign country, and as are necessary and appropriate for the wear and use of such persons and are intended for such wear and use, and shall not be held to apply to merchandise or articles intended for other persons or for sale: *Provided*, That in case of residents of the United States returning from abroad all wearing apparel, personal and household effects taken by them out of the United States to foreign countries shall be admitted free of duty, without regard to their value, upon their identity being established under appropriate rules and regulations to be prescribed by the Secretary of the Treasury: *Provided further*, That up to but not exceeding one hundred dollars in value of articles acquired abroad by such residents of the United States for personal or household use or as souvenirs or curios, but not bought on commission or intended for sale, shall be admitted free of duty.

RESIDENTS OF THE UNITED STATES.

Residents of the United States must declare all articles which have been obtained abroad by purchase or otherwise whether used or unused, and whether on their persons, in their clothing, or in their baggage. The foreign value of each article, stated in United States money, must also be declared.

Articles taken from the United States and remodelled, repaired or improved abroad must be declared, and the cost of such remodelling, repairing or improving must be separately stated.

Clothing and other personal effects taken out of the United States by the passenger will be admitted free of duty if not increased in value or improved in condition while abroad. If increased in value or improved in condition they are dutiable on the cost of the repairs.

Pack in one trunk, if practicable, all dutiable articles. Receipted bills for foreign purchases should be presented whenever possible. Use does not exempt from duty wearing apparel or other articles obtained abroad, but such articles will be appraised at their value in the condition as imported, due allowance being made for depreciation through wear and use.

CUSTOM HOUSE EXAMINATION OF BAGGAGE—*Continued.*

## NONRESIDENTS OF THE UNITED STATES.

Nonresidents of the United States are entitled to bring in free of duty, without regard to the one-hundred-dollar exemption, such articles as are in the nature of wearing apparel, articles of personal adornment, toilet articles, and similar personal effects, necessary and appropriate for their wear and use for the purposes of the journey and present comfort and convenience and which are not intended for other persons or for sale.

Citizens of the United States, or persons who have at any time resided in this country, shall be deemed to be residents of the United States, unless they shall have abandoned their residence in this country and acquired an actual bona fide residence in a foreign country.

Such citizens or former residents who desire the privileges granted by law to nonresidents must show to the satisfaction of the Collector's representative on the pier, subject to the Collector's approval, that they have given up their residence in the United States and that they have become bona fide residents of a foreign country.

The residence of wife follows that of the husband; and the residence of a minor child follows that of its parents.

## GOODS OTHER THAN PERSONAL EFFECTS.

Household effects of persons or families from foreign countries will be admitted free of duty only if actually used abroad by them not less than one year, and if not intended for any other person, nor for sale. Such effects should be declared whether the passenger be a resident or a nonresident of the United States.

Articles intended for use in business, or for other persons, theatrical apparel, properties, and sceneries, must be declared by passengers, whether residents or nonresidents.

## CIGARS AND CIGARETTES.

All cigars and cigarettes must be declared. Each passenger over eighteen years of age may bring in free of duty 50 cigars or 300 cigarettes if for the bona fide use of such passenger. Such cigars and cigarettes will be in addition to the articles included within the $100 exemption.

## BAGGAGE DECLARATIONS.

The law provides that every person entering the United States shall make a declaration and entry of his or her personal baggage. The law further requires that the values of articles shall be determined by customs officers, irrespective of the statements of passengers relative thereto.

*Passengers should observe that on the sheet given them there are two forms of declarations; the one printed in black is for residents of the United States; the one in red, for nonresidents.*

The exact number of pieces of baggage, including all trunks, valises, boxes, packages, and hand bags of any description accompanying the passenger, must be stated in the declaration.

The senior member of a family, present as a passenger, may make declaration for the entire family. Ladies travelling alone should state that fact in their declarations in order that an expeditious examination of their baggage may be made.

When the declaration is prepared and signed, the coupon at the bottom of the form must be detached and retained by the passenger, and the form given to the officer of the ship designated to receive the same. A declaration spoiled in its preparation must not be destroyed, but turned over to the purser, who will furnish a new blank to the passenger.

After all the baggage and effects of the passenger have been landed upon the pier, the coupon which has been retained by the passenger must be presented at the inspector's desk, whereupon an inspector will be detailed to examine the baggage. Passengers must acknowledge in person, on the pier, their signature to their declarations.

Examination of any baggage may be postponed if the passenger requests the officer taking his declaration to have it sent to the appraiser's store.

Passengers must not deduct the $100 exemption in making out their declarations. Such deductions will be made by customs officers on the pier.

## PROHIBITED IMPORTATIONS.

Paragraph 347 of the new Tariff prohibits the importation of aigrettes, egret plumes or so-called osprey plumes, and the feathers, quills, heads, wings, tails, skins, or parts of skins of wild birds, either raw or manufactured, and not for scientific or educational purposes; but this provision shall not apply to the feathers or plumes of ostriches, or to the feathers or plumes of domestic fowls of any kind.

## CONTESTED VALUATION.

Passengers dissatisfied with values placed upon dutiable articles by the customs officers on the pier may demand a re-examination, but application therefor should be immediately made to the officers there in charge. If for any reason this course is impracticable, the packages containing the articles should be left in customs custody and application for reappraisement made to the Collector of Customs, in writing, within ten days after the original appraisement. *No request for reappraisement can be entertained after the articles have been removed from customs custody.*

## MISCELLANEOUS PROVISIONS.

Currency or certified checks only can be accepted in payment of duties, but, upon request, baggage will be retained on the piers for twenty-four hours to enable the owner to secure currency or certified checks. The offering of gratuities or bribes to customs officers is a violation of law.

## BAGGAGE FOR TRANSPORTATION IN BOND.

Baggage intended for delivery at ports in the United States other than the port of arrival, or in transit through the United States to a foreign country, may be forwarded thereto without the assessment of duty at the port of arrival, by the various railroads and express companies, whose representatives will be found on the pier.

Passengers desiring to have their baggage forwarded in bond should indicate such intention and state the value thereof in their declarations before any examination of the baggage has been made.

## SEALSKIN GARMENTS.

An act of Congress of 1897, as amended in 1910, expressly forbids the importation into the United States of garments made in whole or in part of the skins of seals taken in the waters of the Pacific Ocean; and unless the owner is able to establish by competent evidence and to the satisfaction of the Collector that the garments are not prohibited, they cannot be admitted.

## PENALTY FOR NOT DECLARING ARTICLES OBTAINED ABROAD.

Under Sections 2802 and 3082 of the Revised Statutes of the United States, articles obtained abroad and not declared are subject to seizure, and the passenger is liable to criminal prosecution.

## United States Court of Customs Appeals.

*Presiding Judge*—Robert M. Montgomery. *Associate Judges*—James F. Smith, Orion M. Barber, Marion De Vries, George E. Martin. *Attorney-General*—James C. McReynolds. *Assistant Attorney-General*—William L. Wemple. *Clerk*—Arthur B. Shelton ($3,500). *Marshal*—Frank H. Briggs ($3,000).

SEC. 188. There shall be a United States Court of Customs Appeals, which shall consist of a Presiding Judge and four Associate Judges, each of whom shall be appointed by the President, by and with the advice and consent of the Senate, and shall receive a salary of seven thousand dollars a year. The Presiding Judge shall be so designated in the order of appointment and in the commission issued to him by the President; and the Associate Judges shall have precedence according to the date of their commissions. Any three members of said court shall constitute a quorum, and the concurrence of three members shall be necessary to any decision thereof. In case of a vacancy or of the temporary inability, or disqualification for any reason of one or two of the Judges of said court, the President may, upon the request of the Presiding Judge of said court, designate any qualified United States Circuit or District Judge or Judges to act in his or their places and such Circuit or District Judges shall be duly qualified to so act.

SEC. 189. The said Court of Customs Appeals shall always be open for the transaction of business, and sessions thereof may, in the discretion of the court, be held in the several judicial circuits, and at such places as said court may from time to time designate.

SEC. 195. The Court of Customs Appeals shall exercise exclusive appellate jurisdiction to review by appeal, as herein provided, final decisions by a Board of General Appraisers in all cases as to the construction of the law and the facts respecting the classification of merchandise, and the rate of duty imposed thereon under such classification, and the fees and charges connected therewith, and all appealable questions as to the jurisdiction of said board, and all appealable questions as to the laws and regulations governing the collection of the customs revenues; and the judgments and decrees of said Court of Customs Appeals shall be final in all such cases.

SEC. 196. No appeal shall be taken or allowed from any Board of United States General Appraisers to any other court, and no appellate jurisdiction shall thereafter be exercised or allowed by any other courts in cases decided by said Board of United States General Appraisers, but all appeals allowed by law from such Board of General Appraisers shall be subject to review only in the Court of Customs Appeals hereby established, according to the provisions of this chapter: *Provided*, That nothing in this chapter shall be deemed to deprive the Supreme Court of the United States of jurisdiction to hear and determine all customs cases which have heretofore been certified to said court from the United States Circuit Courts of Appeals on applications for writs of *certiorari* or otherwise, nor to review by writ of *certiorari* any customs case heretofore decided or now pending and hereafter decided by any Circuit Court of Appeals, provided application for said writ be made within six months after August fifth, nineteen hundred and nine: *Provided further*, That all customs cases decided by a Circuit or District Court of the United States or a court of a Territory of the United States prior to said date above mentioned, and which have not been removed from said courts by appeal or writ of error, and all such cases theretofore submitted for decision in said courts and remaining undecided may be reviewed on appeal at the instance of either party by the United States Court of Customs Appeals, provided such appeal be taken within one year from the date of the entry of the order, judgment, or decrees sought to be reviewed.

SEC. 197. Immediately upon the organization of the Court of Customs Appeals, all cases within the jurisdiction of that court pending and not submitted for decision in any of the United States Circuit Courts of Appeals, United States Circuit, Territorial or District Courts, shall, with the record and samples therein, be certified by said courts to said Court of Customs Appeals for further proceedings in accordance herewith: *Provided*, That where orders for the taking of further testimony before a referee have been made in any of such cases, the taking of such testimony shall be completed before such certification.

SEC. 198. If the importer, owner, consignee, or agent of any imported merchandise, or the Collector or Secretary of the Treasury, shall be dissatisfied with the decision of the Board of General Appraisers as to the construction of the law and the facts respecting the classification of such merchandise and the rate of duty imposed thereon under such classification, or with any other appealable decision of said board, they, or either of them, may, within sixty days next after the entry of such decree or judgment, and not afterward, apply to the Court of Customs Appeals for a review of the questions of law and fact involved in such decision: *Provided*, That in Alaska and in the insular and other outside possessions of the United States ninety days shall be allowed for making such application to the Court of Customs Appeals. Such application shall be made by filing in the office of the clerk of said court a concise statement of errors of law and fact complained of; and a copy of such statement shall be served on the collector, or the importer, owner, consignee, or agent, as the case may be. Thereupon the court shall immediately order the Board of General Appraisers to transmit to said court the record and evidence taken by them, together with the certified statement of the facts involved in the case and their decision thereon; and all the evidence taken by and before said board shall be competent evidence before said Court of Customs Appeals. The decision of said Court of Customs Appeals shall be final, and such cause shall be remanded to said Board of General Appraisers for further proceedings to be taken in pursuance of such determination.

SEC. 199. Immediately upon receipt of any record transmitted to said court for determination the clerk thereof shall place the same upon the calendar for hearing and submission; and such calendar shall be called and all cases thereupon submitted, except for good cause shown, at least once every sixty days: *Provided*, That such calendar need not be called during the months of July and August of any year.

---

## National Association of Letter Carriers.

THE objects of the association are: First, to unite fraternally all letter carriers in the United States for their mutual benefit. Second, to obtain and secure rights as Government employés and to strive at all times to promote the welfare of every member. Third, to create and establish the United States Letter Carriers' Mutual Benefit Association, as defined in the Constitution and general laws governing said association. Fourth, in conjunction with the Post-Office Department, to strive for the constant improvement of the service. Fifth, to create and establish the United States Letter Carriers' National Sick Benefit Association. The association has a membership of 30,000. The dues are $1.50 per annum.

The officers of the association are: *President*—William E. Kelly, Brooklyn, N. Y. *Vice-President*—Edward J. Gainor, Muncie, Ind. *Secretary*—Edward J. Cantwell, Washington, D. C. *Treasurer*—Charles D. Duffy, Chicago, Ill. The headquarters of the association are at 945 Pennsylvania Avenue, Washington, D. C.

# Postal Information.

(*Revised by the Post-Office Department for* THE WORLD ALMANAC.)

## DOMESTIC RATES OF POSTAGE.

ALL mailable matter for transmission by the United States mails within the United States is divided into four classes, under the following regulations: (Domestic rates apply to mail for Canada, Mexico, Cuba, Tutuila, Porto Rico, Guam, Hawaii, the Philippines, the "Canal Zone," the Republic of Panama, and Shanghai, China, also to officers or members of the crew of vessels of war of the United States, and officers and men of the United States Navy in the United States Naval Hospital, Yokohama, Japan.)

**First-Class Matter**—This class includes letters, postal cards, "post cards," and anything sealed or otherwise closed against inspection, except as provided for under other classifications or anything containing writing not authorized on mail matter of other classifications.

First class or letter rate of postage to any part of the United States, its possessions, or the above-named countries, *two cents per ounce or fraction thereof.*

Rates on local or drop letters at free delivery offices, two cents per ounce or fraction thereof. At offices where there is no free delivery by carriers, and the addressee cannot be served by rural free delivery carriers, one cent per ounce or fraction thereof.

Rates on **postal cards,** one cent (double or "reply" cards, two cents). Postal cards issued by the Post-Office Department may bear written, printed, or other additions as follows:

(*a*) The face of the card may be divided by a vertical line placed approximately one-third of the distance from the left end of the card; the space to the left of the line to be used for a message, etc., but the space to the right for the address only.

(*b*) Addresses upon postal cards may be either written, printed, or affixed thereto, at the option of the sender.

(*c*) Very thin sheets of paper may be attached to the card on condition that they completely adhere thereto. Such sheets may bear both writing and printing.

(*d*) Advertisements, illustrations, or writing may appear on the back of the card and on the left third of the face.

2. The addition to a postal card of matter other than as above authorized will subject the card, when sent in the mails, to postage according to the character of the message—at the letter rate if wholly or partly in writing or the third-class rate if entirely in print. In either case the postage value of the stamp impressed upon the card will not be impaired.

3. Postal cards must be treated in all respects as sealed letters, except that those mailed for local delivery will be returned to the sender if undeliverable and the name and address of the sender appears thereon. Undeliverable "double" postal cards will be returned to the sender if known.

4. Postal cards bearing particles of glass, metal, mica, sand, tinsel or other similar substances, are unmailable, except when inclosed in tightly sealed envelopes with proper postage attached, or when treated in such manner as will prevent the objectionable substances from being rubbed off or injuring persons handling the mails.

Cards that have been spoiled in printing or otherwise will be redeemed from the *original purchasers* at 75 per cent. of their face value if unmutilated.

POST CARDS—(private mailing cards)—bearing written or printed messages are transmissible in the mails.

Private mailing cards ("post cards") in the domestic mails must conform to the following conditions:

(*a*) A "post card" must be an unfolded piece of cardboard not exceeding approximately 3 9-16 by 5 9-16 inches, nor less than approximately 2¾ by 4 inches,

(*b*) It must in form and in the quality and weight of paper be substantially like the Government postal card.

(*c*) It may be of any color not interfering with a legible address and postmark.

(*d*) It may or may not, at the option of the sender, bear near the top of the face the words "post card."

(*e*) The face of the card may be divided by a vertical line; the left half to be used for a message, etc., but that to the right for the address only.

(*f*) Very thin sheets of paper may be attached to the card, and then only on condition that they completely adhere thereto. Such sheets may bear both writing and printing.

(*g*) Advertisements and illustrations may appear on the back of the card and on the left half of the face.

2. Cards, without cover, conforming to the foregoing conditions are transmissible in the domestic mails (including the possessions of the United States) and to Cuba, Canada, Mexico, the Republic of Panama, and Shanghai, China, at the postage rate of 1 cent each.

3. When "post cards" are prepared by printers and stationers for sale, it is desirable that they bear in the uper right hand corner of the face an oblong diagram containing the words "Place postage stamp here," and at the bottom of the space to the right of the verticle dividing line, the words "This space for the address."

4. Cards which do not conform to the conditions prescribed by these regulations are, when sent in the mails, chargeable with postage according to the character of the message—at the letter rate, if wholly or partly in writing, or at the third-class rate, if entirely in print.

5. Cards bearing particles of glass, metal, mica, sand, tinsel, or other similar substances, are *unmailable*, except when inclosed in tightly sealed envelopes, or when treated in such manner as will prevent the objectionable substances from being rubbed off or injuring persons handling the mails.

Rate on special delivery letters, ten cents on each letter in *addition* to the regular postage. This entitles the letter to immediate delivery by special messenger. Special delivery stamps are sold at post-offices, and must be affixed to such letters. Ordinary stamps to the value of ten cents in addition to the regular postage, affixed to a letter or other piece of mail will entitle it to special delivery if it is marked "Special Delivery." The delivery, at carrier offices, extends to the limits of the carrier routes. At non-carrier offices it extends to one mile from the post-office. Postmasters are not obliged to deliver beyond these limits, and letters addressed to places beyond must await delivery in the usual way, notwithstanding the special delivery stamp.

Prepayment by stamps invariably required. Postage on all letters should be *fully* prepaid, but if prepaid one full rate and no more, they will be forwarded, and the amount of deficient postage collected on delivery; if wholly unpaid, or prepaid with less than one full rate and deposited at a post-office, the addressee will be notified to remit postage; and if he fails to do so, they will be sent

to the Dead Letter Office; but they will be returned to the sender if he is located at the place of mailing, and if his address be printed or written upon them.

Letter rate is charged on typewriting and carbon or letter press copies thereof, and on all printed imitations or reproductions of typewriting or manuscript obtained by mechanical process unless such reproductions are presented at post-office windows in the minimum number of twenty identical unsealed copies.

Letters and other matter prepaid at the letter rate—two cents an ounce or fraction thereof—(but no other class of mail matter) will be returned to the sender free, if a request to that effect is printed or written on the envelope or wrapper. The limit of weight is four pounds, except for a single book.

Prepaid letters and other matter prepaid at the letter rate will be forwarded from one post-office to another upon the written request of the person addressed, without additional charge for postage. The direction on forwarded letters may be changed as many times as may be necessary to reach the person addressed. Nothing may be added to such letters except the forwarding address without subjecting them to new postage.

**Second-Class Matter**—This class includes all printed newspapers and periodicals that have been "Entered as second-class matter," under the act of March 3, 1879, and are regularly issued at stated intervals as frequently as four times a year, from a known office of publication and mailed by the publishers or news agents to actual subscribers or as sample copies or to news agents for sale, and newspapers and publications of this class mailed by persons other than publishers. Also periodical publications entered under the act of August 24, 1912, of benevolent and fraternal societies, organized under the lodge system and having a membership of a thousand persons, and the publications of strictly professional, literary, historical and scientific societies, and incorporated institutions of learning, trade unions, etc., provided that these be published at stated intervals not less than four times a year, and that they be formed of printed paper sheets without board, cloth, leather or other substantial binding. Publishers who wish to avail themselves of the privileges of the act are required to make formal application to the department through the postmaster at the place of publication, producing satisfactory evidence that the organizations, societies, and institutions represented come within the purview of the law, and that the object of the publications is to further the objects and purposes of the organizations.

Rates of postage to publishers and news agents, *one cent a pound or fractional part thereof*, prepaid in currency. Publications designed primarily for advertising or free circulation, or circulation at a nominal rate, or not having a legitimate list of subscribers, are not entitled to the pound rate under the act of March 3, 1879.

Publications which have not been admitted to the second-class are third-class matter.

Publications sent to actual subscribers in the county where printed and published are free, unless mailed for delivery at a letter-carrier office.

Rates of postage on second-class newspapers, magazines, or periodicals, mailed by others than the publishers or news agents, *one cent for each four ounces or fraction thereof.* It should be observed that the rate is one cent for each four ounces, not one cent for each paper contained in the same wrapper. This rate applies only when a complete copy is mailed. Parts of second-class publications or partial or incomplete copies are *third-class matter.* Second-class matter will be entitled to special delivery when special delivery stamps (or ten cents in ordinary stamps and the words "Special Delivery" placed on the wrapper) are affixed in addition to the regular postage.

Second-class matter must be so wrapped that it may be easily examined. The sender's name and address may be written in them or on the wrapper, also the words "sample copy" when sent as such, or "marked copy" when it contains a marked item or article. Typographical errors in the text may be corrected, but any other writing subjects the matter to letter postage.

**Third-Class Matter**—Mail matter of the third class includes printed books, pamphlets, engravings, circulars in print (or by the mimeograph, hectograph, electric-pen, or similar process when at least twenty identical copies are mailed at post-office windows at one time), and other matter wholly in print, proof sheets, corrected proof sheets, and manuscript copy accompanying the same.

The rate on matter of this class is *one cent for each two ounces or fraction thereof.* Postage must be paid by stamps affixed, unless 2,000 or more identical pieces are mailed under special permit when the postage at that rate may be paid in money.

Manuscript unaccompanied by proof sheets is subject to the letter rate.

Third-class matter must admit of easy inspection, otherwise it will be charged letter rate on delivery. It must be fully prepaid, or it will not be despatched. New postage must be prepaid for forwarding to a new address or returning to senders.

The limit of weight is four pounds, except single books in separate packages, on which the weight is not limited. It is entitled, like matter of the other classes, to special delivery when special delivery stamps are affixed in addition to the regular postage, or when ten cents in ordinary stamps are affixed in addition to the regular postage and the words "Special Delivery" are placed on the wrapper.

Upon matter of the third class, or upon the wrapper or envelope inclosing the same, or the tag or label attached thereto, the sender may write his own name, occupation, and residence or business address, preceded by the word "from," and may make marks other than by written words to call attention to any word or passage in the text, and may correct any typographical errors. There may be placed upon the blank leaves or cover of any book, or printed matter of the third class, a simple manuscript dedication or inscription not of the nature of a personal correspondence. Upon the wrapper or envelope of third-class matter, or the tag or label attached thereto, may be placed in writing or otherwise the words "Please do not open until Christmas" or words to that effect, and there may be printed any matter mailable as third class. Written designation of the contents such as "book," "photo," "printed matter," is also permissible, but there must be left on the address side a space sufficient for a legible address, postmark and the necessary stamps.

**Fourth-Class Matter**—See "Domestic Parcel Post."

**Third or Fourth Class Matter Mailable Without Stamps**—Under special permits postage may be paid in money for third or fourth class matter mailed in quantities of 2,000 or more *identical* pieces. For information concerning the regulations governing such mailings inquiry should be made of the postmaster.

**Registration**—All domestic mail matter except fourth-class matter may be registered at the rate of *ten cents for each package* in addition to the regular rates of postage, to be fully prepaid by stamps. Each package must bear the name and address of the sender, and a receipt will be returned from the person to whom addressed, when indorsed "receipt desired," or words of similar import. Mail matter can be registered at all post-offices in the United States.

An indemnity—not to exceed $50 for any one registered piece, or the actual value of the piece, if it is less than $50—shall be paid for the loss of first-class registered matter mailed at and addressed to

POSTAL INFORMATION—*Continued.*

a United States post-office, and an indemnity not to exceed $25 is paid for domestic third and fourth class matter. The limit of indemnity paid for registered articles lost in the international mails is 50 francs.

**Domestic Money Orders**—Domestic money orders are issued by money-order post-offices for any amount up to $100, at the following rates:

For sums not exceeding $2.50, 3 cents; over $2.50 to $5, 5 cents; over $5 to $10, 8 cents; over $10 to $20, 10 cents; over $20 to $30, 12 cents; over $30 to $40, 15 cents; over $40 to $50, 18 cents; over $50 to $60, 20 cents; over $60 to $75, 25 cents; over $75 to $100, 30 cents.

**Stamped Envelopes**—Embossed stamped envelopes and newspaper wrappers of several denominations, sizes and colors are kept on sale at post-offices, singly or in quantities, at a small advance on the postage rate. Stamps cut from stamped envelopes are valueless, but postmasters are authorized to give good stamps for stamped envelopes or newspaper wrappers that may be spoiled in directing, if presented in a substantially whole condition.

---

**Unmailable Matter**—See also "Domestic Parcel Post." —Unmailable domestic matter—that is, matter which is not admissible to the United States mails for delivery in the United States or in any of its possessions—includes:

All matter illegibly, incorrectly, or insufficiently addressed.

All second-class matter and all matter of the third or fourth class not wholly prepaid; and letters and other first-class matter not prepaid one full rate—2 cents.

All matter weighing over four pounds, except second-class matter, fourth-class matter, (parcel post), single books, official matter emanating from the Executive Departments and documents printed and circulated by authority of Congress.

Postal, post, or other cards mailed uninclosed which bear delineations, epithets, terms, or language of an indecent, lewd, lascivious, obscene, libelous, scurrilous, defamatory or threatening character, or calculated by the terms or manner or style of display, and obviously intended to reflect injuriously upon the character or conduct of another, also articles bearing such matter upon the wrapper or outside cover. Dunning postal or post cards are included in this class.

Post cards, bearing particles of glass, metal, mica, sand, tinsel, or other similar substances, are unmailable, except as provided under "First-Class Matter."

All matter concerning any lottery, gift, enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or chance, or concerning schemes devised for the purpose of obtaining money or property under false pretenses.

Applications for the establishment of post-offices should be addressed to the First Assistant Postmaster-General, accompanied by a statement of the necessity therefor. Instructions will then be given and blanks furnished to enable the petitioners to provide the department with the necessary information.

The franking privilege was abolished July 1, 1873, but the following mail matter may be sent free by legislative saving clauses, viz.:

1. All public documents printed by order of Congress, the Congressional Record and speeches contained therein, franked by Members of Congress, or the Secretary of the Senate, or Clerk of the House.

2. Seeds transmitted by the Secretary of Agriculture, or by any Member of Congress, procured from that Department.

3. Letters and packages relating exclusively to the business of the Government of the United States, mailed only by officers of the same, and letters and parcels mailed by the Smithsonian Institution. All these must be covered by specially printed "penalty" envelopes or labels.

4. The Vice-President, Members and Members-elect and Delegates and Delegates-elect to Congress may frank any mail matter to any Government official or to any person correspondence, not over four ounces in weight, upon official or departmental business.

All communications to Government officers and to Members of Congress are required to be prepaid by stamps unless inclosed in "penalty" envelopes furnished for replies.

**Suggestions to the Public**—Mail all letters, etc., as early as practicable, especially when sent in large numbers, as is frequently the case with newspapers and circulars.

All mail matter at large post-offices is necessarily handled in great haste and should therefore in all cases be SO PLAINLY addressed as to leave NO ROOM FOR DOUBT AND NO EXCUSE FOR ERROR on the part of postal employés. Names of States should be written in full (or their abbreviations very distinctly written) in order to prevent errors which arise from the similarity of such abbreviations as Cal., Col.; Pa., Va., Vt.; Me., Mo., Md.; Ioa., Ind.; N. H., N. M., N. Y., N. J., N. C., D. C.; Miss., Minn., Mass.; Nev., Neb.; Penn., Tenn., etc., when hastily or carelessly written. This is especially necessary in addressing mail matter to places of which the names are borne by several post-offices in different States.

Avoid as much as possible using envelopes made of flimsy paper, especially where more than one sheet of paper, or any other article than paper, is inclosed. Being often handled, and even in the mail-bags subject to pressure, such envelopes not infrequently split open, giving cause of complaint.

Never send money or any other article of value through the mail except either by means of a money order or in a registered letter. Any person who sends money or jewelry in an unregistered letter not only runs a risk of losing his property, but exposes to temptation every one through whose hands his letter passes, and may be the means of ultimately bringing some clerk or letter-carrier to ruin.

See that every letter or package bears the full name and post-office address of the writer, in order to secure the return of the letter, if the person to whom it is directed cannot be found. A much larger portion of the undelivered letters could be returned if the names and addresses of the senders were always fully and plainly written or printed inside or on the envelopes. Persons who have large correspondence find it most convenient to use "special request envelopes;" but those who only mail an occasional letter can avoid much trouble by writing a request to "return if not delivered," etc., on the envelope.

When dropping a letter, newspaper, etc., into a street mailing-box, or into the receptacle at a post-office, always see that the packet falls into the box and does not stick in its passage; observe, also, particularly, whether the postage stamps remain securely in their places.

Postage stamps should be placed on the upper right-hand corner of the address side of all mail matter.

The street and number (or box number) should form a part of the address of all mail matter directed to cities. In most cities there are many persons, and even firms, bearing the same name. Before depositing any package or other article for mailing, the sender should assure himself that it is wrapped and packed in the manner prescribed by postal regulations; that it does not contain *unmailable* matter nor exceed the limit of weight as fixed by law; and that it is fully prepaid and properly addressed.

POSTAL INFORMATION—*Continued.*

It is unlawful to send an ordinary letter by express or otherwise outside of the mails unless it be inclosed in a Government-stamped envelope of sufficient value to pay the postage to which it is subject. It is also unlawful to inclose a letter in an express package unless it pertains wholly to the contents of the package.

It is forbidden by the regulations of the Post-Office Department for postmasters to give to any person information concerning the mail matter of another, or to disclose the name of a box-holder at a post-office.

Letters addressed to persons temporarily sojourning in a city where the Free Delivery System is in operation should be marked "Transient" or "General Delivery," if not addressed to a street and number or some other designated place of delivery.

*Foreign* books, etc., infringing United States copyright are *undeliverable* if received in foreign mails, or mailed here.

The foregoing rates, rules, and suggestions *apply to postal matters in the United States.*

# Domestic Parcel Post.

## FOURTH-CLASS MATTER.

Fourth-class mail matter embraces all other matter, including farm and factory products, not now embraced by law in either the first, second, or third class, which is not greater in size than seventy-two inches in length and girth combined, nor in form or kind likely to injure the person of any postal employé or damage the mail equipment or other mail matter and not of a character perishable within a period reasonably required for transportation and delivery.

The limit of weight for parcels of fourth-class matter for delivery within the first and second zones is twenty pounds. The limit of weight for parcels intended for delivery in other than the first and second zones is eleven pounds.

### RATES OF POSTAGE.

Parcels weighing four ounces or less are mailable at the rate of one cent for each ounce or fraction of an ounce, regardless of distance. Parcels weighing more than four ounces are mailable at the pound rates shown in the following table, a fraction of a pound being considered a full pound.

The pound rates of postage in the first and second zones are as follows:

| Weight. | 1st Zone. | | 2d Zone Rate. 50 to 150 Miles. | Weight. | 1st Zone. | | 2d Zone Rate. 50 to 150 Miles. |
|---|---|---|---|---|---|---|---|
| | Local Rate. | Zone Rate, 50 Miles. | | | Local Rate. | Zone Rate. 50 Miles. | |
| 1 pound . . . . | $0.05 | $0.05 | $0.05 | 11 pounds . . . | $0.10 | $0.15 | $0.15 |
| 2 pounds . . . | .06 | .06 | .06 | 12 pounds . . . | .11 | .16 | .16 |
| 3 pounds . . . | .06 | .07 | .07 | 13 pounds . . . | .11 | .17 | .17 |
| 4 pounds . . . | .07 | .08 | .08 | 14 pounds . . . | .12 | .18 | .18 |
| 5 pounds . . . | .07 | .09 | .09 | 15 pounds . . . | .12 | .19 | .19 |
| 6 pounds . . . | .08 | .10 | .10 | 16 pounds . . . | .13 | .20 | .20 |
| 7 pounds . . . | .08 | .11 | .11 | 17 pounds . . . | .13 | .21 | .21 |
| 8 pounds . . . | .09 | .12 | .12 | 18 pounds . . . | .14 | .22 | .22 |
| 9 pounds . . . | .09 | .13 | .13 | 19 pounds . . . | .14 | .23 | .23 |
| 10 pounds . . . | .10 | .14 | .14 | 20 pounds . . . | .15 | .24 | .24 |

NOTE—The rate for local delivery applies to all matter mailed at a city carrier office, or at any point within its delivery limits, for delivery by carriers from that office. The rate for local delivery applies also to all parcels mailed at a post-office from which a rural route starts, for delivery on such route, or mailed at any point on such route for delivery at any other point thereon, or at the office from which the route starts, or on any rural route starting therefrom, and on all matter mailed at any office for local delivery.

The pound rates of postage for the third, fourth, fifth, sixth, seventh and eighth zones are as follows:

| Weight. | 3d Zone, 150 to 300 Miles. Rate. | 4th Zone, 300 to 600 Miles. Rate. | 5th Zone, 600 to 1,000 Miles. Rate. | 6th Zone, 1,000 to 1,400 Miles. Rate. | 7th Zone, 1,400 to 1,800 Miles. Rate. | 8th Zone, all over 1,800 Miles. Rate. |
|---|---|---|---|---|---|---|
| 1 pound. . . . . | $0.07 | $0.08 | $0.09 | $0.10 | $0.11 | $0.12 |
| 2 pounds. . . . . | .12 | .14 | .16 | .19 | .21 | .24 |
| 3 pounds. . . . . | .17 | .20 | .23 | .28 | .31 | .36 |
| 4 pounds. . . . . | .22 | .26 | .30 | .37 | .41 | .48 |
| 5 pounds. . . . . | .27 | .32 | .37 | .46 | .51 | .60 |
| 6 pounds. . . . . | .32 | .38 | .44 | .55 | .61 | .72 |
| 7 pounds. . . . . | .37 | .44 | .51 | .64 | .71 | .84 |
| 8 pounds. . . . . | .42 | .50 | .58 | .73 | .81 | .96 |
| 9 pounds. . . . . | .47 | .56 | 65 | .82 | .91 | 1.08 |
| 10 pounds. . . . . | .52 | .62 | .72 | .91 | 1.01 | 1.20 |
| 11 pounds. . . . . | .57 | .68 | .79 | 1.00 | 1.11 | 1.32 |

**Rate to Alaska, the Hawaiian Islands, the Philippine Islands, Guam, Shanghai (China), Tutuila (Samoa), and the Canal Zone**—The rate on parcels for Alaska, the Hawaiian Islands, the Philippine Islands, Guam, the United States Postal Agency at Shanghai (China), Tutuila (Samoa), and the Canal Zone (except for parcels weighing four ounces or less, on which the rate is one cent for each ounce or fraction thereof) is twelve cents for the first pound and twelve cents for each additional pound or fraction thereof.

NOTE—Parcels for the Canal zone, except those having no commercial value, must be accompanied with a Customs Declaration.

**Rate on Parcels for United States Naval Vessels**—The eighth zone rate of postage applies to parcels of fourth-class mail, exceeding four ounces in weight, exchanged between the United States, or any of its possessions, and United States naval vessels stationed in foreign waters. When such

DOMESTIC PARCEL POST—*Continued.*

vessels are stationed in a port of the United States, or any of its possessions, the rates applicable to or from the post-office at such port shall be charged.

**Special Rate for Seeds, Cuttings, Bulbs, Etc.**—Seeds, cuttings, bulbs, roots, scions and plants are matter of the fourth class, but are chargeable with the special rate of postage of one cent for each two ounces or fraction thereof, regardless of distance.

**Rates for Grain, Vegetables, Etc.**—Samples of wheat or other grain in its natural condition, potatoes, beans, peas, chestnuts, acorns, etc., when intended for planting must be prepaid at the special rate of postage prescribed in the preceding paragraph, but when sent for purposes other than planting the parcel post rates apply.

**Postage Stamps**—Ordinary or parcel post stamps are valid for postage and for insurance and collect on delivery fees on fourth-class mail.

**Packages Mailed as First-Class Matter Should Be Sealed**—When it is desired to send merchandise as first-class matter the packages should be sealed or otherwise closed against inspection, in order to avoid any confusion in the mails as to their proper classification.

**Where Parcels Must Be Mailed**—Parcels weighing over four ounces must be mailed at a post-office or at a lettered or local named station or branch post-office, or such numbered stations as have been designated to receive parcel post matter. Parcels must bear the name and address of the sender, preceded by the word "From."

**Parcels Must Not Be Sealed**—Parcels must be prepared for mailing in such manner that the contents can be easily examined. Parcels which are sealed or otherwise closed against inspection, or which contain or bear writing which is not permissible are subject to postage at the first-class (letter) rate and will be treated as first-class matter. If such a parcel exceeds four pounds in weight it is unmailable.

Boxes to which the lids are nailed or screwed may be accepted for mailing at the fourth-class rates of postage, if, with reasonable effort, the lids can be removed for the purpose of permitting examination of the contents.

Parcels in bags or cloth so stitched that the necessary examination can not be made will be regarded as closed against inspection.

**Limit of Weight and Size**—If a parcel exceeds the limit of weight stated in the tables on preceding page, or is greater in size than seventy-two inches in length and girth combined, it must be refused, no matter how small the excess may be in either case.

The law prescribes that a package to be admitted to the parcel post shall not exceed seventy-two inches in combined length and girth. In measuring the length the greatest distance in a straight line between the two ends of the parcel shall be taken, while the girth is the actual measurement by a tape encircling the parcel at its thickest part.

A parcel not more than 3 feet 6 inches in length may measure as much as 2 feet 6 inches in girth, or around its thickest part. A shorter parcel may be thicker; thus, if it measures no more than 3 feet in length it may measure as much as 3 feet in girth, or around its thickest part. Measurements can be made by means of a six-foot tape line. So much of the tape as is not used in measuring the length is the measure of the maximum girth permissible.

**Permissible Additions and Inclosures**—In addition to the name and address of the sender, which is required, it is permissible to write or print on the covering of a parcel, or on a tag or label attached to it, the occupation of the sender, and to indicate in a small space by means of marks, letters, numbers, names or other brief description, the character of the parcel, but ample space must be left on the address side for the full address in legible characters and for the necessary postage stamps. Inscriptions such as "Merry Christmas," "Please do not open until Christmas," "Happy New Year," "With best wishes," and the like, may be placed on the covering of the parcel in such manner as not to interfere with the address.

Printed matter relating to an article of merchandise which it accompanies is regarded as descriptive of the article within the meaning of the Postal Laws and Regulations, and therefore is a permissible inclosure with such article when mailed as fourth-class matter.

Printing on an article of merchandise or on its wrapper, or on a label pasted to it in such manner as to form an integral part of it, does not affect the classification of the article as mail matter of the fourth class.

Directions for taking medicine written on a label attached to a bottle or package containing the medicine or inclosed with it are permissible under the provisions of the Postal Laws and Regulations, and do not affect the classification of the parcel.

It is permissible under the provisions of the Postal Laws and Regulations to inclose with matter of the fourth class an invoice showing in writing or printing the name and address of the sender and of the addressee; the names and quantities of articles inclosed, together with inscriptions indicating, "for purpose of description," the price, style, stock number, size and quality of the articles, the order or file number, date of order and date and manner of shipment, the initials or name of the salesman, or of the person by whom the articles were packed or checked.

**Third-Class Matter Not Admissible**—Articles classified as third-class matter can not be sent by parcel post.

Printed books are third-class matter, and postage on them is required to be prepaid at the rate of one cent for each two ounces or fraction of two ounces.

**Printed Matter with Samples of Merchandise Attached**—Samples of merchandise affixed to circulars or other printed matter will not affect the classification of such matter as third-class mail when the samples occupy less than twenty per cent. of the superficial area of the circulars or other printed matter. When twenty per cent. or more of the space is occupied by samples of merchandise permanently attached thereto, the circulars or other printed matter shall be considered fourth-class mail and chargeable with postage at the rates set forth in the Parcel Post Regulations.

Printed catalogues are third-class mail, and postage on them is required to be prepaid at the rate of one cent for each two ounces or fraction of two ounces. Samples of merchandise permanently attached to a catalogue will not affect its classification as third-class mail when such samples constitute only an incidental feature of the catalogue. When less than twenty per cent. of the space in a catalogue is occupied with samples of merchandise, such space will be regarded as an incidental feature, and the third-class rate of postage will apply to the catalogue. When at least twenty per cent. of the space in a catalogue is occupied with samples of merchandise, the catalogue shall be considered fourth-class mail.

**Books, Forms, Etc., Partially Printed**—Order forms, address tags, report forms, letter and bill heads, insurance and legal forms, post cards, blank check books, receipt books and other books of forms, partially in print, are governed by the classification set forth on pages 7 to 11 of the July 1913, Postal Guide.

**Parcels Containing Two or More Classes of Mail Matter**—A parcel containing two or more classes of mail matter is chargeable with postage at the rate applicable to the highest class of matter inclosed. A parcel composed of two articles, one being matter of the third class and the other matter of the fourth class, is chargeable with postage at the fourth-class rate when such postage is equal

to or greater than that which would be chargeable if the third-class rate were applicable. However, when the postage on a parcel containing both third and fourth-class matter amounts to more at the third-class than at the fourth-class rate, owing to the graduated zone rates, the parcel must be charged with postage at the third-class rate (one cent for each two ounces or fraction of two ounces), and in such cases the parcel must not exceed four pounds in weight, unless it is a single book.

**Forwarding of Parcels**—Parcels may be remailed or forwarded on the payment of additional postage at the rate which would be chargeable if they were originally mailed at the forwarding office, in which case the necessary stamps shall be affixed by the forwarding postmaster. Payment must be made every time the parcel is forwarded.

**Domestic Parcels Can Not Be Registered**—In view of the provision for the insurance of fourth-class mail and the furnishing of receipts for such mail when insured, the necessity for registration is removed and therefore fourth-class matter for domestic destinations is not admitted to the registered mail.

**Special Delivery**—A mailable parcel will be accorded the usual special delivery service when a special delivery stamp or ten cents in ordinary stamps are affixed thereto in addition to the parcel post postage. When ordinary stamps are used the words "Special Delivery" must be placed on the wrapper.

**Parcel Post Map and Parcel Post Guide**—The official parcel post map shows each unit of area in the United States properly numbered, and the eight postal zones indicating the distance on which the parcel post rates of postage are based. Each post-office is furnished with a map suitable for use in the unit in which that post-office is located. To ascertain the zone rate on any parcel mailed at a certain post-office the map for the unit in which that post-office is located must be consulted.

A parcel post guide is published by the department for use in connection with the parcel post map in determining the postage rates.

The guide and map may be purchased together or separately by sending a *postal money order* for the proper amount to the Third Assistant Postmaster General, Division of Finance, Washington, D. C. The price of the guide is 55 cents; the price of the map is 20 cents. Stamps, checks, bank money orders, drafts, etc., are not acceptable for this purpose and will be returned to the sender.

**Canada, Cuba, Mexico and the Republic of Panama**—Packages of fourth-class matter for Canada, Cuba, Mexico and Panama, not exceeding four ounces in weight, are subject to the rate of one cent for each ounce or fraction of an ounce. Those weighing over four ounces are subject to the rate of twelve cents a pounds or fraction thereof. Packages for Canada and Cuba must not exceed four pounds six ounces in weight. To Mexico and Panama parcels weighing up to eleven pounds may be sent under the terms of the (foreign) parcel post conventions between those countries and the United States. Customs Declarations must be sent with *all* parcels for Mexico and Panama.

Parcels for these or other foreign countries can not be insured, but may be registered.

**Insurance on Parcels**—A mailable parcel on which the postage is fully prepaid may be insured against loss in an amount equivalent to its actual value, but not to exceed $25, on payment of a fee of five cents, and in an amount equivalent to its actual value in excess of $25, but not to exceed $50, on payment of a fee of ten cents in stamps, such stamps to be affixed. The amount of the insurance fee shall be placed on the receipt given the sender and on the coupon retained at the mailing office.

Fourth-class (parcel post) mail addressed to the Philippine Islands or the Canal Zone can not be registered, but may be insured, but indemnity can not be allowed in case of loss unless the loss of such insured parcels occurred in the postal service of the United States, without reciprocal action on the part of the postal administrations of the Philippine Islands and the Canal Zone, which are separate and distinct from that of the United States proper.

**Collect-on-Delivery Service**—Parcel Post Regulations. The sender of a mailable parcel on which the postage is fully prepaid may have the price of the article and the charges thereon collected from the addressee on payment of a fee of ten cents in stamps affixed, provided the amount to be collected does not exceed $100. Such a parcel will be insured against loss without additional charge in an amount equivalent to its actual value, but not to exceed $50.

The sender of a collect-on-delivery (C. O. D.) parcel will be given a receipt showing the office and date of mailing, the number of the parcel and the amount due him. A C. O. D. parcel will be accepted for mailing only at a money-order office and when addressed to a money-order office.

**Packing of Parcels**—Section 19. Medicines and anaesthetic agents, which are not outwardly or of their own force dangerous or injurious to life, health or property, and not in themselves unmailable (see Sec. 16), may be admitted to the mails for transmission in the domestic mails when inclosed in packages in conformity with the conditions prescribed in Sections 21, 22 and 23; *Provided*, That the terms "medicines" and "anaesthetic agents" shall not be construed to mean poisons: *Provided further*, That the article mailed bears the label or superscription of the manufacturer thereof, or dealer therein, or of the licensed physician, surgeon, dentist or veterinarian preparing or prescribing the same.

Sec. 20. Admissible articles which from their form or nature, might damage other mail matter or equipment, or injure the person of any postal employé, may be mailed when packed in accordance with the following conditions:

2. When not liquid or liquefiable, they must be placed in a bag, box, or removable envelope or wrapping, made of paper, cloth, parchment or similar material, and inclosed in a box or tube of metal or wood, with a sliding, clasp, or screw lid.

3. In case of such articles liable to break, the inner bag, box, envelope, or wrapping must be surrounded by sawdust, excelsior, cotton or other similar substance.

Sec. 21. Admissible liquids and oils, in packages not exceeding eleven pounds in weight, will be accepted for mailing when intended for delivery at the office of mailing or on a rural route starting therefrom, when inclosed in a glass or metal container, securely closed and heavily wrapped, provided it is not necessary to transport them over steam or electric railways.

Sec. 22. Admissible liquids and oils, pastes, salves, or other articles easily liquefiable, will be accepted for mailing regardless of distance when they conform to the following conditions:

2. When in strong glass bottles holding four ounces or less, the total quantity sent in one parcel shall not exceed twenty-four ounces, liquid measure. Each bottle shall be wrapped in paper or other absorbent substance and placed in a box made of cardboard or other suitable material and then placed in a box and packed in a container made of double-faced corrugated pasteboard of good quality. The corners of the container must fit tightly and be reinforced with tape so as to prevent the escape of any liquid if the contents should be broken, and the whole parcel shall be securely wrapped with strong paper and tied with twine. Single bottles of liquid holding four ounces or less may also be packed as prescribed in the following paragraph:

3. When in glass bottles holding more than four ounces, the total quantity sent in one parcel shall not exceed sixteen ounces, liquid measure. The bottle must be very strong and must be inclosed in a block or tube of metal, wood, papier-mache, or similar material; and there must be provided between the bottle and the block or tube a cushion of cotton, felt or other absorbent. The block or

tube must be at least five thirty-seconds of an inch thick in its thinnest part for bottles holding eight ounces or less and at least three-sixteenths of an inch thick for bottles holding more than eight ounces. The block or tube must be rendered water-tight by an application on the inside of paraffin or other suitable substance and must be closed by a screw-top cover with sufficient screw threads to require at least one and one-half complete turns before it will come off. The cover must be provided with a washer so that no liquid will escape if the bottle should be broken.

4. When in a metal container, the weight of the parcel must not exceed eleven pounds. The container must be hermetically sealed, inclosed in a strong box and securely wrapped.

5. All packages containing liquid must be marked "fragile."

Sec. 23. Pastes, salves, etc., not easily liquefiable, will be accepted for mailing when inclosed in water-tight metal containers and placed in a strong pasteboard or wooden box and securely wrapped.

Sec. 24. Manufacturers or dealers intending to transmit articles in considerable quantities should submit to the postmaster at the mailing office for approval a specimen parcel, showing the manner of packing.

Sec. 25. When sharp pointed instruments are offered for mailing, the points must be capped or encased, so that they can not cut through their covering. Blades must be bound so that they will remain firmly attached to each other or within their handles or sockets.

Sec. 26. Seeds and other admissible articles, which are liable from their form or nature to loss or damage unless specially protected, may be put up in sealed envelopes of material sufficiently transparent to show the contents clearly without opening.

Sec. 27. Ink powders, pepper, snuff, or other similar powders, not explosive, or any similar pulverized dry substance, not poisonous, may be sent in the mails when inclosed in the manner prescribed herein for liquids (see Sec. 22), or when inclosed in cases made of metal, wood, papier-mache, or similar material, in such manner as to render impossible the escape of any of the contents.

Sec. 28. Flour of all kinds must be put up in such manner as to prevent the package breaking or cracking or the flour being scattered in the mails.

Sec. 29. Queen bees, live insects, and dried reptiles may be mailed in accordance with the instructions of the Department of Agriculture as promulgated by the Post-Office Department under the following order number 6242, of May 4, 1912:

Queen bees and their attendant bees, when accompanied by a copy of a certificate of the current year from a State or Government apiary inspector to the effect that the apiary from which said queen bees are shipped is free from disease, or by a copy of a statement by the bee-keeper made before a notary public or other officer having a seal that the honey used in making the candy used in the queen mailing cage has been diluted and boiled in a closed vessel; beneficial insects, when shipped by departments of entomology in agricultural colleges and persons holding official entomological positions; other live insects, when addressed to the Bureau of Entomology of the United States Department of Agriculture, to departments of entomology in State agricultural colleges, and to persons holding official entomological positions, and dried insects and dried reptiles, may be sent in the mails when so put up as to render it practically impossible that the package shall be broken in transit, or the persons handling the same be injured, or the mail bags or their contents soiled.

Sec. 30. Seeds of fruit, nursery stock, and all other plant products for propagation, may be mailed in accordance with the instructions of the Department of Agriculture as promulgated by Post-Office Department orders.

Sec. 31. Candies, confectionery, yeast cakes, soap in hard cakes, etc., must be inclosed in boxes and so wrapped as to prevent injury to other mail matter.

Sec. 32. Sealed original packages of proprietary articles, such as soaps, tobacco, pills, tablets, etc., put up in fixed quantities by the manufacturer and not in themselves unmailable, will be accepted for mailing when properly wrapped.

Sec 33. Fragile articles, such as millinery, toys, musical instruments, etc., and articles consisting wholly or in part of glass, or contained in glass, must be securely packed and the parcel stamped or labelled "fragile." Parcels so labelled must be handled with the greatest possible care.

Sec. 34. Parcels containing perishable articles must be marked "perishable." Articles likely to spoil within the time reasonably required for transportation and delivery must not be accepted for mailing.

2. Butter, lard, and perishable articles such as fish, fresh meats, dressed fowls, vegetables, fruits, berries, and articles of a similar nature which decay quickly, when so packed or wrapped as to prevent damage to other mail matter, will be accepted for local delivery (see Sec. 3, par. 2a), either at the office of mailing or on any rural route starting therefrom. When inclosed in an inner cover and a strong outer cover of wood, metal, heavy corrugated pasteboard, or other suitable material, and wrapped so that nothing can escape from the package, they will be accepted for mailing to all offices within the first and second zones.

3. Butter, lard, or any admissible greasy or oily substance, when intended for delivery at offices beyond the second zone must be packed in accordance with Section 22.

4. Vegetables and fruits which do not decay quickly will be accepted for mailing to any zone if packed so as to prevent damage to other mail matter.

5. Eggs will be accepted for local delivery when so packed in a basket or other container as to prevent damage to other mail matter.

6. Eggs will be accepted for mailing, regardless of distance when each egg is wrapped separately and surrounded with excelsior, cotton, or other suitable material, and packed in a container made of double corrugated pasteboard, metal, wood, or other suitable material in such manner as to place each egg on its end and to prevent them from striking together or against the side or top of the container, with an outer cover of double corrugated pasteboard, metal, wood, or other suitable material, and wrapped so that nothing can escape from the package. All such parcels must be labelled "eggs."

Sec. 35. Salted, dried, smoked, or cured meats and other meat products may be admitted to the mails and may be transported, regardless of distance, from one State or Territory or the District of Columbia to another State or Territory or the District of Columbia when the provisions of the act of June 30, 1906, and the regulations promulgated thereunder by the Department of Agriculture have been complied with; provided, however, that fresh meat in any form may be transported only within the first and second zones. (See Sec. 34.)

Sec. 36. Specimens of dried blood or of diseased tissues or communicable diseases, cultures and tubercular sputum may be mailed in accordance with instructions of the Treasury Department as promulgated by Post-Office Department Order No. 3064.

Sec. 37. Postmasters must refuse to receive for mailing parcels not properly indorsed, or packed for safe shipment.

## UNMAILABLE MATTER, PACKING OF LIQUIDS, FRAGILE AND PERISHABLE ARTICLES.

The following Parcel Post Regulations relate to articles absolutely excluded from the mails, and to the manner in which liquids, fragile and perishable articles, also those which are liable, unless properly protected, to injure another, or destroy, deface or otherwise damage the mails, must be

packed before they can be admitted to domestic mails. These regulations must be strictly complied with in every particular—postmasters having no authority to modify or make exceptions to them in any case.

**Unmailable Matter**—Section 16. The following matter is declared nonmailable by law (see Secs. 211, 212, and 217 of the Criminal Code of the United States, approved March 4, 1909):

1. Matter manifestly obscene, lewd or lascivious; articles intended for preventing conception or for procuring abortion; articles intended for indecent or immoral purposes; all matter otherwise mailable by law, the outside cover or wrapper of which bears any delineations or language of a libelous, scurrilous, defamatory, or threatening character. All such matter, when deposited in a post-office or found in the mails, shall be withdrawn and sent to the Division of Dead Letters, with a statement of the facts. Postmasters must not give opinions as to the mailability of any matter mentioned above, but must submit all such questions to the Assistant-Attorney-General for the Post-Office Department.

2. Spirituous, vinous, malted, fermented or other intoxicating liquors of any kind; poisons of every kind, and articles and compositions containing poison (except as prescribed in Sec. 19); poisonous animals, insects and reptiles; explosives of every kind; inflammable materials (which are held to include matches, kerosene oil, gasoline, naphtha, benzine, turpentine, denatured alcohol, etc. See also "Note" below); infernal machines, and mechanical, chemical, or other devices or compositions which may ignite or explode; disease germs or scabs (except as prescribed in Sec. 36); and other natural or artificial articles, compositions or materials of whatever kind which may kill, or in any wise injure another or damage the mail or other property.

NOTE—It has been decided that inflammable liquids include any liquid or liquid mixture that gives off inflammable vapors at or below a temperature of 80 degrees Fahrenheit.

Therefore, liquids having a flash-point higher than 80 degrees Fahrenheit may be accepted for transmission in the mails when packed for mailing, as provided in Section 22, Parcel Post Regulations, but such materials having a flash-point at or below 80 degrees Fahrenheit are not mailable.

Sec. 17. Live or dead (and not stuffed) animals, birds or poultry (except as prescribed in Secs. 29 and 34); raw hides or pelts, guano or any article having a bad odor shall not be admitted to the mails.

---

## POISONS, EXPLOSIVES, INFLAMMABLE MATERIALS, DANGEROUS ARTICLES, INTOXICATING LIQUORS, ETC.

SECTION 494. All kinds of poison and all articles and compositions containing poison, and all poisonous animals, insects and reptiles, and explosives of all kinds and inflammable materials, and infernal machines and mechanical, chemical or other devices or compositions which may ignite or explode, and all disease germs or scabs, and all other natural or artificial articles, compositions or materials of whatever kind which may kill or in anywise hurt, harm, or injure another, or damage, deface, or otherwise injure the mails or other property, whether sealed as first-class matter or not, are hereby declared to be nonmailable matter, and shall not be conveyed in the mails or delivered from any post-office or station thereof, nor by any letter carrier; but the Postmaster-General may permit the transmission in the mails, under such rules and regulations as he shall prescribe as to preparation and packing, of any article hereinbefore described which are not outwardly or of their own force dangerous or injurious to life, health or property: *Provided*, That all spirituous, vinous, malted, fermented or other intoxicating liquors of any kind, are hereby declared to be nonmailable and shall not be deposited in or carried through the mails. Whoever shall knowingly deposit or cause to be deposited for mailing or delivery, or shall knowingly cause to be delivered by mail according to the direction thereon, or at any place at which it is directed to be delivered by the person to whom it is addressed, anything declared by this section to be nonmailable unless in accordance with the rules and regulations hereby authorized to be prescribed by the Postmaster-General, shall be fined not more than one thousand dollars, or imprisoned not more than two years, or both; and whoever shall knowingly deposit or cause to be deposited for mailing or delivery, or shall knowingly cause to be delivered by mail according to the direction thereon, or at any place to which it is directed to be delivered by the person to whom it is addressed, anything declared by this section to be nonmailable, whether transmitted in accordance with the rules and regulations authorized to be prescribed by the Postmaster-General or not, with the design, intent, or purpose to kill, or in anywise hurt, harm, or injure another, or damage, deface, or otherwise injure the mails or other property, shall be fined not more than five thousand dollars, or imprisoned not more than ten years, or both.

2. Spirituous, vinous, malted, fermented, or other intoxicating liquors of any kind, poisons of every kind, and articles and compositions containing poison (except as prescribed in the fourth paragraph hereof and in Parcel Post Regulations), and poisonous animals, insects, and reptiles, and explosives of every kind, and inflammable materials (including matches, kerosene oil, gasoline, naphtha, benzine, turpentine, denatured alcohol, etc.), and infernal machines, and mechanical, chemical or other devices or compositions which may ignite or explode, and disease germs or scabs (except as prescribed in section 495 of Postal laws), and other natural or artificial articles, compositions, or materials of whatever kind which may kill, or in anywise hurt, harm or injure another, or damage, deface, or otherwise injure the mail or other property, live or dead (and not stuffed) animals (except as prescribed in Parcel Post Regulations), raw hides or pelts, guano, or any article exhaling bad odor, whether sealed as first-class matter or not, shall not be admitted to the mails.

3. Liquids not spirituous, vinous, malted, fermented, or otherwise intoxicating (including samples of altar or communion wine used in church services), and not liable to explosion or spontaneous combustion or ignition by shock or jar, and not inflammable, fruits or vegetable matter liable to decomposition, comb honey, soft soap, paste or confections, ointments, salves, and articles of similar consistency, may be admitted to the mails for transmission in the domestic mails when inclosed in packages in conformity with the conditions prescribed in Parcel Post Regulations.

4. Medicines and anaesthetic agents, which are not outwardly or of their own force dangerous or injurious to life, health or property, and not in themselves unmailable, may be admitted to the mails for transmission in the domestic mails when inclosed in packages in conformity with the conditions prescribed in Parcel Post Regulations: *Provided*, That the terms "medicines" and "anaesthetic agents" shall not be construed to mean poisons: *Provided further*, That the article mailed bears the label or superscription of the manufacturer thereof, or dealer therein, or of the licensed physician, surgeon, dentist, or veterinarian preparing or prescribing the same.

# Foreign Mails.

## POSTAGE RATES AND CONDITIONS.

THE rates of postage to all foreign countries and colonies are as follows:

| | | |
|---|---|---|
| Letters | first ounce or less, 5 cents; each additional ounce | 3 cents. |
| Postal cards, each | | 2 cents. |
| Newspapers and other printed matter, per 2 ounces | | 1 cent. |
| Commercial papers (such as legal and insurance papers, deeds, bills of lading, invoices, manuscript for publication, etc.) | Packets not in excess of 10 ounces | 5 cents. |
| | Packets in excess of 10 ounces, for each 2 ounces or fraction thereof | 1 cent. |
| Samples of merchandise. | Packets not in excess of 4 ounces | 2 cents. |
| | Packets in excess of 4 ounces, for each 2 ounces or fraction thereof | 1 cent. |
| Registration fee on letters or other articles | | 10 cents. |

On printed matter and commercial papers the limit of weight is 4 pounds 6 ounces, except that single volumes of books to Salvador, Canada, Mexico, Cuba, and Panama, are unrestricted as to weight. Size—The limit of size is 18 inches in any one direction, except that printed matter or commercial papers in rolls may be 30 inches long by 4 inches in diameter.

Ordinary letters for countries of the Postal Union (except Canada and Mexico) will be forwarded, whether any postage is prepaid on them or not. All other mailable matter must be prepaid at least partially. Domestic rates apply to matter for Porto Rico, Guam, Philippine Islands, Cuba, "Canal Zone," Republic of Panama, Tutuila, Hawaii, Shanghai City, U. S. Naval Vessels and officers and men of the U. S. Navy in the U. S. Naval Hospital, Yokohama, Japan.

## EXCEPTIONS.

### GREAT BRITAIN AND IRELAND AND NEWFOUNDLAND.

The rate on letters for these countries is two cents for each ounce or fraction. The Postal Union rates apply to postal cards, post cards, printed matter, commercial papers and samples.

### GERMANY.

The postage rate on letters for Germany by direct ocean transportation is two cents an ounce. Letters paid at the two-cent rate are despatched only by steamers able to land the mails at a German port. Letters paid at the Postal Union rate are despatched by the quickest route.

A fast steamer sailing for Germany via Plymouth and Cherbourg carries letters for Germany prepaid at the Postal Union rate and at the two-cent rate—the letters paid at the five-cent (Postal Union) rate are landed at Plymouth (the quickest route), whereas the letters paid at the two-cent rate are carried through to Germany by the transatlantic steamer.

The Postal Union rates apply to postal cards, post cards, printed matter, commercial papers and samples regardless of the route by which sent, also to letters despatched via England and France.

### CANADA.

The postage rates applicable to matter mailed in the United States addressed to Canada are as follows:

Letters, two cents for each ounce or fraction of an ounce.

Postal cards and post cards, one cent.

Double postal cards (with paid reply), two cents.

Second-class matter (newspapers and periodicals), one cent for each 4 ounces or fraction thereof. No limit of weight.

Printed matter (except second-class), one cent for each 2 ounces or fraction thereof. Limit of weight 4 pounds 6 ounces, except for a single book.

Fourth-class matter —For packages weighing 4 ounces or less, one cent for each ounce or fraction of an ounce. For packages weighing over 4 ounces and *not exceeding 4 pounds 6 ounces* (except seeds, plants, etc.), twelve cents per pound or fraction of a pound.

Seeds, plants, etc., are subject to the rate of one cent an ounce.

Packages can not be insured, but may be registered.

Commercial papers and samples of merchandise may be mailed at the Postal Union postage rates and under the conditions applicable to such articles in foreign mails.

Sealed articles, other than letters in their usual and ordinary form, are unmailable. But unsealed packages may contain, in sealed receptacles, articles which can not be safely transmitted in unsealed receptacles; provided the contents of the closed receptacles are plainly visible or are precisely stated on the covers of the closed receptacles and with the packages so wrapped that the outer cover can be easily opened.

Prepayment of postage upon any article, except the reply half of a double postal card, can be effected only by means of United States postage stamps. Letters and postal cards will be despatched if prepaid one full rate of postage. Postage on other articles (except fourth-class matter) must be prepaid at least in part, and on fourth-class matter in full.

### CUBA.

The postage rates applicable to matter mailed in the United States addressed to Cuba are as follows:

Letters, two cents for each ounce or fraction of an ounce.

Postal cards and post cards, one cent.

Double post cards (with paid reply), two cents.

Second-class matter (newspapers and periodicals), one cent for each 4 ounces or fraction thereof. No limit of weight.

Printed matter (except second-class), one cent for each 2 ounces or fraction thereof. Limit of weight 4 pounds 6 ounces, except for a single book.

Fourth-class matter (except seeds, plants, etc.), for packages weighing 4 ounces or less one cent for each ounce or fraction of an ounce. For packages weighing over 4 ounces *and not exceeding 4 pounds 6 ounces*, twelve cents per pound or fraction of a pound.

Seeds, plants, etc., are subject to the rate of one cent for each two ounces or fraction thereof.

Packages can not be insured, but may be registered.

Commercial papers and samples of merchandise may be mailed at the Postal Union postage rates and under the conditions applicable to such articles in foreign mails.

Liquids and fatty substances (except samples) are unmailable.

Sealed articles, other than letters in their usual and ordinary form, are unmailable. But unsealed packages may contain, in sealed receptacles, articles which can not be safely transmitted in unsealed receptacles; provided the contents of the closed receptacles are plainly visible or are precisely stated on the covers of the closed receptacles and with the packages so wrapped that the outer cover can be easily opened.

Prepayment of postage upon any article, except the reply half of a double postal card, can be effected only by means of United States postage stamps. Letters and postal cards must be despatched whether prepaid or not. Postage on other articles (except fourth-class matter) must be prepaid at least in part, and on fourth-class matter in full.

MEXICO.

The postage rates applicable to matter mailed in the United States addressed to Mexico are as follows:

Letters, two cents for each ounce or fraction of an ounce.

Postal cards and post cards, one cent.

Double postal cards (with paid reply), two cents.

Second-class matter (newspapers and periodicals), one cent for each 4 ounces or fraction thereof. No limit of weight.

Printed matter (except second-class), one cent for each 2 ounces or fraction thereof. Limit of weight 4 pounds 6 ounces, except for a single book.

Fourth-class matter (except seeds, plants, etc.), for packages weighing 4 ounces or less, one cent for each ounce or fraction of an ounce. For packages weighing over 4 ounces and not exceeding 4 pounds 6 ounces, twelve cents per pound or fraction of a pound.

Parcels up to 11 pounds in weight may also be sent by foreign parcel post under the conditions stated in Circular 77.

Customs declarations must be attached to all parcels of fourth-class matter and all packages sent by foreign parcel post.

Seeds, plants, etc., are subject to the rate of one cent for each 2 ounces or fraction thereof.

Packages can not be insured, but may be registered.

Commercial papers and samples of merchandise may be mailed at the Postal Union postage rates and under the conditions applicable to such articles in foreign mails.

Sealed articles, other than letters in their usual and ordinary form, are unmailable. But unsealed packages may contain, in sealed receptacles, articles which can not be safely transmitted in unsealed receptacles; provided the contents of the closed receptacles are plainly visible or are precisely stated on the covers of the closed receptacles and with the packages so wrapped that the cover can be easily opened.

Prepayment of postage upon any article, except the reply half of a double postal card, can be effected only by means of United States postage stamps. Letters and postal cards will be despatched if prepaid one full rate of postage. Postage on other articles (except fourth-class matter) must be prepaid at least in part, and on fourth-class matter in full.

*Matter addressed to Mexico must, in all cases, bear as part of the address the name of the State in which the city or town is located.* For example, Acapulco, *Guerrero*, Mexico; not Acapulco, Mexico.

PANAMA.

The postage rates applicable to matter mailed in the United States addressed to the Republic of Panama are as follows:

Letters, two cents for each ounce or fraction of an ounce.

Postal cards and post cards, one cent.

Double postal cards (with paid reply), two cents.

Second-class matter (newspapers and periodicals), one cent for each 4 ounces or fraction thereof. No limit of weight.

Printed matter (except second-class), one cent for each 2 ounces or fraction thereof. Limit of weight 4 pounds 6 ounces, except for a single book.

Fourth-class matter (except seeds, plants, etc.), for packages weighing 4 ounces or less, one cent for each ounce or fraction of an ounce. For packages weighing over 4 ounces and not exceeding 4 pounds 6 ounces, twelve cents per pound or fraction of a pound.

Parcels up to 11 pounds in weight may also be sent by foreign parcel post, under the conditions stated in Circular 77.

Customs declarations must be attached to all parcels of fourth-class matter and all packages sent by foreign parcel post.

Seeds, plants, etc., are subject to the rate of one cent for each 2 ounces or fraction thereof.

Packages can not be insured, but may be registered.

Commercial papers and samples of merchandise may be mailed at the Postal Union postage rates and under the conditions applicable to such articles in foreign mails.

Liquids and fatty substances (except samples) are unmailable.

Sealed articles, other than letters in their usual and ordinary form, are unmailable. But unsealed packages may contain, in sealed receptacles, articles which can not be safely transmitted in unsealed receptacles; provided the contents of the closed receptacles are plainly visible or are precisely stated on the covers of the closed receptacles and with the packages so wrapped that the cover can be easily opened.

Prepayment of postage upon any article, except the reply half of a double postal card, can be effected only by means of United States postage stamps. Letters and postal cards must be despatched whether prepaid or not. Postage on other articles (except fourth class matter) must be prepaid at least in part, and on fourth-class matter in full.

SHANGHAI, CHINA.

Articles intended for delivery in the city of Shanghai, China, are subject to United States domestic postage rates and conditions, but letters specially addressed via Europe-Siberia are subject to the foreign rate. Certain matter may also be sent by *foreign* parcel post.

UNITED STATES NAVAL VESSELS.

Mail matter for officers or members of the crews of United States vessels of war stationed abroad is subject to domestic postage rates and conditions. Packages of fourth-class matter exceeding 4 ounces in weight are subject to the rate of twelve cents for each pound or fraction of a pound *when the vessels are stationed in foreign waters.* Articles should be addressed "U. S. S. (name of vessel), care of Postmaster, New York, N. Y." and be fully prepaid. Mail so addressed will be forwarded to the vessels, whether at domestic or foreign ports. Express packages will not be received unless they conform to the postal regulations and are placed in the mail with the postage properly prepaid.

UNITED STATES NAVAL HOSPITAL, YOKOHAMA, JAPAN.

Mail for officers and men of the United States Navy in the United States Naval Hospital at Yokohama, is subject to domestic rates and conditions, the same as that for officers and men on U. S. naval vessels stationed abroad.

FOREIGN MAILS—*Continued.*

SAMPLES OF MERCHANDISE

must be bona fide trade samples without any salable value. **Wrapping**—Samples of merchandise must be wrapped so that the contents may be easily examined without injury to wrappers. **Permissible Writing**—They must bear no writing except the name or the social position of the sender, a manufacturers' or trade mark, numbers, prices and indications relating to the weight, size, dimensions and quantity to be disposed of, and words which are necessary to precisely indicate the origin and nature of the merchandise. **Weight**—Packages of samples must not exceed 12 ounces in weight. **Size**—The size must not exceed 12 inches in length, 8 inches in breadth, and 4 inches in depth, except when in the form of a roll, they may be 12 inches in length and 6 inches in diameter. **Postage**—The postage on samples is 2 cents for the first 4 ounces or less, and 1 cent for each additional 2 ounces or fraction of 2 ounces. Register all valuable articles. Registration fee 10 cents.

PARCEL POST.

Postage, 12 cents a pound or fraction thereof; greatest length (unless specially noted below), 3 feet 6 inches; greatest length and girth combined (unless specially noted below), 6 feet; limit of weight (unless specially noted below), 11 pounds; value (unless specially noted below), not limited; registration fee, 10 cents.

Unsealed packages of mailable merchandise may be sent by parcel post to Dutch Guiana (parcels cannot be registered. See item "Customs Declarations"), Uruguay (parcels cannot be registered). See item "Customs Declarations"), Hungary, Bermuda, Jamaica, including Cayman Islands, Turks Island, including Caicos Islands, Barbadoes (parcels cannot be registered), the Bahamas, British Honduras, Mexico (limit of size, 2 feet in length, 4 feet in girth; limit of weight for places named in "Postal Guide," 11 pounds; for other places, 4 pounds 6 ounces), Leeward Islands (Antigua, Anguilla, Barbuda, Dominica, Montserrat, Nevis, Redonda, St. Kitts and the Virgin Islands), Colombia (limit of size, 2 feet in length, 4 feet in girth), Costa Rica, Salvador (see item "Customs Declarations"), British Guiana, Danish West Indies (St. Croix, St. John and St. Thomas), and the Windward Islands (Grenada, Grenadines, St. Lucia, and St. Vincent), Trinidad, including Tobago; Venezuela (see item "Customs Declarations"), Bolivia, Ecuador (parcels must not exceed $50 in value), Peru and Chile, Newfoundland, including Labrador; Honduras (Republic of), Germany, including Cameroon (Kamerun) Toga, German East Africa and German South West Africa; Italy, including Erythrea, Benadir, Beugazi and Tripoli in Tripoli (Barbary) and Republic of San Marino. Netherlands (parcels cannot be registered. See item "Customs Declarations"), New Zealand, including Cook and Fanning Islands; Nicaragua, Guatemala, Norway, Japan, including Formosa, Karafuto (Japanese Saghalien), and Korea; Hongkong, including Kowloon, Austria, Belgium, France, excluding Algeria and Corsica (parcels cannot be registered. See item "Customs Declarations"), Great Britain and Ireland (parcels cannot be registered), Australia, including Tasmania, Denmark, including Faroe Islands and Iceland; Sweden, China, the following places only: Amoy, Canton, Changsha, Cheefoo, Chiugkiang, Foochow, Hangchow, Hankow, Hoihao (Hoihow), Hongkong, Kingiang, Lin Kung Tau, Nanking, Newchwang, Ningpo, Shanghai, Shanghaikwan, Shasi, Soochow, Swatow, Peking, Tientsin, Tongku, Wei Hai Wei and Wuku; Aberdeen, Au Tau, Chingchow, Ping Shan, Sai Kung, Sha Tin, Sha Taukok, Shung Shui, Stanley, Tai-O, Tai-Po, Tsinanfoo, Weihsen and the German Protectorates of Kiowchow or Kiautschou; Manchuria, the following places only: Antoken (Antung), Bujun (Fushun), Choshun (Changchun), Dairen (Tairen, Talien, formerly Dalny), Daisekkio (Tashichiao), Daitoko (Tatungkou), Furanten (Pulantien), Gaihei (Kaiping), Giukaton (Newchatun), Gwaboten (Wafangtien), Hishiko (Pitzuwo), Honkelko (Penhasikou), Hoten (Mukden), Howojio (Fenghuangcheng), Kaigen (Kalyuen), Kaijio (Haichaeng), Kinshu (Chinchow), Koshurei (Kungchuling), Riojun (Port Arthur), Rioyo (Liaoyang), Riujuton (Liushutun), Senkinsai (Chienchinsai), Shineigai (Ssupingchieh), Shinminfu (Shingmingfu), Shoto (Changtu), Sokako (Tsaohokow), Sokaton (Suchiatun), Taikozan (Takushan), Tetsure (Tiehling), Yendai (Yentai), Yugakujio (Hsiungyocheng); Hayti, Brazil, Dominican Republic, Dutch West Indies, French West Indies, Panama and Turkey, the following places only: Alexandretta, Beirut, Cavalla, Constantinople (including Galata, Pera and Stamboul), Dardanelles, Dedeagatch, Durazzo, Caifa, Inehol Jaffa, Janina, Jerusalem, Kerassund, Mersine, Mitylene, Prevesa, Ritimo (Rethymo), Rhodes, Saloniki (Salonica), Samsoun, San Jean de Medua, Santi Quaranta, Scio (Schios), Scutari, Smyrna, Trebizond, Tripoli (Syria), Valona, Vathy (Samos), and Canea and Candia in the Isle of Crete. Parcels must be wrapped so as to permit their contents to be easily examined by postmasters. The presence, in an unsealed parcel, of sealed receptacles containing mailable articles which cannot be safely transmitted in the unsealed receptacles, will not render the parcel unmailable, provided the contents of the sealed receptacles are plainly visible, or are unmistakably indicated by the method of packing or by a precise statement on the covers. But such sealed receptacles will not be admitted to the parcel post unless inclosed in an outside cover open to inspection. Any article absolutely prohibited admission to the regular mails for any country is also inadmissable to parcel post mails for that country; but no article is excluded from parcel post mails solely because it is dutiable in the country of destination. Liquids, poisonous, explosive, and inflammable substances are excluded.

CUSTOMS DECLARATIONS.

A "Customs Declaration" Form 4402 (which will be furnished on application at the post-office or a station) must be properly and fully filled out, stating the actual contents, value, etc., of the parcel. General terms, such as "merchandise" or "samples," will not answer; the contents must be accurately described. "Customs Declarations" must be firmly attached to the cover of the parcel, but not pasted or affixed so that they will seal the package and prevent examination of the contents without damaging the cover. In addition to being tied by means of a cord passing through the eyelet, the tag should be bound flat to the parcel (with the front or "declaration" side facing out), so that the tag cannot be used as a handle to lift the parcel while in transit.

Two (2) copies of the "declaration" (Form 4402) must be attached to each parcel for Dutch Guiana, Dutch West Indies, Netherlands, Salvador and Uruguay, and three (3) copies to each parcel for Venezuela.

France—Two copies of the special declaration, "Form No. 2 Bis" (4402½), showing in addition to the usual entries the gross weight of the parcel and net weight of the contents, must be attached to parcels for France. One copy may be pasted to the package, but the other copy must be affixed in such a manner that it can be readily removed at the exchange office where the mail is prepared for despatch to France.

## GENERAL REGULATIONS RESPECTING FOREIGN MAILS.

*Rates and conditions to countries not in the Universal Postal Union are now the same as those to Universal Postal Union countries.*

Postage can be prepaid upon articles (other than the reply half of double postal cards) only by

FOREIGN MAILS—*Continued.*

means of the postage stamps of the country *in* which the articles are mailed. Hence articles mailed in one country addressed to another country which bear postage stamps of the country to which they are addressed are treated as if they had no postage stamps attached to them.

Unpaid letters received from the Postal Union and insufficiently prepaid correspondence of all kinds is chargeable with double the amount of the deficient postage.

Matter to be sent in the mails at less than letter rates must be so wrapped that it can be readily examined at the office of delivery, as well as the mailing office, without destroying the wrapper.

Packages of newspapers and periodicals sent in the mails to foreign countries are restricted to a single (outside) address. Those sent to Canada, Cuba, Mexico, Panama, and Shanghai (City), China, are transmissible as in domestic mails.

The United States two-cent postal card should be used for card correspondence with foreign countries (except Canada, Cuba, Mexico, Panama, and Shanghai City, to which countries the one-cent card is transmissible), but where these cards can not be obtained, it is allowable to use for this purpose the United States one-cent postal card with a one-cent United States adhesive postage stamp attached thereto. Private cards can be used if conforming in size, etc., to Government cards, such cards should bear the words "post card."

Mail matter *of all kinds* received from any country of the Postal Union is required to be reforwarded at the request of the addressee, from one post-office to another, and in the case of articles other than parcel post packages, to any foreign country embraced in the postal Union, without additional charge for postage.

All articles prohibited from domestic mails are also excluded from circulation in the mails to and from foreign countries. Postal cards or letters addressed to go around the world will not be forwarded, being prohibited.

FOREIGN (INTERNATIONAL) MONEY ORDERS.

When payable in Apia, Austria, Belgium, Bolivia, Cape Colony, Costa Rica, Denmark, Egypt, Germany, Great Britain, Honduras, Hongkong, Hungary, Italy, Japan, Liberia, Luxemburg, New South Wales, Natal and Zululand, New Zealand, Orange River Colony, Peru, Portugal, Queensland, Russia, Salvador, South Australia, Switzerland, Tasmania, the Transvaal, Uruguay and Victoria rates are as follows:

| | | | |
|---|---|---|---|
| For sums from $0.01 to $2.50 | 10 cents | From $30.01 to $40.00 | 45 cents |
| From $2.51 to $5.00 | 15 " | " 40.01 to 50.00 | 50 " |
| " 5.01 to 7.50 | 20 " | " 50.01 to 60.00 | 60 " |

NOTE—It should be understood that these tables are subject to change, it being the aim of the Post-Office Department to make reductions whenever conditions warrant such action.

# Postal-Savings System.

## INFORMATION FOR DEPOSITORS ANNOUNCED BY POST-OFFICE DEPARTMENT

**Object**—1. The Postal-Savings System is established for the purpose of providing facilities for depositing savings at interest with the security of the United States Government for repayment.

**Safety**—2. The faith of the United States is solemnly pledged to the payment of deposits made in postal-savings depository offices with accrued interest as provided by the Postal-Savings act.

**Who May Deposit**—3. Accounts may be opened and deposits made by any person of the age of 10 years or over in his or her own name and by a married woman in her own name and free from any interference or control by her husband. No person can have more than one account at any one time.

4. Any person may open a postal-savings account.

5. All accounts must be opened in person by the depositor or his authorized representative. After opening an account a depositor may forward subsequent deposits to the post-office by mail.

6. Deposits will be accepted only from individuals, and no account will be opened in the name of any corporation, association, society, firm, or partnership, or in the names of two or more persons jointly.

7. No account will be opened in the name of one person in trust for or on behalf of another person or persons.

**Service Free**—8. The service of the Postal-Savings System is free, and no charge or fee is collected or required in connection with the opening of an account or the withdrawal of money deposited, unless withdrawals are made by mail, and by means of money orders, when the usual fee is deducted.

**Privacy of Accounts**—9. No person connected with the Post-Office Department or the postal service is permitted to disclose the name of any depositor or give any information concerning an account except to the depositor himself, unless directed to do so by the Postmaster-General.

**How to Open an Account**—10. When a person applies to open an account he must furnish the necessary information for the postmaster or his representative to fill out an application, which he will then be required to sign. If the applicant signs by mark his signature must be witnessed by a disinterested person.

**Deposits**—11. Deposits are evidenced by postal-savings certificates issued in fixed denominations of $1, $2, $5, $10, $20, $50 and $100, each bearing the name of the depositor, the number of his account, the date of issue, the name of the depository office, and the date on which interest begins. The postmaster or his representative will make out a duplicate of each certificate issued, which the depositor will be required to sign and which the postmaster will retain in his records.

12. No account may be opened for less than $1, nor will fractions of a dollar be accepted for deposit.

13. No person is permitted to deposit more than $100 in any one calendar month nor to have a total balance to his credit at one time of more than $500 exclusive of accumulated interest.

14. Savings certificates cannot be transferred or negotiated and will be payable only to the person to whom issued.

15. On opening an account a depositor is supplied with an envelope in which he may keep his

savings certificates. On this envelope is printed information for his guidance, and also a blank ledger record on which to keep an account of his deposits and withdrawals.

16. In case a savings certificate is lost or destroyed the depositor should notify the postmaster. If deemed proper, a new certificate will be issued upon compliance by the depositor with the necessary requirements.

17. Postmasters are not permitted to receive savings certificates for safe-keeping.

**Savings Cards and Stamps**—18. Amounts less than $1 may be saved for deposit by the purchase of 10-cent postal-savings cards and adhesive 10-cent postal-savings stamps. Each postal-savings card contains blank spaces to which savings stamps may be affixed from time to time as purchased, and a postal-savings card with nine 10-cent savings stamps thus affixed will be accepted as a deposit of $1 either in opening an account or in adding to an existing account, or it may be redeemed in cash.

19. Savings stamps are not valid for postage. They will not be received in exchange for postage stamps nor will postage stamps be accepted in exchange for postal-savings cards or stamps.

**Interest**—20. Interest will be allowed on all deposits at the rate of 2 per cent. per annum, computed on each savings certificate separately, and payable annually. No interest will be paid on money which remains on deposit for a fraction of a year only.

21. Deposits will bear interest from the first day of the month next following that in which deposited.

22. Interest will continue to accrue on a savings certificate as long as it remains outstanding, certificates being valid until paid, without limitation as to time.

23. Compound interest is not allowed on an outstanding certificate, but a depositor may withdraw interest payable and include it in a new deposit, which will bear interest at the regular rate.

**Withdrawals**—24. A depositor may at any time withdraw the whole or any part of his deposits to his credit with any interest payable by surrendering savings certificates, properly indorsed, for the amount desired.

25. A depositor presenting a certificate for payment in full, with all interest payable, must indorse it on the back in the presence of the postmaster or his representative and surrender it. The postmaster or his representative, if satisfied as to the depositor's identity, will then make payment.

26. When a depositor desires to withdraw only a part of the amount called for by any certificate the postmaster, on presentation of the certificate, shall pay the amount demanded with all interest then payable on the full amount of the certificate. He shall issue a new certificate or certificates covering the amount to remain on deposit, which shall bear interest from the first day of the month succeeding that in which payment is made.

27. When a depositor desires to withdraw merely the interest payable on any certificate, instead of indorsing and surrendering the certificate as in case of full payment, he will be required to give his receipt for the amount of the interest paid. The postmaster will enter the interest payment on the back of the certificate and return it to the depositor.

**Deposits Not Made in Person**—28. When a person who has opened an account cannot appear personally to make an additional deposit, because of infirmity or for other good and sufficient reason, the amount to be deposited may be sent by a representative or forwarded to the post-office by registered mail or money order. When a depositor forwards money by mail for deposit the postmaster shall sign the duplicate certificates beneath the depositor's name and mail him the originals. New accounts cannot be opened by mail. When an intending depositor desiring to open an account is unable to appear in person he may forward the money by a representative, who will be provided with an application form and a deposit slip. When the application and the deposit slip have been returned, properly filled out and signed, the postmaster shall accept the deposit and issue the necessary certificates, writing the depositor's name on the duplicates and requiring the representative to sign under it.

**Withdrawals Not Made in Person**—29. When under similar circumstances a depositor cannot appear in person to make a withdrawal, a blank order will be furnished for his use upon request by his representative. When such order has been properly filled in and signed by the depositor, with his signature witnessed by a disinterested person, and has been returned to the postmaster, together with each certificate to be paid properly indorsed, payment will be made to the depositor's representative.

30. When a depositor who is unable to appear in person desires to withdraw merely the interest payable on any certificate, the blank order furnished will include receipts for the interest to be paid, upon return of which, properly signed by the depositor, the postmaster will make payment to his representative.

**Death of Depositor**—31. In case of the death of a depositor the amount standing to his credit will be paid to the executor or administrator of his estate upon compliance with the necessary requirements. In case no formal administration is desired by his relatives, the postmaster may, if it is deemed proper, be authorized to pay the amount of the deposit, on application in proper form, to the persons entitled to receive it, without the appointment of an administrator.

**Account of Woman Who Marries**—32. A woman who opens an account and afterward marries must present her savings certificates at her office in order that the certificates may be indorsed as payable to her in her new name. The postmaster will receive no further deposits from a depositor failing to comply with this requirement nor will he make any partial or interest payment to her.

**Postal-Savings Bond**—33. A depositor will be permitted to exchange the whole or any part of his deposits in sums of $20, $100 and $500, into United States registered or coupon bonds bearing interest at the rate of 2½ per cent. per annum, payable semi-annually, and redeemable at the pleasure of the United States after one year from date of issue, both principal and interest payable twenty years from such date in United States gold coin. Such exchange may be made under date of January 1 and July 1 of each year, provided such bonds are then available.

34. A depositor desiring to convert his savings deposits into bonds on January 1 and July 1 of any year must make application at least fifteen days before either of the dates named to the postmaster in triplicate on a form which will be supplied him for that purpose. At the time of making application he must indorse and surrender savings certificates covering the amount of the bonds desired, for which the postmaster will give him a receipt. Interest will continue to accrue on certificates surrendered until the date on which the bonds are issued. Bonds, when issued, are sent to the applicant's address. At the same time all interest due on the certificates surrendered will be paid.

35. Savings deposits converted into bonds are not counted as a part of the maximum of $500 allowed one depositor, and there is no limitation upon the amount of available postal-savings bonds which may finally be acquired by a depositor.

36. Postal-savings bonds are exempt from all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal or local authority.

37. Postal-savings bonds can only be procured by the conversion of postal-savings deposits, and will not be issued to persons who are not depositors, but whether in registered or coupon form they may, upon receipt by the depositor, be sold and assigned at any time to any person desired.

**Information**—38. Further information concerning the Postal-Savings System may be obtained by application at any depository office or by inquiry addressed to the Third Assistant Postmaster-General, Division of Money Orders, Washington, D. C.

BOYCOTTING, BLACKLISTING AND INTIMIDATION LAWS.

THE States having laws prohibiting *boycotting* in terms are Alabama, Colorado, Illinois, Indiana, and Texas.

The States having laws prohibiting *blacklisting* in terms are Alabama, Arizona, Arkansas, Colorado, Connecticut, Florida, Illinois, Indiana, Iowa, Kansas, Minnesota, Mississippi (applies to telegraph operators only), Missouri, Montana, Nevada, New Mexico, North Carolina, North Dakota, Oklahoma, Oregon, Texas, Utah, Virginia, Washington, and Wisconsin.

A number of States have laws concerning *intimidation*, conspiracy against workingmen, and interference with employment, viz.: Alabama, Connecticut, Delaware, Florida, Georgia, Idaho (applies to mine employés only), Illinois, Kansas, Kentucky, Louisiana, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, New Hampshire, New Jersey, New York, North Dakota, Oklahoma, Oregon, Pennsylvania, Porto Rico, Rhode Island, South Dakota, Texas, Utah, Vermont, Washington, West Virginia and Wisconsin.

In the following States it is unlawful for an employer to exact any agreement, either written or verbal, from an employé not to join or become a member of a labor organization, as a condition of employment: California, Colorado, Connecticut, Idaho, Indiana, Kansas, Massachusetts, Minnesota, Mississippi (applies to telegraph operators only), Nevada, New Jersey, Ohio, Oklahoma, Oregon, Pennsylvania, Porto Rico, South Carolina, Utah, and Wisconsin.

EIGHT-HOUR LAWS.

**Arizona.**—Eight hours constitute a day's labor on all public works and in all mines and workings, smelting and reduction works, blast furnaces, rolling mills, etc.

**Arkansas.**—Eight hours constitute a day's work on public highways and bridges and for railway telegraph operators.

**California.**—Unless otherwise expressly stipulated, eight hours constitute a day's work. The time of service of all laborers, workmen, and mechanics employed upon any public works of, or work done for, the State, or for any political sub-division thereof, whether the work is to be done by contract or otherwise, and of employés in mines and smelters, is limited and restricted to eight hours in any one calendar day.

**Colorado.**—A day's work for all workingmen employed by the State, or any county, township, school district, municipality, or incorporated town, and for all employés in underground or open cut mines or workings, and in smelting and refining works, is restricted to eight hours.

**Connecticut.**—Eight hours of labor constitute a lawful day's work unless otherwise agreed. Railroad telegraph operators controlling the movement of trains may work but eight hours, except at stations kept open only in the daytime. Engineers, firemen, machinists and other mechanics employed in State institutions may work but eight hours, except in case of emergency.

**Delaware.**—Eight hours constitute a lawful day's work for all municipal employés of the city of Wilmington.

**District of Alaska.**—Eight hours are a day's labor on the public roads.

**District of Columbia.**—A day's work for all laborers and mechanics employed by the District of Columbia, or by any contractor or sub-contractor upon any public works of the District, is limited to eight hours.

**Hawaii.**—For all mechanics, clerks, laborers, and other employés on public works and in public offices eight hours of actual service constitute a day's work.

**Idaho.**—Eight hours' actual work constitute a lawful day's labor for manual laborers employed by the day on all State, county, and municipal works. Labor in mines and smelters is limited to eight hours per day.

**Illinois.**—Eight hours are a legal day's work in all mechanical employments, except on farms, and when otherwise agreed; the law does not apply to service by the year, month or week. Eight hours constitute a day's labor on the public highways.

**Indiana.**—Eight hours of labor constitute a legal day's work on the public roads, and for all classes of mechanics, workingmen, and laborers, excepting those engaged in agricultural and domestic labor. Overwork by agreement and for extra compensation is permitted.

**Iowa.**—Eight hours constitute a day's labor on the public roads.

**Kansas.**—Eight hours are a day's work for all laborers, mechanics, or other persons employed by or on behalf of the State or any county, city, township or other municipality.

**Kentucky.**—Eight hours constitute a day's work on all public works of the State.

**Louisiana.**—The hours of labor of stationary firemen in factories, etc., in continuous operation are limited to eight per day.

**Maryland.**—No mechanic or laborer employed by the Mayor or City Council of Baltimore, or by any agent or contractor under them, shall be required to work more than eight hours as a day's labor.

**Massachusetts.**—Eight hours shall constitute a day's work for all laborers, workmen, and mechanics employed by or on behalf of the Commonwealth or any county therein, or of any city or town in the Commonwealth upon acceptance of the statute by a majority of voters present and voting upon the same at any general election.

**Minnesota.**—Eight hours constitute a day's labor for all laborers, workmen, or mechanics employed by or on behalf of the State, whether the work is done by contract or otherwise.

**Mississippi.**—Eight hours are a day's labor on highways.

**Missouri.**—Eight hours constitute a legal day's work. The law does not prevent an agreement to work for a longer or a shorter time and does not apply to agricultural laborers. It is unlawful for employers to work their employés longer than eight hours per day in mines and smelters, or as train despatchers, etc., on railroads, unless the office is open only during the daytime. Eight hours are a day's labor on highways.

**Montana.**—Eight hours constitute a legal day's work for persons engaged to operate or handle hoisting engines at mines. The law applies only to such plants as are in operation sixteen or more hours per day, or at or in mines where the engine develops fifteen or more horse-power, or where fifteen or more men are employed underground in the twenty-four hours. A day's labor on public works and in smelters, underground mines and in railroad and other tunnels is limited to eight hours.

**Nebraska.**—Eight hours constitute a day's work on public roads and on all public works in cities of the first class.

**Nevada.**—For labor on public highways, in and about all mines, in smelters, plaster and cement mills, as train despatchers, etc., on railroads, and on all works and undertakings carried on or aided by the State, county, or municipal governments, the hours of labor are fixed at eight per day.

**New Jersey.**—Eight hours is the limit of a day's work by any person employed by or on behalf of the State or any municipality thereof.

**New Mexico.**—Eight hours constitute a day's labor in all employment by or on behalf of the State or municipality.

**New York.**—Eight hours constitute a day's work on highways, and on work done by or for the State, or a municipal corporation, whether directly by contractors or sub-contractors; also for all

classes of employés, except in farm or domestic labor, though overwork for extra pay is permitted in private employments.

**North Carolina.**—Train despatchers, etc., on railroads may work only eight hours, unless otherwise permitted by the corporation commission.

**North Dakota.**—Eight hours are a day's labor on public roads.

**Ohio.**—Eight hours shall constitute a day's work in all engagements to labor in any mechanical, manufacturing or mining business, unless otherwise expressly stipulated in the contract.

**Oklahoma.**—Eight hours constitute a day's labor on all public works, and in underground mines.

**Oregon.**—Eight hours constitute a day's labor on all public works, and in underground mines yielding metal.

**Pennsylvania.**—Eight hours of labor shall be deemed and held to be a legal day's work in all cases of labor and service by the day where there is no agreement or contract to the contrary. This does not apply to farm or agricultural labor or to service by the year, month or week. Eight hours constitute a day's labor for all mechanics, workmen, and laborers in the employ of the State, or of any municipal corporation therein, or otherwise engaged on public works. This act shall be deemed to apply to employés of contractors. Engineers hoisting workmen at anthracite coal mines may work but eight hours per day.

**Philippine Islands.**—Eight hours constitute a day's work on highways.

**Porto Rico.**—No laborer may be compelled to work more than eight hours per day on public works.

**South Dakota.**—For labor on public highways a day's work is fixed at eight hours.

**Tennessee.**—Eight hours shall be a day's work on the highways.

**Texas.**—Eight hours constitute a day's work on the highways, and by train despatchers, etc., except at stations where but one operator is employed.

**Utah.**—Eight hours constitute a day's labor on all works carried on or aided by the State, county or municipal governments, and in all underground mines or workings, and in smelters and all other establishments for the reduction of ores.

**Washington.**—Eight hours in any calendar day shall constitute a day's work on any work done for the State, or for any county or municipality, and in underground coal mines.

**West Virginia.**—Eight hours shall constitute a day's work for all laborers, workmen, and mechanics who may be employed by or on behalf of the State, and for telegraph operators directing the movement of trains where three or more passenger or ten or more freight trains pass in 24 hours.

**Wisconsin.**—In all engagements to labor in any manufacturing or mechanical business, where there is no express contract to the contrary, a day's work shall consist of eight hours, but the law does not apply to contracts for labor by the week, month or year. Eight hours constitute a day's labor on the public highways. Employés on public works and train despatchers may be employed but eight hours per day.

**Wyoming.**—Eight hours' actual work constitute a legal day's labor in all underground mines, in smelters, and on all State and municipal works.

**United States.**—A day's work for all laborers, workmen and mechanics who may be employed by the United States, or by any contractor or sub-contractor upon any of the public works of the United States, including dredging and rock excavation in river and harbor work, is limited to eight hours.

THE WORLD ALMANAC is indebted to Commissioner Royal Meeker of the U. S. Bureau of Labor Statistics for this Summary of Labor Legislation revised to date.

# General Labor Organizations.

## AMERICAN FEDERATION OF LABOR.

PRESIDENT, Samuel Gompers, 801-809 G Street, N.W., Washington, D.C.; Secretary, Frank Morrison, same address; Treasurer, John B. Lennon, Bloomington, Ill.; First Vice-President, James Duncan, Hancock Building, Quincy, Mass.; Second Vice-President, John Mitchell, 3 Claremont Avenue, Mt. Vernon, N. Y.; Third Vice-President, James O'Connell, 512 Ouray Building, Washington, D. C.; Fourth Vice-President, D. A. Hayes, 930 Witherspoon Building, Philadelphia, Pa.; Fifth Vice-President, Wm. D. Huber, 71 Lombard Building, Indianapolis, Ind.; Sixth Vice-President, Jos. F. Valentine, Commercial Tribune Building, Cincinnati, Ohio; Seventh Vice-President, John R. Alpine, 401 Bush Temple of Music, Chicago, Ill.; Eighth Vice-President, H. B. Perham, Star Building, St. Louis, Mo.

The Federation is composed of 113 national and international unions, representing approximately 27,000 local unions, 5 departments, 42 State branches, 615 city central unions, and 673 local unions. The approximate paid membership is 2,000,000. The affiliated unions publish about 540 weekly or monthly papers, devoted to the cause of labor. The official organ is the *American Federationist*, edited by Samuel Gompers. There are 1,760 organizers of local unions acting under the orders of the American Federation of Labor. The objects and aims of the American Federation of Labor are officially stated to render employment and means of subsistence less precarious by securing to the workers an equitable share of the fruits of their labor.

INTERNATIONAL UNIONS COMPRISING THE AMERICAN FEDERATION OF LABOR.

Asbestos Workers, International Association of Heat and Frost Insulators and. Thomas G. McNamara, 2516 Slattery Street, St. Louis, Mo.

Bakery and Confectionery Workers' International Union of America. Otto E. Fischer, 212 Bush Temple of Music, 221 Chicago Avenue, Chicago, Ill.

Barbers' International Union, Journeymen. Jacob Fischer, 222 East Michigan Street, Indianapolis, Ind.

Bill Posters and Billers of America, International Alliance of. William McCarthy, Fitzgerald Building, 1482-90 Broadway, New York City.

Blacksmiths, International Brotherhood of. Wm. F. Kramer, Rooms 1270-85 Monon Building, Chicago, Ill.

Boiler Makers and Iron Ship Builders of America, Brotherhood of. W. J. Gilthorpe, Suite 7-12, Law Building, Kansas City, Kan.

Bookbinders, International Brotherhood of. James W. Dougherty, 222 East Michigan Street, Indianapolis, Ind.

Boot and Shoe Workers' Union. C. L. Baine, 246 Summer Street, Boston, Mass.

Brewery Workmen, International Union of the United. Louis Kemper, Vine Street, near Hollister, Cincinnati, Ohio.

Brick, Tile, and Terra Cotta Workers' Alliance, International. William Van Bodegraven, 2341 West 12th Street, Chicago, Ill.

Bridge and Structural Iron Workers, International Association of. Harry Jones, 422-424 American Central Life Building, Indianapolis, Ind.

Broom and Whisk Makers' Union, International. C. T. Dolan, 2925 Sheffield Avenue, Chicago, Ill.

Brushmakers' International Union. George J. Vitzthun, 2052 Gates Avenue, Brooklyn, N. Y.

Carpenters and Joiners of America, United Brotherhood of. Frank Duffy, Carpenters' Building, Indianapolis, Ind.

Carriage, Wagon and Automobile Workers of North America, International Union of. William P. Mavell, 30 Chapin Block, Buffalo, N. Y.

Carvers' Association of North America, International Wood. Thomas J. Lodge, 10 Carlisle Street, Roxbury, Mass.

Cement Workers, American Brotherhood of. Henry Ullner, Room 705 Clunie Building, California and Montgomery Streets, San Francisco, Cal.

Cigar Makers' International Union of America. George W. Perkins, Monon Building, Chicago, Ill.

Clerks' International Protective Association, Retail. H. J. Conway, Lock Drawer 248, Lafayette, Ind.

Cloth Hat and Cap Makers of North America, United. Max Zuckerman, 62 East Fourth Street, New York City.

Commercial Telegraphers' Union of America, The. Wesley Russell, 922-930 Monon Building, Chicago, Ill.

Compressed Air and Foundation Workers Union of the United States and Canada. Henry Kuhlmann, 238 Ten Eyck Street, Brooklyn, N. Y.

Coopers' International Union of North America. William R. Deal, Suite A, Bishop Building, Kansas City, Kan.

Cutting Die and Cutter Makers, International Union of. William Lalor, 642 Concord Avenue, New York City.

Diamond Workers' Protective Union of America. Andries Meyer, 323 Washington Street, Brooklyn, N. Y.

Electrical Workers of America, International Brotherhood of. Charles P. Ford, Pierick Building, Springfield, Ill.

Elevator Constructors, International Union of. William Young, 418 Perry Building, 16th and Chestnut Streets, Philadelphia, Pa.

Engineers, International Union of Steam and Operating. James G. Hannahan, 6334 Yale Avenue, Chicago, Ill.

Firemen, International Brotherhood of Stationary. C. L. Shamp 3015 North 24th Street, Omaha, Neb.

Foundry Employés, International Brotherhood of. Geo. Bechtold, 200 South Broadway, St. Louis, Mo.

Freight Handlers, Brotherhood of Railroad. George H. Kroeger, 816 Harrison Street, Chicago, Ill.

Fur Workers' Union of United States and Canada, International. Samuel Korman, 89 East 10th Street, New York City.

Garment Workers of America, United. B. A. Larger, Rooms 116-122 Bible House, New York City.

Garment Workers' Union, International Ladies'. John Alex. Dyche, 32 Union Square, New York City.

GENERAL LABOR ORGANIZATIONS—*Continued.*

## NATIONAL UNIONS

NOT AFFILIATED WITH THE AMERICAN FEDERATION OF LABOR.

Bricklayers and Masons' International. William Dobson, University Park Building, Indianapolis, Ind.
Brotherhood of Locomotive Engineers. Warren S. Stone, Grand Chief Engineer, Cleveland, Ohio; W. B. Prenter, General Secretary, Cleveland, Ohio.
Brotherhood of Locomotive Firemen and Enginemen. A. W. Hawley, General Secretary, Jefferson Building, Peoria, Ill.
Brotherhood of Railroad Trainmen. A. E. King, General Secretary-Treasurer, American Trust Building, Cleveland, Ohio.
Order of Railway Conductors of America. A. B. Garretson, President, Kimball Building, Cedar Rapids, Iowa.

## KNIGHTS OF LABOR.

General Master Workman, John W. Hayes, Washington, D. C.; General Secretary-Treasurer, I. D. Chamberlain, 43 B St. N. W., Washington, D. C.; General Executive Board, Chris. Hill, Brooklyn, N. Y.; John C. Patterson, Philadelphia, Pa.; M. F. Holleran, New York City.

# Population Engaged in Industrial Occupations.

THE following table gives the percentages of total occupied population for the principal groups in the eight leading industrial countries:

| OCCUPATION GROUP. | France. | Germany. | Austria. | Hungary. | Italy. | Belgium. | United States. | Great Britain. |
|---|---|---|---|---|---|---|---|---|
| Agriculture | 41.42 | 35.11 | 60.80 | 70.15 | 59.06 | 21.90 | 35.64 | 12.00 |
| Commercial occupations | 6.54 | 6.30 | 3.34 | 2.56 | 3.43 | 11.79 | 9.91 | 11.39 |
| Conveyance of men, goods and messages | 2.89 | 2.89 | 1.70 | 1.55 | 3.12 | 2.03 | 5.95 | 8.20 |
| Mines and quarries | 1.59 | 3.25 | 1.56 | .78 | .89 | 6.46 | 2.09 | 5.00 |
| Metals, machines, implements and conveyances | 4.35 | 6.99 | 2.78 | 2.15 | 2.14 | 5.95 | 3.72 | 7.89 |
| Building and works of construction | 4.20 | 6.99 | 2.96 | 1.48 | 5.02 | 7.28 | 4.43 | 6.77 |
| Textile fabrics | 4.55 | 3.75 | 3.26 | .37 | 4.81 | 6.86 | 2.02 | 6.92 |
| Dress | 8.05 | 5.39 | 3.92 | 2.85 | 6.64 | 7.86 | 4.29 | 7.23 |

# Industrial Workers of the World.

(A distinct organization from that given below bearing same name.)

HEADQUARTERS, 164 West Washington St., Chicago, Ill. Vincent St. John, General Secretary-Treasurer; George Speed, Assistant Secretary and General Organizer. Executive Board—J. J. Ettor, Clarence Edwards, F. H. Little, Ewald Koettgen, John M. Foss.

PREAMBLE—The working class and the employing class have nothing in common.

Between these two classes a struggle must go on until the workers of the world organize as a class, take possession of the earth and the machinery of production, and abolish the wage system.

We find that the centring of the management of industries into fewer and fewer hands makes the trades unions unable to cope with the ever-growing power of the employing class. The trades unions foster a state of affairs which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping defeat one another in wage wars. Moreover, the trades unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

These conditions can be changed and the interest of the working class upheld only by an organization formed in such a way that all its members in any one industry, or in all industries, if necessary, cease work whenever a strike or lockout is on in any department thereof, thus making an injury to one an injury to all.

Instead of the conservative motto, "A fair day's wages for a fair day's work," we must inscribe on our banner the revolutionary watchword, "Abolition of the wage system."

It is the historic mission of the working class to do away with capitalism. The army of production must be organized, not only for the every day struggle with capitalists, but also to carry on production when capitalism shall have been overthrown. By organizing industrially we are forming the structure of the new society within the shell of the old.

The organization differs from syndicalism in that great stress is laid upon having a form of organization to correspond, cell for cell, tissue for tissue, with capitalist industry itself, and also because it seeks to build a new union on revolutionary lines rather than to attempt to change the present reactionary and out-of-date craft unions. The organization claims to have blended the practical features of socialism, anarchism, and syndicalism, and yet it is distinct from all three.

The I. W. W. is composed of 300 local unions, 3 national industrial unions (textile, lumber and Marine Transport Workers), having a total membership of 70,000, four national administrations, Hawaiian, Australian, New Zealand and South African.

Excerpts from Constitution and By-Laws follow:

The Industrial Workers of the World shall be composed of actual wage-workers brought together in an organization embodying thirteen national industrial departments, national industrial unions, local industrial unions, local recruiting unions, industrial councils, and individual members.

The annual convention of the Industrial Workers of the World shall be held on the third Monday of September each year at such place as may be determined by previous convention.

Members-at-large shall pay an initiation fee of $2.00 and $1.00 per month dues and assessments. No working man or woman shall be excluded from membership in local unions because of creed or color.

That to the end of promoting industrial unity and of securing necessary discipline within the organization, the Industrial Workers of the World refuse all alliances, direct or indirect, with existing political parties or anti-political sects.

---

## INDUSTRIAL WORKERS OF THE WORLD.

(A distinct organization from that given above bearing same name.)

HEADQUARTERS, Detroit, Mich. General Secretary-Treasurer, H. Richter, Detroit; Assistant Secretary and General Organizer, Adolf S. Carm, Chicago, Ill.

PREAMBLE—The working class and the employing class have nothing in common.

Between these two classes a struggle must go on until all the toilers come together on the political, as well as on the industrial field, and take and hold that which they produce by their labor through an economic organization of the working class, without affiliation with any political party.

The rapid gathering of wealth and the centring of the management of industries into fewer and fewer hands make the trades unions unable to cope with the ever-growing power of the employing class, because the trades unions foster a state of things which allows one set of workers to be pitted against another set of workers in the same industry, thereby helping defeat one another in wage wars. The trades unions aid the employing class to mislead the workers into the belief that the working class have interests in common with their employers.

Excerpts from Constitution and By-Laws follow:

The Industrial Workers of the World shall be composed of actual wage-workers brought together in an organization embodying thirteen national industrial departments, national industrial unions, local industrial unions, local recruiting unions, industrial councils and individual members.

A national industrial union shall be comprised of the local industrial unions of the various localities in America in a given industry.

The industrial departments shall consist of not less than ten local unions, aggregating a membership of not less than ten thousand members. The industrial departments shall be sub-divided in industrial unions of closely kindred industries in the appropriate organizations for representation in the departmental administration. The departments included are: Department of Mining Industry; Transportation Industry; Metal and Machinery Industry; Glass and Pottery Industry; Food-Stuffs Industry; Brewery, Wine and Distillery Industry; Floricultural, Stock and General Farming Industries; Building Industry; Textile Industries; Leather Industries; Wood Working Industries; Public Service Industries; Miscellaneous Manufacturing.

The annual convention shall be held on the third Monday in September of each year at such place as may be determined by previous convention.

Individual members may be admitted to membership-at-large in the organization on payment of 50 cents initiation fee and 25 cents per month dues, together with assessments.

None but actual wage-workers shall be members of the Industrial Workers of the World. No member of the Industrial Workers of the World shall be an officer in a pure and simple trade union. No member of one industrial or trade organization in the Industrial Workers of the World can at the same time hold a card in another industrial or trade organization of this body. No workingman or workingwoman shall be excluded from membership because of creed or color.

# Commission on Industrial Relations.

THE Sixty-second Congress of the United States, Second Session, passed the following act which was approved Aug. 23, 1912.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That a commission is hereby created to be called the Commission on Industrial Relations. Said commission shall be composed of nine persons, to be appointed by the President of the United States, by and with the advice and consent of the Senate, not less than three of whom shall be employers of labor and not less than three of whom shall be representatives of organized labor.

Sec. 2. That the members of this commission shall be paid actual traveling and other necessary expenses and in addition a compensation of ten dollars per diem while actually engaged on the work of the commission and while going to or returning from such work. The commission is authorized as a whole, or by subcommittees of the commission, duly appointed, to hold sittings and public hearings anywhere in the United States, to send for persons and papers, to administer oaths, to summon and compel the attendance of witnesses and to compel testimony, and to authorize its members or its employés to travel in or outside the United States on the business of the commission.

Sec. 3. That said commission may report to the Congress its findings and recommendations and submit the testimony taken from time to time, and shall make a final report accompanied by the testimony not previously submitted not later than three years after the date of the approval of this act, at which time the term of this commission shall expire, unless it shall previously have made final report, and in the latter case the term of the commission shall expire with the making of its final report; and the commission shall make at least one report to the Congress within the first year of its appointment and a second report within the second year of its appointment.

Sec. 4. That the commission shall inquire into the general condition of labor in the principal industries of the United States, including agriculture, and especially in those which are carried on in corporate forms; into existing relations between employers and employés; into the effect of industrial conditions on public welfare and into the rights and powers of the community to deal therewith; into the conditions of sanitation and safety of employés and the provisions for protecting the life, limb and health of the employés; into the growth of associations of employers and of wage-earners and the effect of such associations upon the relations between employers and employés; into the extent and results of methods of collective bargaining; into any methods which have been tried in any State or in foreign countries for maintaining mutually satisfactory relations between employés and employers; into methods for avoiding or adjusting labor disputes through peaceful and conciliatory mediation and negotiations; into the scope, methods and resources of existing bureaus of labor and into possible ways of increasing their usefulness; into the question of smuggling or other illegal entry of Asiatics into the United States or its insular possessions, and of the methods by which such Asiatics have gained and are gaining such admission, and shall report to Congress as speedily as possible with such recommendation as said commission may think proper to prevent such smuggling and illegal entry. The commission shall seek to discover the underlying causes of dissatisfaction in the industrial situation and report its conclusions thereon.

The names of the commission were sent to the Senate by President Wilson on June 26, 1913, and were confirmed by the Senate on September 10, 1913. The names and addresses of the members of the commission are as follows:

Frank P. Walsh, President, Kansas City, Mo.; Prof. John R. Commons of Madison, Wis.; Mrs. J. Borden Harriman, New York City; Frederick A. Delano, Chicago, Ill.; Harris Weinstock, Sacramento, Cal.; S. Thurston Ballard, Louisville, Ky.; John B. Lennon, Peoria, Ill.; James O'Connell, Washington, D.C., and Austin B. Garretson, Des Moines, Iowa.

# Children's Bureau.

(Department of Labor.)

CHIEF of Bureau—Miss Julia C. Lathrop, Washington, D. C. ($5,000). Lewis Meriam, Assistant Chief ($2,400).

The Children's Bureau was created by act of April 9, 1912, to investigate and report upon all matters pertaining to the welfare of children and child-life among all classes of our people, and especially to investigate the questions of infant mortality, the birth rate, orphanage, juvenile courts, desertion, dangerous occupations, accidents and diseased children, employment and legislation affecting children in the several States and Territories. The functions of the bureau are thus largely investigative. It has no power to administer anything or to regulate anything, and the act creating the bureau stipulates that "no official, or agent, or representative of said bureau shall, over the objection of the head of the family, enter any house used exclusively as a family residence." It is to serve as a centre to which people can turn for definite information regarding child welfare movements, so that every individual or organization working for children can learn of and profit from the experience of others.

The bureau has been in active operation since August 23, 1912. It has already published, in addition to a brief circular containing the law establishing the bureau and a statement of its scope and plans, a monograph entitled "Birth Registration an Aid in Protecting the Lives and Rights of Children. Necessity for Extending the Registration Area," a pamphlet "Baby-Saving Campaigns. What Some American Cities are Doing to Prevent Infant Mortality," and a monograph called "Prenatal Care," designed for the use of the expectant mother.

The publications thus far issued have all been in the field of the work to promote child health. Other pamphlets on the care of children are in the course of preparation, and the results of an investigation into the social causes of infant mortality in Johnstown, Pa., will soon be published. The bureau expects to follow it with reports of the results of other similar investigations in typical cities and rural districts to be conducted in the future.

The bureau has not, as yet, published anything on the employment of children, but it has in the course of preparation a thorough digest of all the State laws on child labor. It proposes to undertake in the near future an investigation of the methods employed by the several States in the administration and enforcement of these laws.

A handbook of Federal statistics of children is also being prepared. It will be published in five sections or parts, the first dealing with the number of children in the country and their sex, race, nativity, parentage and geographic distribution; the second with the growth of the child population, including the questions of the birth rate and infant mortality; the third with illiteracy and school attendance; the fourth with the employment of children, and the fifth with statistics of the defective, dependent and delinquent classes.

The publications of the bureau may be secured by writing to the Chief of the Children's Bureau, Washington, D. C.

# The National Civic Federation.

OFFICE, 1 MADISON AVENUE, NEW YORK.

An organization of prominent representatives of capital, labor, and the general public formed as the direct outgrowth of conventions held in Chicago and New York in 1900-1901. Its purpose is to organize the best brains of the nation in an educational movement seeking the solution of some of the great problems related to social and industrial progress; to provide for study and discussion of questions of national import; to aid thus in the crystallization of the most enlightened public opinion; and when desirable, to promote legislation in accordance therewith. At the present time the work of the federation is carried on through the following agencies:

(1) The Industrial Conciliation Department dealing entirely with strikes, lockouts and trade agreements. Its membership includes representatives of the general public and the leading organizations of employers and wage-earners. The services of this department have been enlisted in more than five hundred cases involving every phase of industrial controversy. The greatest recent accomplishment of the Federation in this connection was the prevention of a strike on the Eastern railroads on the part of the Brotherhoods of Railway Conductors and Railroad Trainmen. Under the Department on Industrial Mediation Law, an amendment is being proposed to the railway commission laws of various States that will serve to provide a preventive for strikes and lockouts on street railways and in gas, electric light and other municipal corporations.

(2) The Industrial Economics Department organized to promote discussion and to aid in the solution of practical economic and social problems such as "Wages, and the Cost of Living," "The Injunction," "Opened and Closed Shop," "Restriction of Output," "Compulsory Arbitration," "Initiative and Referendum," "The Income Tax," "The Trusts," The Industrial Economics Department is now undertaking a thorough examination of the economic proposals of the Marxian Socialists and is making a dispassionate scientific examination of the proposals of the Socialist party.

(3) Welfare Department, composed of employers of labor in stores, factories, mines and on railroads, and officials who have to do with the working conditions of public employés, Chairmen of boards of health, heads of departments of public safety, leading physicians connected with public hospitals, heads of charity boards and others. It is devoted to securing improvements in the working and living conditions of the employé by the employer.

(4) The Woman's Department, composed largely of women who are themselves stockholders or who through family relationships are financially interested in industrial organizations. The object of this department is to use its influence in securing needed improvements in the working and living conditions of women and men wage-earners in the various industries and governmental institutions, and to co-operate, when practicable, in the general work of the federation.

(5) The Department on Compensation for Industrial Accidents and Their Prevention, composed of employers, representative labor men, attorneys, insurance experts, economists, State officials, members of State compensation commissions, and others concerned. Its object is: To advocate the amendment of State laws on employers' liability with a view to securing uniform provisions looking toward compensation for industrial accidents; and to look into means of preventing accidents in commercial and manufacturing enterprises. Commission now studying recently enacted laws: Cyrus W. Phillips, J. Walter Lord, John Mitchell, James Duncan, Louis B. Schram, Otto M. Eidlitz.

(6) Wage-Earners' Insurance Department: To promote employers' voluntary relief associations, and to investigate the need for uniform legislation covering such employers' voluntary sick, accident, pension and death benefit associations.

(7) Department on Uniform State Legislation: To promote uniform State legislation in those matters that are interstate; to work for the co-ordination of State with Federal legislation where there now is conflict, and to secure Federal legislation in matters that are purely interstate. Local councils have been organized in thirty-one States in the Union to promote this movement.

(8) Department on Regulation of Combinations and Trusts: Working for co-ordination of Federal and State laws and unification of the latter.

(9) Department on Regulation of Interstate and Municipal Utilities: is studying this subject in all its phases through expert investigations and will report recommendations, including a skeleton law designed to secure uniformity.

(10) The Pure Food and Drugs Department is composed of representatives of State food and dairy departments, public health associations and organizations of physicians, farmers, labor and food and drug manufacturers, as well as large individual employers of labor. Its object is to promote uniform legislation on this subject among the States, work for effective co-operation between State and Federal Governments, stimulate the public to demand a better enforcement of existing laws and to make evident to employers how their employés too frequently are defrauded in both quality and measurement.

## OFFICERS AND EXECUTIVE COUNCIL.

President, Seth Low; Vice-Presidents, Samuel Gompers, Benjamin I. Wheeler; Treasurer, Isaac N. Seligman; Chairman Executive Council, Ralph M. Easley; Chairman Welfare Department, William R. Willcox; Chairman Department on Reform in Legal Procedure, Alton B. Parker; Chairman Industrial Economics Department, John Hays Hammond; Chairman Department Compensation Industrial Accidents, August Belmont; Chairman Department Interstate and Municipal Utilities, Emerson McMillin; Chairman Wage-Earners' Insurance Department, George W. Perkins; Chairman Department on Regulation of Industrial Corporations, Seth Low; Chairman Department on Industrial Mediation Law, Marcus M. Marks; Chairman Woman's Department, Miss Maude Wetmore; Chairman Taxation Department, E. R. A. Seligman.

## EXECUTIVE COMMITTEE.

Hamlin, Second Vice-Chairman, Boston, Mass.; Mrs. Alfred E. Bates, Third Vice-Chairman, Washington, D. C.; Mrs. Allison Hodges, Fourth Vice-Chairman, Richmond, Va.; Miss Maud R. Borland, Fifth Vice-Chairman, New York City; Mrs. Eva M. Valesh, Sixth Vice-Chairman, New York City; Chairman Metropolitan Section for New York and New Jersey, Mrs. Francis McNeil Bacon, Jr., New York City; Chairman District of Columbia Section, Mrs. Archibald Hopkins, Washington, D. C.; Chairman Virginia and West Virginia Section, Mrs. W. T. Harris, Danville, Va.; Chairman Massachusetts and Rhode Island Section, Mrs. Geo. T. Rice, Boston, Mass.; Chairman Alabama and Mississippi Section, Mrs. Cyrus Pitman Orr, Birmingham, Ala.; Chairman North and South Carolina Section, Mrs. B. Frank Mebane, Spray, N. C.; Chairman Congressional Section, Mrs. Henry G. Danforth, Washington, D. C.; Chairman Georgia Section, Mrs. John K. Ottley, Atlanta, Ga.; Chairman Florida Section, Mrs. William Brooks Young, Jacksonville, Fla.; Chairman Government Employés Committee, Mrs. H. S. B. Beale, Washington, D. C.; Chairman Vacation Bureau and Savings Fund Committee, Miss Gertrude Robinson-Smith, New York City.

# National Association of Manufacturers.

*President*, George Pope; *Secretary*, George S. Boudinot; *Assistant Secretary*, W. M. Benny; *Treasurer*, Alonzo B. See; *General Manager*, J. Philip Bird. Headquarters, 30 Church Street, New York.

## DECLARATION OF LABOR PRINCIPLES.

1. Fair dealing is the fundamental and basic principle on which relations between employés and employers should rest.

2. The National Association of Manufacturers is not opposed to organizations of labor as such, but it is unalterably opposed to boycotts, blacklists and other illegal acts of interference with the personal liberty of employer or employé.

3. No person should be refused employment or in any way discriminated against on account of membership or non-membership in any labor organization, and there should be no discriminating against or interference with any employé who is not a member of a labor organization by members of such organizations.

4. With due regard to contracts, it is the right of the employé to leave his employment whenever he sees fit, and it is the right of the employer to discharge any employé when he sees fit.

5. Employers must be free to employ their work people at wages mutually satisfactory, without interference or dictation on the part of individuals or organizations not directly parties to such contracts.

6. Employers must be unmolested and unhampered in the management of their business in determining the amount and quality of their product, and in the use of any methods or systems of pay which are just and equitable.

7. In the interest of employés and employers of the country, no limitation should be placed upon the opportunities of any person to learn any trade to which he or she may be adapted.

8. The National Association of Manufacturers disapproves absolutely of strikes and lockouts, and favors an equitable adjustment of all differences between employers and employés by any amicable method that will preserve the rights of both parties.

9. Employés have the right to contract for their services in a collective capacity, but any contract that contains a stipulation that employment should be denied to men not parties to the contract is an invasion of the constitutional rights of the American workman, is against public policy, and is in violation of the conspiracy laws. This association declares its unalterable antagonism to the closed shop and insists that the doors of no industry be closed against American workmen because of their membership or non-membership in any labor organization.

10. The National Association of Manufacturers pledges itself to oppose any and all legislation not in accord with the foregoing declaration.

# United States Bureau of Mines.

Director—Joseph A. Holmes, Washington, D. C. ($6,000).

THE general purpose of the Bureau of Mines, of the Department of the Interior, is to conduct, in behalf of the public welfare, fundamental inquiries and investigations into the mining industry. Two phases of the industry of greatest national concern are safety and efficiency—safeguarding the lives of our miners and insuring the most efficient and least wasteful development and use of our mineral resources.

These inquiries and investigations are national in scope; they do not contemplate the safeguarding of the life of the individual miner nor the promotion of the interests of the individual mine owner or operator, but seek the development of methods that will increase the safety of all miners and will promote the upbuilding and permanence of the whole mineral industry. Yet, although the advancement of the public welfare is the primary purpose of this work, it is obvious that broad fundamental inquiries and researches cannot fail to confer benefits on the individual miner and the individual mine owner. Hence, the function of the Bureau of Mines may be defined as the conducting of inquiries and investigations that have for their purpose the improvement of health conditions, and the increase of safety, efficiency and economic development in the mining, quarrying, metallurgical and miscellaneous mineral industries of the country.

NUMBER OF MEN EMPLOYED AND NUMBER OF MEN KILLED AND INJURED IN AND ABOUT ALL MINES AND QUARRIES IN THE UNITED STATES DURING 1911.

| MINE. | Employed. | KILLED. | | SERIOUSLY INJURED. | | SLIGHTLY INJURED. | |
|---|---|---|---|---|---|---|---|
| | | Total. | Per 1,000 Employed. | Total. | Per 1,000 Employed. | Total. | Per 1,000 Employed. |
| Quarries | 110,954 | 188 | 1.69 | 862 | 7.77 | 4,528 | 40.81 |
| Coal mines | 728,348 | 2,719 | 3.73 | 9,106 | 12.50 | 22,228 | 30.65 |
| Metal mines | 165,979 | 695 | 4.19 | 4,169 | 25.12 | 22,408 | 135.01 |
| Totals | 1,005,281 | 3,602 | 3.58 | 14,137 | 14.11 | 49,164 | 48.95 |

During the calendar year 1912 there were 2,360 men killed in and about the coal mines of the United States. Based on an output of 550,000,000 short tons of coal produced by 750,000 men, the number of men killed for every 1,000,000 tons of coal mined was 4.29, and the death rate per 1,000 employed was 3.15. The number of men killed was the least since 1906, the death rate per 1,000 employed was the smallest since 1899, the death rate per 1,000,000 tons of coal mined was the lowest, and the number of tons of coal produced in proportion to the number of men killed was the greatest on record.

In 1912 the number of men killed in the coal mines of the United States was 359 less than in 1911—2,360 as compared with 2,719—a decrease of 13.2 per cent., and this in spite of the fact that there were more men employed in the mines and more coal mined than in any previous year. The death rate per 1,000 men employed in 1912 was 3.15, as against 3.73 in the previous year, a decrease of 15.5 per cent.

During 1912 for every 1,000,000 tons of coal mined 4.29 men were killed, as compared with 5.48 men in 1911, a decrease of 21.7 per cent. There was 233,000 tons of coal mined for each man killed in 1912, as compared with 183,000 tons in 1911, an increase of 50,000 tons, or 27.3 per cent.

Although the improvement in 1912 was greater than in any previous year for which accurate statistics are available, partly due, perhaps, to exceptionally mild weather during the last few months of the year decreasing the likelihood of disastrous coal dust explosions, there has been an annual improvement for a number of years, as indicated by the accompanying table.

NUMBER OF MEN KILLED IN AND ABOUT THE COAL MINES IN THE UNITED STATES IN THE CALENDAR YEARS 1907 TO 1912, INCLUSIVE, WITH DEATH RATES.

| YEARS. | NUMBER KILLED. | | | Production per Death, Short Tons. | YEARS. | NUMBER KILLED. | | | Production per Death, Short Tons. |
|---|---|---|---|---|---|---|---|---|---|
| | Total. | Per 1,000 Employed. | Per 1,000,000 Short Tons Mined. | | | Total. | Per 1,000 Employed. | Per 1,000,000 Short Tons Mined. | |
| 1907 | 3,197 | 4.88 | 6.93 | 144,000 | 1910 | 2,840 | 3.92 | 5.66 | 177,000 |
| 1908 | 2,449 | 3.64 | 6.05 | 165,000 | 1911 | 2,719 | 3.73 | 5.48 | 183,000 |
| 1909 | 2,668 | 4.00 | 5.79 | 173,000 | 1912 | 2,360 | 3.15 | 4.29 | 233,000 |

It will be noted from the foregoing table that the death rate per 1,000,000 tons of coal mined has decreased annually, that the production per death has increased each year since 1907, and that the death rate per 1,000 men employed has steadily decreased during the last four years.

## INTERNATIONAL TRIBUNALS OF EGYPT.

In 1876, as the result of negotiations between the Ottoman and Egyptian Governments and the various Christian powers having representatives at Cairo, certain courts were created in Egypt for the trial of civil and commercial causes arising between natives and foreigners of different nationality, as well as all questions of real estate between any person and suits of foreigners against the Egyptian Government and members of the Khedival family. These mixed tribunals, in civil matters within their exclusive jurisdiction, superseded the consular courts. A mixed tribunal consists of five judges, three of whom are foreigners and two natives. The foreign judges are appointed by the Khedive on the recommendation of the great powers, each of which is represented by from one to three judges. There are three tribunals of original jurisdiction (first instance), one each at Cairo, Alexandria and Mansura, and a Court of Appeals at Alexandria. The United States is represented in these courts by the following judges:

Court of Appeals.—Somerville P. Tuck, of New York (appointed 1908; appointed to Court of First Instance 1894).

Court of First Instance.—William G. Van Horne, of Utah (appointed 1902); Pierre Crabités, of Louisiana (appointed 1911).

# The Panama Canal.

THE present composition of the Isthmian Canal Commission is as follows:

Chairman and Chief Engineer, Col. George W. Goethals; Assistant Chief Engineer, Col. H. F. Hodges; assistant to the Chief Engineer, Civil Engineer H. H. Rousseau, U. S. N.; Division Engineer, Central Division, Lieut.-Col. D. D. Gaillard; Division Engineer, Atlantic Division, Lieut.-Col. William L. Sibert; Chief Sanitary Officer, Col. W. C. Gorgas; Head of the Department of [redacted] Administration, Richard L. Metcalfe. The members of the Commission receive salaries of $14,000 per annum, except the Chairman, who receives $15,000. Major F. C. Boggs, Chief of Office, Washington, D. C.

The Canal has a summit elevation of 85 feet above the sea. It is about 50 miles in length from deep water in the Caribbean Sea to deep water in the Pacific Ocean. The distance from deep water to the shore line in Limon Bay is about 4½ miles, and from the Pacific shore line to deep water is about 4 miles; hence the length of the Canal from shore to shore is approximately 41½ miles. The channel ranges in width from 300 to 1,000 feet. The average bottom width of the channel in this project is 649 feet, and the minimum width is 300 feet. The Canal has a minimum depth of 41 feet. It is estimated that the time required for the passage of a ship of medium size through the entire length of the Canal will be from 9½ to 10 hours, and for larger vessels from 10½ to 11 hours.

The Gatun dam along the crest is 8,000 feet long, including the spillway, or about 1½ miles, and 2,100 feet wide at its greatest width. The crest of the dam is at an elevation of 115 feet above sea level, or 30 feet above the normal level of Gatun Lake, and 100 feet wide. The width of the dam at the normal water level of the lake, *i. e.*, 85 feet above sea level, is about 388 feet.

The cost estimated by the present commission for completing the Canal is $325,201,000, which includes $20,053,000 for sanitation and $7,382,000 for civil administration.

These figures do not include the $50,000,000 paid to the New French Canal Company and to the Republic of Panama for property and franchises. Hence, it is estimated that the total cost of the Canal to the United States will approximate $375,000,000.

The date set for the official opening of the Panama Canal is January 1, 1915, although the Canal is expected to be open to light craft in 1914. Shipping interests will be advised as soon as the commission feels assured that vessels can be passed without unnecessary delay.

Appropriations and expenditures to December 31, 1912:

Receipts and Expenditures—Appropriations by Congress, $322,541,468; fortifications, March 4, 1911, $3,000,000; August 24, 1912, $2,806,950; private acts for relief of individuals, $9,980. Total credited by United States Treasury to December 31, 1912, $328,358,398; miscellaneous, $7,888,317; total receipts, $336,246,715. Disbursements—Including classified expenditures, $294,189,776; balance available December 31, 1912, $42,056,939; total, $336,246,715.

Distances from New York to San Francisco by water, present route, 13,400 miles; via Panama Canal, 5,300 miles. New York to Hawaii, present all-water route, 12,800 miles; by Canal, 7,000 miles. New York to Manila via Hawaii, now 17,800 miles; by Canal, 12,000 miles.

From New York to all American Pacific ports north of Panama there will be a uniform reduction of 8,415 miles and to such ports south of Panama a uniform reduction of about 5,000 miles. The corresponding reductions from Liverpool and Antwerp will be about 6,000 and 2,600, respectively. From Hamburg to San Francisco the reduction will be 6,200 miles.

Between New York and Yokohama the reduction will be 3,729 miles, and that Japanese city will be brought nearer to New York than Liverpool by 1,805 miles. Shanghai will be 1,629 miles nearer to New York. Sydney, Australia, will be 3,806 miles nearer to New York, and the distance between the two cities will be 2,382 miles less than the distance between Sydney and Liverpool. Wellington, New Zealand, will be 2,542 miles nearer New York, and the distance between them will be 2,759 miles less than between Wellington and Liverpool. Between New Zealand and Europe there will be an average saving of 1,600 miles. British ships which now pass through the Suez Canal on their way to China and Japan and thence to Vancouver, Seattle, and San Francisco, will return to their home ports by way of the Panama Canal when return cargoes can be obtained in those cities. Ships from Japan, China, Australia, New Zealand and from Pacific ports of South America will sail to New York via the new waterway.—(From United States Consul Report.)

## PANAMA CANAL TOLL RATES.

### A PROCLAMATION BY THE PRESIDENT OF THE UNITED STATES.

I, William Howard Taft, President of the United States of America, by virtue of the power and authority vested in me by the act of Congress, approved August 24, 1912, to provide for the opening, maintenance, protection and operation of the Panama Canal and the sanitation and government of the Canal zone, do hereby prescribe and proclaim the following rates of toll to be paid by vessels using the Panama Canal:

1. On merchant vessels carrying passengers or cargo one dollar and twenty cents ($1.20) per net vessel ton—each one hundred (100) cubic feet—of actual earning capacity.
2. On vessels in ballast without passengers or cargo forty (40) per cent. less than the rate of tolls for vessels with passengers or cargo.
3. Upon naval vessels, other than transports, colliers, hospital ships and supply ships, fifty (50) cents per displacement ton.
4. Upon Army and Navy transports, colliers, hospital ships and supply ships one dollar and twenty cents ($1.20) per net ton, the vessels to be measured by the same rules as are employed in determining the net tonnage of merchant vessels.

The Secretary of War will prepare and prescribe such rules for the measurement of vessels and such regulations as may be necessary and proper to carry this proclamation into full force and effect.

Washington, D. C., November 14, 1912.

## FORTIFICATION OF THE PANAMA CANAL.

Chapter 285 of the Statutes of the Sixty-first Congress, third session, "An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1912, and for other purposes," approved March 4, 1911, contained the following appropriations for the fortification of the Isthmian Canal:

"For construction of sea-coast batteries on the Canal zone, two million dollars;

"For the purchase, manufacture and test of sea-coast cannon for coast defence, including their carriages, sights, implements, equipments and machinery necessary for the manufacture at the arsenals (to cost ultimately not to exceed one million, nine hundred and sixty-six thousand dollars), one million dollars, the same to be immediately available and to continue available until expended."

Public Law No. 302—An act making appropriations for Sundry Civil Expenses of the Government for the fiscal year ending June 30, 1913, and for other purposes, approved August 24, 1912, contained the following appropriations for the fortification of the Isthmian Canal.

For the following for fortifications and armament thereof for the Isthmian Canal, to be immediately available and to continue available until expended, namely:

THE PANAMA CANAL—*Continued.*

Surveys—For detailed surveys of the areas on the Canal zone required for military purposes, including the cost of marking permanently the boundaries of such areas, $50,000;

Causeway—For the construction of a causeway or bridge for use in connection with fortifications, Isthmian Canal, $150,000;

Seacoast Batteries—For construction of seacoast batteries on the Canal zone, $1,000,000, and any balances of the appropriation for the construction of seacoast batteries on the Canal zone made by the act of March 4, 1911.

Submarine Mine Structures—For the construction of mining casemates, cable galleries, torpedo storehouses, cable tanks and other structures necessary for the operation, preservation and care of submarine mines and their accessories on the Canal zone, $220,200;

Field Fortifications and Camps—For the construction of field fortifications and the preparation of camp sites on the Canal zone, $200,000;

Armament of Fortifications—For the purchase, manufacture and test of seacoast cannon for coast defence, including their carriages, sights, implements, equipments and the machinery necessary for the manufacture at the arsenals (to cost ultimately not to exceed $2,324,000), $500,000;

For the purchase, manufacture and test of ammunition for seacoast cannon, including the necessary experiments in connection therewith, and the machinery necessary for its manufacture at the arsenals, $575,000;

Submarine Mines—For the purchase of submarine mines and the necessary appliances to operate them for closing the channels leading to the Isthmian Canal, $111,750.

In all, specifically for fortifications and armament thereof for the Isthmian Canal, $2,806,950.

An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1914, and for other purposes.—(Approved June 23, 1913.)

For the following for fortifications and armament thereof for the Panama Canal, to be immediately available and to continue available until expended, namely:

Surveys—For detailed surveys of the areas on the Canal zone required for military purposes, including the cost of marking permanently the boundaries of such areas, $12,000;

Purchase of Land—For the purchase of land on the Canal zone required for military purposes, $50,000;

Seacoast Batteries—For the construction of seacoast batteries on the Canal zone, $2,365,000;

Electric Light and Power Plants—For the purchase and installation of electric light and power plants for the seacoast fortifications on the Canal zone, $173,000;

Searchlights—For the purchase and installation of searchlights for the seacoast fortifications on the Canal zone, $285,000;

Sanitary Clearing—For sanitary clearing, filling and drainage in vicinity of camps, posts, and defensive works on the Canal zone, as follows:

Margarita Island—For filling swamp in rear defensive works, $180,000; for clearing and improving permanent post site and drill ground at Miraflores, $30,000;

Armament of Fortifications—For the purchase, manufacture, and test of seacoast cannon for coast defence, including their carriages, sights, implements, equipments, and the machinery necessary for their manufacture at the arsenals (to cost ultimately not to exceed $2,506,000), $1,000,000: *Provided*, That the Chief of Ordnance is authorized to transfer to and use in the fortifications of the Panama Canal one sixteen-inch gun and carriage, procured, or to be procured, out of appropriations heretofore made under armament of fortifications for Continental United States;

For the purchase, manufacture, and test of ammunition for seacoast cannon, including the necessary experiments in connection therewith, and the machinery necessary for its manufacture at the arsenals, $575,000;

Fire Control—For the construction of fire-control stations and the purchase and installation of accessories therefor, $200,000;

In all, specifically for fortifications and armament thereof for the Panama Canal, $4,870,000.

The Secretary of War is authorized and directed to cause to be prepared and submit to Congress on or before December 15, 1913, complete plans for, and detailed estimates of, barracks and quarters for the mobile army and seacoast artillery on the Canal zone and in the Hawaiian Islands.

# The Panama Canal Act of 1912.

## PROVISION FOR THE PERMANENT GOVERNMENT OF THE CANAL ZONE AND EXEMPTION OF COASTWISE VESSELS FROM TOLLS.

THE Sixty-second Congress, Second Session, passed "An act to provide for the opening, maintenance, protection and operation of the Panama Canal and for the sanitation and government of the Canal zone," which was approved August 24, 1912, and is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the zone of land and land under water of the width of ten miles extending to the distance of five miles on each side of the centre line of the route of the canal now being constructed thereon, which zone begins in the Caribbean Sea three marine miles from mean low-water mark and extends to and across the Isthmus of Panama into the Pacific Ocean to the distance of three marine miles from mean low-water mark, excluding therefrom the cities of Panama and Colon and their adjacent harbors located within said zone, as excepted in the treaty with the Republic of Panama dated November 18, 1903, but including all islands within said described zone, and in addition thereto the group of islands in the Bay of Panama named Perico, Naos, Culebra and Flamenco, and any lands and waters outside of said limits above described which are necessary or convenient or from time to time may become necessary or convenient for the construction, maintenance, operation, sanitation, or protection of the said canal or of any auxiliary canals, lakes, or other works necessary or convenient for the construction, maintenance, operation, sanitation, or protection of said canal, the use, occupancy, or control whereof were granted to the United States by the treaty between the United States and the Republic of Panama, the ratifications of which were exchanged February 26, 1904, shall be known and designated as the Canal zone, and the canal now being constructed thereon shall hereafter be known and designated as the Panama Canal. The President is authorized, by treaty with the Republic of Panama, to acquire any additional land or land under water not already granted, or which was excepted from the grant, that he may deem necessary for the operation, maintenance, sanitation, or protection of the Panama Canal, and to exchange any land or land under water not deemed necessary for such purposes for other land or land under water which may be deemed necessary for such purposes, which additional land or land under water so acquired shall become part of the Canal zone.

Sec. 2. That all laws, orders, regulations, and ordinances adopted and promulgated in the Canal zone by order of the President for the government and sanitation of the Canal zone and the construction of the Panama Canal are hereby ratified and confirmed as valid and binding until

THE PANAMA CANAL ACT OF 1912—*Continued.*

Congress shall otherwise provide. The existing courts established in the Canal zone by Executive order are recognized and confirmed to continue in operation until the courts provided for in this act shall be established.

Sec. 3. That the President is authorized to declare by Executive order that all land and land under water within the limits of the Canal zone is necessary for the construction, maintenance, operation, sanitation, or protection of the Panama Canal, and to extinguish, by agreement when advisable, all claims and titles of adverse claimants and occupants. Upon failure to secure by agreement title to any such parcel of land or land under water the adverse claim or occupancy shall be disposed of and title thereto secured in the United States and compensation therefor fixed and paid in the manner provided in the aforesaid treaty with the Republic of Panama, or such modification of such treaty as may hereafter be made.

A PERMANENT GOVERNMENT FOR THE CANAL ZONE.

Sec. 4. That when in the judgment of the President the construction of the Panama Canal shall be sufficiently advanced toward completion to render the further services of the Isthmian Canal Commission unnecessary the President is authorized by Executive order to discontinue the Isthmian Canal Commission, which, together with the present organization, shall then cease to exist; and the President is authorized thereafter to complete, govern, and operate the Panama Canal and govern the Canal zone, or cause them to be completed, governed and operated, through a Governor of the Panama Canal and such other persons as he may deem competent to discharge the various duties connected with the completion, care, maintenance, sanitation, operation, government, and protection of the canal and Canal zone. If any of the persons appointed or employed as aforesaid shall be persons in the military or naval service of the United States, the amount of the official salary paid to any such person shall be deducted from the amount of salary or compensation provided by or which shall be fixed under the terms of this act. The Governor of the Panama Canal shall be appointed by the President, by and with the advice and consent of the Senate, commissioned for a term of four years, and until his successor shall be appointed and qualified. He shall receive a salary of ten thousand dollars a year. All other persons necessary for the completion, care, management, maintenance, sanitation, government, operation, and protection of the Panama Canal and Canal zone shall be appointed by the President, or by his authority, removable at his pleasure, and the compensation of such persons shall be fixed by the President, or by his authority, until such time as Congress may by law regulate the same, but salaries or compensation fixed hereunder by the President shall in no instance exceed by more than twenty-five per centum the salary or compensation paid for the same or similar services to persons employed by the Government in Continental United States. That upon the completion of the Panama Canal the President shall cause the same to be officially and formally opened for use and operation.

Before the completion of the canal, the Commission of Arts may make report to the President of their recommendation regarding the artistic character of the structures of the canal, such report to be transmitted to Congress.

NO TOLLS ON AMERICAN COASTWISE VESSELS.

Sec. 5. That the President is hereby authorized to prescribe and from time to time change the tolls that shall be levied by the Government of the United States for the use of the Panama Canal: Provided, That no tolls, when prescribed as above, shall be changed, unless six months' notice thereof shall have been given by the President by proclamation. No tolls shall be levied upon vessels engaged in the coastwise trade of the United States. That section forty-one hundred and thirty-two of the Revised Statutes is hereby amended to read as follows:

"Sec. 4132. Vessels built within the United States and belonging wholly to citizens thereof; and vessels which may be captured in war by citizens of the United States and lawfully condemned as prize, or which may be adjudged to be forfeited for a breach of the laws of the United States; and seagoing vessels, whether steam or sail, which have been certified by the Steamboat Inspection Service as safe to carry dry and perishable cargo, not more than five years old at the time they apply for registry, wherever built, which are to engage only in trade with foreign countries or with the Philippine Islands and the islands of Guam and Tutuila, being wholly owned by citizens of the United States or corporations organized and chartered under the laws of the United States or of any State thereof, the President and managing directors of which shall be citizens of the United States or corporations organized and chartered under the laws of the United States or of any State thereof, the President and managing directors of which shall be citizens of the United States, and no others, may be registered as directed in this title. Foreign-built vessels registered pursuant to this act shall not engage in the coastwise trade: Provided, That a foreign-built yacht, pleasure boat, or vessel not used or intended to be used for trade admitted to American registry pursuant to this section shall not be exempt from the collection of ad valorem duty provided in section thirty-seven of the act approved August 5, 1909, entitled 'An act to provide revenue, equalize duties, and encourage the industries of the United States, and for other purposes.' That all materials of foreign production which may be necessary for the construction or repair of vessels built in the United States and all such materials necessary for the building or repair of their machinery and all articles necessary for their outfit and equipment may be imported into the United States free of duty under such regulations as the Secretary of the Treasury may prescribe: Provided further, That such vessels so admitted under the provisions of this section may contract with the Postmaster-General under the act of March 3, 1891, entitled 'An act to provide for ocean mail service between the United States and foreign ports, and to promote commerce,' so long as such vessels shall in all respects comply with the provisions and requirements of said act."

Tolls may be based upon gross or net registered tonnage, displacement tonnage, or otherwise, and may be based on one form of tonnage for warships and another for ships of commerce. The rate of tolls may be lower upon vessels in ballast than upon vessels carrying passengers or cargo. When based upon net registered tonnage for ships of commerce the tolls shall not exceed one dollar and twenty-five cents per net registered ton, nor be less, other than for vessels of the United States and its citizens, than the estimated proportionate cost of the actual maintenance and operation of the canal, subject, however, to the provisions of article nineteen of the convention between the United States and the Republic of Panama, entered into November 18, 1903. If the tolls shall not be based upon net registered tonnage, they shall not exceed the equivalent of one dollar and twenty-five cents per net registered ton as nearly as the same may be determined, nor be less than the equivalent of seventy-five cents per net registered ton. The toll for each passenger shall not be more than one dollar and fifty cents. The President is authorized to make and from time to time amend regulations governing the operation of the Panama Canal, and the passage and control of vessels through the same or any part thereof, including the locks and approaches thereto, and all rules and regulations affecting pilots and pilotage in the canal or the approaches thereto through the adjacent waters.

Such regulations shall provide for prompt adjustment by agreement and immediate payment of claims for damages which may arise from injury to vessels, cargo, or passengers from the passing of vessels through the locks under the control of those operating them under such rules and regu-

THE PANAMA CANAL ACT OF 1912—*Continued.*

lations. In case of disagreement suit may be brought in the district court of the Canal zone against the Governor of the Panama Canal. The hearing and disposition of such cases shall be expedited and the judgment shall be immediately paid out of any moneys appropriated or allotted for canal operation.

The remainder of the section provides for the method of adjusting all claims arising out of injuries to employés.

Section 6 provides for radio-communication at suitable places along the Panama Canal and adjacent coasts and for the establishment and maintenance of dry docks, repair shops, warehouses, etc., for the use of the vessels using the canal.

DUTIES OF THE GOVERNOR OF THE PANAMA CANAL.

Sec. 7. That the Governor of the Panama Canal shall, in connection with the operation of such canal, have official control and jurisdiction over the Canal zone and shall perform all duties in connection with the civil government of the Canal zone, which is to be held, treated and governed as an adjunct of such Panama Canal. Unless in this act otherwise provided, all existing laws of the Canal zone referring to the civil Governor or the civil administration of the Canal zone shall be applicable to the Governor of the Panama Canal, who shall perform all such executive and administrative duties required by existing law. The President is authorized to determine or cause to be determined what towns shall exist in the Canal zone and subdivide and from time to time resubdivide said Canal zone into subdivisions, to be designated by name or number, so that there shall be situated one town in each subdivision, and the boundaries of each subdivision shall be clearly defined. In each town there shall be a magistrate's court with exclusive original jurisdiction co-extensive with the subdivision in which it is situated of all civil cases in which the principal sum claimed does not exceed three hundred dollars, and all criminal cases wherein the punishment that may be imposed shall not exceed a fine of one hundred dollars, or imprisonment not exceeding thirty days, or both, and all violations of police regulations and ordinances and all actions involving possession or title to personal property or the forcible entry and detainer or real estate. Such magistrates shall also hold preliminary investigations in charges of felony and offences under section ten of this act, and commit or bail in bailable cases to the district court. A sufficient number of magistrates and constables, who must be citizens of the United States, to conduct the business of such courts, shall be appointed by the Governor of the Panama Canal for terms of four years and until their successors are appointed and qualified, and the compensation of such persons shall be fixed by the President, or by his authority, until such time as Congress may by law regulate the same. The rules governing said courts and prescribing the duties of said magistrates and constables, oaths and bonds, the times and places of holding such courts, the disposition of fines, costs, forfeitures, enforcements of judgments, providing for appeals therefrom to the district court, and the disposition treatment, and pardon of convicts shall be established by order of the President. The Governor of the Panama Canal shall appoint all notaries public, prescribe their powers and duties, their official seal, and the fees to be charged and collected by them.

Sections 8, 9 and 10 provide for a judiciary for the Canal zone, and prescribe its duties, and Section 11 provides for jurisdiction by the Interstate Commerce Commission in matters of competition by common carriers through the canals involving disputes as to facts. The remaining sections of the act are as follows:

EXTRADITION.

Sec. 12. That all laws and treaties relating to the extradition of persons accused of crime in force in the United States, to the extent that they may not be in conflict with or superseded by any special treaty entered into between the United States and the Republic of Panama with respect to the Canal zone, and all laws relating to the rendition of fugitives from justice as between the several States and Territories of the United States, shall extend to and be considered in force in the Canal zone, and for such purposes and such purposes only the Canal zone shall be considered and treated as an organized Territory of the United States.

THE CANAL IN TIME OF WAR.

Sec. 13. That in time of war in which the United States shall be engaged, or when, in the opinion of the President, war is imminent, such officer of the army as the President may designate shall, upon the order of the President, assume and have exclusive authority and jurisdiction over the operation of the Panama Canal and all of its adjuncts, appendants, and appurtenances, including the entire control and government of the Canal zone, and during a continuance of such condition the Governor of the Panama Canal shall, in all respects and particulars as to the operation of such Panama Canal, and all duties, matters, and transactions affecting the Canal zone, be subject to the order and direction of such officer of the army.

Sec. 14. That this act shall be known as, and referred to as, the Panama Canal act, and the right to alter, amend, or repeal any or all of its provisions or to extend, modify, or annul any rule or regulation made under its authority is expressly reserved.

# America's Twenty Best Customers.

(From American Consular Report.)

THE following table is arranged to show the twenty heaviest buyers of American goods, as indicated by the value of exports from the United States during the fiscal years 1909-10 and 1910-11:

| | 1909–10. | |

# Territorial Expansion of the United States.

THERE have been thirteen additions to the original territory of the Union, including Alaska, the Hawaiian, Philippine, and Samoan Islands and Guam, in the Pacific, and Porto Rico and Pine Islands, in the West Indies, and the Panama Canal zone. The area of the original thirteen States (years 1783-1817) comprised 894,407 square miles.

The additions to the territory of the United States subsequent to the peace treaty with Great Britain of 1783 are shown by the following table:

ADDITIONS TO THE TERRITORY OF THE UNITED STATES FROM 1800 TO 1900.

| TERRITORIAL DIVISION. | Year | Area Added S. Miles | TERRITORIAL DIVISION. | Year | Area Added. S. Miles. | TERRITORIAL DIVISION. | Year | Area Added. S. Miles. |
|---|---|---|---|---|---|---|---|---|
| Louisiana purchase.. | 1803 | 824,607 | Purchase from Texas | .... | ..... | Samoan Islands .. | 1899 | 77 |
| Gained through treaty with Spain | 1819 | 12,732 | Gadsden purchase... | 1853 | 30,022 | Addit'nal Philippines | 1901 | 68 |
| Florida..... | 1819 | 58,666 | Alaska..... | 1867 | 590,884 | Panama Canal Strip.. | 1904 | 474 |
| Texas ..... | 1845 | 389,382 | Hawaiian Islands... | 1898 | 6,449 | Total ..... | .. | 2848,937 |
| Oregon Territory..... | 1846 | 287,430 | Porto Rico..... ... | 1898 | 3,435 | Total United States including original 13 States, 3,743,344 | | |
| Mexican cession..... | 1848 | 529,543 | Guam ..... | 1898 | 210 | | | |
| | | | Philippine Islands... | 1898 | 114,958 | | | |

Payments for above were made by the United States as follows: Louisiana purchase, $15,440,000; Gadsden purchase, $10,000,000; Alaska, $7,200,000; Florida, $5.000,000; Hawaiian Islands, public debt assumed to the amount of $4,000,000.

By treaty of February 2, 1848, a payment of $8,250,000 was made to Mexico in consideration of the extension acquired by the boundaries of the United States, as defined in that treaty.

The treaty of Paris, of December 10, 1898, terminating the Spanish-American war, provided for a money payment to Spain (for relinquishing claim to Porto Rico, Guam and Philippine Islands) of $20,000,000, and a subsequent treaty of November 7, 1900, provided for a further payment of $100,000 for other Philippine Islands.

By the first treaty the Philippine Islands were ceded to the United States, and the later treaty of November 7, 1900, ceded certain outlying islands of the Philippines not included in the first cession.

A payment of $10,000,000 was made to the Republic of Panama under treaty stipulations governing the control of the Panama Canal strip.

No money payments were made upon the acquisition of the other territories mentioned in the list.

---

The United States did not acquire, by the Isthmian Canal Convention of November 18, 1903, any title to territory in the Republic of Panama, but merely a perpetual right of occupation, use, and control of and over a zone of land ten miles in width. For this privilege it paid to the Republic of Panama the sum of $10,000,000, and undertook to pay the sum of $250,000 annually so long as such occupancy continued, such payments beginning on February 26, 1913.

---

# The Territory of Alaska.

THE Sixty-second Congress, Second Session, enacted a law which was approved August 24, 1912, "to create a Legislative Assembly in the Territory of Alaska, to confer legislative power thereon and for other purposes."

The first section provides that "the territory ceded to the United States by Russia by the treaty of March 30, 1867, and known as Alaska, shall be and constitute the Territory of Alaska under the laws of the United States; the government of which shall be organized and administered as provided by said laws.

The second section constitutes the city of Juneau as the capital of the Territory.

By other sections of the act the legislative power and authority of the Territory is vested in a Legislature, to consist of a Senate of eight members (two from each of the four judicial districts into which Alaska is now divided) and a House of Representatives of sixteen members (four from each judicial district). It is provided that the election for members of the first Legislature shall take place the first Tuesday after the first Monday in November, 1912, and subsequent Legislatures shall be elected biennially. The Legislature shall be convened biennially on the first Monday of March and continue in session not longer than sixty days. The veto power is invested in the Governor, but laws vetoed by him may be passed over his veto by a two-third vote of all the members of each House. All laws passed by the Territorial Legislature shall be transmitted by the Governor to the President of the United States and by him submitted to Congress, and if disapproved by Congress, shall be null and void.

The following section of the act creates a Railroad Commission for the Territory:

"Section 18. That an officer of the Engineer Corps of the United States Army, a geologist in charge of Alaska surveys, an officer in the Engineer Corps of the United States Navy, and a civil engineer who has had practical experience in railroad construction and has not been connected with any railroad enterprise in said Territory, be appointed by the President as a commission hereby authorized and instructed to conduct an examination into the transportation question in the Territory of Alaska; to examine railroad routes from the seaboard to the coal fields and to the interior and navigable waterways; to secure surveys and other information with respect to railroads, including cost of construction and operation; to obtain information in respect to the coal fields and their proximity to railroad routes; and to make report of the facts to Congress on or before December 1, 1912, or as soon thereafter as may be practicable, together with their conclusions and recommendations in respect to the best and most available routes for railroads in Alaska which will develop the country and the resources thereof for the use of the people of the United States: Provided further, That the sum of twenty-five thousand dollars, or so much thereof as may be necessary, is hereby appropriated out of any money in the Treasury not otherwise appropriated to defray the expenses of said commission."

# Insular Possessions of the United States.

## THE PHILIPPINES.

THE Philippine group, lying off the southern coast of Asia, extending almost due north and south from Formosa to Borneo and the Moluccas, between longitude 116° 40′ and 126° 34′, and latitude 4° 40′ and 21° 10′ approximately number about 3,141 islands and islets, of which 1,668 are listed by name, while 1,473 are, so far as known, without names. The actual land area is about 115,026 square miles. The six New England States, New York, and New Jersey have about an equal area. The island of Luzon, on which the capital city (Manila) is situated, is the largest, most populous, and wealthiest member of the group, being about the size of the State of New York. Mindanao is nearly as large, but its population is very much smaller. There are two islands with areas exceeding 10,000 square miles each, namely, Luzon with 40,969, and Mindanao with 36,292. There are nine islands each of which has an area of more than 1,000 square miles and less than 10,000. There are twenty between 100 and 1,000 square miles, seventy-three between 10 and 100 square miles, and two hundred and sixty-two between 1 and 10 square miles. The remaining number, 2,775, or seven-eighths of all, have areas less than a square mile each. The areas of the largest islands are: Luzon, 40,969; Mindanao, 36,292; Samar, 5,031; Panay, 4,611; Mindoro, 3,851; Leyte, 2,722; Negros, 4,881; Cebú, 1,762.

The islands with large populations are: Luzon, with 3,798,507 inhabitants, of whom 223,506 are uncivilized; Panay, 743,646 (14,933 uncivilized); Cebú, 592,247 (all civilized); Mindanao, 499,634 (252,940 uncivilized); Negros, 460,776 (21,217 uncivilized); Leyte, 357,641 (all civilized); Bohol, 243,148 (all civilized); Samar, 222,690, (688 uncivilized). The capital of the Archipelago is Manila, with 234,409 inhabitants. Other towns are: In Luzon, Bauan (39,094), Lipa (37,934), Laoag (34,454), Batangas (33,131), San Carlos (27,166), Tabaco (21,946); in Samar, Calbayog (15,895); in Panay, Janiuay (20,738), Miagao (20,656), Iloilo (19,054); in Cebú, Argao (35,448), Cebú (31,079), Barill (31,617), Carcar (31,895), Sibonga (25,848); in Leyte, Baybay (22,990), Ormoc (16,128).

A census of the Philippines was taken by the United States Government in 1903 under the auspices of the Census Office. The population returned was 7,635,426. Of this number almost seven millions are more or less civilized. The wild tribes form about 9 per cent. of the entire population. Racially the inhabitants are principally Malays. The civilized tribes are practically all adherents of the Catholic Church, the religion being that introduced into the country by the Spaniards when they took possession of the islands in 1565. The Church has since then been a strong ruling power and the priesthood is numerous. The Moros are Mohammedans and the other wild peoples have no recognized religious beliefs. The total number of non-Christian peoples is 647,740.

The density of population in the Philippines is 67 per square mile. In Continental United States it is 26 per square mile. Foreigners number about 50,000, of whom nearly three-fourths are Chinese. Exclusive of the army there are 8,135 Americans in the islands, nearly one-half being located in the city of Manila. There are about twenty-five different tribes in the islands, speaking fifteen or sixteen distinct dialects, the largest tribe being the Visayans, who form nearly one-fourth of the entire civilized population (3,219,030). The Tagalogs, occupying the provinces in the vicinity of Manila (1,460,695) rank second in numbers, and the Ilocanos (803,942) the third. Education has been practically reorganized by the Americans. The total annual enrolment is 440,050. One thousand additional primary schools, largely increasing the total enrolment, have been opened during the current year. Seven thousand six hundred and seventy-one teachers are employed, of whom 658 are Americans and 7,013 Filipinos. English is very generally taught, and the next generation of Filipinos will probably speak that tongue. Pauperism is almost unknown in the islands. In 1902 there were only 1,668 paupers maintained at public charge. Vital statistics are as yet restricted to Manila. The death rate in the city of Manila is 24.20 per thousand. The birth rate is 36.51 per thousand. In 1912 there were 70 newspapers and periodicals published in the islands, 19 being in English, 16 in Spanish, 15 in native dialects, 7 in Spanish and English, 11 in Spanish and native dialects, and 2 in Spanish, English, and native dialects. The assessed real estate property value in 1912 was 484,037,327.10 pesos. The reported value of church buildings, mostly Catholic, is 41,698,710 pesos.

The climate is one of the best in the tropics. The islands extend from 5° to 21° north latitude, and Manila is in 14° 35′. The thermometer during July and August rarely goes below 79° or above 85°. The extreme ranges in a year are said to be 61° and 97°, and the annual mean 81°.

### AGRICULTURE.

Although agriculture is the chief occupation of the Filipinos, yet only one-ninth of the surface is under cultivation. The soil is very fertile, and even after deducting the mountainous areas it is probable that the area of cultivation can be very largely extended and that the islands can support population equal to that of Japan (42,000,000).

The chief products are hemp, rice, corn, sugar, tobacco, cocoanuts, and cacao, hemp being the most important commercial product and constituting 43 per cent. of the value of all exports. Coffee and cotton were formerly produced in large quantities—the former for export and the latter for home consumption; but the coffee plant has been almost exterminated by insects and the home-made cotton cloths have been driven out by the competition of those imported from England. The rice and corn are principally produced in Luzon and Mindoro and are consumed in the islands. The cacao is raised in the southern islands, the best quality of it at Mindanao. The sugar cane is raised in the Visayas. The hemp is produced in Southern Luzon, Mindoro, the Visayas, and Mindanao. It is nearly all exported in bales. Tobacco is raised in many of the islands, especially Luzon and Negros.

### IMPORTS AND EXPORTS.

In the year ending June 30, 1913, the exports of domestic merchandise from the United States to the Philippines were $25,360,646, and the total imports from the Philippines for the same period were $21,010,248.

The imports of merchandise from foreign countries, year ending June 30, 1913, were $30,948,498, and the exports were $33,834,438. The principal foreign countries trading with the Philippines are Great Britain, French East Indies, China, and Spain.

### CIVIL GOVERNMENT OF THE PHILIPPINES.

On July 1, 1902, Congress passed (chapter 1369) "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands and for other purposes." Under this act complete civil government was established in the Archipelago, except that portion inhabited by Moros, comprising part of Mindanao and the Sulu Islands, and the office of Military Governor was terminated. Wm. H. Taft was appointed Civil Governor by the President, the title being subsequently changed to that of Governor-General. Governor Taft was succeeded by Luke E. Wright in Dec., 1903, by Henry Clay Ide in 1905, James F. Smith in 1906, W. Cameron Forbes

in 1909, and Francis Burton Harrison in 1913. The government was composed of a Civil Governor and seven commissioners, of whom four were Americans and three Filipinos. By act of Congress approved May 11, 1908, the commission was increased by one member, to be appointed by the President, making the commission nine members in all, including the Governor-General, who is President of the Philippine Commission. There are four executive departments—Interior, Finance, and Justice, Commerce and Police, and Public Instruction. There are thirty-eight provinces, each with a Governor, a Treasurer, and prosecuting attorney (provincial fiscal). Local governments have been established in about 725 towns. The officials consist of a President, Vice-President, and Councilmen (the latter varying in number according to the population) and are elected by the qualified voters of the municipality and serve for four years. The Judiciary consists of a Supreme Court, with seven Judges; Courts of First Instance, Justice of the Peace Courts, and a Court of Land Registration. There are seventeen Judicial Districts. In each province there is a Court of First Instance and a Court of the Justice of the Peace in each organized municipality in every province where there is a Court of First Instance. In March, 1907, the President in accordance with the act of Congress, directed the Commission to call a general election of delegates to a Philippine Assembly. The new Assembly was chosen July 30, and was opened October 16 by Secretary of War Taft. It was politically divided as follows: Nacionalists, 31; Progresistas, 16; Independents, 20; Immediatistas, 7; Independistas, 4; Nacional Independiente, 1; Catolico, 1. The total vote recorded at the election for delegates was 104,000, which is only 1.4 per cent. of the population. The second election was held on November 2, 1909. The number of persons registered was 208,845 and the number of votes cast 192,975, which is 2.81 per cent. of the population. The third election was held on June 4, 1912. Incomplete returns showed 248,154 registered voters and 235,786 votes cast. By act of February 15, 1911, the members of the Philippine Assembly are elected for four years from the 16th day of October following their election, and the resident commissioners for four years, their term of office beginning on March 4 following their election. The next election will take place about June 1, 1916. At the first session of the Sixty-first Congress an act was passed and approved August 5, 1909, readjusting the customs duties on imports from all countries, including the United States, on the basis generally of reductions. By act of Congress approved March 23, 1912, section four of the act of Congress approved July 1, 1902, entitled "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes," was amended to read as follows:—"That all inhabitants of the Philippine Islands continuing to reside therein who were Spanish subjects on the eleventh day of April, eighteen hundred and ninety-nine, and then resided in said islands, and their children born subsequent thereto, shall be deemed and held to be citizens of the Philippine Islands and as such entitled to the protection of the United States, except such as shall have elected to preserve their allegiance to the Crown of Spain in accordance with the provisions of the treaty of peace between the United States and Spain, signed at Paris, December tenth, eighteen hundred and ninety-eight: *Provided*, That the Philippine Legislature is hereby authorized to provide by law for the acquisition of Philippine citizenship by those natives of the Philippine Islands who do not come within the foregoing provisions, the natives of other insular possessions of the United States, and such other persons residing in the Philippine Islands who could become citizens of the United States, under the laws of the United States if residing therein."

The Philippine Constabulary, which is distributed throughout the Archipelago in 119 stations, consists of 323 officers and 4,157 enlisted men.

There are in operation 587 post-offices, free delivery municipal letter-carrier service in 397 municipalities, 253 money-order offices, and 437 postal-savings banks, with 35,802 accounts. Of the 35,751 depositors, 29,555 are Filipinos.

The total kilometreage of telegraph and cable lines on June 30, 1912, was 9,010.84, and the number of telegraph offices 267. There are also four wireless stations operated. The total kilometreage of railroads in operation is 1,014.3.

Of the legislation enacted by the legislative authority in the islands during the last two years might be mentioned that fixing the gold-standard fund at a sum equal to 35 per cent. of the money of the Government of the Philippine Islands in circulation and available for that purpose, exclusive of the silver certificates in circulation protected by gold reserve; that providing for the apportionment between the insular, provincial and municipal governments of taxes paid by grantees of franchises; that embodying certain provisions concerning the building and operation of railroads, and that providing for the establishment of an irrigation system.

## PORTO RICO.

The island of Porto Rico, over which the flag of the United States was raised in token of formal possession on October 18, 1898, is the most eastern of the Greater Antilles in the West Indies and is separated on the east from the Danish island of St. Thomas by a distance of about fifty miles, and from Hayti on the west by the Mona passage, seventy miles wide. Distances from San Juan, the capital, to important points are as follows: New York, 1,411 miles; Charleston, S. C., 1,200 miles; Key West, Fla., 1,050 miles; Havana, 1,000 miles.

The island is a parallelogram in general outline, 108 miles from the east to the west, and from 37 to 43 miles across, the area being about 3,600 square miles, or somewhat less than half that of the State of New Jersey (Delaware has 2,050 square miles and Connecticut 4,990 square miles). The population according to an enumeration made by the United States Government in 1900 showed a population of 953,243, of whom 589,426 are white and 363,817 are colored. The density was 260 to the square mile in 1900; 83.2 per cent. of the population could not read. The population in 1910 is reported as 1,118,012.

Porto Rico is unusually fertile, and its dominant industries are agriculture and lumbering. In elevated regions the vegetation of the temperate zone is not unknown. There are more than 500 varieties of trees found in the forests, and the plains are full of palm, orange, and other trees. The principal crops are sugar, coffee, tobacco, and maize, but oranges, bananas, rice, pineapples, and many other fruits are important products. The largest article of export from Porto Rico is sugar. The next is tobacco. Other exports in order of amount are coffee, fruits, molasses, cattle, timber, and hides.

The principal minerals found in Porto Rico are gold, carbonates, and sulphides of copper and magnetic oxide of iron in large quantities. Lignite is found at Utuado and Moca, and also yellow amber. A large variety of marbles, limestones, and other building stones are deposited on the island, but these resources are very undeveloped. There are salt works at Guanica and Salina on the south coast, and at Cape Rojo on the west, and these constitute the principal mineral industry in Porto Rico.

The principal cities are Mayaguez, with 16,939, Ponce, 35,027 inhabitants; and San Juan, the capital, with 48,716. The shipments of domestic merchandise from the United States to Porto Rico, year ending June 30, 1913, were $32,223,191. The exports of domestic merchandise to the

United States were $40,529,665. The foreign trade, year ending June 30, 1913, was: Imports, $3,745,057; exports, $8,564,942.

An act providing for a civil government for Porto Rico was passed by the Fifty-sixth Congress and received the assent of the President April 12, 1900. A statement of its provisions was printed in THE WORLD ALMANAC for 1901, pages 92 and 93. President Roosevelt in his message to Congress in December, 1906, recommended the granting of United States citizenship to the Porto Ricans, and a bill was introduced in the Sixty-second Congress providing for the same, but failed to reach a final vote.

Under this act a civil government was established, which went into effect May 1, 1900. There are two legislative chambers, the Executive Council, or "upper house," composed of the Government Secretary, Attorney-General, Treasurer, Auditor, Commissioner of the Interior, and Commissioner of Education, and five citizens appointed by the President, and the House of Delegates, or "lower house," consisting of 35 members, elected by the people. The island is represented in the Congress of the United States by a Resident Commissioner.

The Legislature of 1912 enacted a sanitation law establishing an insular board of health, and a general sanitary organization, provided a bureau of labor, and authorized investment by the treasurer of $200,000 in first mortgage bonds of a corporation to be organized for the construction of a modern hotel in San Juan. It also authorized a bond issue of $500,000 in connection with port improvements at San Juan. The Legislature of 1913 provided for the retirement on ¾ pay of the Justices of the Supreme Court of the island after ten years' service, and upon reaching 65 years of age, and ordered the establishment of an insular hospital in each of the seven districts in which the island is divided, for those suffering from transmissible and contagious diseases.

## GUAM.

The island of Guam, the largest of the Mariana Archipelago, was ceded by Spain to the United States by Article 2 of the Treaty of Peace, concluded at Paris December 10, 1898. It lies in a direct line from San Francisco to the southern part of the Philippines, and is 5,044 miles from San Francisco and 1,506 miles from Manila. It is about 30 miles long and 100 miles in circumference, and has a population of 12,517. The inhabitants are mostly immigrants or descendants of immigrants from the Philippines, the original race of the Mariana Islands being nearly extinct. The prevailing language is English. Spanish and Chamorro are also spoken. Nine-tenths of the islanders can read and write. The island is thickly wooded, well watered, and fertile, and possesses an excellent harbor. The productions are tropical fruits, cacao, rice, corn, tobacco, and sugar cane. The island of Guam was discovered by Hernando de Magallanes on March 6, 1521.

The island was captured by the U. S. S. Charleston, Captain Henry Glass commanding, June 21, 1898, the American flag raised over Fort Santa Cruz, and a salute fired. Later the island was made a naval station, and Commander E. D. Taussig, of the U. S. S. Bennington, took possession February 1, 1899. The Governor is a naval officer, and the island has a marine garrison as well as a station ship.

During the year ending June 30, 1911, the imports, general cargo, were as follows: From United States, $28,112.69; Hawaiian Islands, $17,406.16, Philippines, $815.71; Japan, $89,469.07; Saipan, $3,115.76; Great Britain, $1,088.86; Germany, $197.83; total imports, $140,326.08. Exports, all copra, to Japan, $51,058.80.

## TUTUILA (AMERICAN SAMOA).

Tutuila, the Samoan island which, with its attendant islets of Manu'a, Olosega, Ofu, Aunun and Rose, became a possession of the United States by virtue of the tri-partite treaty with Great Britain and Germany in 1899, covers, according to the Bureau of Statistics of the Department of Commerce and Labor, fifty-five square miles, and has (by census of February 1, 1912) 7,251 inhabitants. It possesses the most valuable island harbor, Pago-Pago, in the South Pacific, and perhaps in the entire Pacific Ocean. Commercially the island is unimportant at present, but is extremely valuable in its relations to the commerce of any nation desiring to cultivate trans-Pacific commerce.

Ex-Chief Justice Chambers, of Samoa, says of Pago-Pago that "The harbor could hold the entire naval force of the United States, and is so perfectly arranged that only two vessels can enter at the same time. The coaling station, being surrounded by high bluffs, cannot be reached by shells from outside." Capacity of coaling station, 4,200 tons.

The Samoan Islands, in the South Pacific, are fourteen in number, and lie in a direct line drawn from San Francisco to Auckland, New Zealand. Tutuila is 4,160 miles from San Francisco, 2,263 miles from Hawaii, 1,580 miles from Auckland, 2,354 miles from Sydney, and 4,200 miles from Manila. Germany governs all the group except the part owned by the United States. The inhabitants are native Polynesians and Christians of different denominations.

The civil government is administered by a Governor, a naval officer nominated by the Navy Department and appointed by the President. All civil affairs are under the jurisdiction of the Navy Department.

## WAKE AND OTHER ISLANDS.

The United States flag was hoisted over Wake Island in January, 1899, by Commander Taussig, of the Bennington, while proceeding to Guam. It is a small island in the direct route from Hawaii to Hongkong, about 2,000 miles from the first and 3,000 miles from the second.

The United States possesses a number of scattered small islands in the Pacific Ocean, some hardly more than rocks or coral reefs, over which the flag has been hoisted from time to time. They are of little present value and mostly uninhabited. The largest are Christmas, Gallego, Starbuck, Penrhyn, Phœnix, Palmyra, Howland, Baker, Johnston, Gardner, Midway, Morell, and Marcus islands. The Midway Islands are occupied by a colony of telegraphers in charge of the relay in the cable line connecting the Philippines with the United States, in all about forty persons.

The Santa Barbara group is a part of California and the Aleutian chain, extending from the peninsular of Kamchatka in Asiatic Russia to the promontory in North America which separates Behring Sea from the North Pacific, a part of Alaska.

## HAWAII.

Hawaii was annexed to the United States by joint resolution of Congress July 7, 1898. A bill to create Hawaii a Territory of the United States was passed by Congress and approved April 30, 1900.

The area of the several islands of the Hawaiian group is as follows: Hawaii, 4,210 square miles; Maui, 760; Oahu, 600; Kauai, 590; Molokai, 270; Lanai, 150; Niihau, 97; Kahoolawe, 63. Total, 6,740 square miles.

At the time of the discovery of the islands by Captain Cook in 1778 the native population was about 200,000. This has steadily decreased, so that at the census of 1910 the native born numbered but 98,157. Total foreign born (1910), 93,752.

The first United States census of the islands was taken in 1900 with the following result: Hawaii

INSULAR POSSESIONS OF THE UNITED STATES.—*Continued.*

Island, 46,843; Kauai Island, 20,562; Niihau Island, 172; Maui Island, 25,416; Molokai Island and Lanai Island, 2,504; Oahu Island, 58,504. Total of the Territory, 154,001. The population of the city of Honolulu was 39,306. The population of Hawaii according to the 1910 census, made by the United States Census Bureau, was 191,909, Honolulu City having a population of 52,183.

POPULATION OF HAWAII, BY ISLANDS, 1910.

The exports from Hawaii to the United States in the twelve months ending June 30, 1913, were valued at $42,652,462. The imports into Hawaii from the United States for the same period were valued at $30,411,899. The imports from foreign countries for the same period were $6,873,531, exports $758,656.

The new Territorial Government was inaugurated at Honolulu June 14, 1900, and the first Territorial Legislature began its sessions at Honolulu February 20, 1901. The Legislature is composed of two houses—the Senate of fifteen members, holding office four years, and the House of Representatives of thirty members, holding office two years. The Legislature meets biennially, and sessions are limited to sixty days.

The executive power is lodged in a Governor, a Secretary, both appointed by the President, and hold office four years, and the following officials appointed by the Governor, by and with the consent of the Senate of Hawaii. An Attorney-General, Treasurer, Commissioner of Public Lands, Commissioner of Agriculture and Forestry, Superintendent of Public Works, Superintendent of Public Instruction, Auditor and Deputy, Surveyor, High Sheriff, and members of the Boards of Health, Public Instruction, Prison Inspectors, etc. They hold office for four years, and must be citizens of Hawaii.

The Judiciary of the Territory is composed of the Supreme Court, with three Judges, the Circuit Court, and such inferior courts as the Legislature may establish. The Judges are appointed by the President. The Territory is a Federal Judicial District, with a District Judge, District-Attorney, and Marshal, all appointed by the President. The District Judge has all the powers of a Circuit Judge.

The Territory is represented in Congress by a delegate, who is elected biennially by the people.

Provision is made in the act creating the Territory for the residence of Chinese in the Territory, and prohibition as laborers to enter the United States.

The imports and exports aggregated $84,143,760 during the fiscal year 1912 and have increased 172 per cent. since the first year of Territorial Government. Receipts of the Territorial Government greatly exceeded the expenditures, notwithstanding large increases in the latter for public schools, public health and other matters. The assessed value of property increased 14.4 per cent. and commercial deposits 23.10 per cent. During the fiscal year 1912, 483 homesteads or more than twice as many as for any preceding year were taken. About four million dollars will be available during the present biennial period for the building of roads, water and sewer works, wharves and harbors, public school and other public buildings and the reclamation of wet lands in several towns. There was an increase 31.49 per cent. over the preceding year in the expenditures for public schools and of nearly 4,000 in attendance. Pearl Harbor channel has been completed and the harbor was entered for the first time by a large war vessel, the California. The Territorial indebtedness on June 30, 1912, was $5,454,000.

# Duration of Sunshine on United States Territory.

The acquisition of Porto Rico, the Sandwich and Philippine Islands, and a portion of the Navigator or Samoan Group has very considerably affected the duration of continuous sunshine on our territory. The mathematical discussion of this subject would be out of place here, but any one who desires to inform himself on this matter can easily and satisfactorily do so by using a terrestrial globe having an artificial horizon attached to it, and carefully complying with the following instructions: Place the globe so that the North Pole shall be directed toward the north, and elevate it 23° above the horizon as indicated by the brass meridian. Assuming, of course, that the sun is in the zenith, this will be the position of the earth in reference to the sun at the Summer solstice, June 22. As we turn the globe on its axis from west to east, the sun will be rising at all places on the western and setting at all places on the eastern horizon, and we shall find on turning the globe through an entire revolution that some portion or other of our territory—including the islands named above—will always be above the horizon or will have continuous sunshine during the twenty-four hours. If we now depress the North Pole 23° below the horizon we shall have the relative position of things at the Winter solstice, December 22, and we shall find the opposite conditions to prevail; that is to say, the sun will not now shine continuously on our territory, but some portion of it will always be involved in darkness or *below* the horizon.

Again, if we place the poles of the globe in the horizon, which is the relative position at the equinoxes, March 21 and September 23 and turn the globe through a complete revolution, we shall find that for a very short time during the twenty-four hours the whole of our territory will be below the horizon or in darkness. Finally, let us elevate the North Pole about 5° above the horizon, then we shall find, as we revolve the globe on its axis, that some portion of our territory is always above the horizon or has sunshine. Therefore, we conclude that when the sun's northern declination exceeds 5°, or from the 3d of April to the 10th of September, the sun will shine continuously over some part or other of United States territory.

If we consider the effect of refraction, which accelerates the time of rising and retards the time of setting, the above dates may be practically extended to within two or three days of the equinoxes.

Great Britain, France, and Holland are the only nations on whose dominions the sun never sets. Those of Great Britain are very extensive and scattered far and wide over both hemispheres, so that while the sun may be setting at one, it is rising on another. The French possessions consist for the most part of numerous small islands in the Atlantic, Indian, and Pacific Oceans, with continental territories in South America, Africa, and Asia, and accordingly are so distributed that the sun is always above the horizon of some of them. The foreign possessions of Holland are far more extensive than most people imagine. With the exception of Dutch Guiana in South America, they consist of two groups of islands—one on the coast of Venezuela and the other embracing Sumatra, Java, Celebes, portions of Borneo and New Guinea and a host of smaller islands scattered throughout the East Indian Archipelago, extending over 46° of longitude. These, with Holland itself, are so situated as to their difference of longitude that the sun is always shining on some of them.

# Cuba.

THE island of Cuba is 730 miles long, and its width varies from about 25 miles to 100 miles. Its area comprises 44,164 square miles, or about that of Pennsylvania. It has numerous safe and commodious harbors, that of Havana being one of the largest and finest in the world. Measuring from points of nearest approach to its neighbors, Cuba is about 100 miles from Key West, Fla., North; 54 miles from Hayti, East; 130 miles from Yucatan, West, and 85 miles from Jamaica, South.

The two principal agricultural staples of the island are sugar and tobacco. It also produces in considerable quantities fruits, vegetables, timber and metals, mainly iron, manganese and copper ore. The soil is adapted to coffee and cotton. Prof. Robert T. Hill, of the United States Geological Survey, says: "Cuba is the fairest and most fertile of the tropical lands. So far as wealth and lay of soil are concerned Cuba is superior to the rest of the tropical lands, with the possible exception of Porto Rico. The whole island is mantled with rich soils, fertile calcareous loams, which, under constant humidity, yield in abundance every form of useful vegetation of the tropical and temperate climes."

The Government is Republican in form. The President, who is chosen by popular suffrage, serves four years and appoints his own Cabinet. The Congress consists of a Senate and House of Representatives, one representative being chosen for every 25,000 inhabitants, as nearly as possible. The provinces, of which there are six, corresponding to the American States, elect their own Governors and control their own internal affairs.

## POPULATION OF CUBA.

A census of Cuba was taken by the United States Provisional Government in 1907, under the direction of the Department of Agriculture, at Washington. The results, of which the following is an abstract, were published in Spanish and English in 1909.

In 1907 Cuba had a population of 2,048,980, an increase from 1899 of 476,183, or 30.3 per cent. The population of the provinces of Cuba was as follows:

| | | | |
|---|---|---|---|
| Habana | 538,010 | Pinar del Rio | 240,372 |
| Santa Clara | 457,431 | Matanzas | 239,812 |
| Oriente | 455,086 | Camaguey | 118,269 |

Over half of the population lived in the rural districts, the 134 towns and cities containing 899,667 inhabitants, or 43.9 per cent. of the total. The population of the six large cities was as follows:

| | | | |
|---|---|---|---|
| Habana | 297,159 | Cienfuegos | 30,100 |
| Santiago de Cuba | 45,470 | Camaguey | 29,616 |
| Matanzas | 36,009 | Cardenas | 24,280 |

The density of population in 1907 was 46.4 per square mile.

Males were more numerous than females, the numbers being 1,074,882 and 974,098, respectively.

Of the total population, 1,369,476, or 66.8 per cent., were single or divorced; 423,537, or 20.7 per cent., were married; 176,509, or 8.6 per cent., were consensually married; and 79,458, or 3.9 per cent., were widowed. The average number of persons to a family was 4.8.

In 1907 over two-thirds 1,428,176, or 69.7 per cent., of the inhabitants were white. The colored population was composed of 274,272 negroes, 334,695 mixed, and 11,837 Chinese. Of the whites, 1,224,539 were native and 203,637 foreign born. Of the latter class, Spain contributed 185,393 and the United States 6,713.

Of the total population, 1,780,628, or 86.9 per cent., were of Cuban and 228,138, or 11.1 per cent., of Spanish citizenship. Of the 551,639 males of voting age, 430,514 were Cuban citizens, and of these, 212,930, or less than one-half, were literate, while 217,584 were illiterate; among those of other citizenship the proportion of literates was much greater, 89,217 being literate and 31,908 illiterate. Among the white males of voting age the literates were in the majority, the numbers being 161,742 literates and 130,944 illiterates for Cuban citizens, and 84,937 literates and 23,056 illiterates for all the others.

Almost one-third, 171,017, or 31.6 per cent., of the children attended school; the corresponding percentage for 1899 was only 15.7. In the six large cities 55,336, or 49.9 per cent. of those of school age, attended school.

Of the population at least ten years of age, 837,958, or 56.6 per cent., could read. For the large cities the percentage was 82.6; for the rest of Cuba it was 47.9.

In 1907, 772,502 persons were engaged in gainful occupations. The 698,982 male breadwinners formed 65 per cent. of all the males, while the 73,520 females gainfully employed formed 7.5 per cent. of all the females. Of the wage-earners, 374,969, or 48.5 per cent., were engaged in agriculture, fishing and mining; 136,419, or 17.6 per cent., in trade and transportation; 126,021, or 16.3 per cent., in manufacturing and mechanical pursuits; 122,288, or 16 per cent., in domestic and personal service; and 12,805, or 1.6 per cent., in professional service.

The principal trade is with the United States, which takes practically all the exports of sugar, fruit, and minerals, and more than nine-tenths of the raw tobacco. Trade with Spain has fallen off greatly.

The total trade of Cuba for the fiscal year, 1912, exclusive of coin, was as follows: Imports, $118,937,000; exports, $146,676,000, and United States trade with Cuba, merchandise only, for the fiscal year ending June 30, 1913. Imports into the United States from Cuba, $126,088,173; exports from the United States to Cuba, $70,581,154.

# The Cuban Government.

*President*..(Salary, $25,000).....GEN. MARIO MENOCAL.
*Vice-President*.....ENRIQUE JOSÉ VARONA.

CABINET.

*Secretary of State*—Cosme de la Torriente.
*Secretary of the Treasury*—Leopoldo Cancio y Luna.
*Secretary of Government*—Aurelio Hevia.
*Secretary of Justice*—Cristobal de la Guardia.
*Secretary of Public Works*—José Ramón Villalón.
*Sec'y of Agriculture, Commerce and Labor*—Emilio Núñez.
*Secretary of Public Instruction and Fine Arts*—Ezequiel García Enseñat.
*Secretary of Health and Charities*—Enrique Núñez.
*Secretary of the Presidency*—Dr. Rafael Montoro.

LEGISLATIVE.

*President of the Senate*—Dr. Eugenio Sánchez Agramonte.
*President (Speaker) of the House of Representatives*—Dr. Antonio González Lanuza.

THE national parks and reservations mentioned below are under the supervision of the Secretary of the Interior. General information, the annual administrative reports, copies of the rules and regulations, and compilations of the laws relating to the parks may be obtained from the Secretary of the Interior or from the superintendents of the parks.

YELLOWSTONE NATIONAL PARK is in Wyoming, Montana, and Idaho, and has an area of 2,142,720 acres. The superintendent's address is Yellowstone Park, Wyoming. The park can be reached by the following railroads: Northern Pacific Railroad to Gardiner, the northern entrance, or Livingston, Mont.; Oregon Short Line Railroad to Yellowstone, Mont., the western entrance; Chicago, Burlington and Quincy Railroad to Cody, Wyo., from which the eastern entrance to the park is accessible. Stage and private transportation connections for the reservation are made at all these points. The tourist season extends from June 1 to September 15.

YOSEMITE NATIONAL PARK, CALIFORNIA, including the Yosemite Valley and Mariposa Big Tree Grove, embraces an area of 719,622 acres. The superintendent's address is Yosemite, Cal. The park can be reached from Merced on the Atchison, Topeka and Santa Fé and the Southern Pacific railroads by way of Yosemite Valley Railroad, which runs to the western boundary, and by connections of the same roads to Raymond, on the southwest; stage lines run from the terminus of the Yosemite Valley Railroad and from Raymond to Yosemite Valley within the park. The tourist season extends from May 1 to November 1, but the park is accessible and hotel accommodations are furnished the entire year.

GLACIER NATIONAL PARK, MONTANA, has an area of approximately 915,000 acres, of which 15,000 acres have been surveyed. Within the limits stated there are 250 lakes, ranging from 10 miles to a few hundred feet in extent. There are more than 60 glaciers between 5 square miles and a few acres in area. There are wild animals, plants, and rocks in number and quantity to satisfy the most ardent student, and views of great variety, beauty and grandeur to gratify the artist and the lover of nature. The address of the superintendent is Belton, Mont. The park can be reached via the Great Northern Railway. The tourist season extends from May 1 to about September 15.

MOUNT RAINIER NATIONAL PARK, WASHINGTON, has an area of 207,360 acres. The superintendent's address is Ashford, Wash. The park is reached by stage or private transportation from Ashford, Wash., on the Tacoma Eastern Railroad, and by trail from Fairfax, on the Northern Pacific Railroad. The tourist season extends from June 15 to September 15.

SEQUOIA NATIONAL PARK, CALIFORNIA, has an area of 161,597 acres. The address of the superintendent is Ranger, Cal., during the tourist months (June 1 to September 15) and Three Rivers, Cal., the balance of the year. This park may be reached from Visalia, on the Southern Pacific and the Atchison, Topeka and Santa Fé railroads by way of the Visalia Electric Railroad Company to Lemon Cove, thence by stage or private conveyance to the Giant Forest within the park, or by private conveyance from Visalia via Lemon Cove.

GENERAL GRANT NATIONAL PARK, CALIFORNIA, has an area of 2,536 acres. This reservation is administered jointly with Sequoia National Park, and the tourist season extends from June 1 to September 15. The address of the superintendent is given above. The park may be reached from Visalia on the Southern Pacific and Atchison, Topeka and Santa Fé railroads, thence by the Visalia Electric Railway to Woodlake, thence 30 miles by stage or private conveyance, or by trail from Sequoia National Park.

CRATER LAKE NATIONAL PARK, OREGON, has an area of 159,360 acres. The address of the superintendent during the tourist months (June 15 to September 30) is Crater Lake, Ore., and during the balance of the year Klamath Falls, Ore. This park may be reached by stage or automobile from Klamath Falls, Ore., or from Medford, Ore., on the Southern Pacific Railroad.

WIND CAVE NATIONAL PARK, SOUTH DAKOTA, contains 10,522 acres. The superintendent's address is Wind Cave, S. Dak. This park may be reached by private conveyances from Hot Springs, on the Chicago, Burlington and Quincy and the Chicago and Northwestern railroads, or by similar conveyance from Custer, on the Chicago, Burlington and Quincy Railroad. The reservation is open to tourists the entire year.

SULLYS HILL PARK, NORTH DAKOTA, on the shore of Devils Lake, has an area of 780 acres. The address of the superintendent is Fort Totten, N. Dak. Devils Lake, Narrows, and Tokio, on the Great Northern Railroad, are close to the park, and from these points the reservation can be approached by wagon, or by boat (private conveyance).

PLATT NATIONAL PARK, AT SULPHUR, OKLAHOMA, has an area of 848.22 acres. Sulphur is the post-office address of the superintendent. The town is accessible by the Atchison, Topeka and Santa Fé and the St. Louis and San Francisco railroads. The park, which is open to tourists the entire year, is within walking or riding distance of the railroads.

MESA VERDE NATIONAL PARK, COLORADO, under the organic act approved June 29, 1906, contained an area of 42,376 acres, and the 5-mile strip under the park jurisdiction for the protection of ruins, provided for by the act, abutting the park, contained 175,360 acres. The 5-mile strip was eliminated from park supervision by the act of June 30, 1913, and the boundaries of the park proper were changed so as to make the present aggregate area 76.51 square miles, or 48,966.4 acres. The address of the superintendent is Mancos, Col., the nearest railroad station, on the Rio Grande Southern Railroad. This station is about 25 miles from the ruins, which may be reached only by horseback or on foot. The tourist season extends from May 1 to September 30.

CASA GRANDE RUIN, ARIZONA, a reservation; has an area of 480 acres. The nearest railroad station is Casa Grande, on the Southern Pacific Railroad. It may also be reached by private conveyance from Florence, Ariz., on the Phoenix and Eastern Railroad. The address of the custodian is Florence.

The Mesa Verde National Park and the Casa Grande Reservation were set aside to protect the instructive prehistoric ruins and other objects of antiquity which they contain. These ruins are being excavated and repaired and are open for the inspection of visitors. Reports on the repair of such ruins have been issued by the Department of the Interior, and more detailed accounts are distributed by the Bureau of American Ethnology, Smithsonian Institution.

HOT SPRINGS RESERVATION, ARKANSAS (the permanent reservation), has an area of 911.63 acres. Eleven bathhouses on the reservation and thirteen in the city of Hot Springs, as well as several hotels operated in connection with bathhouses, receive hot water from the springs, under lease with the Secretary of the Interior. The address of the superintendent is Hot Springs, Ark.

PRESERVATION OF AMERICAN ANTIQUITIES.—Under the act of Congress approved June 8, 1906, interdepartmental regulations governing the excavation, appropriation, etc., of prehistoric ruins or objects of antiquity have been promulgated by the Secretaries of the Interior, Agriculture, and War. Applications for permits to make excavations on the public lands, Indian reservations, or the national monuments named below should be addressed to the Secretary of the Interior. The following have been reserved from entry and set aside as national monuments:

| | | |
|---|---|---|
| Devils Tower, Wyoming. | Natural Bridges, Utah. | Gran Quivira, New Mexico. |
| Montezuma Castle, Arizona. | Lewis and Clark Cavern, Montana. | Sitka National Monument, Alaska. |
| Petrified Forest, Arizona. | Tumacacori, Arizona. | Rainbow Bridge, Utah. |
| El Moro, New Mexico. | Navajo, Arizona. | Pinnacles, California. |
| Chaco Canyon, New Mexico. | Mukuntuweap, Utah. | Colorado, Colorado. |
| Muir Woods, California. | Shoshone Cavern, Wyoming. | |

Ten other national monuments within national forests have also been set aside under this act and placed under the jurisdiction of the Secretary of Agriculture, to whom inquiries in regard thereto should be addressed. One other national monument (Big Hole Battlefield, Mont.), is under jurisdiction of the Secretary of War.

# Forests and Forestry.

Our forests now cover 550,000,000 acres, or about one-fourth of the United States. Forests publicly owned contain one-fifth of all timber standing. Forests privately owned contain at least four-fifths of the standing timber. The timber privately owned is not only four times that publicly owned, but it is generally more valuable.

The original forests of the United States contained timber in quantity and variety far beyond that upon any other area of similar size in the world. They covered 850,000,000 acres, with a stand of not less than 5,200,000,000,000 board feet of merchantable timber, according to present standards of use. There were five great forest regions—the northern, the southern, the central, the Rocky Mountain and the Pacific.

The present rate of cutting is three times the annual growth of the forests of the United States. The great pineries of the lake States are nearing exhaustion and heavy inroads have been made upon the supply of valuable timber throughout all parts of the country.

The heavy demands for timber have been rapidly pushing the great centres of lumber industry toward the South and West. In consequence, the State of Washington has led for several years in lumber production, now followed in order by Louisiana, Mississippi, North Carolina and Oregon. In 1912 the production of yellow pine lumber amounted to fou teen and one-half billion feet; the Douglas fir of the Northwest held second place, with nearly five and one-quarter billion feet; while white pine ranked third, though less was produced than in the preceding year; oak came first among the hardwoods with four and one-third billion feet, and was followed in order by maple, red gum, tulip poplar, chestnut, beech, and birch.

We take from our forests yearly, including waste in logging and in manufacture, 30,000,000,000 cubic feet of wood, valued at about $1,875,000,000.

We use in a single year 90,000,000 cords of firewood, 40,000,000,000 board feet of lumber, 135,000,000 hewed ties, 1,686,000,000 staves, over 444,500,000 board feet for veneer, over 136,000,000 sets of heading, over 353,000,000 barrel hoops, 3,300,000 cords of native pulp wood, 165,000,000 cubic feet of round mine timbers, nearly 1,500,000 cords of wood for distillation, over 140,000 cords for excelsior, and nearly 3,500,000 telegraph and telephone poles.

In 1912 about 4,330,000 cords of wood were used in the manufacture of paper, of which about 940,000 cords were imported from Canada. The demand for wood pulp is making a severe drain on the spruce forests, which furnish the principal supply, though a number of other woods, such as poplar, hemlock, pine, and balsam, are now being used in considerable quantities. The Forest Service of the United States Department of Agriculture is conducting investigations to determine what other woods, such as scrub pine, white fir, tupelo and the like, can be successfully used.

A larger drain upon our forest resources is made by the demand for railroad ties. White oak, hitherto the chief source of supply, is not plentiful enough to meet this demand indefinitely, and in many parts of the country the supply of chestnut, cedar and cypress is dwindling; however, methods of treating woods with preservative solutions are being used, and in this way cheaper and more plentiful woods, such as Southern pine, Douglas fir, tamarack, and hemlock, are coming into demand. A great saving has been effected in the naval stores industry, also largely through the work of the Forest Service, by the introduction of the so-called "cup" systems of turpentining in place of the old destructive system of "boxing." The new systems insure a larger product of better quality and prolong the life of the longleaf pine forests upon which the industry depends.

## UNITED STATES FOREST SERVICE.

The Forest Service is one of the bureaus of the Department of Agriculture. It has charge of the administration and protection of the national forests and also promotes the practice of forestry generally through investigations and the diffusion of information.

The work of the Government in forestry was initiated by the appointment of Dr. Franklin B. Hough in 1876 as special agent in the Department of Agriculture. In 1881 a division of forestry was created in that department. In 1901 this division became the Bureau of Forestry, and in 1905, when the care of the national forests was given to this bureau, its name became the Forest Service.

Previously the care of the national forests had been in the hands of the Department of the Interior.

A law authorizing the President to set apart forest reserves was passed in 1891, but no provision for their administration and use was made until 1897. Previous to 1905 the Bureau of Forestry merely gave expert advice, on request, to the Department of the Interior concerning the application of forestry to the forest reserves. The change of name from "forest reserves" to "national forests" was made in 1906 to correct the impression that the forests were, as "reserves," withdrawn from use. Since the Forest Service took charge of them the fundamental aim has been to open them to the widest use consistent with their proper protection.

The reserves were set aside as follows: By President Harrison, 13,416,710 acres; by President Cleveland, 25,686,320 acres; by President McKinley, 7,050,089 acres; by President Roosevelt, 148,346,924 acres.

The present gross area of the national forests, including Alaska and Porto Rico, is 187,008,796 acres. This is not likely to be increased because a close study of the best ultimate use of lands within the national forests is resulting in the elimination of certain tracts found to be better suited for agricultural and other purposes than for forestry. Acts of Congress prohibit any additions by the President to the national forest area in Washington, Oregon, California, Idaho, Montana, Wyoming, and Colorado.

The following tables show the national forest expenditures and receipts for the fiscal years 1913 and 1912 for purposes of comparison:

EXPENDITURES ON NATIONAL FORESTS—FISCAL YEARS 1913 AND 1912.

| Fiscal Year. | Administration and Protection. | | Permanent Improvements. | |
|---|---|---|---|---|
| | Total. | Per Acre. | Total. | Per Acre. |
| 1913 | $4,653,560.48 | $0.02488 | $470,825.50 | $0.00251 |
| 1912 | 4,718,668.96 | 0.02518 | 499,158.55 | 0.00266 |

The following table shows the national forest receipts for the fiscal year 1913 compared with those for the fiscal year 1912:

COMPARISON OF RECEIPTS FROM THE SEVERAL SOURCES FOR THE FISCAL YEARS 1913 AND 1912.

| Fiscal Year. | Grazing. | | Timber. | | Special Uses. | | All Sources. | |
|---|---|---|---|---|---|---|---|---|
| | Total. | Per Acre. | Total. | Per Acre | Total. | Per Acre. | Total. | Per Acre. |
| 1913 | $999,369.16 | $ 0.0053 | $1,275,556.48 | $ 0.0068 | $116,995.21 | $ 0.0006 | $2,391,920.85 | $0.01279 |
| 1912 | 968,942.26 | 0.00520 | 1,089,702.04 | 0.00580 | 98,712.27 | 0.00050 | 2,157,356.57 | 0.01150 |

Under the law 25 per cent. of the gross receipts are paid to the States in which the national forests

FORESTS AND FORESTRY—*Continued.*

are located, to be expended for roads and schools. The amount to be paid to the States in this way from the receipts in 1913 is about $586,596.70.

In addition 10% is spent on roads under the direction of the Secretary of Agriculture, and generally in co-operation with State authorities.

The total appropriation for the Forest Service in the fiscal year 1914 is $5,399,679, as against $5,343,045 for 1913, with a further provision of $200,000 available for fighting and preventing forest fires in cases of extraordinary emergency.

The grazing receipts for 1913 were paid by the holders of 22,032 permits to graze 1,557,118 cattle, horses and hogs, and of 5,434 permits to graze 7,867,851 sheep and goats. The receipts from timber sales were paid by approximately 5,800 purchasers, who cut the equivalent of 495,668,000 board feet of timber. The receipts from special uses were paid by the holders of approximately 5,000 permits. In other words, these receipts represent profitable use of the forests by at least 38,000 individuals or concerns. To the use for which payment was made must be added the heavy free use of the forests by the public. Figures for free use of timber are as follows:

FREE USE OF TIMBER ON NATIONAL FORESTS.

| Fiscal Year. | Number of Permittees. | Cut. | Value. |
|---|---|---|---|
| | | *Board Feet.* | |
| 1913 | 38,264 | 121,985,000 | $191,824.77 |
| 1912 | 38,551 | 123,233,000 | 196,335.41 |

In issuing permits for reservoirs, conduits, power-houses and transmission lines for commercial power development the Forest Service has steadfastly insisted on conditions designed to prevent speculative or perpetual holdings and to secure the full development of available power and the payment of reasonable charges for the use of land.

The total stand of timber on the national forests is estimated at nearly six hundred billions board feet.

The following table shows the local cut of timber from the national forests in the fiscal year 1913:

TIMBER CUT FROM NATIONAL FORESTS.

| State. | Cut Under Sale. | Cut Under Free Use. | Total Cut. | State. | Cut Under Sale. | Cut Under Free Use. | Total Cut. |
|---|---|---|---|---|---|---|---|
| | *Board Feet.* | *Board Feet.* | *Board Feet.* | | *Board Feet.* | *Board Feet.* | *Board Feet.* |
| Montana | 82,757,000 | 18,513,000 | 101,270,000 | So. Dakota | 9,085,000 | 5,080,000 | 14,165,000 |
| Idaho | 78,199,000 | 21,405,000 | 99,604,000 | Wyoming | 7,915,000 | 7,750,000 | 15,665,000 |
| Arizona | 58,532,000 | 4,459,000 | 62,991,000 | Nevada | 3,122,000 | 2,638,000 | 5,760,000 |
| California | 52,419,000 | 9,153,000 | 61,572,000 | Michigan | 130,000 | 54,000 | 184,000 |
| Oregon | 52,362,000 | 12,049,000 | 64,411,000 | Minnesota | 57,000 | 65,000 | 122,000 |
| Colorado | 42,446,000 | 11,002,000 | 53,448,000 | Florida | 40,000 | 12,000 | 52,000 |
| Alaska | 33,535,000 | 96,000 | 33,631,000 | Oklahoma | 13,000 | 232,000 | 245,000 |
| Washington | 29,149,000 | 2,611,000 | 31,760,000 | No. Dakota | ..... | 42,000 | 42,000 |
| Arkansas | 20,104,000 | 187,000 | 20,291,000 | | | | |
| New Mexico | 14,815,000 | 14,611,000 | 29,426,000 | Totals | 495,668,000 | 121,985,000 | 617,653,000 |
| Utah | 10,988,000 | 12,026,000 | 23,014,000 | | | | |

The value of the public property administered by the Forest Service is estimated at over two billion dollars.

The great areas contained in the national forests have now been brought to a condition where they are beginning to serve the purposes of the West. The conservation of timber and forage through wise use, and the protection of stream flow, are the means of sustaining many industries which have contributed materially to the prosperity of the country.

## ORGANIZATION OF THE FOREST SERVICE.

At the head of the Forest Service are the Forester, Henry S. Graves, and the Associate Forester, A. F. Potter. The work is organized under the following branches: Operation, and also Lands, James B. Adams in charge; Silviculture, and also Products, W. B. Greeley in charge; Grazing, A. F. Potter in charge, and Products Laboratory, Howard F. Weiss in charge; Acquisition of Lands Under the Weeks law, William L. Hall in charge.

The 163 national forests are distributed in six districts, with a District Forester in charge of each, and headquarters as follows: District 1 (Montana, northeastern Washington, northern Idaho, northwestern South Dakota, northern Michigan, northern Minnesota and southwestern North Dakota), Missoula, Mont., F. A. Silcox, District Forester; District 2 (Colorado, Wyoming, the remainder of South Dakota, Nebraska and western Kansas), Denver, Col., Smith Riley, District Forester; District 3 (most of Arizona, Arkansas, Florida, New Mexico and Oklahoma), Albuquerque, N. Mex., A. C. Ringland, District Forester; District 4 (Utah, southern Idaho, western Wyoming, eastern and central Nevada and a small portion of northwestern Arizona), Ogden, Utah, E. A. Sherman, District Forester; District 5 (California and southwestern Nevada), San Francisco, Cal., Coert DuBois, District Forester; and District 6 (Washington, Oregon and Alaska), Portland, Ore., Geo. H. Cecil, District Forester.

On July 1, 1913, the force employed by the Forest Service numbered 3,791. Of these 3,068 were employed upon the national forests and 723 were engaged in administrative, scientific and clerical work at the Washington and district headquarters. Of the employés on the national forests the force engaged principally in protective work numbered 2,302 men, as follows: Forest Rangers, 359; Assistant Forest Rangers, 888; Forest Guards, 1,053; Game Wardens, 2. The protective force was therefore about one man for every 80,000 acres, or 125 square miles. (Prussia has one man for every 1,700 acres, and Baden one for every 750.)

## BRANCH OF SILVICULTURE.

The branch of silviculture directs the management of the national forests as regards both the systems of cutting mature timber and the work of forest planting; supervises their protection; co-operates with States in developing forest policies adapted to their requirements; co-operates with private forest owners who desire to practice forestry on their lands; and carries on silvicultural investigations of the important species of the United States. Its most important work is in connection with the management of the national forests where the chief problem, after fire protection, is to replace the mature timber as it is sold and cut by young growth of valuable species.

In planting within the national forests the primary object is to produce commercial timber, although in a number of cases planting has been done chiefly with the view of reforesting denuded watersheds in order to control and regulate the flow of streams directly supplying cities and towns. During the year ending June 30, 1913, about 30,000 acres in national forests were sown or planted

to trees, chiefly Douglas fir, a Western yellow pine, Austrian pine and Engelmann spruce. There are 40 Government nurseries which supply the national forests. These have a present stock of about 45,000,000 plants and are capable of supplying about 23,000,000 a year. In the East, forest planting has been done mainly in connection with States and private owners, though experiments have been made with the French maritime pine, for turpentine production, and with cork oak and Australian eucalypts, on the Florida national forest.

At the request of the States the Forest Service makes examinations of their forest conditions and conducts other studies needed to serve as a basis for forest legislation and formulation by each State of a forest policy adapted to its special requirements. The cost of such work is shared by the States and the service. The service co-operates with private owners, especially small owners, in States which have no State Forester, by furnishing advice, with or without field examinations, concerning the best methods for managing and protecting their holdings. The cost of such examination is borne by the owner.

## BRANCH OF GRAZING.

The branch of grazing supervises the grazing of live stock upon the national forests, the principal lines of work being the allotment of grazing privileges; the issuance of grazing permits; the division of the ranges between different classes of stock or their owners, and the regulation of the stock grazed under permit upon the ranges; and the development of the forage-producing capacity of the national forests by the restoration of depleted areas through systematic control of the stock grazed upon them or by artificial means, through the eradication of noxious range-destroying rodents and through the institution of new methods of range control. By co-operation with Federal and State authorities in the enforcement of quarantine regulations the national forests have been practically freed from infectious or contagious diseases fatal to live stock, and by an active campaign against predaceous animals destructive to live stock, the annual loss from this source within the national forests has been reduced by several hundred thousand dollars.

The number of stock grazed during the past season (1913), under permit, was 1,557,118 head of cattle, horses and swine, and 7,867,851 head of sheep and goats. The annual productive value of this number of stock is more than $20,000,000. The number of persons holding permits to graze live stock during the past year was in excess of 27,000.

About 15 per cent. of all the sheep in the United States are grazed in the national forests.

## BRANCH OF PRODUCTS.

The branch of products carries on studies, tests and demonstrations to further the more complete utilization of the products of the forest. A forest products laboratory is operated at Madison, Wis., in co-operation with the University of Wisconsin, where experiments are made to determine the physical properties of woods, to ascertain cheap and effective treatments to prevent decay, to test the adaptability of untried woods for specific uses; to develop practical uses for sawmill, woods and factory waste, and to discover processes of obtaining valuable chemical by-products for the waste which cannot otherwise be utilized. Experiments in the manufacture of pulpwood from woods heretofore little used are conducted on a commercial scale at a mill operated by the Forest Service at Wausau, Wis. Studies are made to find the kind, quantity and cost of timber consumed in different States and regions and also where the material comes from and what amount is lost through waste. The wood-consuming industries are aided in finding the most suitable raw material and in developing methods of utilizing their waste product. In the Western States all products work centres in the district offices at Denver, San Francisco and Portland.

## EASTERN NATIONAL FORESTS.

The act of March 1, 1911, commonly known as the Weeks law, provides for the acquisition of forest lands on the watersheds of navigable streams. Its purpose is to promote and protect the navigability of the streams by preserving the forest on the upland portions of their watersheds. Through this act means are afforded of extending the national forest system to regions where the Government has hitherto owned no forest lands and taken no direct part in forest preservation.

The original appropriation was $2,000,000 per year for five and one-half years, beginning with the last half of the fiscal year, 1911. The Agricultural Appropriation bill for the fiscal year, 1913, made the appropriation for 1912 and subsequent years available until expended.

In order to concentrate the purchases where they will be of the greatest benefit from the standpoint of watershed protection, certain areas in the Appalachian region have been designated, aggregating 6,593,332 acres, to which purchases will be for the present confined. The United States Geological Survey is examining this land, as required by law, in order to determine whether or not the forest cover exercises a beneficial influence in regulating the flow of navigable streams. Up to July 1, 1913, 5,833,103 acres were reported upon favorably by the Geological Survey. No unfavorable reports have been made.

The Forest Service has been designated as the bureau to receive proposals of land and to examine and value lands for purchase. The National Forest Reservation Commission considers the recommendations of the Forest Service and approves the lands to be purchased and fixes the price to be paid.

From April 1, 1911, to June 30, 1913, proposals were received covering 3,098,899 acres, of which 2,334,561 acres were within the general areas which had been selected for purchase in the White Mountains and the Southern Appalachians.

During the same period 1,382,655 acres were examined, and 713,415 acres were approved by the National Forest Reservation Commission. These are located as follows: Georgia Area, 33,062 acres, in Fannin, Union, Gilmer, and Lumpkin Counties, Ga. Massanutten Area, 57,729 acres, in Shenandoah, Warren, Page and Rockingham Counties, Va. Mount Mitchell Area, 41,583 acres, in McDowell County, N. C. Nantahala Area, 33,282 acres, in Macon and Swain Counties, N. C. Natural Bridge Area, 28,321 acres, in Rockbridge, Bedford, and Botetourt Counties, Va. Smoky Mountain Area, 59,213 acres, in Blount and Sevier Counties, Tenn. White Mountain Area, 90,944 acres, in Coos and Grafton Counties, N. H. White Top Area, 47,354 acres, in Johnson and Sullivan Counties, Tenn., and Washington County, Va. Cherokee Area, 53,600 acres, in Polk County, Tenn. Monongahela Area, 20,587 acres, in Randolph and Tucker Counties, W. Va. Potomac Area, 70,714 acres in Hardy County, W. Va., Shenandoah and Frederick Counties, Va. Savannah Area, 81,198 acres in Rabun County, Ga., Oconee County, S. C., Macon and Jackson Counties, N. C. Shenandoah Area, 79,464 acres, in Augusta, Highland, Rockingham Counties, Va., and Pendleton County, W. Va. Unaka Area, 16,464 acres in Union County, Tenn.

As these lands are acquired they are administered along the same lines as are the National Forests in the West, and the above-named areas will, as title is obtained and plans for handling them are prepared, be given formal designation as national forests.

## FOREST POLICY OF THE STATES.

New York has purchased and set aside 1,642,000 acres in the Adirondack and Catskill Mountains as forest preserves, under the control of the Conservation Commission of the State. These lands and private lands in the preserve counties are protected from fire by an adequate system of rangers.

FORESTS AND FORESTRY—*Continued.*

Unfortunately the Constitution of the State prohibits the cutting of timber from State lands. In 1910 the commission distributed at cost to private owners 1,700,000 forest tree seedlings; and the waste and open land on the preserve is being gradually planted to trees under the supervision of trained foresters.

Pennsylvania has purchased more than 920,000 acres of land for State forest preserves, and the Forestry Commission has the right to purchase additional forest lands at a price not to exceed $5 an acre. The preserves are situated chiefly on the mountains of the central part of the State and located with special reference to protecting the water supply at the sources of rivers. The State forest reserves are not only protected from fire, but are managed according to forestry principles, the mature timber being cut and sold, and waste areas reforested. A school for training forest rangers for the reserves is maintained at Mont Alto. There is also a fire-warden system organized for the protection of private lands. The State distributes forest trees for planting and gives advice in the management of forest lands to private owners.

Minnesota, Wisconsin and Michigan have well organized State forest departments. Minnesota has 51,000 acres reserved, Wisconsin 385,000 acres, and Michigan 232,000. These are protected from fire and the open land is being planted and the mature timber cut and sold. Each of these States protects the forest land of private owners as well as that of the State forest reserves from fire, and Michigan distributes tree seedlings for forest planting to land owners at cost. Kansas, Connecticut, Ohio, New Hampshire and Vermont also distribute planting material to private owners and give them advice in regard to methods of forest management. The following States have forestry departments which seek to protect from fire by means of an organized warden system all of the greater portion of the forest lands in the State: Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Colorado, Montana, Idaho, Connecticut, New Jersey, Maryland, West Virginia, Kentucky, Tennessee, Alabama, Oregon, Washington, and California. With the exception of West Virgina, Tennessee, Alabama, Colorado, and California, each makes a specific appropriation for fire protection. Maine supports a very efficient forest fire service covering the unorganized townships in the northern part of the State; in the remaining townships each bears the cost of an individual service of ex-office wardens.

Idaho has adopted a co-operative system of fire protection with private owners, and pays its pro rata share of the cost of protecting State lands. Some of these States also have small State forests, those of New Jersey aggregating 14,000 acres. Other States which have forest officers charged with forest interests are Delaware, North Carolina, Louisiana, Ohio, Indiana, and Iowa. All the States, in general, are beginning to consider the enactment of advanced forest legislation, which will create a well-equipped forest department in charge of a technically trained State Forester, with an adequate appropriation for the purchase of land for State forest purposes, for a fire protective system, for the reforestation of waste lands, or for conducting other lines of forest work.

## Conservation of Natural Resources.

THE National Conservation Association, with headquarters in the Colorado Building, Washington, D. C., is now the organized head of the conservation movement in the United States.

In a booklet explaining the objects of the association is the following:

"The National Conservation Association is fighting for the prompt and orderly development of our natural resources, for the welfare of ourselves and our children, and for the rights of the plain people. The association is bound neither by political considerations nor official connections. It is free to speak the whole truth.

"That conservation means the use of our natural resources for the benefit of us all and not merely for the profit of a few is already household knowledge. The task which the National Conservation Association has set itself is to get this principle put into practical effect."

The association is maintained by annual dues from membership, ranging from $1.00 to $20.00.

The organization of the National Conservation Association is as follows:

Gifford Pinchot, President; Charles W. Eliot, Honorary President; Overton W. Price, Vice-President and Treasurer; Harry A. Slattery, Secretary.

The first National Conservation Congress was held at Seattle, Washington, in August, 1909, under the auspices of the Washington Conservation Association.

The objects of the Congress are:

1. To provide for discussion of the resources of the United States as the foundation for the prosperity of the people.
2. To furnish definite information concerning the resources and their development, use and preservation.
3. To afford an agency through which the people of the country may frame policies and principles affecting the conservation and utilization of their resources to be put into effect by their respective representatives in State and Federal Governments.

President, Charles L. Pack, Lakewood, N. J. Executive Secretary, Thomas R. Shipp, Indianapolis, Ind. Treasurer, D. Austin Latchaw, Kansas City, Mo.

## The American Forestry Association.

THE American Forestry Association whose headquarters are at 1410 H Street, N. W., Washington, D. C., was organized in 1882, and incorporated in January, 1897, with the following objects:

1. The promotion of a businesslike and conservative use and treatment of the forest resources of this country.
2. The advancement of legislation tending to this end both by the States and the Congress of the United States, the inauguration of forest administration by the Federal Government and by the States, and the extension of sound forestry by all proper methods.
3. The diffusion of knowledge regarding the conservation, management, and renewal of forests, the proper utilization of their products, methods of reforestation of waste lands, and the planting of trees.

The association desires and needs as members all who are interested in promoting the objects for which it is organized—all who realize the importance of using the natural resources of the country in such a manner as not to exhaust them, or to work ruin to other interests. In particular it appeals to owners of woodlands, to lumbermen and foresters, as well as to engineers, professional and business men who have to do with wood and its manifold uses, and to persons concerned in the conservation of water supplies for irrigation and other purposes.

The association has a membership of several thousands, residents of every State in the Union, Canada and foreign countries. A magazine, *American Forestry*, is published monthly and the subscription and membership fees are $3.00 a year. The officers of the association are:

*President*—Dr. Henry S. Drinker of Pennsylvania; *Treasurer*—Otto Luebkert, Washington, D. C.; *Executive Secretary*—P. S. Ridsdale, Washington, D. C.

(From a Report issued January 3, 1913, by the Bureau of the Census.)

THE special inquiry on irrigation by the Bureau of the Census was limited to that part of the continental United States where irrigation is commonly practised: namely, the arid region and the rice district.

For the purposes of this report the "arid region" has been held to include all sections of continental United States where irrigation is generally practised in the growing of farm crops. As defined in this way the "arid region" includes the western parts of the tier of States formed by the Dakotas, Nebraska, Kansas, Oklahoma, and Texas, and all of the States between these and the Pacific Ocean. In parts of this great territory there is abundant rainfall; but in each of the States comprised in it there are considerable sections, and in some very extensive areas, where farming is largely dependent upon irrigation. The special inquiry was also extended to the rice-growing districts of Arkansas, Louisiana, and Texas, but the rice district has been treated separately in the reports.

## NUMBER OF FARMS IRRIGATED.

The number of farms reported irrigated is the number of farms on which irrigation is practised, regardless of the extent of such irrigation. The number of farms on which irrigation was practised, for purposes other than rice growing, in 1909 in the States of the arid region was 158,713, or 11 per cent. of the total number of farms in the same States. While the total number of farms in this region, including the entire area of States in which irrigation is practised only in the western part, increased 31.5 per cent. between 1900 and 1910, the number of farms on which irrigation was practised increased 47.7 per cent. between 1899 and 1909, the irrigated farms forming a larger percentage of all farms in 1909 than in 1899.

The acreage reported as irrigated in 1909 was 13,738,485, which constitutes 1.2 per cent. of the total land area of the same States, 3.5 per cent. of the total land in farms, and 7.9 per cent. of the improved land in farms. There was an increase of 82.7 per cent. in such acreage between 1899 and 1909, a rate of increase much higher than that in the number of farms irrigated, the average irrigated acreage per farm being greater for 1909 than for 1899.

The acreage to which enterprises were ready to supply water in 1910 was 19,334,697, or 5,596,212 acres in excess of the acreage irrigated in 1909, while the acreage included in all projects, whether completed or in process of development, in 1910 was 31,111,142, or 17,372,657 acres greater than the acreage reported as irrigated in 1909.

The total length of ditches used for irrigation in 1910 was 125,591 miles. There were 6,812 reservoirs, having a combined capacity of 12,581,129 acre-feet, or nearly 1 acre-foot of reservoir capacity for each acre irrigated from any source in 1909. The number of pumping plants reported was 13,906, and the acreage supplied by them 477,625.

The total cost of irrigation enterprises to July 1, 1910, was $307,866,369, or $15.92 per acre of the land which these enterprises were capable of supplying with water in 1910. The increases in the items relating to cost are the most conspicuous. The total cost of irrigation enterprises increased between 1900 and 1910 by 359.8 per cent. and the average cost per acre covered increased also, although much less in degree.

The following table shows in detail the statistics for irrigation in the United States in 1910:

| | | | |
|---|---|---|---|
| Number of farms (1) | 1,440,822 | Length of main ditches, miles | 87,529 |
| Approximate land area (1), acres | 1,161,385,600 | Length of lateral ditches, miles | 38,062 |
| Land in farms (1), acres | 388,606,991 | Number of reservoirs | 6,812 |
| Improved land in farms (1), acres | 173,433,957 | Capacity of reservoirs, acre-feet | 12,581,129 |
| Number of farms irrigated | (2) 158,713 | Number of pumping plants | 13,906 |
| Acreage irrigated | (2) 13,738,485 | Capacity of power plants, horsepower | 243,435 |
| Acreage enterprises were capable of irrigating | 19,334,697 | Cost of irrigation enterprises | $307,866,369 |
| Acreage included in projects | 31,111,142 | Average cost per acre | (3) $15.92 |
| Number of enterprises | 54,700 | Average annual cost of operation and maintenance per acre | (2) $1.07 |
| Total length of ditches, miles | 125,591 | | |

(1) Figures relate to entire areas of States included in the inquiry. (2) In 1909. (3) Based on cost to July 1, 1910, and acreage enterprises were capable of irrigating in 1910.

## CALIFORNIA LEADS.

California contained the largest number of farms on which irrigation was practised, having about one-fourth (24.8 per cent.) of the total number, and Colorado the next largest number, nearly one-sixth (16.3 per cent.) of the total, while Utah ranked third in this respect, with about one-eighth (12.4 per cent.) of the total.

The percentage of increase between 1889 and 1899 in the number of farms irrigated was more than double that during the succeeding decade, but the absolute increases during the two decades were approximately equal. Nebraska showed the largest percentage of increase during the former period and Texas during the latter period, but in neither State is the actual number of irrigated farms large. In Nebraska and South Dakota there were decreases between 1899 and 1909. The largest absolute increase in both decades was in California. In the period 1899 to 1909 the next largest increase was in Colorado, and in the period 1889 to 1899 in Utah.

In total acreage irrigated California ranked first in 1889, Colorado second, and Montana third. In both 1899 and 1909 Colorado reported the largest irrigated acreage, while California and Montana were second and third, respectively. Idaho followed closely in 1909. From 1899 to 1909 California showed the largest absolute increase, followed by Colorado, Idaho, and Montana in the order named. In percentage of increase for this decade, however, Texas ranked first, Washington second, Idaho third, and New Mexico fourth.

## COST OF IRRIGATION.

The total cost of irrigation enterprises up to July 1, 1910, was reported as $307,866,369, which represents an increase of $240,904,094, or 359.8 per cent. over the cost reported at the census of 1900. In no State in the arid region was the increase in cost for this period less than 100 per cent., the highest percentage of increase being in North Dakota and the lowest in Oklahoma. With respect to absolute increase California ranked first, Colorado second, Idaho third, and Montana fourth. The year 1910 was in the midst of a period of great activity in the construction of irrigation works, and on July 1, 1910, a large number of works were incomplete. The "estimated final cost" reported, $424,281,186, is the sum of the cost up to July 1, and the estimated cost of completing these unfinished works.

The average cost per acre based on the acreage irrigated in 1909 was $22.41; that based on the acreage enterprises were capable of irrigating in 1910 was $15.92; and that based on the estimated total cost and the acreage included in projects was $13.64.

## VALUE OF IRRIGATED CROPS.

The report shows for all crops reported as irrigated an average value per acre of $25.08. The highest average value per acre for crops raised on irrigated land is that for Washington, $49.82, which is followed by that for Texas, $45.43 (exclusive of rice), and that for California, $43.50. Wyoming showed the lowest average value per acre, $12.61. As is to be expected, the average value per acre is highest in the States with large areas of fruits, vegetables, and other specialized crops raised by means of irrigation, while in those where forage crops and grains predominate the average is lower.

# The Public Lands of the United States.

(Prepared for THE WORLD ALMANAC by the General Land Office.)

TABULAR statement showing area of public lands vacant and subject to entry and settlement in the public land States and Territories, June 30, 1913.

| STATE OR TERRITORY. | AREA UNAPPROPRIATED AND UNRESERVED. | | | STATE OR TERRITORY. | AREA UNAPPROPRIATED AND UNRESERVED. | | |

# Passport Regulations.

RULES governing the granting and issuing of passports in the United States:

1. BY WHOM ISSUED AND REFUSAL TO ISSUE.—No one but the Secretary of State may grant and issue passports in the United States (Revised Statutes, sections 4075, 4078), and he is empowered to refuse them in his discretion.

Passports are not issued by American diplomatic and consular officers abroad, except in cases of emergency; and a citizen who is abroad and desires to procure a passport must apply therefor through the nearest diplomatic or consular officer to the Secretary of State.

Applications for passports by persons in Porto Rico or the Philippines should be made to the Chief Executives of those islands. The evidence required of such applicants is the same as that required of applicants in the United States.

2. FEE.—By act of Congress approved March 23, 1888, a fee of one dollar is required to be collected for every citizen's passport. That amount in currency or postal money order should accompany each application made by a citizen of the United States. Orders should be made payable to the Disbursing Clerk of the Department of State. Drafts or checks will not be accepted.

3. APPLICATIONS.—A person who is entitled to receive a passport, if within the United States, must make a written application, in the form of an affidavit, to the Secretary of State. The application must be made by the person to whom the passport is to be issued and signed by him, as it is not competent for one person to apply for another.

The affidavit must be attested by an officer authorized to administer oaths, and if he has an official seal it must be affixed. If he has no seal his official character must be authenticated by certificate of the proper legal officer.

If the applicant signs by mark, two attesting witnesses to his signature are required. The applicant is required to state the date and place of his birth, his occupation, the place of his permanent residence and within what length of time he will return to the United States with the purpose of residing and performing the duties of citizenship.

The applicant must take the oath of allegiance to the Government of the United States.

The application must be accompanied by a description of the person applying, and should state the following particulars, viz.: Age, —— years; stature, —— feet —— inches (English measure); forehead, ——; eyes, ——; nose, ——; mouth, ——; chin, ——; hair, ——; complexion, ——; face, ——.

The application must be accompanied by a certificate from at least one credible witness that the applicant is the person he represents himself to be, and that the facts stated in the affidavit are true to the best of the witness's knowledge and belief.

4. NATIVE CITIZENS.—An application containing the information indicated by rule 3 will be sufficient evidence in the case of native citizens; but

A person of the Chinese race, alleging birth in the United States, must obtain from the Commissioner of Immigration or Chinese inspector in charge at the port through which he proposes to leave the country a certificate upon his application, under the seal of such officer, showing that there has been granted to him by the latter a return certificate in accordance with rule 16 of the Chinese Regulations of the Department of Labor. For this purpose special blank forms of application for passports are provided.

Passports issued by the Department of State or its diplomatic or consular representatives are intended for identification and protection in foreign countries, and not to facilitate entry into the United States, immigration being under the supervision of the Department of Labor.

5. A PERSON BORN ABROAD WHOSE FATHER WAS A NATIVE CITIZEN OF THE UNITED STATES.—In addition to the statements required by rule 3, his application must show that his father was born in the United States, resided therein, and was a citizen at the time of the applicant's birth. The Department may require that this affidavit be supported by that of one other citizen acquainted with the facts.

6. NATURALIZED CITIZENS.—In addition to the statements required by rule 3, a naturalized citizen must transmit his certificate of naturalization, or a duly certified copy of the court record thereof, with his application. It will be returned to him after inspection. He must state in his affidavit when and from what port he emigrated to this country, what ship he sailed on, where he has lived since his arrival in the United States, when and before what court he was naturalized, and that he is the identical person described in the certificate of naturalization. The signature to the application should conform in orthography to the applicant's name as written in his certificate of naturalization, or an explanation of the difference should be submitted.

7. WOMAN'S APPLICATION.—If she is unmarried, in addition to the statements required by rule 3, she should state that she has never been married. If she is the wife or widow of a native citizen of the United States the fact should be made to appear in her application, which should be made according to the form prescribed for a native citizen whether she was born in this country or abroad. If she is the wife or widow of a naturalized citizen, in addition to the statements required by rule 3, she must transmit for inspection her husband's certificate of naturalization, or a certified copy of the court record thereof, must state that she is the wife (or widow) of the person described therein, and must set forth the facts of his emigration, naturalization, and residence, as required in the rules governing the application of a naturalized citizen. A married woman citizenship follows that of her husband so far as her international status is concerned. It is essential, therefore, that a woman's marital relations be indicated in her application for a passport, and that in the case of a married woman her husband's citizenship be established.

8. THE CHILD OF A NATURALIZED CITIZEN CLAIMING CITIZENSHIP THROUGH THE NATURALIZATION OF THE PARENT.—In addition to the statements required by rule 3, the applicant must state that he or she is the son or daughter, as the case may be, of the person described in the certificate of naturalization, which must be submitted for inspection, and must set forth the facts of emigration, naturalization, and residence, as required in the rule governing the application of a naturalized citizen.

9. A RESIDENT OF AN INSULAR POSSESSION OF THE UNITED STATES WHO OWES ALLEGIANCE TO THE UNITED STATES.—In addition to the statements required by rule 3, he must state that he owes allegiance to the United States and that he does not acknowledge allegiance to any other government; and must submit affidavits from at least two credible witnesses having good means of knowledge in substantiation of his statements of birth, residence, and loyalty.

10. EXPIRATION OF PASSPORT.—A passport expires two years from the date of its issuance. A new one will be issued upon a new application, and if the applicant be a naturalized citizen, the old passport will be accepted in lieu of a certificate of naturalization, if the application upon which it was issued is found to contain sufficient information as to the naturalization of the applicant. Passports are not renewed by the Department, but a person abroad holding a passport issued by the Department may have it renewed for a period of two years upon presenting it to a diplomatic or principal consular officer of the United States when it is about to expire.

11. WIFE, MINOR CHILDREN, AND SERVANTS.—When the applicant is accompanied by his wife, minor children, or servant who would be entitled to receive a passport, it will be sufficient to state the fact, giving the respective ages of the children and the allegiance of the servant, when one passport will suffice for all. For any other person in the party a separate passport will be required. A woman's passport may include her minor children and servant under the above-named conditions. The term servant does not include a governess, tutor, pupil, companion, or person holding like relations to the applicant for a passport.

12. TITLES.—Professional and other titles will not be inserted in passports.

13. BLANK FORMS OF APPLICATION.—They will be furnished by the Department to persons who desire to apply for passports, but are not furnished, except as samples, to those who make a business of procuring passports.

14. ADDRESS.—Communications should be addressed to the Department of State, Bureau of Citizenship, and each communication should give the post-office address of the person to whom the answer is to be directed.

---

Section 4075 of the Revised Statutes of the United States, as amended by the act of Congress, approved June 14, 1902, provides that "the Secretary of State may grant and issue passports, and cause passports to be granted, issued, and verified in foreign countries by such diplomatic or consular officers of the United States, and by such chief or other executive officer of the insular possessions of the United States, and under such rules as the President shall designate and prescribe for and on behalf of the United States," the foregoing rules are accordingly prescribed for the issuing and granting of passports in the United States.

The Secretary of State is authorized to make regulations on the subject of granting and issuing passports additional to these rules and not inconsistent with them.

WOODROW WILSON.

THE WHITE HOUSE, March 10, 1913.

# Naturalization.

THE following paraphrase and condensation of the naturalization laws of the United States have been revised by the Commissioner of Naturalization of the Department of Labor, and includes such minor changes in the law as were provided by the recent amendments embodied in the act of Congress, approved June 25, 1910.

The following courts alone have the power to naturalize aliens: United States District Courts now existing, or which may hereafter be established by Congress in any State, United States District Courts for the Territories of Hawaii and Alaska, also all courts of record in any State or Territory now existing, or which may hereafter be created, having a seal, a clerk and jurisdiction in actions at law or equity, or law and equity, in which the amount in controversy is unlimited.

The power to naturalize, conferred upon the above mentioned courts, is limited to persons residing within the geographical limits over which their respective jurisdiction extends.

## DECLARATION OF INTENTION.

Any alien who is a white person, or of African nativity or African descent, is required, if he desires to become naturalized, to file a declaration of intention in the clerk's office of any court having jurisdiction over the place in which he lives, and such declaration may not be filed until the alien has reached the age of eighteen years. This declaration must contain information as to the name, age, occupation, time and place of arrival in the United States, and must further show that it is the declarant's *bona fide* intention to become a citizen of the United States and to renounce forever all allegiance and fidelity to any foreign prince, potentate, state or sovereignty, and particularly to the one of which he may be at the time a citizen or subject.

Any alien who filed a declaration of intention before September 27, 1906, and has continued to reside in the United States since such declaration was filed, may be required to file a new declaration of intention after September 26, 1913, under the rulings of some of the courts.

Aliens of the age of twenty-one years and upward, who have been honorably discharged from service in the armies of the United States, either regular or volunteer, are not required to make a declaration of intention.

Any alien, of the age of twenty-one years and upward, who has served five consecutive years in the United States navy or one enlistment in the United States marine corps, may be admitted to citizenship without any previous declaration of intention.

The widow and children who are under age at the time that an alien who has made his declaration of intention has died, without having secured a certificate of naturalization, are also exempted from the necessity of filing a declaration of intention.

By act of June 25, 1910, any person who on May 1, 1905, was an inhabitant for five years and qualified to become a citizen of the United States and who for the five years preceding May 1, 1910, had resided in the United States continuously and who, because of misinformation in regard to his citizenship, had in good faith exercised the rights and duties of a citizen of the United States because of wrongful information and belief, may, upon proof of these facts satisfactory to a court having jurisdiction to naturalize aliens, petition for naturalization without filing the required declaration of intention upon compliance with the other requirements of the law.

## PETITIONS FOR NATURALIZATION.

Not less than two years after an alien has filed his declaration of intention, and after not less than five years' continuous residence in the United States, he may file a petition for citizenship in any one of the courts above stated which has jurisdiction over the place in which he resides, provided he has lived at least one year continuously, immediately prior to the filing of such petition, in the State or Territory in which such place is located. This petition must be signed by the petitioner in his own handwriting and shall give his full name, place of residence, occupation, place of birth and the date thereof, the place from which he emigrated, and the date and place of his arrival in the United States. If such arrival occurred subsequent to the passage of the act of June 29, 1906, he must secure a certificate from the Department of Labor showing the fact of such arrival and the date and place thereof, for filing with the clerk of the court to be attached to his petition. If he is married he must state the name of his wife and, if possible, the country of her nativity and her place of residence at the time of the filing of his petition, and, if he has children, the name, date and place of birth and present place of residence of each living child. The petition must set forth that he is not a believer in or opposed to organized government, or a member of or affiliated with any organization or body of persons teaching disbelief in or opposition to organized government; that he is not a polygamist or a believer in the practice of polygamy, and that he absolutely and forever renounces all allegiance and fidelity to any foreign country of which he may, at the time of filing such petition, be a citizen or subject. This petition must be verified at the time it is filed by the affidavit of two credible witnesses, who are citizens of the United States and who shall state that they have known the petitioner during his entire residence in the State in which the petition is filed, which must be not less than one year, and that they have known him to be a resident of the United States continuously during the five years immediately preceding the filing of the petition; that during such time he acted as a man of good moral character, attached to the principles of the Constitution of the United States and well disposed to the good order and happiness of the same. If a portion of the five years has been passed by the petitioner in some other State than that in which he resides at the time of filing his petition the affidavit of the witnesses may verify so much of the petitioner's residence as has been passed in the State, and the portion of said five years' residence out of the State may be shown by depositions at the time of hearing on the petition.

No petition may be heard until the expiration of at least ninety days after it is filed nor within thirty days preceding a general election. At the hearing upon a petition, which shall be at a date fixed by order of the court, the witnesses are required to again attend and testify in open court so that the judge or judges thereof may be satisfied that the petitioner is qualified and that he has complied with all the requirements of the law.

An alien who has borne a hereditary title or been a member of an order or nobility must renounce such title or position expressly before becoming naturalized. No alien may become naturalized, if physically capable, who does not speak the English language.

Aliens who are admitted to citizenship by order in open court will be required to take the oath of allegiance and thereafter will be entitled to a certificate of naturalization.

The law also provides as to those persons, who though not citizens owe permanent allegiance to the United States, and who may become citizens of any State or organized Territory of the United States, that they may be naturalized upon compliance with all the requirements of the law, except that they will not be called upon to renounce allegiance to any foreign sovereignty.

At the time of filing his declaration of intention an alien is required to pay to the clerk of the court a fee of one dollar. At the time of filing a petition for naturalization a petitioner is required to pay to the clerk of the court a fee of four dollars. This latter fee is for the cost of recording the petition and hearing the case, as well as for the issuance, if the petition is granted, of the certificate of naturalization.

## CHINESE.

The naturalization of Chinamen is expressly prohibited by Sec. 14, Chap. 126, Laws of 1882.

# The National Pure Food Law.

THE Pure Food act, approved June 30, 1906, is entitled "An act for preventing the manufacture, sale, or transportation of adulterated or misbranded or poisonous or deleterious foods, drugs, medicines and liquors, and for regulating traffic therein, and for other purposes." It took effect by its terms on January 1, 1907.

The first section of the act makes it unlawful for any person to manufacture within the District of Columbia or any Territory any article of food or drug which is adulterated or misbranded, under a penalty not to exceed $500, or one year's imprisonment, or both, at the discretion of the court, for the first offence, and not less than $1,000 or one year's imprisonment, or both, for each subsequent offence.

Sec. 2 of the act makes it applicable to food or drugs introduced into any State from any other State, and from or to any foreign country

Sec. 3. That the Secretary of the Treasury, the Secretary of Agriculture, and the Secretary of Commerce and Labor shall make uniform rules and regulations for carrying out the provisions of this act, including the collection and examination of specimens of foods and drugs manufactured or offered for sale in the District of Columbia, or in any Territory of the United States, or which shall be offered for sale in unbroken packages in any State other than that in which they shall have been respectively manufactured or produced, or which shall be received from any foreign country, or intended for shipment to any foreign country, or which may be submitted for examination by the chief health, food, or drug officer of any State, Territory, or the District of Columbia, or at any domestic or foreign port through which such product is offered for interstate commerce, or for export or import between the United States and any foreign port or country.

Sec. 4. That the examinations of specimens of foods and drugs shall be made in the Bureau of Chemistry of the Department of Agriculture, or under the direction and supervision of such bureau, for the purpose of determining from such examinations whether such articles are adulterated or misbranded within the meaning of this act; and if it shall appear from any such examination that any of such specimens is adulterated or misbranded within the meaning of this act, the Secretary of Agriculture shall cause notice thereof to be given to the party from whom such sample was obtained. Any party so notified shall be given an opportunity to be heard, under such rules and regulations as may be prescribed as aforesaid, and if it appears that any of the provisions of this act have been violated by such party, then the Secretary of Agriculture shall at once certify the facts to the proper United States District-Attorney, with a copy of the results of the analysis or the examination of such article duly authenticated by the analyst or officer making such examination, under the oath of such officer. After judgment of the court, notice shall be given by publication in such manner as may be prescribed by the rules and regulations aforesaid.

Sec. 5. That it shall be the duty of each District-Attorney to whom the Secretary of Agriculture shall report any violation of this act, or to whom any health or food or drug officer or agent of any State, Territory, or the District of Columbia shall present satisfactory evidence of any such violation, to cause appropriate proceedings to be commenced and prosecuted in the proper courts of the United States, without delay, for the enforcement of the penalties as in such case herein provided.

The sections descriptive of the articles which come within the scope of the act are as follows:

"Sec. 6. That the term 'drug,' as used in this act, shall include all medicines and preparations recognized in the United States Pharmacopoeia or National Formulary for internal or external use, and any substance or mixture of substances intended to be used for the cure, mitigation or prevention of disease of either man or other animals. The term 'food,' as used herein, shall include all articles used for food, drink, confectionery or condiment by man or other animals, whether simple, mixed or compound.

"Sec. 7. That for the purposes of this act an article shall be deemed to be adulterated:"

In the case of drugs:

"First. If, when a drug is sold under or by a name recognized in the United States Pharmacopoeia or National Formulary, it differs from the standard of strength, quality or purity, as determined by the test laid down in the United States Pharmacopoeia or National Formulary official at the time of investigation: Provided, That no drug defined in the United States Pharmacopoeia or National Formulary shall be deemed to be adulterated under this provision if the standard of strength, quality or purity be plainly stated upon the bottle, box or other container thereof, although the standard may differ from that determined by the test laid down in the United States Pharmacopoeia or National Formulary.

"Second. If this strength or purity fall below the professed standard or quality under which it is sold."

In the case of confectionery:

"If it contain terra alba, barytes, talc, chrome yellow, or other mineral substance or poisonous color or flavor, or other ingredient deleterious or detrimental to health, or any vinous, malt or spirituous liquor or compound or narcotic drug."

In the case of food:

"First. If any substance has been mixed and packed with it so as to reduce, or lower, or injuriously affect its quality or strength.

"Second. If any substance has been substituted wholly or in part for the article.

"Third. If any valuable constituent of the article has been wholly or in part extracted.

"Fourth. If it be mixed, colored, powdered, coated, or stained in a manner whereby damage or inferiority is concealed.

"Fifth. If it contain any added poisonous or other added deleterious ingredient which may render such article injurious to health: Provided, That when in the preparation of food products for shipment they are preserved by any external application applied in such manner that the preservative is necessarily removed mechanically, or by maceration in water, or otherwise, and directions for the removal of said preservatives shall be printed on the covering of the package, the provisions of this act shall be construed as applying only when said products are ready for consumption.

"Sixth. If it consists in whole or in part of a filthy, decomposed, or putrid animal or

THE NATIONAL PURE FOOD LAW—*Continued.*

vegetable substance, or any portion of an animal unfit for food, whether manufactured or not, or if it is the product of a diseased animal, or one that has died otherwise than by slaughter.

"Sec. 8. That the term 'misbranded,' used herein, shall apply to all drugs, or articles, or food, or articles which enter into the composition of food, the package or label of which shall bear any statement, design, or device regarding such article, or the ingredients or substances contained therein which shall be false or misleading in any particular, and to any food or drug product which is falsely branded as to the State, Territory, or country in which it is manufactured or produced.

"That for the purposes of this act an article shall also be deemed to be misbranded."

In the case of drugs:

"First. If it be an imitation of or offered for sale under the name of another article.

"Second. If the contents of the package as originally put up shall have been removed, in whole or in part, and other contents shall have been placed in such package, or if the package fail to bear a statement on the label of the quantity or proportion of any alcohol, morphine, opium, cocaine, heroin, alpha or beta eucaine, chloroform, cannabis indica, chloral hydrate or acetanilide, or any derivative or preparation of any such substances contained therein.

"Third. If its package or label shall bear or contain any statement, design, or device regarding the curative or therapeutic effect of such article or any of the ingredients or substances contained therein, which is false and fraudulent."

In the case of food:

"First. If it be an imitation of or offered for sale under the distinctive name of another article.

"Second. If it be labelled or branded so as to deceive or mislead the purchaser, or purport to be a foreign product when not so, or if the contents of the package as originally put up shall have been removed in whole or in part and other contents shall have been placed in such package, or if it fail to bear a statement on the label of the quantity or proportion of any morphine, opium, cocaine, heroin, alpha or beta eucaine, chloroform, cannabis indica, chloral hydrate, or acetanilide, or any derivative or preparation of any such substance contained therein.

"Third. If in package form, the quantity of the contents be not plainly and conspicuously marked on the outside of the package in terms of weight, measure, or numerical count: Provided, however, That reasonable variations shall be permitted, and tolerances and also exemptions as to small packages shall be established by rules and regulations made in accordance with the provisions of Section 3 of this act. (The act of March 3, 1913, provides that no penalty of fine, imprisonment, or confiscation shall be enforced for any violation of its provisions as to domestic products prepared or foreign products imported prior to eighteen months after its passage.)

"Fourth. If the package containing it or its label shall bear any statement, design or device regarding the ingredients or the substances contained therein, which statement, design or device shall be false or misleading, in any particular: Provided, That an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed to be adulterated or misbranded in the following cases:

"First. In the case of mixtures or compounds which may be now or from time to time hereafter known as articles of food, under their own distinctive names, and not an imitation of or offered for sale under the distinctive name of another article, if the name be accompanied on the same label or brand with a statement of the place where said article has been manufactured or produced.

"Second. In the case of articles labelled, branded or tagged so as to plainly indicate that they are compounds, imitations or blends, and the word 'compound,' 'imitation' or 'blend,' as the case may be, is plainly stated on the package in which it is offered for sale: Provided, That the term 'blend' as used herein shall be construed to mean a mixture of like substances, not excluding harmless coloring or flavoring ingredients used for the purpose of coloring and flavoring only: And provided further, That nothing in this act shall be construed as requiring or compelling proprietors or manufacturers of proprietary foods which contain no unwholesome added ingredients to disclose their trade formulas, except in so far as the provisions of this act may require to secure freedom from adulteration or misbranding.

"Sec. 9. That no dealer shall be prosecuted under the provisions of this act, when he can establish a guaranty signed by the wholesaler, jobber, manufacturer or other party residing in the United States, from whom he purchases such articles, to the effect that the same is not adulterated or misbranded within the meaning of this act, designating it."

The remaining provisions of the act provide the methods of prosecuting offenders and destroying goods imported or offered for import which are adulterated or falsely labelled.

## SUMMARY OF RESULTS—1913.

(Bureau of Chemistry, Carl L. Alsberg, Chief, Washington, D. C.)

The inspection force of the Bureau of Chemistry collected more than 10,000 offical samples of foods and drugs during the fiscal year of 1913, and many additional samples for investigating purposes relating to the enforcement of the law.

## Nutritiveness of Foods.

AVERAGE quantity of nutritive matter in 1,000 parts of varieties of animal and vegetable food.

| | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| Cucumber | 25 | Beet-root | 148 | Sole | 210 | Apricots | 260 | Almonds | 650 |

Of the receipts in 1913 classed as "Miscellaneous," $35,006,299 was from excise tax on corporations, $655,283 from playing cards, and $401,910 from penalties. (a) Including $319,100 from sale of internal revenue stamps affixed to Philippine products, as provided for in the act of August 5, 1909. *Not including $1,259,957 from oleomargarine, $3,223 from mixed flour, $54,189 from adulterated butter, $98,241 from process or renovated butter.

## RECEIPTS BY STATES AND TERRITORIES.

FISCAL YEAR ENDED JUNE 30, 1913.

| States and Territories. | Aggregate Collections. | States and Territories. | Aggregate Collections. |
|---|---|---|---|
| Alabama | $361,463.81 | Nebraska | $2,697,049.76 |
| Alaska | 19,994.00 | Nevada | 92,513.17 |
| Arizona | 156,614.56 | New Hampshire | 505,881.75 |
| Arkansas | 190,665.24 | New Jersey | 12,403,126.53 |
| California | 9,684,145.99 | New Mexico | 83,723.68 |
| Colorado | 943,793.27 | New York | 46,661,853.07 |
| Connecticut | 1,987,074.48 | North Carolina | 10,635,276.47 |
| Delaware | 579,013.25 | North Dakota | 61,279.83 |
| District of Columbia | 913,104.23 | Ohio | 25,169,957.10 |
| Florida | 1,429,929.61 | Oklahoma | 177,649.30 |
| Georgia | 523,632.24 | Oregon | 822,730.30 |
| Hawaii | 240,553.38 | Pennsylvania | 28,959,530.66 |
| Idaho | 88,282.04 | Porto Rico | 591,356.36 |
| Illinois | 58,302,601.36 | Rhode Island | 1,241,087.01 |
| Indiana | 31,623,505.62 | South Carolina | 192,104.14 |
| Iowa | 1,180,855.47 | South Dakota | 137,260.63 |
| Kansas | 732,152.46 | Tennessee | 2,384,189.03 |
| Kentucky | 35,200,906.44 | Texas | 1,584,440.94 |
| Louisiana | 4,462,094.33 | Utah | 328,130.83 |
| Maine | 200,932.99 | Vermont | 78,429.93 |
| Maryland | 7,546,012.45 | Virginia | 8,059,986.63 |
| Massachusetts | 7,236,812.89 | Washington | 1,428,013.90 |
| Michigan | 8,302,016.91 | West Virginia | 1,898,998.78 |
| Minnesota | 3,274,511.22 | Wisconsin | 9,564,192.13 |
| Mississippi | 80,181.10 | Wyoming | 69,483.35 |
| Missouri | 12,470,712.72 | Philippine Islands | 319,100.64 |
| Montana | 445,545.87 | Total | $344,424,453.85 |

Note—Alabama and Mississippi comprise the district of Alabama; Colorado and Wyoming, the district of Colorado; Connecticut and Rhode Island, the district of Connecticut; Maryland, Delaware, District of Columbia, and the counties of Accomac and Northampton, Va., the district of Maryland; Montana, Idaho, and Utah, the district of Montana; New Hampshire, Maine, and Vermont, the district of New Hampshire; New Mexico and Arizona, the district of New Mexico; North Dakota and South Dakota, the district of North and South Dakota; Washington and Alaska, the district of Washington; Nevada forms a part of the first district of California, and South Carolina a part of the fourth district of North Carolina.

## WITHDRAWALS FOR CONSUMPTION.

The quantities of distilled spirits, fermented liquors, manufactured tobacco, snuff, cigars, cigarettes, and oleomargarine on which tax was paid during the last fiscal year are as follows:

| Articles Taxed. | Fiscal year ended June 30, 1913. | Change from Preceding Year. | |
|---|---|---|---|
| | | Increase. | Decrease. |
| Spirits distilled from apples, peaches, grapes, pears, pineapples, oranges, apricots, berries, prunes, figs and cherries.....gals.. | 2,801,767 | 352,436 | ..... |
| Spirits distilled from materials other than apples, peaches, grapes, pears, pineapples, oranges, apricots, berries, prunes, figs and cherries.....gals.. | 140,418,289 | 7,040,831 | ..... |

| Cigars, weighing more than 3 pounds per thousand.....no.. | 7,699,037,543 | 442,647,240 | ..... |
| Cigars, weighing not more than 3 pounds per thousand.....no.. | 1,033,778,160 | ..... | 59,950,640 |
| Cigarettes, weighing more than 3 pounds per thousand.....no.. | 18,124,311 | 212,492 | ..... |
| Cigarettes, weighing not more than 3 pounds per thousand.....no.. | 14,276,771,160 | 3,055,146,176 | ..... |
| Snuff.....lbs.. | 33,209,468 | 3,129,986 | ..... |
| Tobacco, chewing and smoking.....lbs.. | 404,362,620 | 10,577,474 | ..... |
| Oleomargarine.....lbs.. | (b) 143,157,238 | 16,906,035 | ..... |
| Adulterated butter.....lbs.. | 123,807 | 43,291 | ..... |
| Process or renovated butter.....lbs.. | 38,741,604 | ..... | 8,276,196 |

Note—The quantity of mixed flour withdrawn cannot be stated, owing to the variable number of pounds taxed.
(b) Includes 4,171,664 pounds at 10 cents and 138,985,584 pounds at one-fourth of 1 cent per pound.

Receipts of tax on Porto Rican products—spirits, cigars and cigarettes—year ended June 30, 1913, $591,356; on cigars and cigarettes from Philippines, $319,100.

## UNITED STATES INTERNAL REVENUE TAXES.

### SPECIAL TAXES AND RATES.

Rectifiers of less than 500 barrels a year, $100; rectifiers of 500 barrels or more a year, $200.

Wholesale liquor dealers, $100; retail liquor dealers, $25.

Wholesale dealers in malt liquors, $50; retail dealers in malt liquors, $20.

Manufacturers of stills, $50; and for stills or worms, manufactured, each, $20.

Brewers: Annual manufacture less than 500 barrels, $50; annual manufacture 500 barrels or more, $100.

Manufacturers of filled cheese, $400; wholesale dealers in filled cheese, $250; retail dealers in filled cheese, $12.

Manufacturers of oleomargarine, $600; wholesale dealers in oleomargarine artifically colored in imitation of butter, $480; wholesale dealers in oleomargarine free from artificial coloration, $200; retail dealers in oleomargarine artificially colored in imitation of butter, $48; retail dealers in oleomargarine free from artificial coloration, $6.

Manufacturers of adulterated butter, $600; wholesale dealers in adulterated butter, $480; retail dealers in adulterated butter, $48; manufacturers of process or renovated butter, $50; manufacturers, packers or repackers of mixed flour, $12.

### DISTILLED SPIRITS, ETC.

Distilled spirits, per gallon, $1.10; stamps for distilled spirits intended for export, each, 10 cents; except when affixed to packages containing two or more 5-gallon cans for export, 5 cents.

Case stamps for spirits bottled in bond, 10 cents.

Wines, liquors, or compounds known or denominated as wine, and made in imitation of sparkling wine or champagne, but not made from grapes grown in the United States, and liquors not made from grapes, currants, rhubarb or berries grown in the United States, but produced by being rectified or mixed with distilled spirits or by the infusion of any matter in spirits, to be sold as wine, or as a substitute for wine, in bottles containing not more than 1 pint per bottle or package, 10 cents; same, in bottles, containing more than 1 pint, and not more than 1 quart, per bottle or package, 20 cents (and at the same rate for any larger quantity of such merchandise, however put up or whatever may be the package). Grape brandy used in the fortification of pure, sweet wine under an act approved June 7, 1906 (to be assessed), per gallon, 3 cents.

### FERMENTED LIQUORS.

Fermented liquors per barrel, containing not more than 31 gallons, $1 (and at a proportionate rate for halves, thirds, quarters, sixths and eighths of barrels); more than one barrel of 31 gallons, and not more than 63 gallons, in one package, $2.

### TOBACCO, SNUFF, CIGARS AND CIGARETTES.

Tobacco, however prepared, manufactured and sold, or removed for consumption or sale, per lb., 8 cents; snuff, however prepared, manufactured and sold, or removed for consumption or sale, per lb., 8 cents.

Cigars of all descriptions made of tobacco, or any substitute therefor, and weighing more than 3 lbs. per thousand, $3; cigars of all descriptions made of tobacco, or any substitute therefor, and weighing not more than 3 lbs. per thousand, 75 cents; cigarettes weighing more than 3 lbs. per thousand $3.60; cigarettes weighing not more than 3 lbs. per thousand, $1.25.

### OLEOMARGARINE, ADULTERATED BUTTER AND PROCESS OR RENOVATED BUTTER.

Oleomargarine, domestic, artificially colored to look like butter, of any shade of yellow, per lb., 10 cents; oleomargarine, free from coloration that causes it to look like butter, of any shade of yellow, per lb., ¼ of one cent; oleomargarine, imported from foreign countries, per lb., 15 cents.

Adulterated butter, per lb., 10 cents; process or renovated butter, per lb., ¼ of one cent.

### FILLED CHEESE.

Filled cheese, per lb., 1 cent; same, imported, per lb., 8 cents.

### OPIUM.

Prepared smoking opium, per lb., $10.

### MIXED FLOUR.

Mixed flour, per barrel of 196 lbs., or more than 98 lbs., 4 cents; half barrel of 98 lbs., or more than 49 lbs., 2 cents; quarter barrel of 49 lbs., or more than 24½ lbs., 1 cent; eighth barrel of 24½ lbs. or less, ½ of one cent. (Mixed flour imported from foreign countries, in addition to import duties, must pay internal revenue tax as above.)

### CIRCULATION OF AND NOTES PAID OUT BY BANKS AND BANKERS.

Circulation issued by any bank, etc., or person (except a national bank taxed under Section 5214, Revised Statutes, and Section 13, act March 14, 1900), per month, 1-12 of 1 per cent.

Circulation (except national banks) exceeding 90 per cent. of capital, in addition, per month, 1-6 of 1 per cent.

Banks, etc., on amount of notes of any person, State bank, or State banking association, used for circulation and paid out, 10 per cent.

Banks, etc., bankers, or associations, on amount of notes of any town, city, or municipal corporation paid out by them, 10 per cent.

Every person, firm, association, other than national bank associations, and every corporation, State bank, or State banking association, on the amount of *their own notes* used for circulation and paid out by them, 10 per cent.

Every such person, firm, association, corporation, State bank, or State banking association, and also every national banking association, on the amount of notes of any person, firm, association, other than a national banking association, or of any corporation, State bank or State banking association, or of any town, city, or municipal corporation, used for circulation, and paid out by them, 10 per cent.

### PLAYING CARDS.

Playing cards, per pack, containing not more than 54 cards, 2 cents.

### TAXES NOT PAYABLE BY STAMPS.

Tax on deficiencies in production of spirits—On excess of materials used in production of spirits; on circulation of banks and bankers; on notes paid out by banks and others; on brandy used in the fortification of wine. Penalties of 50 per cent. and 100 per cent.

### CORPORATION TAXES.

Excise tax on corporations, joint stock companies, associations, and insurance companies (including 50 per cent. additional), unassessed penalties, United States' share of penalties recovered by suits, offers in compromise, interest, costs, fines, etc. (including duplicate payments, payments in excess, and payments after abatement). Rate of tax equivalent to 1 per cent. of net income above $5,000.

# United States Executive Civil Service.

(Revised for this issue of THE WORLD ALMANAC by the Secretary of the Civil Service Commission.)

THE purpose of the Civil Service act, as declared in its title, is "to regulate and improve the Civil Service of the United States." It provides for the appointment of three Commissioners, a chief Examiner, a Secretary, and other employes, and makes it the duty of the Commissioners to aid the President as he may request in preparing suitable rules for carrying the act into effect; to make regulations to govern all examinations held under the provisions of the act, and to make investigations and report upon all matters touching the enforcement and effect of the rules and regulations. The address of the Commission is Washington, D. C.

## PROVISIONS OF THE RULES.

The act requires the rules to provide, as nearly as the conditions of good administration will warrant, for open competitive practical examinations for testing the fitness of applicants for the classified service; for the filling of all vacancies by selections from among those graded highest; for the apportionment of appointments at Washington among the States upon the basis of population; for a period of probation before absolute appointment; that no person in the public service shall be obliged to contribute service or money for political purposes; that persons in the competitive service, while retaining the right to vote as they please or to express privately their political opinions, shall take no active part in political campaigns; and that no person in said service has any right to use his official authority or influence to coerce the political action of any person or body.

## EXTENT OF THE SERVICE.

There were on June 30, 1912, over 395,000 positions in the Executive Civil Service, nearly 60 per cent. of which, or about 236,000 were subject to competitive examination. The expenditure for salaries in the Executive Civil Service is over $200,000,000 a year. The Civil Service act does not require the classification of persons appointed by the President and confirmed by the Senate or of persons employed merely as laborers or workmen. Many positions are excepted in part from the provisions of the rules for various reasons.

## APPLICATIONS.

Persons seeking to be examined must file an application blank. The blank for the Departmental Service at Washington, Railway Mail Service, the Indian School Service, and the Government Printing Service should be requested directly of the Civil Service Commission at Washington. The blank for the Customs, Postal, or Internal Revenue Service should be requested of the Civil Service Board of Examiners at the office where service is sought.

Applicants for examination must be citizens of the United States, and of the proper age. No person using intoxicating liquors to excess may be appointed. No discrimination is made on account of sex, color, or political or religious opinions. The limitations of age vary with the different services, but do not apply to any person honorably discharged from the military or naval service of the United States by reason of disability resulting from wounds or sickness incurred in the line of duty.

## EXAMINATIONS.

The examinations are open to all persons qualified in respect to age, citizenship, legal residence, character, and health. During the fiscal year ended June 30, 1912, 33,240 persons were appointed. Of those appointed, 2,264 were rural letter-carriers, 12,807 were mechanics and workmen at navy yards appointed on registration tests of fitness given by a board of labor employment at each yard. Several hundr d different kinds of examinations were held, each one of which involved different tests. Three hundred and twenty of these examinations contained educational tests, the others being for mechanical trades or skilled occupations and consisting of certificates of employers or fellow-workmen. Examinations are held twice a year in each State and Territory, the places and dates being publicly announced.

## APPOINTMENTS.

In case of a vacancy not filled by promotion, reduction, transfer, or reinstatement, the highest three of the sex called for on the appropriate register are certified for appointment, the apportionment being considered in appointments at Washington. In the absence of eligibles, or when the work is of short duration, temporary appointments, without examination, are permitted. The number of women applying for ordinary clerical places is greatly in excess of the calls of appointing officers. The chances of appointment are good for teachers, matrons, seamstresses, and physicians in the Indian Service, for male stenographers and typewriters, draughtsmen, patent examiners, civil, mechanical, and electrical engineers, and for technical and scientific experts.

## PREFERENCE CLAIMANTS.

Persons who served in the military or naval service of the United States, and were discharged by reason of disabilities resulting from wounds or sickness incurred in the line of duty, are, under the Civil Service rules, given certain preferences. They are released from all maximum age limitations, are eligible for appointment at a grade of 65, while all others are obliged to obtain a grade of 70, and are certified to appointing officers before all others. Subject to the other conditions of the rules, a veteran of the rebellion or of the war with Spain, or the widow of any such person, or any army nurse of either war, may be reinstated without regard to the length of time he or she has been separated from the service.

## INSULAR POSSESSIONS.

Examinations are also held for positions in the Philippines, Porto Rico, and Hawaii, and also for the Isthmian Canal service.

## THE UNCLASSIFIED SERVICE.

Under an executive order unclassified laborers are appointed after open, competitive examination upon their physical condition. This action is outside the Civil Service act.

## PUBLICATIONS OF THE COMMISSION.

Among the publications of the Commission for free distribution are the following:

Manual of Examinations, giving places and dates of examinations, rules by which papers are rated, descriptions of examinations, specimen questions, and general information.

The Civil Service act and rules.

The Annual Reports of the Commission, showing its work. These annual reports may be consulted at public libraries.

## CIVIL SERVICE EXAMINATIONS. (July 1, 1911, to June 30, 1912.)

The approximate number of competitive positions was 236,061; the number of persons examined was 106,078; number passed, 59,251 or 55.8 per cent. According to branches of the service, the returns were as follows: Departmental examined, 15,898; passed, 7,488; appointed, 2,262; Railway Mail examined, 11,266; passed, 3,034; appointed, 770; Post-Office examined, 40,248; passed, 26,129; appointed, 8,706; other Field Services examined, 38,666; passed, 22,600; appointed, 9,231.

The term departmental, as now used in the commissioner's statistics, refers to the service in Washington, D. C.

# Civil Service Rules in the City of New York.

SYNOPSIS of regulations governing the admission of persons into the civil service of the city of New York. Information may also be had by applying to the Secretary of the Municipal Civil Service Commission, 299 Broadway, New York City.

Under the White Civil Service law, Chapter 370, Laws of 1899, April 19, the rules apply to all positions in the service of the city of New York except officers elected by the people, all legislative officers and employés, heads of any department, or superintendents, principals, or teachers in a public school, academy, or college. This requires "examinations, wherever practicable, to ascertain the fitness of applicants for appointment to the civil service of said city." The Constitution requires that these examinations shall be competitive, "so far as practicable."

## APPLICATIONS.

Applications are only received when an examination is ordered for a position.

Applications of competitors for positions must be addressed to the "Secretary of the Municipal Civil Service Commission, New York City," and must set forth:

First—The affidavit of the applicant showing his age, whether a citizen of the United States, giving his place of residence, with the street and number thereof, if any; the place, nature, and extent of his education, and of his business training and experience, and stating whether he has ever been in the civil service of the city of New York, or in the military or naval service of the United States, and if so, when and where.

Second—A statement whether such application is limited to any particular office in the service.

Third—The certificate of four reputable persons of the city of New York, that they have been personally acquainted with the applicant for at least one year, and believe him to be of good moral character, of temperate and industrious habits, and in all respects fit for the service he wishes to enter, and that each of them is willing that such certificate should be published for public information, and will upon request give such further information concerning the applicant as he may possess.

Applicants for the following positions must, before being admitted to examination, present satisfactory evidence as to the following facts:

First—If the position to be filled be that of physician, surgeon, medical officer, medical superintendent, or medical inspector, that the applicant is duly authorized by the laws of the State of New York to practise medicine and surgery.

In positions where the duties are professional, technical, or expert, the candidates will be required to present evidences of the preliminary training or technical education they have undergone to qualify them for such situations before they can be admitted to examination.

In all examinations for professional positions, or positions requiring technical knowledge, no person shall be placed on the eligible list who obtains a rating in technical knowledge of less than 75.

## CONDUCT OF EXAMINATIONS.

Applicants shall be admitted to examination upon the production of the official notification to appear for that purpose.

All paper upon which examinations are to be written shall be furnished to the applicants by the examining board and shall bear some suitable official indorsement, stamp, or mark, for the purpose of identifying the same.

All examinations shall be in writing, except such as refer to expertness or physical qualities, and except as herein otherwise provided.

The sheets of questions shall be numbered and shall be given out in the order of their numbers, each, after the first, being given only when the competitor has returned to the examiners the last sheet given to him. In general, no examination shall extend beyond five hours without intermission; and no questions given out at any session, to any candidate, shall be allowed to be answered at another session.

Each examiner shall exercise all due diligence to secure fairness and prevent all collusion and fraud in the examinations.

The time allowed for completing the examination shall be announced before the first paper is given out.

The following municipal departments and offices come under jurisdiction of Civil Service rules:

Accounts, Com. of.
Armory, Board of.
Assessors, Board of.
Bellevue and Allied Hospitals.
Board of Ambulance Service.
Board of Inebriety.
Board of Water Supply.

Sinking Fund Commission.
Street Cleaning, Dept. of.
Taxes and Assessm'ts, Dept. of.
Tenement House Dept.
Water Supply, Gas, and Electricity, Dept. of.

Inspectors of Elections and Poll Clerks are not subject to competitive examination.

# University Forum of America.

AN educational institution of travelling professorships of eminent men of action, and original investigators, whose lectures are based on personal experience and observation. The lectures are delivered before the leading universities, colleges and other educational bodies throughout North America, Europe and in other parts of the world.

The Forum acts as a standing committee, a bureau of information, a clearing-house, through which universities and colleges may promptly and readily secure national leaders to speak at first-hand and authoritatively concerning their particular line of life-work and activity.

*President*—Alexander Cumming, LL. B., A. M., Ph. D., 550 West 113th Street, New York. *Secretary*—Almeron W. Smith, A. M. *Treasurer*—Henry Clews, Ph. D., LL. D.

# Regents' Examinations in New York State in 1914.

REGENTS' EXAMINATIONS under the control of the Education Department of the State of New York (office, Albany, N. Y.) will be held in 1914 at the following times and places: Jan. 19-23 inclusive, at New York, and about 800 academies and high schools; June 15-19 inclusive, at New York, and about 800 academies and high schools. Examinations for teachers' certificates are held on the same dates as the Regents', and August 13-14 and 10-14, Sept. 14-16, inclusive, at New York, Albany, Syracuse, Buffalo; 33 subjects. September examinations are for professional and technical students only. Morning session begins 9.15 o'clock. Afternoon session begins 1.15 o'clock. For conditions governing examinations, see WORLD ALMANAC for 1913, page 161.

UNIVERSITY CREDENTIALS—Preliminary (preacademic) certificate—reading, writing, spelling, elementary English, arithmetic, geography, and elementary United States history and civics. Students from countries where English is not the mother tongue must pass an examination in second year English for any one of the professional certificates.

LAW, MEDICINE, DENTISTRY, ETC.—Sixty count qualifying certificates. All candidates taking Regents' examinations for qualifying certificates in law, dentistry, veterinary science, for admission to examination for certified public accountant, and for certified shorthand reporter, must earn counts upon examination as follows:

English, three years, 10 counts; elementary algebra, 5 counts; plane geometry, 5 counts; physics and chemistry, 10 counts, or physics and biology, 10 counts, or chemistry and biology, 10 counts; any second year foreign language, 10 counts; American history with civics, 5 counts; electives, 15 counts.

The electives shall be: English fourth year, 3 counts; Latin second year, or Greek second year, or French second year, or German second year, or Spanish second year, or Italian second year, or Hebrew second year, 10 counts; advanced algebra, 5 counts; advanced arithmetic, 2 counts; physical geography, 5 counts; ancient history, 5 counts; *history of Great Britain and Ireland, 5 counts; *modern history 1, 3 counts; *modern history 2, 3 counts; economics, 2 counts; elementary bookkeeping and business practice, 3 counts; advanced bookkeeping and office practice, 5 counts; shorthand 1, 5 counts; shorthand 2, 5 counts; †elementary representation, 2 counts; †advanced design, 2 counts, †advanced representation, 2 counts.

PROFESSIONAL CERTIFICATES WITHOUT EXAMINATION—Candidates having credentials which can be accepted in place of examinations should send them to the Education Department.

MEDICAL EXAMINATIONS—Examinations for license to practise medicine in this State will be held as follows: Jan. 27-30, May 19-22, June 23-26, Sept. 22-25, at New York, Albany, Syracuse, and Buffalo. (Each candidate is notified as to exact place.)

PHARMACY AND DRUGGIST EXAMINATIONS—Jan. 28-29, May 20-21, June 24-25, Sept. 23-24.

CHIROPODY EXAMINATIONS—Jan. 27-28, May 19-20, June 23-24, Sept. 22-23.

DENTAL EXAMINATIONS—Dates and places of examinations same as Medical Examinations shown above, except that no examination is given in May. The practical examination is held on the Saturday morning following the regular examinations.

VETERINARY EXAMINATIONS—Dates and places of examinations same as Medical Examinations shown above.

CERTIFIED PUBLIC ACCOUNTANTS—Dates of examinations: Jan. 27-29, June 23-25, at New York, Albany, Syracuse, and Buffalo.

CERTIFIED SHORTHAND REPORTERS.—Examinations on the first two days of the other regular professional examinations, when there are applicants, in January and June of each year.

REGISTRATION OF NURSES—Two examinations will be held annually in January and June respectively. Applications should be made at least ten days in advance to Education Department, Examination Division, Albany, N. Y. Dates: Jan. 27-29, June 23-25, at New York, Albany, Syracuse, and Buffalo. (Each candidate is notified as to exact place.)

OPTOMETRY EXAMINATIONS—Examinations Jan. 27-29, June 23-25, Sept. 22-24. (Each candidate is notified as to exact place.) Application should be made at least one week in advance to Education Department, Examinations Division, Albany, N. Y.

*Candidates who have credit in history of Great Britain and Ireland (3 or 5) may receive credit for modern history 2 but not for modern history 1. Candidates who have credit in European history may not have credit in modern history 1 or 2.
†Candidates who have credit in elementary drawing based on the 1905 syllabus will receive no additional counts for passing elementary representation, but will receive two counts for passing advanced design and two counts for passing advanced representation. Candidates who have credit for advanced drawing general based on the 1905 syllabus can obtain no additional counts in drawing.

# National Statuary Hall.

WORKS of art in the Capitol Building, Washington, have been acquired by gift from private individuals interested in the preservation of the historical, biographical, or pictorial art of the nation; by the gift from States, as instanced by the statues of distinguished citizens forming the collection in Statuary Hall, and by purchase by the Government. A general supervision of the art works of the Capitol is exercised by the Joint Committee on the Library. This committee also has charge of accessions to the art works of the Capitol Building, except as otherwise provided by law.

Statuary Hall, formerly the hall of the House of Representatives, was established as Statuary Hall by act of Congress of July 2, 1864. By this legislation a National Hall of Statuary was created, and the President was authorized to invite each State to contribute to the collection to be formed; two statues, in either marble or bronze, of deceased citizens of the State whom "for historic renown or from civil or military services" the State should consider as worthy of commemoration in this National Hall of Statuary.

The following is a list of statues presented by the States and the dates of the works:

| STATE. | Name. | Date. | STATE. | Name. | Date. |
|---|---|---|---|---|---|
| Alabama | J. L. M. Curry | 1906 | New Jersey | Richard Stockton | 1886 |
| Connecticut | Roger Sherman | 1872 | " | Philip Kearny | 1875 |

# Prosecution of Trusts by the United States.

THE following is the status on October 1, 1913, of the cases brought by the United States under the terms of the Sherman Anti-Trust act:

United States vs. A. Haines et al. Southern Florida.—Two indictments returned December 6, 1911, for unlawful combination and conspiracy. Plea of guilty entered March 21, 1913, and sentenced to four hours' confinement by U. S. Marshal.

United States vs. Pacific Coast Plumbing Supply Association et al. Southern California.—Petition in equity filed December 18, 1911, alleging unlawful restraint of trade. Decree enjoining defendants entered January 6, 1912.

United States vs. Keystone Watch Case Company et al. Eastern Pennsylvania.—Petition in equity filed December 20, 1911, alleging unlawful contracts, combinations and conspiracies with a view to monopolize. Issues joined, testimony completed.

United States vs. American Naval Stores Company et al. Southern Georgia.—Petition in equity filed January 8, 1912, alleging unlawful combination and conspiracy in restraint of trade. Pending on demurrer. Expediting certificate filed. Demurrer overruled January 2, 1913.

United States vs. New Departure Manufacturing Company et al. Western New York.—Indictment returned January 8, 1912, charging unlawful combination and conspiracy. Plea in abatement overruled April 2, 1912. Demurrer overruled March 12, 1913. Fines aggregating $81,500 imposed May 27, 1913.

United States vs. North Pacific Wharves and Trading Company et al. District of Alaska.—Indictment returned February 12, 1912, charged with conspiring to monopolize coal business at Skagway. Demurrer sustained May 3, 1912.

United States vs. Pacific and Arctic Railway and Navigation Company et al. District of Alaska.—Indictment returned February 12, 1912, charging conspiracy and unlawful monopoly. Demurrer sustained May 3, 1912.

United States vs. North Pacific Wharves and Trading Company et al. District of Alaska.—Indictment returned February 12, 1912, charging conspiracy and unlawful combination. Demurrer overruled May 3, 1912.

United States vs. Pacific and Arctic Railway and Navigation Company et al. District of Alaska.—Indictment returned February 13, 1912, charging conspiracy and unlawful monopoly. Demurrer sustained, except as to corporation defendants to count No. 6.

United States vs. John H. Patterson et al. Southern Ohio.—Indictment returned February 22, 1912, charging conspiracy and unlawful monopoly. Demurrer overruled June 26, 1912. Verdict guilty, February 13, 1913. Pending on appeal.

United States vs. American-Asiatic Steamship Company et al. Southern New York.—Petition in equity filed March 30, 1912, charging unlawful combination and conspiracy.

United States vs. Miller (New York Charcoal Company) et al. Eastern New York.—Indictment returned April 2, 1912, charging conspiracy, etc. Demurrer sustained October 17, 1912.

United States vs. International Harvester Company et al. Minnesota.—Petition in equity filed April 30, 1912, alleging monopoly. Taking of testimony completed.

United States vs. Aluminum Company of America. Western Pennsylvania.—Petition in equity filed May 16, 1912, to prevent further monopoly. Decree granting relief entered June 7, 1912.

United States vs. Herman Sielchen et al. Southern New York.—Petition in equity filed May 18, 1912, to prevent a further restraint upon interstate and foreign commerce in coffee. Motion for preliminary injunction denied. Order of dismissal entered May 29, 1913.

United States vs. Prince Line (Limited) et al. Southern New York.—Petition in equity filed June 5, 1912, charging defendants with monopoly by means of conspiracies, etc. Issue joined and testimony now being taken.

United States vs. Central-West Publishing Company, Western Newspaper Union, American Press Association et al. Chicago, Ill.—Petition in equity filed August 3, 1912. Consent decree; granting relief as prayed for, entered August 3, 1912.

United States vs. Associated Billposters and Distributors of the United States and Canada and others. Chicago, Ill.—Petition in equity filed August 3, 1912, charging conspiracy.

United States vs. Motion Picture Patents Company and others. Philadelphia, Pa.—Petition in equity filed August 15, 1912, to remove restraints imposed upon interstate and foreign trade.

United States vs. Calvin N. Payne and others. (Standard Oil.) Dallas, Tex.—Indictment returned August 29,1912. Nolle prosequi entered Feb. 25, 1913.

United States vs. Consolidated Rendering Co. Massachusetts.—Indictment returned October 31, 1912, charging monopoly of interstate trade and commerce.

United States vs. the Master Horseshoers' National Protective Association of America and others. Eastern Michigan.—Petition in equity filed December 12, 1912, charging conspiracy in restraint of trade and commerce.

United States vs. Philadelphia Jobbing Confectioners' Association et al. Eastern Pennsylvania.—Petition in equity filed December 13, 1912, charging defendants with unlawfully interfering with interstate commerce. Consent decree entered February 17, 1913.

United States vs. Elgin Board of Trade et al. Northern Illinois.—Petition in equity filed December 14, 1912, charging defendants with combining and conspiring in the interest of a number of large centralizing concerns to restrain interstate commerce in butter and butter fat, and arbitrarily fixing the price thereof to obtain throughout the United States, regardless of the law of supply and demand.

United States vs. Charles S. Mellen, Edson J. Chamberlin, and Alfred W. Smithers. Southern New York.—Indictment returned December 23, 1912, charging Charles S. Mellen, President of the New York, New Haven & Hartford Railroad Company; Edson J. Chamberlin, President of the Grand Trunk Railway Company of Canada; and Alfred W. Smithers, Chairman of the Board of Directors of the Grand Trunk Railway Company of Canada, with engaging in a combination and conspiracy to restrain interstate commerce by preventing the construction of subsidiary lines.

United States vs. Kellogg Toasted Corn Flake Company et al. Eastern Michigan.—Petition in equity filed December 26, 1912, alleging that the business policy of the defendant company in fixing and enforcing resale prices on Kellogg's Toasted Corn Flakes is unlawful and tends to restrain and monopolize interstate commerce in said product.

United States vs. Page et al. Portland, Ore.—Indictment returned February 5, 1913, charging fifteen individuals, through the medium of the Produce Merchants' Exchange, of Portland, Ore., with unlawfully controlling the purchase, distribution, and sale of approximately 90 per cent. of the produce, fruit, and vegetables shipped into the State of Oregon. The defendants entered pleas of guilty on February 21, 1913, and fines aggregating $8,450 were imposed and collected.

United States vs. Krentler-Arnold Hinge Last Company et al. Eastern Michigan.—Petition in equity filed February 7, 1913, alleging that defendant controls the price of practically all shoe and boot lasts, both patented and unpatented, manufactured in the United States. Consent decree enjoining defendants was entered at Detroit, Michigan, on February 7, 1913.

United States vs. United Shoe Machinery Company, of New Jersey, et al. Trenton, N. J.—Petition in equity filed February 8, 1913, seeking to have annulled an alleged unlawful contract involving "inseam trimming machines."

United States vs. the Southern Wholesale Grocers' Association et al. Birmingham, Ala.—Petition for rule to show cause why an attachment for a criminal contempt of court for alleged violation of the terms of a decree entered October 17, 1911, should not issue was filed on February 10, 1913. The association and three individual members were adjudged guilty of contempt of court, and fines aggregating $5,500 were imposed on July 29, 1913.

United States vs. Board of Trade of the City of Chicago et al. Chicago, Ill.—Petition in equity filed February 11, 1913, attacking rule 33 of the Chicago Board of Trade, by virtue of which it is alleged the price of all corn, oats, wheat, and rye arriving in Chicago at times when the Board of Trade is not in session is arbitrarily determined and controlled without competition.

United States vs. the Cleveland Stone Company et al. Cleveland, Ohio.—Petition in equity filed February 12, 1913, charging defendants with establishing and maintaining a practical monopoly of the stone business, by means of various unlawful contracts, to wit, holding out subsidiary companies as competitors, influencing architects, allowing rebates, fixing resale prices, etc.

United States vs. the Delaware, Lackawanna & Western Railroad Company and the Delaware, Lackawanna & Western Coal Company. Trenton, N. J.—Petition in equity filed February 13, 1913, charging defendants with transporting coal in which it had an interest in violation of the Interstate Commerce act, and with entering into an unlawful contract whereby the Coal Company acquired a monopoly of the sale of anthracite coal produced along the line of the Railroad Company, in violation of the Sherman Anti-Trust act.

United States vs. the McCaskey Register Company et al. Cleveland, Ohio.—Petition in equity filed February 20, 1913, charging defendants with conspiring to restrain and monopolize the manufacture and sale of account registers and appliances.

United States vs. International Brotherhood of Electrical Workers, Local Unions Nos. 9 and 134, et al. Chicago, Ill.—Petition in equity filed February 24, 1913, seeking to enjoin defendants from interfering in any way or manner with the business of the Postal Telegraph-Cable Company.

United States vs. Corn Products Refining Company et al. New York City.—Petition in equity filed March 1, 1913, charging defendants with monopolizing interstate trade and commerce in corn products, praying for the dissolution of the combination and other appropriate relief.

United States vs. the American Thread Company et al. Trenton, N. J.—Petition in equity filed March 3, 1913, charging defendants with monopolizing the thread industry, and praying for such relief as may be necessary to restore competition.

United States vs. the Burroughs Adding Machine Company et al. Detroit, Mich.—Petition in equity filed March 3, 1913, alleging conspiracy to monopolize the adding-machine industry. Defendants having voluntarily agreed to refrain from committing acts of the character complained of, a consent decree was entered at Detroit on March 3, 1913.

United States vs. American Coal Products Company et al. New York City.—Petition in equity filed March 3, 1913, charging defendants with monopolizing the supply of coal tar and restraining the trade of competitors. Defendants having voluntarily offered to meet the demands of the Government, a form of decree was approved by the Court on March 4, 1913.

United States vs. Terminal Railroad Association of St. Louis et al. St. Louis, Mo.—Petition in equity filed March 4, 1913, alleging conspiracy to suppress and eliminate competition in various rates for the transportation of soft coal from the State of Illinois to the city of St. Louis, Mo.

United States vs. the New Departure Manufacturing Company et al. Rochester, N. Y.—Petition in equity filed May 27, 1913, alleging conspiracy to discourage and suppress competition. An agreed decree granting relief sought by the Government was entered at Rochester on May 27, 1913.

United States vs. White et al. Southern West Virginia.—Indictment returned June 7, 1913, against nineteen members of the United Mine Workers of America, alleging a conspiracy to unionize the miners in West Virginia and force the price of labor so high that the increased cost of production would tend to suppress and destroy the competition existing in the shipment and sale in interstate commerce between coal mined in West Virginia and certain other States.

United States vs. Eastman Kodak Company et al. Buffalo, N. Y.—Petition in equity filed June 9, 1913, alleging that defendants by purchasing numerous competing companies and adopting terms of sale tending to restrict and eliminate competition have acquired a monopoly, and praying for a dissolution of the combination and other relief deemed to be necessary to restore natural competitive conditions.

United States vs. the Quaker Oats Company et al. Chicago, Ill.—Petition in equity filed June 11, 1913, alleging that defendants by purchasing the plants of competitors and by means of trade agreements and arrangements acquired control of approximately 90 per cent. of the entire interstate trade and commerce in oatmeal products and by-products in the United States.

United States vs. Hippen et al. Western Oklahoma.—Indictment returned June 25, 1913, against the Oklahoma Brokerage Company and two other corporations and the officers thereof, alleging a conspiracy to restrain and monopolize interstate trade and commerce in fruits, vegetables and other articles of produce.

United States vs. Thompson et al. Southern New York.—Indictment returned July 1, 1913, alleging that the defendants conspired to purchase upon the New York Cotton Exchange for future delivery quantities of cotton greatly in excess of the amount available for acquisition and delivery thus creating such an abnormal demand that excessive prices would prevail, and committed other acts tending to materially restrain interstate trade and commerce in cotton.

United States vs. American Telephone & Telegraph Company et al. Portland, Ore.—Petition in equity filed July 24, 1913, seeking to destroy the monopoly of the telephone business on the Pacific Coast acquired by the defendants and restore competitive conditions.

United States vs. Reading Company et al. (Anthracite Coal Trust). Philadelphia, Pa.—Petition in equity filed September 2, 1913.

## SUMMARY OF CASES UNDER ANTI-TRUST LAWS.

PRESIDENT HARRISON'S ADMINISTRATION.
Four bills in equity.
Three indictments.
Total ..... 7

PRESIDENT CLEVELAND'S ADMINISTRATION.
Four bills in equity.
Two indictments.
Two informations for contempt.
Total ..... 8

Eighteen bills in equity.
Twenty-five indictments.
One forfeiture proceeding.
Total ..... 44

PRESIDENT TAFT'S ADMINISTRATION.
Forty-six bills in equity.
Forty-two indictments.
One contempt.
Total ..... 89

PRESIDENT WILSON'S ADMINISTRATION TO SEPTEMBER 12, 1913.
Five bills in equity.
Three indictments.
Total ..... 8

# The Sherman Law.

THE following is the text of the Sherman law concerning Trusts:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled:

Sec. 1. Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal. Every person who shall make any such contract, or engage in any such combination or conspiracy, shall be deemed guilty of a misdemeanor, and, on conviction thereof, shall be punished by a fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both said punishments in the discretion of the Court.

Sec. 2. Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a misdemeanor, and on conviction thereof, shall be punished by fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the Court.

Sec. 3. Every contract, combination in form of trust or otherwise, or conspiracy, in restraint of trade or commerce in any Territory of the United States, or the District of Columbia, or in restraint of trade or commerce between any such Territory and another, or between any such Territory or Territories and State or States or the District of Columbia, or with foreign nations, or between the District of Columbia and any State or States or foreign nations, is hereby declared illegal. Every person who shall make any such contract or engage in any such combination or conspiracy, shall be deemed guilty of a misdemeanor, and on conviction thereof, shall be punished by fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both said punishments in the discretion of the Court.

Sec. 4. The several Circuit Courts of the United States are hereby invested with jurisdiction to prevent and restrain violations of this act; and it shall be the duty of the several District-Attorneys of the United States, in their respective districts, under the direction of the Attorney-General, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petition setting forth the case and praying that such violation shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition the Court shall proceed, as soon as may be, to the hearing and determination of the case; and pending such petition and before final decree, the Court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises.

Sec. 5. Whenever it shall appear to the Court before which any proceeding under Sec. 4 of this act may be pending, that the ends of justice require that other parties should be brought before the Court, the Court may cause them to be summoned, whether they reside in the district in which the Court is held or not; and subpoenas to that end may be served in any district by the marshal thereof.

Sec. 6. Any property owned under any contract or by any combination, or pursuant to any conspiracy (and being the subject thereof) mentioned in Sec. 1 of this act, and being in the course of transportation from one State to another, or to a foreign country, shall be forfeited to the United States, and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure and condemnation of property imported into the United States contrary to law.

Sec. 7. Any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared to be unlawful by this act may sue therefor in any Circuit Court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the costs of suit, including a reasonable attorney's fee.

Sec. 8. That the word "person" or "persons" wherever used in this act shall be deemed to include corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the Territories, the laws of any State or the laws of any foreign country.

Approved July 2, 1890.

# United States Pension Statistics.

NUMBER OF ARMY AND NAVY PENSIONERS ON THE ROLL JUNE 30, 1913.

Regular Establishment—Invalids, 14,561; widows, 4,397.

Service—Act of May 11, 1912, 379,064; act of February 6, 1907, 16,241.

Civil War, General Law—Invalids, 62,125; widows, 62,519.

Civil War, Act of June 27, 1890—Invalids, 5,274; minors, etc., 4,280.

Civil War, Act of April 19, 1908—232,864.

War with Spain—29,015.

War of 1812—Widows, 199.

War with Mexico—Survivors, 1,142; widows, 5,123.

Indian Wars—Survivors, 1,066; widows, 2,330.

Total pensioners on roll June 30, 1913, 820,200.

Total number of original applications during fiscal year ending June 30, 1913, 27,881.

Total number of original claims allowed for fiscal year ending June 30, 1913, 19,346.

Number of pensioners on roll June 30, 1913—Invalids, 503,633; widows, 316,567; total, 820,200.

Paid pensioners during 1913, $174,171,660.80.

(For number of pension claims, pensioners and disbursements, by years, from 1867 to 1912, see WORLD ALMANAC for 1913, page 166.)

Expenses of the Pension Bureau and agencies in disbursing pension fund for the fiscal year ending June 30, 1913, $2,543,246.39.

All the pension agencies have been consolidated, and all pensioners are now paid by the Commissioner of Pensions through the Disbursing Clerk of the Pension Bureau, Washington, D. C.

TOTAL DISBURSEMENTS FOR PENSIONS FOR ALL WARS AND OF THE PEACE ESTABLISHMENT.

War of the Revolution (estimate), $70,000,000; war of 1812 (service pension), $45,923,014.46; Indian wars (service pension), $12,241,273.61; war with Mexico (service pension), $47,232,572.34; civil war, $4,294,596,944.47; war with Spain and insurrection in the Philippine Islands, $42,185,230.84; regular establishment, $28,461,369.52; unclassified, $16,499,419.44. Total disbursements for pensions, $4,557,539,824.68.

The following are the rates for total disability from causes incident to the service:

**Army**—Lieutenant-colonel and all officers of higher rank, $30; major, surgeon, and paymaster, $25; captain, provost marshal, and chaplain, $20; first lieutenant, assistant surgeon, and deputy provost marshal, $17; second lieutenant and enrolling officer, $15; enlisted men, $8.

**Navy**—Captain and officers of higher rank, commander, lieutenant commanding and master commanding, surgeon, paymaster, and chief engineer, respectively ranking with commander by law, $30; lieutenant, surgeon, paymaster, and chief engineer, respectively ranking with lieutenant by law, and passed assistant surgeon, $25; master, professor of mathematics, assistant surgeon, assistant paymaster and chaplain, $20; first assistant engineer, ensign, and pilot, $15; cadet midshipman, passed midshipman, midshipman, clerks of admirals, paymasters, or other officers commanding vessels, second and third assistant engineers, master's mate, and warrant officers, $10; enlisted men, $8.

**Marine Corps**—Lieutenant-colonel and officers of higher rank, $30; major, $25; captain, $20; first lieutenant, $17; second lieutenant, $15; enlisted men, $8.

Pension at certain ages on account of service in the civil and Mexican wars. Act of May 11, 1912. Any person who served ninety days or more in the military or naval service of the United States during the late civil war, and who has been honorably discharged therefrom, and who has reached the age of sixty-two years or over, on making proof of such facts is entitled to receive a pension as follows: Age sixty-two years—For a service of 90 days, $13.00 per month; 6 months, $13.50; 1 year, $14.00; 1½ years, $14.50; 2 years, $15.00; 2½ years, $15.50, and 3 years and more, $16.00. Age 66 years—For a service of 90 days, $15.00 per month; 6 months, $15.50; 1 year, $16.00; 1½ years, $16.50; 2 years, $17.00; 2½ years, $18.00, and 3 years and more, $19.00. Age 70 years—For a service of 90 days, $18.00 per month; 6 months, $19.00; 1 year, $20.00; 1½ years, $21.50; 2 years, $23.00; 2½ years, $24.00, and 3 years and more, $25.00. Age 75 years—For a service of 90 days, $21 per month; 6 months, $22.50; 1 year, $24.00; 1½ years, $27.00, and 2 years and more, $30.00. And such pension shall commence from the date of filing the application in the Bureau of Pensions. Any person who served sixty days or more in the war with Mexico, and who received an honorable discharge, is entitled to $30.00 per month. Any person who was wounded in battle or in line of duty in the civil war, and is now unfit for manual labor by reason thereof, or who from disease or other causes incurred in line of duty resulting in his disability, is now unable to perform manual labor, is entitled to $30.00 per month.

# Patent Office Procedure.

THE following statement has been revised by the Patent Office for THE WORLD ALMANAC for 1914:

Patents are issued in the name of the United States, and under the seal of the Patent Office, to any person who has invented or discovered any new and useful art, machine, manufacture, or composition of matter or any new and useful improvement thereof, or any new original and ornamental design for an article of manufacture, not known or used by others in this country before his invention or discovery thereof, and not patented or described in any printed publication in this or any foreign country, before his invention or discovery thereof or more than two years prior to his application, and not in public use or on sale in the United States for more than two years prior to his application, unless the same is proved to have been abandoned; upon payment of the fees required by law and other due proceedings had.

Every patent contains a grant to the patentee, his heirs or assigns, for the term of seventeen years, except in the case of design patents, of the exclusive right to make, use, and vend the invention or discovery throughout the United States and the Territories, referring to the specification for the particulars thereof.

If it appear that the inventor, at the time of making his application, believed himself to be the first inventor or discoverer, a patent will not be refused on account of the invention or discovery, or any part thereof, having been known or used in any foreign country before his invention or discovery thereof, if it had not been before patented or described in any printed publication.

Joint inventors are entitled to a joint patent; neither can claim one separately. Independent inventors of distinct and independent improvements in the same machine cannot obtain a joint patent for their separate inventions; nor does the fact that one furnishes the capital and another makes the invention entitle them to make application as joint inventors; but in such case they may become joint patentees by means of a deed of assignment.

No person otherwise entitled thereto will be debarred from receiving a patent for his invention or discovery, by reason of its having been first patented or caused to be patented by the inventor or his legal representatives or assigns in a foreign country, unless the application for said foreign patent was filed more than twelve months prior to the filing of the application in this country, and four months in cases of designs, in which case no patent shall be granted in this country.

## APPLICATIONS.

If an inventor wishes to file an application for patent, a copy of the Rules of Practice, containing forms and instructions, will be sent upon request. It is advisable, however, in every case, that the services of a competent registered patent attorney be secured, as the value of patents depends largely upon the skilful preparation of the specification and claims. The Patent Office cannot recommend any particular attorney or firm, but advises applicants to avoid doing business with those who advertise the possession of unusual facilities for obtaining patents.

Applications for a patent must be made in writing to the Commissioner of Patents. The applicant must also file in the Patent Office a written description of the invention or discovery, and of the manner and process of making, constructing, compounding, and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art or science to which it appertains, or with which it is most nearly connected, to make, construct, compound, and use the same; and in case of a machine, he must explain the principle thereof, and the best mode in which he has contemplated applying that principle, so as to distinguish it from other inventions, and particularly point out and distinctly claim the part, improvement, or combination which he claims as his invention or discovery. The specification and claim must be signed by the inventor and attested by two witnesses.

When the nature of the case admits of drawings, the applicant must furnish a drawing of the required size, signed by the inventor or his attorney in fact, and attested by two witnesses. The applicant, if required by the Patent Office, shall furnish a model of convenient size to exhibit advantageously the several parts of his invention or discovery, but a model should not be sent unless first called for by the Patent Office.

The applicant shall make oath that he verily believes himself to be the original and first inventor or discoverer of the art, machine, manufacture, composition, or improvement for which he solicits a patent; that he does not know and does not believe that the same was ever before known or used, and shall state of what country he is a citizen and where he resides, and whether he is the sole or joint inventor of the invention claimed in his application. In every original application the applicant must distinctly state under oath that the invention has not been patented to himself or to others with his knowledge or consent in this or any foreign country for more than two years prior to his application, or on an application for a patent filed in any foreign country by himself or his legal representatives or assigns more than twelve months prior to his application in this country, or four months in cases of designs. If any application for patent has been filed in any foreign country by the applicant in this country or by his legal representatives or assigns, prior to his application in this country, he shall state the country or countries in which such application has been filed, giving the date of such application, and shall also state that no application has been filed in any other country or countries than those mentioned; that to the best of his knowledge and belief the invention has not been in public use or on sale in the United States nor described in any printed publication or patent in this or any foreign country for more than two years prior to his application in this country. Such oath may be made before any person within the United States authorized by law to administer oaths, or, when the applicant resides in a foreign country, before any minister, chargé d'affaires, consul, or commercial agent holding commission under the Government of the United States, or before any notary public, judge or magistrate having an official seal and authorized to administer oaths in that country whose authority shall be proved by a certificate of a diplomatic or consular officer of the United States, except that no acknowledgment may be taken by any attorney appearing in the case.

On the filing of such application and the payment of the fees required by law, if, on examination, it appears that the applicant is justly entitled to a patent under the law, and that the same is sufficiently useful and important, the Commissioner will issue a patent therefor.

Every patent or any interest therein shall be assignable in law by an instrument in writing; and the patentee or his assigns or legal representatives may, in like manner, grant and convey an exclusive right under his patent to the whole or any specified part of the United States.

## REISSUES.

A reissue is granted to the original patentee, his legal representatives, or the assignees of the entire interest when, by reason of a defective or insufficient specification, or by reason of the patentee claiming as his invention or discovery more than he had a right to claim as new, the original patent is inoperative or invalid, provided the error has arisen from inadvertence, accident, or mistake, and without

PATENT OFFICE PROCEDURE—*Continued.*

any fraudulent or deceptive intention. Reissue applications must be made and the specifications sworn to by the inventors, if they be living.

## FEES.

Fees must be paid in advance, and are as follows: On filing each original application for a patent, $15. On issuing each original patent, $20. In design cases: For three years and six months, $10; for seven years, $15; for fourteen years, $30. On every application for the reissue of a patent, $30. On filing each disclaimer, $10. For certified copies of patents and other papers in manuscript, ten cents per hundred words and twenty-five cents for the certificate; for certified copies of printed patents, eighty cents. For uncertified printed copies of specifications and drawings of patents, five cents each. For recording every assignment, agreement, power of attorney, or other paper, of three hundred words or under, $1; of over three hundred and under one thousand words, $2; for each additional thousand words, or fraction thereof, $1. For copies of drawings, the reasonable cost of making them. The Patent Office is prepared to furnish positive photographic copies of the drawings of pending patented or abandoned cases, in sizes and at rates as follows: Large size, 10x15 inches, twenty-five cents; medium size, 8x12½ inches, fifteen cents. Negative photographic copies of specifications and drawings of foreign patents, or of any page or part of page of any printed publication in the possession of the office, will be furnished on paper 7x11 inches, for 15 cents per sheet. Fee for examining and registering trade-mark, $10, which includes certificate. Stamps cannot be accepted by the Patent Office in payment of fees. Stamps and stamped envelopes should not be sent to the office for replies to letters, as stamps are not required on mail matter emanating from the Patent Office.

## PATENT OFFICE STATISTICS.

The receipts of the Patent Office during the year ending December 31, 1912, were $2,118,158.30, and expenditures, $2,022,066.11. Receipts over expenditures, $96,092.19. Total net surplus to December 31, 1912, $7,160,017.95.

The following is a statement of the business of the office for the year ending December 31, 1912:

| | |
|---|---|
| Number of applications for patents | 68,968 |
| Number of applications for design patents | 1,850 |
| Number of applications for reissue patents | 158 |
| Total | 70,976 |
| Number of applications for registration of trade-marks | 7,215 |
| Number of applications for registration of labels | 885 |
| Number of applications for prints | 309 |
| Number of disclaimers filed | 15 |
| Number of appeals on the merits | 1,732 |
| Total | 10,156 |

| | |
|---|---|
| Number of patents granted, including designs | 37,573 |
| Patents reissued | 158 |
| Total | 37,731 |
| Number of trade-marks registered | 5,020 |
| Number of labels registered | 633 |
| Number of prints registered | 243 |
| Total | 5,896 |
| Number of patents expired | 20,883 |
| Number of patents forfeited for non-payment of final fees | 7,494 |
| Number of applications allowed awaiting final fees | 13,303 |
| Number of trade-mark applications passed for publication | 5,117 |

The total number of applications filed at the Patent Office in seventy-five years, 1837-1912, was 1,926,009; number of original patents, including designs and reissues issued, 1,106,235.

There is now no law permitting the filing of a caveat, the old law having been repealed July 1, 1910. Patent No. 1,000,000 was granted August 8, 1911, to F. H. Holton, of Akron, O., for an automobile tire.

The following is a statement of patents and designs issued in 1912 according to residence of patentees:

Alabama, 181; Alaska, 5; Arizona, 65; Arkansas, 135; California, 1,658; Canal Zone, 14; Colorado, 467; Connecticut, 969; Delaware, 60; District of Columbia, 271; Florida, 124; Georgia, 238; Hawaii, 30; Idaho, 94; Illinois, 3,441; Indiana, 776; Iowa, 660; Kansas, 458; Kentucky, 238; Louisiana, 204; Maine, 128; Maryland, 315; Massachusetts, 2,231; Michigan, 1,054; Minnesota, 609; Mississippi, 101; Missouri, 1,152; Montana, 116; Nebraska, 304; Nevada, 36; New Hampshire, 101; New Jersey, 1,683; New Mexico, 64; New York, 5,103; North Carolina, 168; North Dakota, 151; Ohio, 2,395; Oklahoma, 259; Oregon, 278; Pennsylvania, 3,356; Philippine Islands, 9; Porto Rico, 4; Rhode Island, 279; South Carolina, 84; South Dakota, 149; Tennessee, 210; Texas, 550; Utah, 122; Vermont, 67; Virginia, 276; Washington, 538; West Virginia, 209; Wisconsin, 801; Wyoming, 38; U. S. Army, 5; U. S. Navy, 17. Total, †33,050.

Foreign countries: Austria-Hungary, 160; Belgium, 46; Canada, 579; Cuba, 15; Denmark, 34; England, 952; France, 369; Germany, 1,558; Italy, 66; Japan, 14; Mexico, 36; Norway, 23; Russia, 47; Scotland, 74; Sweden, 102; Switzerland, 125; other countries, 289. Total foreign, 4,489.

## GENERAL PATENT STATISTICS.

The following table is compiled from the report of the Commissioner of Patents for 1913. It exhibits the number of patents issued by foreign countries (estimated) and the United States from the earliest records to December 31, 1912:

| Countries. | To 1871 inclusive. | 1871 to 1912. | Total. | Countries. | To 1871 inclusive. | 1871 to 1912. | Total. |
|---|---|---|---|---|---|---|---|
| Austria | .... | 76,143 | 76,143 | Russia | 1,464 | 28,999 | 30,463 |
| Austria-Hungary | 15,350 | 67,583 | 82,933 | Spain | .... | 49,611 | 49,611 |

# Registration of Trade-Marks

## IN THE UNITED STATES.

THE following are extracts from the new "Act to authorize the registration of trade-marks used in commerce with foreign nations, or among the several States or Indian tribes, and to protect the same," approved February 20, 1905, and amended by act approved March 2, 1907, and by act approved February 18, 1909.

"The owner of a trade-mark used in commerce with foreign nations, or among the several States, or with Indian tribes, provided such owner shall be domiciled within the territory of the United States, or resides in or is located in any foreign country, which, by treaty, convention, or law, affords similar privileges to the citizens of the United States, may obtain registration for such trade-mark by complying with the following requirements: First, by filing in the Patent Office an application therefor, in writing, addressed to the Commissioner of Patents, signed by the applicant, specifying his name, domicile, location, and citizenship; the class of merchandise and the particular description of goods comprised in such class to which the trade-mark is appropriated; a statement of the mode in which the same is applied and affixed to goods, and the length of time during which the trade-mark has been used; a description of the trade-mark itself shall be included, if desired by the applicant or required by the Commissioner, provided such description is of a character to meet the approval of the Commissioner. With this statement shall be filed a drawing of the trade-mark, signed by the applicant, or his attorney, and such number of specimens of the trade-mark, as actually used, as may be required by the Commissioner of Patents. Second, by paying into the Treasury of the United States the sum of ten dollars, and otherwise complying with the requirements of this act and such regulations as may be prescribed by the Commissioner of Patents.

"A certificate of registration shall remain in force for twenty years, except that in the case of trade-marks previously registered in a foreign country such certificates shall cease to be in force on the day on which the trade-mark ceases to be protected in such foreign country, and shall in no case remain in force more than twenty years, unless renewed. Certificates of registration may be, from time to time, renewed for like periods on payments of the renewal fees required by this act, upon request by the registrant, his legal representatives, or transferees of record in the Patent Office, and such request may be made at any time not more than six months prior to the expiration of the period for which the certificates of registration were issued or renewed. Certificates of registration in force at the date at which this act takes effect shall remain in force for the period for which they were issued, but shall be renewable on the same conditions and for the same periods as certificates issued under the provisions of this act, and when so renewed shall have the same force and effect as certificates issued under this act.

"The registration of a trade-mark under the provisions of this act shall be prima facie evidence of ownership. Any person who shall, without the consent of the owner thereof, reproduce, counterfeit, copy, or colorably imitate any such trade-mark and affix the the same to merchandise of substantially the same descriptive properties as those set forth in the registration, or to labels, signs, prints, packages, wrappers, or receptacles intended to be used upon or in connection with the sale of merchandise of substantially the same descriptive properties as those set forth in such registration, and shall use, or shall have used, such reproduction, counterfeit, copy, or colorable imitation in commerce among the several States, or with a foreign nation, or with the Indian tribes, shall be liable to an action for damages therefor at the suit of the owner thereof; and whenever in any such action a verdict is rendered for the plaintiff, the court may enter judgment therein for any sum above the amount found by the verdict as the actual damages, according to the circumstances of the case, not exceeding three times the amount of such verdict, together with the costs."

No trade-mark will be registered which consists of or comprises immoral or scandalous matter, or which consists of or comprises the flag or coat of arms or other insignia of the United States, or any simulation thereof, or of any State or municipality, or of any foreign nation, or which consists of or comprises any design or picture that has been adopted by any fraternal society as its emblem, or of any name, distinguishing mark, character, emblem, colors, flag, or banner adopted by any institution, organization, club, or society which was incorporated in any State in the United States prior to the date of the adoption and use by the applicant; Provided, That said name, distinguishing mark, character, emblem, colors, flag, or banner was adopted and publicly used by said institution, organization, club, or society prior to the date of adoption and use by the applicant; unless it shall be shown to the satisfaction of the Commissioner of Patents that the mark was adopted and used as a trade-mark by the applicant or applicant's predecessors, from whom title is derived, at a date prior to the date of its adoption by such fraternal society as its emblem, or which trade-mark is identical with a registered or known trade-mark owned and in use by another, and appropriated to merchandise of the same descriptive properties, or which so nearly resembles a registered or known trade-mark owned and in use by another, and appropriated to merchandise of the same descriptive properties as to be likely to cause confusion or mistake in the minds of the public, or to deceive purchasers; or which consists merely in the name of an individual, firm, corporation, or association, not written, printed, impressed, or woven in some particular or distinctive manner or in association with a portrait of the individual, or merely in words or devices which are descriptive of the goods with which they are used, or of the character or quality of such goods, or merely a geographical name or term; no portrait of a living individual will be registered as a trade-mark, except by the consent of such individual evidenced by an instrument in writing; and no trade-mark will be registered which is used in unlawful business, or upon any article injurious in itself, or which has been used with the design of deceiving the public in the purchase of merchandise, or which has been abandoned.

Any mark, used in commerce with foreign nations or among the several States or with Indian tribes, may be registered if it has been in actual and exclusive use as a

REGISTRATION OF TRADE-MARKS—*Continued.*

trade-mark of the applicant, or his predecessors from whom he derived title, for ten years next preceding the passage of the act of February 20, 1905.

By act of Congress approved February 18, 1909, the second section of the trade-mark act was amended so as to read as follows:

"The application prescribed in the foregoing section, in order to create any right whatever in favor of the party filing it, must be accompanied by a written declaration verified by the applicant, or by a member of the firm or an officer of the corporation or association applying, to the effect that the applicant believes himself or the firm, corporation, or association in whose behalf he makes the application to be the owner of the trade-mark sought to be registered, and that no other person, firm, corporation, or association, to the best of the applicant's knowledge and belief, has the right to use such trade-mark in the United States, either in the identical form or in such near resemblance thereto as might be calculated to deceive; that such trade-mark is used in commerce among the several States, or with foreign nations, or with Indian tribes, and that the description and drawing presented truly represent the trade-mark sought to be registered. If the applicant resides or is located in a foreign country, the statement required shall, in addition to the foregoing, set forth that the trade-mark has been registered by the applicant, or that an application for the registration thereof has been filed by him in the foreign country in which he resides or is located, and shall give the date of such registration, or the application therefor, as the case may be, except that in the application in such cases it shall not be necessary to state that the mark has been used in commerce with the United States or among the States thereof. The verification required by this section may be made before any person within the United States authorized by law to administer oaths, or, when the applicant resides in a foreign country, before any minister, charge d'affaires, consul, or commercial agent holding commission under the Government of the United States, or before any notary public, judge, or magistrate having an official seal and authorized to administer oaths in the foreign country in which the applicant may be whose authority shall be proved by a certificate of a diplomatic or consular officer of the United States."

TRADE-MARK TREATIES WITH FOREIGN NATIONS.

The following is a list of the Governments with which conventions for the reciprocal registration and protection of trade-marks have been entered into by the United States—Austria-Hungary, Belgium, Denmark, France, Germany, Great Britain (including colonies), Italy, Japan (including China and Korea), Luxemburg, Mexico, Russia, Roumania, Servia, Spain. The laws of Switzerland and the Netherlands being so framed as to afford reciprocal privileges to the citizens or subjects of any Government which affords similar privileges to the people of those countries, the mere exchange of diplomatic notes, giving notice of the fact, accomplishes all the purposes of a formal convention.

# The United States Public Health Service.

RUPERT BLUE, SURGEON-GENERAL.

THE United States Public Health Service is a bureau of the Treasury Department. The head of the bureau is a commissioned medical officer, with the title of Surgeon-General. The work of the Service is administered, under direction of the Surgeon-General, by seven bureau divisions—Personnel and Accounts, Scientific Research, Foreign and Insular Quarantine, Domestic (Interstate) Quarantine, Sanitary Reports and Statistics, Marine Hospitals and Relief and Miscellaneous.

The commissioned corps of the Service consists of medical officers of the following grades: Surgeon-General, Assistant Surgeon-Generals (chiefs of divisions of the bureau), Senior Surgeons, Surgeons, Passed Assistant Surgeons, and Assistant Surgeons. Appointments in the corps are made to the grade of Assistant Surgeon, after successful examination. Qualifications for examination are graduation from a reputable medical college, one year's hospital experience or two years' professional work after graduation, and testimonials from responsible persons as to professional and moral character. Applicants for examination must be between the ages of 23 and 32 years.

The Public Health Service maintains twenty-two marine hospitals and 125 other relief stations throughout the country. Fifty-one quarantine stations in the United States and twenty-five stations in its insular possessions are also operated, and eighty-one stations for the medical inspection of immigrants. Eighteen officers are stationed at American consulates abroad to assist in the administration of quarantine and the inspection of immigrants.

At the Hygienic Laboratory, located in the city of Washington, research work in connection with investigations of disease, sanitation and water pollution is carried on, and tests are made of the purity and potency of viruses, serums and toxins, with the supervision of the manufacture and sale of which the Public Health Service is charged by law.

The Public Health Service co-operates with State and local Boards of Health in the eradication of epidemic diseases, such as plague, cholera, yellow fever, typhus fever, smallpox and leprosy. Details of officers are also made, on request from State and municipal health authorities, to assist in the suppression of typhoid fever, infantile paralysis, cerebro-spinal meningitis, and other diseases. The Public Health Service has supervision of measures for the prevention of the spread of infectious and contagious diseases in interstate traffic; the administration of matters in relation to the Interstate Quarantine Regulations regarding the prevention of the use of the common towel and common drinking cup on vehicles or vessels operating in interstate traffic and the certification of water and ice furnished by common carriers for passengers in interstate traffic. Among the signal achievements of the Service in recent years in the field of public health work have been the eradication of bubonic plague in California and Porto Rico, and the suppression of yellow fever in the South.

In addition to the commissioned medical corps, the services of 241 Acting Assistant Surgeons (physicians appointed locally and not subject to change of station) were required to conduct the operations of the Service during the fiscal year ending June 30, 1913. During this year 50,604 patients were treated—14,097 in hospitals and 36,507 at dispensaries. At quarantine stations 7,821 vessels, carrying 599,955 passengers and crews, were inspected, and 1737 vessels disinfected. Immigrants to the number of 1,574,371 were inspected, and 38,558 certified for rejection on account of physical and mental defects. At the immigrant hospitals at Ellis Island, N. Y., conducted by Service officers under the supervision of Commissioner of Immigration, 10,165 patients were admitted to treatment.

# The Chamber of Commerce

## OF THE UNITED STATES OF AMERICA.

ORGANIZED at the National Commercial Conference called by the President of the United States and held at Washington, D.C., April 22 and 23, 1912.

*President*—Harry A. Wheeler, Chicago, Ill. *Vice-Presidents*—J. N. Teal, Portland, Ore., for Western States; W. D. Simmons, St. Louis, Mo., for Southern Central States; A. B. Farquhar, York, Pa., for Eastern States, and H. E. Miles, Racine, Wis., for Northern Central States. *Treasurer*—John Joy Edson, Washington, D. C. *Chairman Executive Committee*—John H. Fahey, Boston, Mass. *General Secretary*—Elliot H. Goodwin, Washington, D. C. *Assistant Secretary*—D. A. Skinner, Washington, D. C. *Field Secretary*—E. F. Trefz, Chicago, Ill. *Chief, Editorial Division*—Grosvenor Dawe, Washington, D. C.

PURPOSES—To encourage and promote the organization of associations of business men in all parts of the country. To study the work of existing organizations and their value to their respective trades and communities, and to clear the information thus acquired for the benefit of all organizations desiring to increase their efficiency. To advocate the standardization of association methods and of association effort, and to urge the adoption of those standards which have been found most effective in so far as they may be applicable to local or trade conditions.

To study the work performed by all Government Bureaus in any way related to the commerce of the country, to encourage and support appropriation measures for their further development, and to utilize the data which they gather by directing it into the channels to which it is immediately applicable.

To carefully analyze all statistics with regard to the production and distribution of our manufactures at home and abroad; to be watchful of every influence calculated to retard our commercial development, and to become a source of information with respect to new opportunities for trade expansion, especially in foreign markets.

When debatable policies affecting our National commerce are advocated by the Federal authorities, there should be a recognized organization capable of expressing the business opinion of the entire country available for conference, alike to the Executive and legislative branches of the Government. It is the purpose of the Chamber of Commerce of the United States of America to act in this capacity—not to originate legislation, nor to be unnecessarily critical of legislation proposed by others, but rather to assume that the National Government desires to act in harmony with the commercial interests of the country and will accept our co-operation in an endeavor to make all business legislation constructive.

There are three great wealth-producing factors in our National life—Commerce, Labor and Agriculture. Labor, through its State and National organizations, strives for legislation in its own interest and presents its demands with the united voice of two million union workers. Agriculture likewise presents its demands through its National organization, and these are heeded in both State and National Legislatures. Commerce has been organized into local and trade groups, but not as an effective National unit, and it is to provide such a unit, as powerful as those enjoyed by Labor and Agriculture, that the Chamber of Commerce of the United States is now organized. These three great factors, through their National organizations, may find a means for co-operation on many subjects in which there is a vital joint interest.

ORGANIZATION MEMBERSHIP—Every commercial or manufacturers' association not organized for private purposes shall be eligible for membership in the Chamber. Such associations shall be of two classes.

First—Local or State commercial or business organizations whose chief purpose is the development of the commercial and industrial interests of a single State, city or locality.

Second—Local, State, interstate or National organizations whose membership is confined to one trade, or group of trades.

REPRESENTATION—Each member of the Chamber of Commerce of the United States of America shall be entitled to one delegate and one vote for the first twenty-five members, and one delegate and one vote for each additional two hundred members in excess of twenty-five, but no member shall be entitled to more than ten delegates and ten votes. Organizations having less than twenty-five members may be admitted to membership if in the judgment of the Board of Directors their importance would justify their admission, and these shall be entitled to one delegate and one vote.

INDIVIDUAL MEMBERSHIP—Persons, firms and corporations who are members in good standing of any organization admitted to the Chamber are eligible for election as individual members. Individual members receive the regular publications of the Chamber and they may avail themselves of the facilities of the National headquarters; may attend all regular and special meetings of the Chamber and, subject to the rules of such meetings, may have the privilege of the floor, but they are not entitled to vote except as duly accredited delegates of organization members.

---

# The United States Government Printing Office.

IN this establishment practically all the printing for the United States Government is done except the manufacture of paper money and postage stamps. The Public Printer is the executive head of the Government Printing Office. Directly or through his principal officers he purchases all materials and machinery subject to the provisions of law, disburses all money, appoints all officers and employés, and exercises general supervision over the affairs of the office. The Superintendent of Documents has general supervision over the distribution of all public documents, excepting those printed for the use of the two Houses of Congress and for the Executive Departments. He is required to prepare a comprehensive index of public documents and consolidated index of Congressional documents, and is authorized to sell at cost any public document in his charge, the distribution of which is not specifically directed.

The principal officers are as follows: Public Printer, Cornelius Ford; Deputy Public Printer, Henry T. Brian; Chief Clerk, William J. Dow; Private Secretary, Joseph P. O'Lone; Purchasing Agent, Edward S. Moores; Superintendent of Work, Daniel V. Chisholm, Foreman of Printing, T. Frank Morgan, Congressional Record Clerk, William A. Smith; Superintendent of Documents, Frank C. Wallace.

**Penalties for usury** differ in the various States. California, Colorado, Maine, Massachusetts (except on loans of less than $1,000), Montana and Nevada have no provisions on the subject. Loss of *principal and interest* is the penalty in Arkansas and New York. Loss of principal in Delaware and Oregon.

Loss of interest in Alabama, Alaska, District of Columbia, Florida, Idaho, Illinois, Iowa, Louisiana, Michigan, Minnesota, Mississippi, Nebraska, New Jersey, North Carolina (double amount if paid), North Dakota (double amount if paid), Oklahoma, South Carolina, South Dakota, Texas, Virginia, Washington (double amount if paid), Wisconsin, Hawaii, and Wyoming.

Loss of excess of interest in Connecticut, Georgia, Indiana, Kansas, Kentucky, Maryland, Missouri, New Hampshire (three times), New Mexico, Ohio, Pennsylvania, Tennessee, Vermont, and West Virginia. Loss of principal and interest in Rhode Island. also fine or imprisonment.

# National Grange, Patrons of Husbandry.

*Master*—Oliver Wilson, Peoria, Ill. *Overseer*—L. H. Healey, North Woodstock, Ct. *Lecturer*—N. P. Hull, Dimondale, Mich. *Steward*—D. C. Mullen, Nampa, Idaho. *Assistant Steward*—George R. Shaefer, Appleton, Wis. *Chaplain*—C. F. Smith, Morrisville, Vt. *Treasurer*—Mrs. Eva S. McDowell, Wellesley, Mass. *Secretary*—C. M. Freeman, Tippecanoe City, Ohio. *Gate Keeper*—A. E. Judson, Balfour, Iowa. *Ceres*—Mrs. E. E. Pattee, Plymouth, N. H. *Flora*—Mrs. Ida Judson, Balfour, Iowa. *Pomona*—Mrs. Cordelia Atkeson, Morgantown, W. Va. *L. A. Steward*—Mrs. Mary A. Smith, Morrisville, Vt. *High Priest*—George W. F. Gaunt, Mullica Hill, N. J. *Priest Archon*—Oliver Wilson, Peoria, Ill. *Priest Annalist*—F. E. Marchant, Kingston, R. I.

The following proposed legislation is favored by the National Grange, representing the farmers of the United States:

1. Free delivery of mails in the rural districts be placed upon the same permanent footing as the delivery of mails in the cities, and the appropriations to be commensurate with the demands and the benefits of the service. 2. Postal savings banks. 3. Election of United States Senators by direct vote of the people. 4. An amendment to the Constitution granting the power to Congress to regulate and control all corporations and combinations. 5. Enlargement of the powers and duties of the Interstate Commerce Commission, giving it authority to determine what changes shall be made or what practices are discriminative or unreasonable, and their findings to be immediately operative and so to continue until overruled by the courts. 6. Regulation of the use of shoddy. 7. Pure food laws. 8. Extension of the markets for farm products equally with manufactured articles. 9. An anti-trust law, clearly defining what acts on the part of any corporation would be detrimental to public welfare. 10. The speedy construction of a ship canal connecting the Mississippi River with the Great Lakes and the Great Lakes with the Atlantic Ocean. 11. Revision of the fees and salaries of all Federal officers, and placing them on a basis of similar service in private business. 12. Parcel post, telephone and telegraph in the mail service. 13. National and State aid to improve the public highways.

The National Grange has established over 30,000 subordinate granges in 44 States and Territories.

# Fisheries of the United States.

(Compiled by the Bureau of the Census, Department of Commerce.)

| Sections. | Vessels Employed. No. | Vessels Employed. Tons. | Persons Employed. (1) | Capital Invested. (2) | Value of Products. |
|---|---|---|---|---|---|
| South Atlantic States (1908) | 534 | 5,029 | 17,961 | $2,324,000 | $4,034,000 |
| Gulf States (1908) | 915 | 13,665 | 15,387 | 3,901,000 | 4,824,000 |
| Middle Atlantic States (1908) | 3,165 | 45,208 | 54,163 | 11,105,000 | 16,302,000 |
| New England States (1908) | 1,623 | 44,219 | 22,157 | 11,970,000 | 15,139,630 |
| Great Lakes (1908) | 319 | 4,499 | 8,533 | 4,814,000 | 3,767,000 |
| Mississippi River and Tributaries (1908) | 39 | 273 | 11,825 | 1,440,000 | 3,125,000 |
| Pacific Coast States (1908) | 294 | 15,618 | 13,855 | 6,468,000 | 6,839,000 |
| Alaska Territory (1912) | 504 | 98,978 | 24,263 | 38,263,457 | 18,877,480 |
| Total | 7,393 | 227,489 | 168,144 | $80,285,457 | $72,908,110 |

(1) The figures for persons employed are not comparable with those of prior reports compiled by the Bureau of Fisheries, as the figures for 1908 do not include those employed in packing and canning establishments. (2) The figures for amount of capital invested are not comparable with prior reports, as the figures for 1908 do not include the investment in packing houses and canneries.

Pacific Fisherman's (January, 1913, issue) estimate of Pacific coast (including Alaska) canned salmon pack in 1912: Chinooks and king, 346,901 cases; sockeye and Alaska red, 2,099,673 cases; cohoes, silversides, 456,508 cases; pinks and chums, 2,060,280 cases; steelheads, 7,198 cases. Total, 4,960,377 cases.

1 case = 48 pounds.

## UNITED STATES BUREAU OF FISHERIES.

DEPARTMENT OF COMMERCE.

The work of the Bureau of Fisheries comprises (1) the propagation of useful food fishes, including lobsters, oysters and other shellfish, and their distribution to suitable waters; (2) the inquiry into the causes of decrease of food fishes in the lakes, rivers and coast waters of the United States, the study of the waters of the coast and interior in the interest of fish-culture, and the investigation of the fishing grounds of the Atlantic, Gulf and Pacific coasts, with the view of determining their food resources and the development of the commercial fisheries; (3) the collection and compilation of the statistics of the fisheries and the study of their methods and relations. The bureau also has jurisdiction over the fur-seal herds and the salmon fisheries of Alaska. Office, Sixth and B Streets, Washington, D. C. The official force of the bureau is as follows: *Commissioner*, Hugh M. Smith; *Deputy Commissioner*, E. Lester Jones; *Chief Clerk*, I. H. Dunlap. *Chief, Division of Alaska Fisheries*, Barton W. Evermann. *Assistants in Charge of Division: Inquiry Respecting Food Fishes*, Henry F. Moore; *Fish Culture*, Robert S. Johnson; *Statistics and Methods*, A. B. Alexander; *Architect and Engineer*, Hector von Bayer.

# The Life-Saving Service.

The ocean and lake coasts of the United States are picketed with the stations of the Life-Saving Service attached to the United States Treasury Department. Sumner I. Kimball is general superintendent, with headquarters at Washington, and there is a corps of inspectors, superintendents, station keepers, and crews, extending over the entire coast line, together with a board on life-saving appliances, composed of experts selected from the Life-Saving Service, the Revenue Cutter Service, and the United States Coast and Geodetic Survey and the Army.

At the close of last fiscal year the life-saving establishment embraced 285 stations, 203 being on the Atlantic and Gulf coasts, 62 on the lakes, 19 on the Pacific coast, and 1 at the Falls of the Ohio, Louisville, Ky. In the following table are the important statistics of the service:

| | Year Ending June 30, 1913. | Since Introduction of Life-Saving System in 1871, to June 30, 1913. | | Year Ending June 30, 1913. | Since Introduction of Life-Saving System in 1871, to June 30, 1913. |
|---|---|---|---|---|---|
| Disasters | 552 | 26,184 | Shipwrecked persons succored at stations | 437 | 24,754 |
| Value property involved | $14,657,240 | $333,893,224 | Days' succor afforded | 756 | 55,388 |
| Value property saved | $12,936,025 | $270,088,037 | Vessels totally lost on U. S. coasts | 66 | ..... |
| Value property lost | $1,721,215 | $63,805,187 | | | |
| Persons involved | 5,787 | 168,373 | | | |
| Persons lost | 73 | 1,417 | | | |

In addition to the number of disasters shown for 1913, there occurred 1,191 casualties to small craft, such as launches, sailboats, rowboats, etc., on which were 3,254 persons, of whom 14 were lost. The cost of the maintenance of the service during the year was $2,204,074.50.

## U. S. Volunteer Life-Saving Corps.

(Incorporated and Organized in most of the States.)

*President*—James R. Howe; *Secretary*—Charles H. Scott; *Treasurer*—Ernest H. Luebbers, Jr.; *General Superintendent*—Charles E. Raynor. Headquarters, 63-65 Park Row, New York City.

Three hundred First Aid stations where equipment is placed.

Twenty-three stations owned by Corps—twenty houses; three houseboats.

Three houses not owned by Corps but under its control and used for stations.

Fifty boats owned by Corps which do patrol work along the 450 miles of water front in New York City.

Three hundred boats owned by volunteers carrying Corps flags do patrol duty along New York City water front.

These boats decrease the number of drownings yearly by rendering assistance, and also by preventing people from going out too far, thereby taking great risk.

One thousand one hundred men enlisted since June. 1,500 to 2,000 persons instructed in swimming daily in city baths during the Summer by city-paid instructors. 1,500 children awarded certificates for learning to swim. 4,159 First Aid cases. 375 boats assisted, with 1,875 occupants. 400 rescues, where lives of rescuers were in danger. Four lives saved by pulmotor at Coney Island during the Summer.

### HOUSES OWNED BY CITY DEPARTMENT OF U. S. VOLUNTEER LIFE-SAVING CORPS.

1. Orchard Beach.
2. Hunt's Point.
3. Barretto Point.
4. Port Morris, 133d St., E. R.
5. Astoria, foot of Wardell St.
6. Harlem, foot E. 100th St.
7. E. 89th St.
8. E. 58th St. Greenpoint Charity Building.
9. W. 99th St.
10. Fort Washington Point, W. 175th St.
11. Bay Ridge, 65th St.
12. Fort Hamilton.
13. South Beach.
14. Raritan Bay.
15. Sheepshead Bay Point. Thalis Sheepshead Bay Hills.
16. 36th St., Coney Island.
17-18. 15th St., Coney Island, two.
19. Rockaway, W.
20. Harway Ave., Coney Island Creek.
21. Houseboat, Hook Creek.
22. Houseboat, Bergen Landing.
23. Houseboat, Old Mill Creek. Midland Beach, use of room.

## National Women's Life-Saving League.

ORGANIZED for work among women and children. Its purposes are: To encourage swimming by women and children; to co-operate with other organizations, whenever advisable, in the dissemination of knowledge on life-saving from drowning and "first aid" to the injured; to encourage interest and promote efficiency in swimming and life-saving by the holding of annual competitions for medals, prizes and the like; to encourage and advocate simplicity and rationalism in bathing and swimming costumes; to establish an athletic branch for the supervision of athletics for women by women, in order to raise the dignity of such branch of outdoor sports so that all women may participate in the healthful and instructive exercises of swimming and life-saving; to advocate the general adoption of swimming and life-saving—Rescue and Resuscitation—as a branch of elementary education.

It conducts free classes of instruction in swimming at all the municipal plunges, free competitions for the entertainment and benefit of its members, and public exhibition drills for the purpose of public instruction. The dues of the league are 50 cents a year, to cover postage and incidentals, bringing the membership of the organization within the reach of all working women.

*President*—Katherine F. Mohrtens. *Vice-President*—Florence West. *Treasurer*—Sarah L. Marrin. *Secretary*—Adeline Trapp, 143 Havemeyer Street, Brooklyn, N. Y. Headquarters for 1914, 25 Clinton Street, Brooklyn, N. Y.

## The Non-Smokers' Protective League.

THE Non-Smokers' Protective League was organized in New York, May 9, 1910. *President*, Dr. Chas. G. Pease. *Secretary*, John S. Nichols. *Directors:* Chancellor James R. Day, Syracuse. President David Starr Jordan, Leland Stanford University; Dr. Harvey W. Wiley; Prof. Burt G. Wilder, Cornell; Rev. Dr. Jenkin Lloyd Jones, Chicago; Prof. Thomas B. Stowell, University of Southern California; Prof. Winfield S. Hall, Northwestern University; Prof. W. A. McKeever, Kansas State Agricultural College; Dr. J. W. Seaver; Dr. Stephen F. Peckham, Brooklyn, and William H. Douglas, William B. Chapman, Asa F. Smith, Horace Greeley Knapp, Charles H. Valentine, George A. Rutherford, T. O. Abbott, Alphonse Major, New York; G. L. Fabri, New York; F. W. Roman, University of S. Dakota, and Dr. Charles G. Pease of New York City.

Membership is open to any one in sympathy with the purposes of the league.

## International Peace Forum.

To promote peace among the nations of the world, by encouraging a systematic study of the causes of war and the best methods to effect its abolition:

1. By the maintenance of a literary bureau for the moulding of public opinion regarding the various phases of the peace movement and the appalling nature and consequences of war;
2. By conducting a speakers' bureau to secure representative men for mass meetings, religious and patriotic services, conferences, conventions, chautauquas and congresses;
3. By organizing in every State in the Union and throughout the world, auxiliaries of the Forum, to be controlled and directed from the international headquarters;
4. By the speedy discovery and execution of the means best calculated to unite the nations of the earth in a proclamation establishing compulsory arbitration and consequent abolition of war;
5. Also to work for the establishment of peace in the industrial world, by diffusing information relating to economic questions, and thus safeguard the rights of life, liberty and property—securing such conditions of industrial and economic competition as are fundamental to the peace of the world.

The Forum in endeavoring to bring about industrial peace is striving for the enactment of a measure which will make illegal the calling of a strike until the lapse of a fixed period of time for the purpose of investigation by an impartial tribunal, which shall render a report on the merits of the controversy. Official Organ "The Peace Forum," published monthly.

*Honorary President*—Hon. William H. Taft; *President*—John Wesley Hill; *Vice-President*—Charles W. Fairbanks; *Treasurer*—Henry Clews. Headquarters, 185 Madison Avenue, New York City.

# The United States Revenue Cutter Service.

THE United States Revenue Cutter Service is a military arm of the Government attached to and under the direction of the Treasury Department. The Service was organized in 1790 and constituted the original naval force of the country. There being at that time no Navy Department, the Service was placed under the Treasury Department, where it has remained ever since. It is charged with the enforcement of the navigation and customs laws of the United States, the assistance of vessels in distress, the protection of the sealing industry in Alaska, the enforcement of the quarantine laws, the destruction of derelicts and other floating dangers to navigation, and numerous other duties appropriate to its class of vessels. Each Winter, by direction of the President, a number of the cutters patrol the coast for the special purpose of assisting vessels in distress. The Service co-operates with the Navy when directed by the President and has so co-operated in every war in which the United States has been engaged. The officers of the Service are commissioned by the President and hold rank by law with officers of the Army and Navy as follows:

Captain-Commandant with Colonel in the Army and Captain in the Navy; Senior Captains and Engineer-in-Chief with Lieutenant-Colonels in the Army and Commanders in the Navy; Captains with Majors in the Army and Lieutenant-Commanders in the Navy; First Lieutenants with Captains in the Army and Lieutenants in the Navy; Second Lieutenants with First Lieutenants in the Army and Lieutenants (Junior Grade) in the Navy; Third Lieutenants with Second Lieutenants in the Army and Ensigns in the Navy.

There are now in the Service 228 commissioned officers and cadets on the active list, and 1,500 petty officers and enlisted men. The officers are: 1 Captain-Commandant, 6 Senior Captains, 51 Captains, 37 First Lieutenants, 42 Second Lieutenants, 35 Third Lieutenants, 22 Cadets of the line, 1 Engineer-in-Chief, 6 Captains of Engineers, 28 First Lieutenants of Engineers, 22 Second Lieutenants of Engineers, 13 Third Lieutenants of Engineers, 4 Cadet Engineers and 2 Constructors.

Commissioned officers of the line are appointed from Cadet graduates of the School of Instruction at New London, Ct. The Cadet course covers three years and embraces professional and academic subjects. Cadets are appointed after competitive examinations, conducted by boards of commissioned officers of the Revenue Cutter Service. Candidates must be not less than eighteen nor more than twenty-four years of age.

Appointments to the Engineer Corps are made after competitive examination, and successful candidates are appointed Cadet Engineers for a period of six months prior to being commissioned Third Lieutenants of Engineers in the Service. Candidates for the Engineer Corps must be not less than twenty-one nor more than twenty-six years of age.

The present Commandant of the Service is Captain-Commandant Ellsworth P. Bertholf, U. S. R. C. S., and Engineer-in-Chief Chas. A. McAllister, U. S. R. C. S., is head of the Engineer Corps.

The organization of the Division of Revenue Cutter Service is as follows:

Captain Preston H. Uberroth, U. S. R. C. S., in charge of Personnel and Operations; Second Lieutenant William Williams, U. S. R. C. S., Assistant for Personnel.

LIST OF VESSELS OF THE REVENUE CUTTER SERVICE.

# The United States Lighthouse Service.

BUREAU of Lighthouses. Commissioner, George R. Putnam; Deputy Commissioner, John S. Conway; Chief Constructing Engineer, Horatio B. Bowerman; Superintendent of Naval Construction, George Warrington; Chief Clerk, T. S. Clark.

The Lighthouse Service is charged with the establishment and maintenance of lighthouses, light-vessels, buoys, and other aids to navigation on the coasts and rivers of the United States, as authorized by Congress, and with the direction of the offices, depots and tenders required in this work.

The field work of the service is divided into nineteen districts, each in charge of an inspector.

# American and Foreign Shipping.

UNITED STATES MERCHANT MARINE, 1913.

| Class. | Employment. | | | | | | Total. | |
|---|---|---|---|---|---|---|---|---|
| | Foreign. | | Coastwise. | | Fisheries. | | | |
| | Number. | Gross Tons. | Number. | Gross Tons. | Number. | Gross Tons. | Number. | Gross Tons. |
| Steam | 810 | 666,593 | 13,624 | 4,647,174 | 647 | 21,732 | 15,081 | 5,335,499 |

| Adriatic‡ | 40,790 |
| Baltic | 40,740 |
| **FRENCH LINE.** | |
| France | 27,000 |

* Burns about 1,000 tons of coal a day, on a full day's run. † Burns about 740 tons a day. ‡ Burns about 600 tons a day. § Burns about 280 tons a day. ** Burns about 265 tons a day.

# Fastest Atlantic Ocean Passages.

| *Route.* | *Steamer.* | *Line.* | *Date.* | *D.* | *H.* | *M.* |
|---|---|---|---|---|---|---|
| Queenstown to New York | Mauretania | Cunard | Sept. 11-15, 1910 | 4 | 10 | 41 |
| New York to Queenstown | Mauretania | Cunard | Sept. 15-20, 1909 | 4 | 13 | 41 |
| Cherbourg to New York | Kronprinz. Cecilie | No. Germ. Lloyd. | Aug. 19-25, 1908 | 5 | 11 | 9 |
| New York to Southampton | Kaiser Wilh. d. Gr'se. | No. Germ. Lloyd. | Nov. 23-29, 1897 | 5 | 17 | 8 |
| New York to Havre | France | French | Aug. 22-28, 1912 | 5 | 17 | .. |
| New York to Cherbourg | Kaiser Wilh. d. Gr'se. | No. Germ. Lloyd. | Jan. 4-10, 1900 | 5 | 16 | .. |
| New York to Plymouth | Kronprinz. Cecilie | No. Germ. Lloyd. | Sept. 14-20, 1909 | 5 | 7 | 25 |
| New York to Naples | Deutschland | Hamburg-Am. | Jan. 20-28, 1904 | 7 | 16 | 44 |

The fastest day's run was made by the Mauretania of the Cunard line, January, 1911—676 knots, or 27.04 knots per hour.

Battleship Speed Record made by U. S. ship Wyoming, July 19, 1912. On the twenty-first standardization run she made a speed of 22.045 knots. This is more than half a knot better than the previous record, 21.493 knots, made by her sister ship, the Arkansas.

1905 record.—Allen line's turbine Steamer Virginian passed Cape Race June 13, 11 A. M., inward bound, having left Moville on the afternoon of June 9, thus crossing in less than four days.

The Pacific Mail Steamship Company's Steamer City of New York, left Sandy Hook, New York, December 19, 1875, anchored off Cape Virgins, entrance to Strait of Magellan, January 18, 1876, at 7 P. M., passed Cape Pillar (Pacific entrance) January 22, and arrived at San Francisco, 13,533 miles, on February 16, at 2 P. M., being the first steamer that ever made that voyage without stopping en route for coal. Time from New York 54 days, 14 hours.

Steamship development as shown in the relative proportions, speed, etc., of the Great Eastern and Imperator:

| Great Eastern. | | Imperator. | |
|---|---|---|---|
| Length | 692 ft. | Length | 919 ft. |
| Breadth | 80 ft. | Breadth | 98 ft. |
| Displacement | 27,000 tons. | Displacement | 65,000 tons. |
| Paddle, Screw and Sail: Speed | 13 to 14 knots. | Quadruple Screws | 23 knots. |

THE RECORD-BREAKERS BETWEEN NEW YORK AND QUEENSTOWN—EAST OR WEST.

# National Star-Spangled Banner Centennial.

The centennial will be held in Baltimore, Md., September 6-13, 1914, to commemorate the birth and birthplace of the National Anthem; the Battle of North Point; the defence of Fort McHenry; the achievement of national independence, and a century of peace and progress. The programme for the centennial is as follows: September 6, Patriots' Day. Special addresses, music and decorations in all churches. "Patriotism" to be the theme of the day; September 7, general reception and welcome day; arrival of old frigate Constellation off Federal Hill; general illumination of the city and historical views and moving pictures of War of 1812 scenes; September 8, Industrial Day, unveiling of monument and tablets, athletic contests, regatta and industrial and trades pageant; September 9, tournament, fraternal orders' pageant, including floats representing the States of the Union and the nationalities which have been factors in American life; September 10, municipal and civic pageant, athletic sports, unveiling of tablets and historical, patriotic and educational pageant; September 11, parade of the army, navy, National Guard, etc., unveiling of monument and tablets at North Point battlefield, dinner to distinguished guests, band concerts and Colonial garden parties at historic points in the parks; September 12, Star-Spangled Banner Day, escorting the original battle flag through the city to Fort McHenry. The escort is expected to include the President and Vice-President of the United States, members of the Cabinet, former Presidents and Vice-Presidents of the United States, and members of former Cabinets, Governors of the States and staffs, distinguished and specially invited guests, and, if possible, a troop of 100 picked men from each of the eighteen States which were in existence in 1814, assembled in a special regiment, to be known as the "Star-Spangled Banner Legion." Upon arrival at Fort McHenry a fac-simile of the original battle flag will be raised, while a human flag, composed of the school children of Baltimore, will render the "Star-Spangled Banner," assisted by the combined singing societies and bands. Dedication of Fort McHenry National Park, Defenders' Memorial Hall and Key Monument. Addresses by the President or a former President of the United States. In the evening there will be the bombardment of Fort McHenry, special fireworks terminating in a grand water carnival and the illumination of Fort McHenry flag by searchlights. On September 13, special addresses, music and decorations in all churches, "Peace" to be the theme of the day; decoration and marking of graves of "Defenders," sacred and patriotic concerts and brief addresses will close the centennial. *Executive Chairman*—A. Barneveld Bibbins. *Executive Secretary*—Robert E. Lee. Headquarters, 303 City Hall, Baltimore, Md.

STATEMENT showing the cost and date of construction, length, number of locks, and navigable depth of the principal canals of the United States used for commercial purposes.

| CANALS. | Cost of Construction.* | When Completed | Len'h miles. | No. of Locks. | Depth feet.† | Location. |

| Walhoonding | 607,269 | 1843 | 25 | 11 | 4 | Rochester, O., to Roscoe, O. |
| **Welland (ship canal) | 26,080 366 | 1833 | 26¾ | 26 | 14 | Connects Lake Ontario and Lake Erie. |

* And improvements. † Navigable depth. ** Depth to be increased to 22 feet so that vessels can navigate the waterway from the head of Lake Superior to Prescott, on the River St. Lawrence, within a hundred miles of Montreal. Total cost of improvement about $30,000,000.

‡The Erie Canal, Oswego Canal and Champlain Canal are now being enlarged by the State of New York to a depth of 12 feet, and with locks of a capacity to pass barges having a net tonnage capacity of 2,000 tons each. The enlarged Champlain Canal will probably be opened in May, 1914. It is anticipated that this entire enlargement will be completed during the year 1915. The Canal Commission has decided to use a standard size of boat which probably will be 275 feet long by 30 feet beam, with a draught of 12 feet. These will be used in transporting ore along the Champlain Canal from Port Henry to Communipaw, in New York Harbor. The cost of enlarging these three canals was not to exceed $101,000,000 and will probably be within that figure.

§The Cayuga and Seneca Canal will be enlarged to pass barges of the same capacity as the improved Erie Canal at a cost estimated at $7,000,000.

Cape Cod Canal (Sea Level Ship Canal) about 12 miles long and 25 feet deep, to connect Massachusetts Bay and Buzzard's Bay, under construction, will shorten sea route between New York and Boston by about 63 miles and will be completed about July 1, 1914.

Lake Washington Canal, through Lake Union, Seattle, Washington, to Puget Sound, under construction.

The Harlem River Ship Canal, connecting the Hudson River and Long Island Sound, by way of Spuyten Duyvil Creek and Harlem River, was opened for traffic on June 17, 1895, and cost about $2,700,000. For the year 1911, incoming tonnage, 2,011,708; outgoing tonnage, 822,571.

| FOREIGN SHIP CANALS. | Length, Miles. | Depth, Feet. | Bottom Width, Feet. | Cost. |
|---|---|---|---|---|
| Suez—Mediterranean and Red Seas | 90 | 35 | 108 | $100,000,000 |
| Cronstadt—St. Petersburg | 16 | 20½ | .... | 10,000,000 |
| Manchester—Manchester and Liverpool | 35½ | 28 | 120 | 85,000,000 |
| Kaiser Wilhelm (Kiel Canal)—Baltic and North Seas | 61 | 36 | 72 | 40,000,000 |
| Elbe and Trave | 41 | 10 | 72 | 6,000,000 |

Trent Valley Canal, from Orillia on Lake Couchichiog to the Trent River, at foot of Rice Lake, Canada, about 160 miles.
Canal, connecting Berlin with the River Oder and with Stettin.

## TONNAGE ON CANALS.

| CANALS. | Year. | Tonnage. | CANALS. | Year. | Tonnage. |
|---|---|---|---|---|---|
| Suez | 1912 | 20,125,120 | Sault Ste. Marie | 1912 | 72,472,676 |
| Manchester | 1912 | 5,339,884 | Erie | 1912 | 1,795,069 |
| Kaiser Wilhelm | 1911 | 7,580,000 | All N. Y. Canals, incl. Erie | 1912 | 2,606,116 |

## PASSING OF THE SAILING SHIP.

The efficiency of steam as compared with sail is customarily rated in the proportion of 4 to 1. Yet it was many years before the tonnage of steamships was as great as that of sailing ships and the latter have not yet died out, not less than a quarter of the world's tonnage still consisting of sail. But the disproportion grows yearly, although the expenses of maintaining the sailing ship in the absence of coal and motive power are smaller and the absence of engine space and bunkers make it possible for the sailing ship to utilize almost the whole of her capacity below deck. The London *Economist* prints the following table, showing the net tonnage of steamships and sailing vessels on the register of Great Britain and Ireland from 1840 to 1909:

| YEAR. | Steam. | Sail. | Total. | YEAR. | Steam. | Sail. | Total. |
|---|---|---|---|---|---|---|---|
| 1840 | 87,930 | 2,680,330 | 2,768,260 | 1900 | 7,207,610 | 2,096,490 | 9,304,100 |
| 1860 | 454,330 | 4,204,360 | 4,658,690 | 1909 | 10,284,810 | 1,301,060 | 11,585,870 |
| 1880 | 2,723,470 | 3,851,040 | 6.574,510 | | | | |

# The Submarine Cables of the World.

(From report issued by the Bureau International de l'Union Télégraphique.)

THE following table sets forth the entire system of submarine cables of the world, including those along the shores and in the bays, gulfs, and estuaries of rivers, but excepting those in lakes and the interior watercourses of continents. The list includes all cables operated by private companies, and in addition thereto under the name of each nation is given the list of cables operated by the government of that nation

| COMPANIES. | Number of Cables. | Length of Cables in Nautical Miles. |

# Telegraph Rates.

## WESTERN UNION TELEGRAPH COMPANY RATES.

NIGHT LETTERS of 50 words or less, address and signature free, filed before midnight, are transmitted during the night and delivered the next morning at the same rate as that shown for "Day telegrams of 10 words."

DAY LETTERS of 50 words or less, address and signature free, filed at any hour during the day, are transmitted and delivered subject to the priority of Day telegrams. Rates for Day Letters are one-half higher than rates for Night Letters.

Words above 50 in Night Letters or Day Letters are one-fifth the 50-word rate for each additional 10 or fraction of 10 words.

| Places. | Telegrams. 10 Words. Day. | 10 Words. Night. | 50 Words. Day Letter. | 50 Words. Night Letter. |

## TELEGRAPH RATES TO FOREIGN COUNTRIES.

These rates are from New York City. The address and signature are included in the chargeable matter, and the length of words is limited to fifteen letters. When a word is composed of more than fifteen letters, every additional fifteen or the fraction of fifteen letters will be counted as a word.

TELEGRAPH RATES—*Continued.*

On January 1st, 1912, a reduced rate on cable messages in plain language, taken on a delay basis, was inaugurated, and is now in effect between most countries. Deferred cable messages must be written in plain language of the country of origin or destination, must bear the declaration LCO (language country of origin), LCD (language country of destination), or LCF (language country French, as an international language), and are subordinated to full-rate messages in the order of transmission until an accumulated delay of 19 hours has occurred, when they take their turn with fully paid traffic. The tariff is generally one half the regular rate, but on deferred messages between the United States or Canada and the United Kingdom of Great Britain and Ireland the tariff is 3 cents less than half rates.

In December, 1911, the Western Union Telegraph Company inaugurated two new forms of cable service. These new services, known as cable letters and week-end letters, are the cable equivalent of night letters in the domestic telegraph service, in that they are predicated on the use of facilities that otherwise would be idle at night, and on delivery the following day. Unlike all other forms of cable service, the tolls on which invariably are charged on a word basis, cable and week-end letters are charged on a message basis. The minimum charge on cable letters is for 13 words (including a necessary prefix), and in week-end letters for 25 words (including a necessary prefix). The tariff varies according to distance, but between New York City and London is 75 cents and $1.15 for cable and week-end letters respectively.

---

On November 10, 1910, Clarence H. Mackay, President of the Commercial Cable Company and the Postal Telegraph Company announced an intended reduction in cable rates on plain language (not code) messages from 25 cents for a word not exceeding fifteen letters to 12½ cents for every five letters sent. The plan has been worked out, but instead of this plan being adopted, a plan of the Postmaster-General of Great Britain, proposed in 1909, to reduce the rates on plain language from 25 cents to 12½ cents a word, the message to be subject to a delay not exceeding 24 hours, has been accepted. It went into effect with the co-operation of the British, French and German Governments on January 1, 1912. On January 1, 1913, this rate was again reduced to 9 cents a word. Many other countries have since accepted the plan. In foreign countries the telegraph lines are owned by the Governments. The plan involves proportionate reductions of the Government rates and hence the co-operation of the Governments is necessary.

The Postal Telegraph Cable Company also transacts business in the United States, and in 1912 operated 66,154 miles of poles and 408,735 miles of wire, by means of which it reached 35,230 places.

## TELEGRAPH STATISTICS.

THE WESTERN UNION TELEGRAPH COMPANY.

Theodore N. Vail, President; Executive Offices, 195 Broadway, New York.

Capital stock outstanding, $99,786,758.96. Funded debt, $32,602,000. Capital stock in subsidiary companies not owned by Western Union, $3,881,075. Total capital liabilities, $136,269,833.96.

Annual report for fiscal year ending June 30, 1913: Gross income, $47,423,442.80; operating expenses and taxes, $42,959,933.90; net profits, $4,463,508.90; interest on bonds, $1,337,229.12; dividend (3%), $2,992,166.25; Balance to surplus, $134,113.53. Number of offices, 26,300. Miles of wire added during the year, 26,020.

| Totals | 12,652,400 | 100.0 | 30,084,100 | 100.0 | $1,738,760,000 | .... |

Total telephones in United States, December 31, 1907, 6,118,578 (United States Census); December 31, 1910, 7,596,000, of which 5,883,000 are in Bell system, leaving 1,713,000 rural and other company telephones not connected with Bell system.

The independent telephone companies of the United States, which are owned and operated entirely apart from the Bell organization, are represented in the National Independent Telephone Association, which has its headquarters in the McCormick Building, Chicago. There are about 15,000 of these companies, operating a reported aggregate of over 4,000,000 telephones, of which 2,502,627 connect with the Bell system. The capital invested is approximately $400,000,000, the number of stockholders over 500,000, and the income is roughly estimated at about $105,000,000 per annum. The independent companies, which are for the most part financed in the territories which they cover, are particularly strong throughout the middle and far West. They are established in nearly every large city in the United States except those on the Atlantic coast.

TELEPHONE DEVELOPMENT OF CITIES.
(From latest records.)

| CITY. | Telephones. | Telephones, per 100 Population. | CITY. | Telephones. | Telephones, per 100 Population. |
|---|---|---|---|---|---|
| London | 220,782 | 3.0 | Hamburg | 64,935 | 5.4 |
| New York | 441,128 | 8.8 | Shanghai | 3,691 | .6 |

* Estimated.

# National Probation Association.

ORGANIZED in 1906 as the National Probation Officers' Association; title changed to present one in 1911.

The purposes of the Association are to promote the more extensive and wise use of the probation and parole systems of dealing with both juvenile and adult offenders; also to encourage the adoption of the most approved methods of conducting children's courts. The Association holds an annual conference each Spring at the time and place of the meetings of the National Conference of Charities and Correction. It publishes an annual directory of probation officers in the United States, the proceedings of its annual conferences, and other literature. From time to time it appoints special committees to study and report on particular phases of probation, parole, and juvenile court work. Supported by membership fees and voluntary contributions

*President*—Edwin Mulready, Boston, Mass. *Vice-Presidents*—Arthur W. Towne, Brooklyn, N. Y.; Miss Julia C. Lathrop, Washington, D. C. *Secretary-Treasurer*—Hugh Fullerton, St. Louis, Mo.

# Electrical Progress in 1913.

BY CHARLES H. HUGHES.

## IN GENERAL.

During 1913 all branches of electrical engineering have advanced both theoretically and practically, as electricity is now no longer a luxury to be enjoyed by the wealthy, but has become an every day necessity for all classes. Improved apparatus has been devised for generating and transmitting electrical energy, consequently the different fields which electricity can be used in has grown even broader than those of previous years.

Particular attention should be called to the fact that for short interurban hauls electric operated trains are steadily replacing those of steam, and, furthermore, electric trains running through subways and on elevated structures have made possible the development of outlying districts by placing them within easy reach of the shopping and business centres of cities. New York City is a typical example of how electricity can build up suburban districts. For, broadly speaking, the most important uses of electricity are for transportation, communication and lighting.

Consider briefly communication. Many improvements have been made in wire and wireless telegraphy and in telephony. In wire telegraphy, by means of improved instruments, messages can be sent cheaper than heretofore. In wireless, the range of communication has increased, and work was started on towers which, with suitable transmitting instruments, will be able, it is estimated, to send messages nearly 3,000 miles. In telephony, longer distances can be talked over, and the rates have in many cities been reduced. As to lighting, new types of incandescent lamps have been brought out, which give a better light and consume less current. Improvements have also been made in arc lamps and those using mercury vapor, as well as in the different apparatus used in the manufacture of all kinds of lamps.

Besides what might be called the standard uses of electricity, as for transportation, communication and lighting, it is interesting to note the unique ones. For example, a series of experiments were made on the effect of electricity upon the growth of plants and animals. It was found that chickens grew with astounding rapidity. They surpassed the best previous record in speed of growth, and in keeping their health in crowded conditions. Then again, electricity has been used for seasoning timber and it is claimed that timber so treated is harder and stronger and is less warped by moisture than timber which has been seasoned by the ordinary air drying process.

## ELECTRIC LIGHTING.

The new electric searchlight projectors made by the Allgemeine Co., of Berlin, Germany, are among the most powerful ever produced. The important feature is the method of regulating the arc, the carbons being moved back and forth by small electric motors. Searchlights for use by airmen in aeroplanes for spying out the land at night were tested in England. The searchlights were attached to small parachutes, which were dropped from the aeroplane. It is claimed that airmen will be able to locate troops and objects within the lighted area without running great risk of discovery.

Incandescent lamps filled with nitrogen at a pressure of about an atmosphere, and having especially shaped tungsten filaments, were placed on the market. The new lamps are designed to give a higher efficient than any before manufactured.

Experiments were made by the United States Bureau of Mines to determine whether standard incandescent lamps with carbon or tungsten filaments, when the filaments were exposed to explosive gases, would ignite the gases. A simple and practical miner's lamp was placed on the market by the Edison Storage Battery Company.

An improved device for the automatic replacement of electric lamps for signalling was brought out. A disc holding four lamps is pivoted within the lantern, one lamp burning in focus with the signal lens, the other three being held in reserve.

What is reported to be the first installation in the United States of the multiple ornamental inclosed flame arc lamp was made on the exterior of a theatre in Boston, Mass.

To obtain specific information on the various forms of reflectors, experiments were made on all known makes intended for use with the 100 watt tungsten lamp by the General Electric Company.

A large electric sign, with capital letters 10 feet high and small letters 5 feet, at Framingham, Mass., presents an attractive appearance because of its light emerald green color. The sign is illuminated by light reflected from Cooper Hewitt mercury lamps, giving the sign the appearance of being painted on the clouds in phosphorescent paint.

Among the novel uses of electric lighting should be mentioned the use for night tennis playing as at Newton Centre, Mass., and at the Delmar swimming pool, St. Louis, Mo. In both installations tungsten lamps were used.

A quartz tube mercury vapor lamp using solid tungsten anodes was brought out, the chief advantage of which is its long life. Among the novelties in electric lighting are the Dim-a-lite switch, which enables the light to be gradually diminished, and a type of tungsten lamp with the filament suspended horizontally so as to give a strong illumination underneath the lamp.

A lamp was manufactured by Siemens and Halske, which while not giving a light exactly equivalent to daylight, yet resembled it very closely for practical purposes. This was accomplished by a tungsten lamp and a special glass screen, which absorbed with progressively increasing strength, rays with wave lengths between certain limits.

A large variety of fixtures for direct and indirect electric lighting were designed. A Japanese company originated a particularly attractive line, the shape and style of the shades being distinctly different from Western practice. In England a pleasing semi-indirect fitting was brought out, consisting of a translucent bowl fitted under an enamelled white reflector.

The lighting of cinematograph theatres has called for special illumination. The general practice is to use indirect and semi-indirect methods, the intensity of illumination in the auditorium being graduated from the screen outward, so people at the rear will be able to readily see the entrances and the exits.

An elaborate system for lighting the Panama Canal has been planned.

## METALLURGICAL AND CHEMICAL ENGINEERING.

Interesting experiments were carried out at Glasgow, Scotland, with the Ostermann system of metallizing different materials. A variety of articles in glass, paper, wood and stone were coated with zinc, lead, copper or their alloys, so that when the articles were bent or hammered the coating showed no signs of cracking or peeling.

A large electric steel plant was erected on the Tyne River, near Newcastle, England. The output will consist of tool, automobile and other kinds of steel which are claimed to be superior when manufactured by the electric process.

From tables compiled to March 1, 1913, Germany leads the world in the production of electrically refined steel, by the Heroult furnace, followed by the United States. It is estimated that the annual output from electric furnaces of all kinds is about 1,300,000 tons.

A method for preventing boiler corrosion was developed, in which iron anodes were introduced into the boiler, and currents were passed from them to the metal parts of the boiler.

The electro-chemical works of Rossi in Legnano, Northern Italy, conducted experiments on the production of acid proof alloys, and succeeded in obtaining one cheaply. The new alloy—cilanite—

ELECTRICAL PROGRESS IN 1913—*Continued.*

resists not only certain acids but is a good conductor of heat. Elaborate heat efficiency tests were made on two 60-ton open hearth furnaces at the Duquesne works of the Carnegie Steel Co.

An improved optical pyrometer was devised by Dr. G. A. Shook of the University of Illinois. The new instrument has a scale for furnace temperatures in addition to the scale for open temperatures.

A paper on the electrolytic theory of corrosion was read before the Faraday Society at Manchester, England. It was shown that iron can be prepared which will not rust on long exposure to air and water.

The principal types of electrode holders for furnaces, with the latest European practice pertaining to them, was published in Stahl und Eisen, Nos. 12 and 14.

A report on the progress made at the first American electric iron ore reduction plant located at Heroult, Cal., was published in Metallurgical and Chemical Engineering.

A large company was formed in England for making nitric acid from ammonia by the Ostwald process.

Ferronickel and ferrochrome are to be produced electrically by a French company, which is erecting hydro-electric power plants and smelting works at New Caledonia.

A preliminary report was issued by the Bureau of Mines, technical paper No. 15, giving results of experiments in electrolytic methods for preventing corrosion of iron and steel.

An improved type of thermo-electric pyrometer for measuring the temperature of metals such as copper, brass aluminum, bronze, etc., in their molten state was placed on the market by the Brown Instrument Co., of Philadelphia, Pa.

Dr. C. P. Steinmetz (of the General Electric Co.) devised a process for producing ammonium compounds by passing a mixture of steam and air or nitrogen through an electric arc.

The salient feature of a patent granted to W. R. Walker, of the U. S. Steel corporation for a combined Bessemer converter and electric furnace, is the recarburizing of the metal decarbonized in the Bessemer converter, the recarburizing taking place in the ladle before the metal is transferred to the electric furnace.

## TELEGRAPH AND TELEPHONE.

Wireless storm warnings and general weather forecasts for ships at sea, covering conditions 100 miles off shore all along the Atlantic Coast, were inagurated by the United States Navy Department on July 15, 1913. Every night bulletins are sent from the wireless stations at Radio, Va., and Key West, Fla.

A 35-mile telephone cable was laid between Vancouver and Vancouver Island, British Columbia, Can. It is claimed to be one of the longest telephone cables in the world, and is laid at a great depth, much of it being at a depth of 1,200 feet in the Gulf of Georgia, and at one place 1,356 feet.

The first section connecting Colombo, Ceylon, and Penang in the Malay states, of a submarine telegraph cable from Europe to Hongkong was laid. The cable will ultimately extend from Suez to Aden, Aden to Colombo, Colombo to Penang, Penang to Singapore and Singapore to Hongkong. No new section from Suez to England or to Europe is considered necessary.

A contract was signed by the Portuguese Government and the Europe and Azores Telegraph Co., for two new telegraph cables connecting the United States and England by way of the Azore Islands.

Direct wireless communication between America and Asia was established by the completion of stations at Anadyr, Siberia, and Nome, Alaska. The stations are about 500 miles apart.

Plans were prepared for one of the largest radio stations in the world, to be erected by the United States in the Canal zone. It will be known as the Darien station, and will be able, it is thought, to communicate with San Francisco, Cal., and with Arlington, Va.

Official tests of a system of wireless telephony invented by a Japanese electrician, Mr. Toripata, have led to the adoption of the system by the Japanese Government.

In a paper read before British and French engineers at Paris, Commandant G. A. Ferrie described experiments conducted between the Eiffel Tower station at Paris and the Arlington station at Washington, D. C., to determine the difference of longitude between the two cities.

According to a press report wireless telephonic communications have been successfully established between Berlin, Germany, and Vienna, Austria, a distance of 355 miles.

The English Post-Office Department has decided to lay a new telegraph cable to Germany.

A wireless direction finder was brought out by the Marconi Wireless Telegraph Co. With it the navigating officer of a ship can take bearings of wireless telegraph stations for finding the position of his ship.

The most powerful wireless telegraph station in the East was opened at Bac Mai, near Hanvi, Indo-China. Day signals have been received by ships 1,600 miles distant.

The Western Union Telegraph Co. issued a new set of specifications for the installation and operation of its quadruplex system which provides for the simultaneous transmission of four messages (two in each direction) over one wire connecting two stations.

An apparatus for discharging submerged mines by a wireless current was invented by Mr. Ulivi, an Italian engineer. It was reported that he succeeded in discharging a mine submerged 600 feet and at a distance of almost four miles from a steamer on which was his wireless apparatus.

The first installation of wireless telephony in a coal mine in Great Britain was made at Dinnington Main Colliery, South Yorkshire.

A simple system for operating a submarine cable was brought out by a British telegraph engineer. By reversing the current for each successive signal, the distinctness of the signals is so increased that the siphon recorder bids fair to be eliminated.

## ELECTRIC RAILWAYS.

The Swiss Federal Railroad placed in operation two electric locomotives of a type using a three phase current. Four speeds are given by modifying the number of pairs of poles in the motor. At full speed 2,800 H. P. can be developed.

Electrification of the lines of the Swedish State railroads from Kiruna to Riksgransen was completed, and the Government planned the electrification of the trunk lines from Stockholm to Malmo and from Stockholm to Gothenburg.

The new electric locomotives of the New York Central Railroad are claimed to be among the most powerful ever built. They can develop 1,400 H. P. continuously, and 5,000 H. P. for short periods, and can haul a 1,000-ton train at 60 miles per hour.

Preliminary steps have been taken in the proposed electrification of the Berlin (Germany) city belt and suburban railways.

An automatic trolley reverser with a patented swivelling contact whereby the lights in the car do not go out when the trolley arm is being reversed was brought out by an English company.

Among the European cities which are planning improved transit facilities are Constantinople, Turkey, and Paris, France. The former city has started work on a metropolitan electric line, and the latter city has planned to electrify its western suburban railway system.

The first direct current electric locomotives working at the high potential of 2,400 volts were

ELECTRICAL PROGRESS IN 1913—*Continued.*

placed in operation on the Butte, Anaconda and Pacific Railroad. The locomotives were furnished by the General Electric Company.

Radical changes have been made in ventilated railway motors. A forced circulation of air through the interior parts was obtained, thereby securing a higher rating for the motors.

An improved portable rail grinder was developed by the Cincinnati Traction Company. The important features are the cupped carborundum wheel, which is attached to the armature shaft, and the manner of supporting the motor on the grinder truck.

A novel departure from previous electric traction practice was made by the Norfolk and Western Railroad. The equipment of its Elkhorn Grade, Bluefield section, will consist of a single phase transmission line, with polyphase motors on the locomotive.

An improved trolley catcher was placed on the market by the Ohio Brass Company, Mansfield, Ohio. One of the important features is the elimination of the stepping up of the trolley pole after the rebound which follows the sudden stopping of a flying pole.

A simple thermostatic system for the regulation of electric heaters in trolley cars was developed by the Railway Utility Company of Chicago, Ill.

An electric train order signal with two arms, one for each direction of traffic, was brought out by the Union Switch and Signal Company. Only one lantern is needed.

The London County Council Tramways placed in use gas-electric double deck-cars. The motors can be supplied with current either from the overhead or conduit supply as an alternative to the self continued generator, so the cars can be run either purely electric or gas-electric.

At a meeting of the standardization committee of the Central Electric Railway Association a standard trolley wheel was recommended to be adopted.

POWER AND TRANSMISSION.

One of the largest hydro-electric enterprises in the world is being constructed in the district of Catalonia, Spain, by the Barcelona Traction, Light and Power Company. The company has under construction plants which will develop a total of about 140,000 H. P.

Construction work was started on the permanent electrical transmission line across the Isthmus of Panama. The line will run from Cristobal to Balboa, permitting distribution of electricity both ways from Gatun. In addition to the lighting of the canal, electricity for light and power will be furnished to the towns and cities within the Canal zone.

Work was started on a large hydro-electric station in Valais, Switzerland, which will utilize what is claimed to be the highest fall in the world. Water will be supplied from Fully Lake, about 5,360 feet above the Rhone Valley.

Electric trucks and electric cranes of the storage battery type were installed on several steamship piers in New York to relieve congestion and expedite the handling of freight.

What is claimed to be the largest turbo-generator in the world was built for the Commonwealth Edison Company of Chicago, Ill., by the General Electric Company. It is of the horizontal type, 60.5 feet long, and will generate 30,000 kilowatts.

A new apparatus was brought out for threading conduits pneumatically. A traveller to which the wire is attached is inserted in the conduit, the end of which is sealed by a plug. By means of compressed air the traveller is forced through the conduit.

In the Calabria region of Southern Italy hydro-electric developments are planned of upward 50,000 H. P. Electricity will be furnished for use in large fertilizer works, and for light and power purposes throughout Calabria.

A line of adjustable speed, reversible direct current motors for machine tool drive was developed by the General Electric Company. The same company also brought out electric furnaces for tool hardening.

With the completion by the Mexican Light and Power Company of its light and power plants in Mexico, another great hydro-electric development was put into service. The main power plants have an aggregate capacity of 127,500 H. P., and the auxiliary plants bring up the total horsepower to about 150,000.

Single electric motors for driving reversing rolling mills are now being built up to outputs of 15,500 H. P. by a German company. The motor is cooled by means of compressed air.

The 150,000 volt power transmission system of the Big Creek development of the Pacific Light and Power Company is reported to be the first system using 150,000 volts. Electricity will be delivered to Los Angeles, Cal., 275 miles distant, at this voltage.

An improved automatic feeder voltage regulator for outdoor service was placed on the market by the General Electric Company.

Improvements were made in the horn gaps for aluminum lightning arresters. Two discharge paths to the cells are provided, one of which is through the main gap and the other through an auxiliary gap with a low resistance unit in parallel with the main gap.

Among the recent developments in high tension circuit interrupting devices, the chemical fuse has proved successful under severe operations. An installation on a 66,000 volt system gave satisfactory results.

The completion of the Mississippi Dam at Keokuk, Ia., owned by the Mississippi River Power Company, inaugurated the commercial service of the world's greatest hydro-electric power plant. By means of long-distance transmission lines electricity will be available for light, power and traction over a radius of more than one hundred miles.

# International Polar Commission.

ORGANIZED at Brussels, Belgium, May 29, 1908. *President*—M. Tschernyscheff, membre de l' Académie impériale des sciences de St. Pétersbourg (Russie). *Vice-President*—D. Ortto Nordenskjold, Swedeu. *Secretary*—Rear-Admiral Robert E. Peary (U. S. N.)

MEMBERS—Prof. E. Bruckner, Prof. G. Trabert, Prof. E. Oberhummer and Prof. A. Grund, Austria; Baron Roland Eötvös, Rear-Admiral A. Gratzl, Prof. R. de Kövesligethy, and Dr. J. Kepes, Hungary; Capt. A. de Gerlache de Gomery, Brussels, and Prof. Georges Lecointe, Uccle, Belgium; Rear-Admiral Louis A. Goni, Chile; Capt. Holm, Capt. Koch, Capt. Amdrup, and Dr. la Cour, Denmark; Rear-Admiral Robert E. Peary, U. S. N., and Herbert L. Bridgman, United States; Capt. Cagni, R. N., Prof. G. Cora, Capt. Roncagli Giovanni, and Cavalli Molinelli Pietro, Italy; Dr. Van der Stok, Capt. Phaff, Dr. Van Everdingen, and J. L. H. Luymes, Netherlands; Prof. Mehedinti, Prof. Coculesco, and Prof. Stefau Popescu, Roumania; Prof. Rudmose Brown, Dr. Bruce, Dr. Bartholomew, and Dr. Richardson, Grande Bretagne; Dr. Tschernyscheff, de Schokalsky (legénéral), and Dr. Knipovitch, Russia; Dr. Baron de Geer, Dr. De Nordenskjold, Dr. Hamberg and Dr. Anderssou, Sweden; Prof. Von Drygalsky, Prof. Penck, A., Dr. Supan and Dr. Wiechert, Germany.

# Interstate Commerce Law.

THE following is a synopsis of the provisions of the Interstate Commerce law and acts amendatory thereof, prepared for the Official Congressional Directory:

Under "An Act to Regulate Commerce," approved February 4, 1887; as amended March 2, 1889; February 10, 1891; February 8, 1895; the "Elkins act" of February 19, 1903, and the amending act approved June 29, 1906, the Interstate Commerce Commission is composed of seven members, each receiving a salary of $10,000 per annum. The regulating statutes apply to all common carriers engaged in the transportation of oil or other commodity, except water and except natural or artificial gas, by means of pipe lines, or partly by pipe line and partly by rail, or partly by pipe line and partly by water, and to common carriers engaged in the transportation of passengers or property wholly by railroad (or partly by railroad and partly by water when both are used under a common control, management, or arrangement for a continuous carriage or shipment). The statutes apply generally to interstate traffic, including import and domestic traffic, and also that which is carried wholly within any Territory of the United States. Only traffic transported wholly within a single State is excepted.

The Commission has jurisdiction on complaint, and, after full hearing, to determine and prescribe reasonable rates, regulations, and practices, and order reparation to injured shippers; to require any carriers to cease and desist from unjust discrimination, or undue or unreasonable preference, and to institute and carry on proceedings for enforcement of the law. The Commission may also inquire into the management of the business of all common carriers subject to the provisions of the regulating statutes, and it may prescribe the accounts, records, and memoranda which shall be kept by the carriers, and has authority through its special agents and examiners to inspect the same. The carriers must file annual reports with the Commission, and such other reports as may from time to time be required. Various other powers are conferred upon the Commission. Carriers failing to file and publish all rates and charges, as required by law are prohibited from engaging in interstate transportation, and penalties are provided for failure on the part of carriers or of shippers to observe the rates specified in the published tariffs.

The Commission appoints a Secretary and clerks, whose duties are not specifically defined by the act, and also appoints attorneys, examiners, and special agents.

By amendment of June 18, 1910 ("Mann-Elkins law"), telegraph, telephone and cable companies are made subject to the Commission. The jurisdiction of the Commission is increased as to through routes and joint rates, freight classification, switch connections, long and short hauls, filing or rejection of rate schedules, investigations on own motion, making reasonable rates, suspension of proposed rates, and other matters. An important section authorized the President to appoint a special commission to investigate issuance of railroad stocks and bonds.

The act of February 11, 1903, provides that suits in equity brought under the act to regulate commerce, wherein the United States is complainant, may be expedited and given precedence over other suits, and that appeals from the Circuit Court lie only to the Supreme Court. The act of February 19, 1903, commonly called the Elkins law, penalizes the offering, soliciting, or receiving of rebates, allows proceedings in the courts by injunction to restrain departures from published rates, and makes the Expediting act of February 11, 1903, include cases prosecuted under the direction of the Attorney-General in the name of the Commission.

Under the act of August 7, 1888, all railroad and telegraph companies to which the United States have granted any subsidy in lands or bonds or loan of credit for the construction of either railroad or telegraph lines are required to file annual reports with the Commission and such other reports as the Commission may call for. The act also directs every such company to file with the Commission copies of all contracts and agreements of every description existing between it and every other person or corporation whatsoever in reference to the ownership, possession, or operation of any telegraph lines over or upon the right of way, and to decide questions relating to the interchange of business between such Government-aided telegraph company and any connecting telegraph company. The act provides penalties for failure to perform and carry out within a reasonable time the order or orders of the Commission.

The act of March 2, 1893, known as the "Safety Appliance act," provides that railroad cars used in interstate commerce must be equipped with automatic couplers and standard height of drawbars for freight cars, and have grab irons or hand holds in the ends and sides of each car. A further provision is that locomotive engines used in moving interstate traffic shall be fitted with a power driving-wheel brake and appliances for operating the train-brake system, and a sufficient number of cars in the train shall be equipped with power or train brakes. The act directs the Commission to lodge with the proper District-Attorneys information of such violations as may come to its knowledge. The Commission is authorized upon full hearing and for good cause to extend the period within which any common carrier shall comply with the provisions of the statute. The act of March 2, 1903, amended this act so as to make its provisions apply to Territories and the District of Columbia, and to all locomotives, cars, and other equipment of any railroad engaged in interstate traffic, except logging cars and cars used upon street railways, and also to power or train brakes used in railway operation.

By act of April 14, 1910, the safety appliance acts were supplemented so as to require railroads to equip their cars with sill steps, hand brakes, ladders, running boards and grab irons, and the Commission was authorized to designate the number, dimensions, location and manner of application of appliances.

* * *

The act of Congress approved July 15, 1913, provides for mediation, conciliation, and arbitration in controversies between railroads and their employés in the following sections of the act: SECTION 2. That whenever a controversy concerning wages, hours of labor, or conditions of employment shall arise between an employer or employers and employés subject to this act interrupting or threatening to interrupt the business of said employer or employers to the serious detriment of the public interest, either party to such controversy may apply to the Board of Mediation and Conciliation created by this act and invoke its services for the purpose of bringing about an amicable adjustment of the controversy; and upon the request of either party the said board shall with all practicable expedition put itself in communication with the parties to such controversy and shall use its best efforts, by mediation and conciliation, to bring them to an agreement; and if such efforts to bring about an amicable adjustment

INTERSTATE COMMERCE LAW—*Continued.*

through mediation and conciliation shall be unsuccessful, the said board shall at once endeavor to induce the parties to submit their controversy to arbitration in accordance with the provisions of this act.

In any case in which an interruption of traffic is imminent and fraught with serious detriment to the public interest, the Board of Mediation and Conciliation may, if in its judgment such action seems desirable, proffer its services to the respective parties to the controversy.

In any case in which a controversy arises over the meaning or the application of any agreement reached through mediation under the provisions of this act either party to the said agreement may apply to the Board of Mediation and Conciliation for an expression of opinion from such board as to the meaning or application of such agreement and the said board shall upon receipt of such request give its opinion soon as may be practicable.

SEC. 3. That whenever a controversy shall arise between an employer or employers and employés subject to this act, which can not be settled through mediation and conciliation in the manner provided in the preceding section, such controversy may be submitted to the arbitration of a board of six, or, if the parties to the controversy prefer so to stipulate, to a board of three persons, which board shall be chosen in the following manner: In the case of a board of three, the employer or employers and the employés, parties respectively to the agreement to arbitrate, shall each name one arbitrator; and the two arbitrators thus chosen shall select the third arbitrator; but in the event of their failure to name the third arbitrator within five days after their first meeting, such third arbitrator shall be named by the Board of Mediation and Conciliation. In the case of a board of six, the employer or employers and the employés, parties respectively to the agreement to arbitrate, shall each name two arbitrators, and the four arbitrators thus chosen shall, by a majority vote, select the remaining two arbitrators; but in the event of their failure to name the two arbitrators within fifteen days after their first meeting the said two arbitrators, or as many of them as have not been named, shall be named by the Board of Mediation and Conciliation.

In the event that the employés engaged in any given controversy are not members of a labor organization, such employés may select a committee which shall have the right to name the arbitrator, or the arbitrators, who are to be named by the employés as provided above in this section.

*

The act of March 3, 1901, "requiring common carriers engaged in interstate commerce to make reports of all accidents to the Interstate Commerce Commission," makes it the duty of such carrier to monthly report, under oath, all collisions and derailments of its trains and accidents to its passengers, and to its employés while on duty in its service, and to state the nature and causes thereof. The act prescribes that a fine shall be imposed against any such carrier failing to make the report so required.

By act of May 6, 1910, the prior Accident Reports law was repealed and a new statute passed giving more power to the Commission as to investigating accidents, and is more comprehensive than the former law.

The act of March 4, 1907, makes it the duty of the Interstate Commerce Commission to enforce the provisions of the act wherein it is made unlawful to require or permit employés engaged in, or connected with, the movement of trains to be on duty more than a specified number of hours in any twenty-four.

The act of May 30, 1908, directs the Interstate Commerce Commission to make regulations for the safe transportation of explosives by common carriers engaged in interstate commerce. A penalty is provided for violations of such regulations.

By act of May 30, 1908, it is made the duty of the Interstate Commerce Commission to enforce the provisions of the act wherein it is provided that after a certain date no locomotive shall be used in moving interstate or foreign traffic, etc., not equipped with an ash pan which can be emptied without requiring a man to go under such locomotive. A penalty is provided for violation of this act.

Public resolution No. 46, approved June 30, 1906, and the sundry civil appropriation act of May 27, 1908, direct the Commission to investigate and report on the use and need of appliances intended to promote the safety of railway operation.

The act of February 17, 1911, confers jurisdiction upon the Commission to enforce certain provisions, compelling railroad companies to equip their locomotives with safe and suitable boilers and appurtenances thereto.

The Panama Canal act of August 24, 1912, amends sections 5 and 6 of the act to regulate commerce by conferring upon the Commission jurisdiction to enforce a provision prohibiting a railroad company subject to the act, after July 1, 1914, from owning, leasing, operating, controlling or having any interest in water carriers operating through the Panama Canal or elsewhere; gives the Commission power to establish physical connection between the lines of a rail carrier and the dock of a water carrier; authorizes the Commission to establish through routes and joint rates over rail and water lines, and to determine all the terms and conditions under which such rail and water routes shall be operated; authorizes the Commission to establish maximum proportional rates by rail to and from ports to which traffic is brought by water carriers; authorizes the Commission, where a rail carrier has entered into arrangements with a water carrier operating from a port in the United States to a foreign country, for the handling of through business, to require the railway company to enter into similar arrangements with other water lines.

The Post-Office Appropriation act of August 24, 1912, empowers the Commission to co-operate with the Postmaster-General in reforming, from time to time, the classification, weight limit, rates, zones, or conditions, in order to promote the parcel post service created by the act, and requires the Commission to furnish data to a Congressional committee appointed to investigate the subject of a general parcel post.

## National Association of Railway Commissioners.

*President*—O. P. Gothlin, Columbus, Ohio. *First Vice-President*—Laurence B. Finn, Frankfort, Ky. *Second Vice-President*—Clifford Thorne, Des Moines, Ia. *Secretary*—William H. Connolly, Interstate Commerce Commission, Washington, D. C. *Assistant Secretary*—William Kilpatrick, Springfield, Ill.

## INTERSTATE COMMERCE COMMISSION.

WASHINGTON, D. C.

Edgar E. Clark, of Iowa, Chairman; Judson C. Clements, of Georgia; Charles A. Prouty, of Vermont; James S. Harlan, of Illinois; Charles C. McChord, of Kentucky; Balthasar H. Meyer, of Wisconsin; John H. Marble, of California; George B. McGinty, Secretary.

## STATE RAILROAD COMMISSIONERS.

**Alabama Railroad Commission**—Montgomery. Chas. Henderson, President, Troy; Leon McCord, Albertville; Frank N. Julian, Tuscumbia; S. P. Kennedy, Secretary, Montgomery.

**Arizona Railway Commission**—Phoenix. Corporation Commission of Arizona.

**Arkansas Railroad Commission**—Little Rock. R. P. Allen, Chairman; Geo. W. Bellamy, Wm. F. McKnight; Wm. E. Floyd, Secretary.

**California Railroad Commission**—San Francisco. John M. Eshleman, President; H. D. Loveland, Alexander Gordon, Max Thelen, E. O. Edgerton; Chas. R. Detrick, Secretary.

**Colorado Railroad Commission**—Denver. A. P. Anderson, President; Sheridan S. Kendall; D. H. Staley, Secretary.

**Connecticut Public Utilities Commission**—Hartford. Richard T. Higgins, Chairman, Winsted; T. B. Ford, Bridgeport; John H. Hale, S. Glastonbury; Henry F. Billings, Secretary, Hartford.

**District of Columbia Public Utilities Commission**—Washington, D. C. Lieut.-Col. Chester Harding, Chairman; Frederick L. Siddons, Oliver P. Newman; Capt. Julian L. Schley, Executive Officer.

**Florida Railroad Commissioners**—Tallahassee. R. Hudson Burr, Chairman; N. A. Blitch, Royal C. Dunn; J. Will Yon, Secretary.

**Georgia Railroad Commission**—Atlanta. C. M. Candler, Chairman; George Hillyer, Paul B. Trammell, Dalton; J. A. Perry, Lawrenceville; Joseph F. Gray, Savannah; Campbell Wallace, Secretary.

**Idaho Public Utilities Commission**—Boisé. J. A. Blomquist, Axel P. Ramstedt, D. W. Standrod.

**Illinois Railroad and Warehouse Commission**—O. F. Berry, Chairman, Carthage; B. A. Eckhart, Chicago; J. A. Willoughby, Belleville; Wm. Kilpatrick, Secretary, Springfield.

**Indiana Public Service Commission**—Indianapolis. Thos. C. Duncan, Chairman; John F. McClure, Frank E. Payne, Jas. L. Clark, Chas. J. Murphy; J. L. Riley, Secretary.

**Iowa Board of Railroad Commissioners**—Des Moines. C. Thorne, Chairman; N. S. Ketchum, David J. Palmer; Geo. L. McCaughan, Secretary.

**Kansas Public Utilities Commission**—Topeka. Henderson S. Martin, Chairman; Meyer Hurley, John M. Kinkel; W. P. Feder, Secretary.

**Kentucky Railroad Commission**—Frankfort. Laurence B. Finn, Chairman, Franklin; Wm. F. Klair, Lexington; H. G. Garrett, Winchester; Richard Tobin, Secretary.

**Louisiana Railroad Commission**—Baton Rouge. Shelby Taylor, Chairman, Columbia; Henry B. Schrieber, New Orleans; Burk A. Bridges; Henry Jastremski, Secretary.

**Maine Railroad Commissioners**—Augusta. Elmer P. Spofford, Chairman, Deer Isle; John A. Jones, Lewiston; Frank Keizer, Rockland; Geo. F. Giddings, Clerk, Augusta.

**Maryland Public Service Commission**—Baltimore. Philip D. Laird, Chairman; J. W. Hering, E. Clay Timanus; B. T. Fendall, Secretary.

**Massachusetts Public Service Commission**—Boston. Frederick J. Macleod, Chairman, Cambridge; Clinton White, Melrose; George W. Anderson, George P. Lawrence, George W. Bishop, Newtonville; Charles E. Mann, Clerk, Malden.

**Michigan Railroad Commission**—Lansing. Lawton T. Hemans, Chairman; Jas. Scully, C. L. Glasgow; Willard N. Sweeney, Secretary.

**Minnesota Railroad and Warehouse Commission**—St. Paul. Ira B. Mills, Chairman; C. E. Elmquist, C. F. Staples; A. C. Clausen, Secretary.

**Mississippi Railroad Commission**—Jackson. F. M. Sheppard, President, Richton; Geo. R. Edwards, McCool; W. B. Wilson, Corinth; James Galceran, Secretary.

**Missouri Public Service Commission**—Jefferson City. John M. Atkinson, Chairman; F. A. Wightman, Wm. F. Woerner, John Kinnish, Howard B. Shaw; T. M. Bradbury, Secretary.

**Montana Railroad Commission**—Helena. D. Boyle, Chairman; J. H. Hall, E. A. Morley; R. F. McLaren, Secretary.

**Nebraska State Railway Commission**—Lincoln. H. T. Clarke, Chairman; H. G. Taylor, Thos. L. Hall; A. B. Allen, Secretary.

**Nevada Public Service Commission**—Carson City. H. F. Bartine, Chairman; W. H. Simmons, J. F. Shaughnessy; E. H. Walker, Secretary.

**New Hampshire Public Service Commission**—Concord. Edward C. Niles, Chairman; Thos. W. D. Worthen; John E. Benton, Clerk.

**New Jersey Board of Public Utility Commissioners**—Trenton. Ralph W. E. Donges, President; Thos. J. Hillery, W. Moore Daniels; A. N. Barber, Secretary.

**New Mexico State Corporation Commission**—Santa Fé. Hugh H. Williams, Chairman; M. S. Groves, O. L. Owen; Edwin F. Coard, Clerk.

**New York Public Service Commission**—First District—(Greater New York) New York City—*Edw'd E McCall, Chairman; Geo. V. S. Williams, J. Sergeant Cram, Milo R. Maltbie, John E. Eustis; T. H. Whitney, Secretary. Second District—(all of State outside Greater New York), Albany, N. Y. Martin S. Decker, Chairman; James E. Sague, D. P. Hodson, C. N. Douglas; Frank H. Mott, Secretary.

**North Carolina Corporation Commission**—Raleigh. Edward L. Travis, Chairman; Geo. P. Pell, Wm. T. Lee, A. J. Maxwell, Secretary.

**North Dakota Commissioners of Railroads**—Bismarck. W. H. Stutsman, President, Mandan; O. P. N. Anderson, Starkweather; W. H. Mann, New Salem; Walter F. Cushing, Secretary.

**Ohio Public Service Commission**—Columbus. O. H. Hughes, Chairman; Edward W. Doty; C. A. Radcliffe, Secretary.

**Oklahoma Corporation Commission**—Oklahoma City. J. E. Love, Chairman, Woodward; A. P. Watson, Shawnee; Geo. A. Henshaw, Madill; J. H. Hyde, Secretary.

**Oregon Railroad Commission**—Salem. Frank J. Miller, Chairman, Thos. K. Campbell, Clyde B. Aitchison; H. H. Corey, Secretary.

**Pennsylvania Public Service Commission**—Harrisburg. Nathaniel Ewing, Chairman; Samuel W. Pennypacker, Milton J. Brescht, S. La Rue Tone, Emory R. Johnson, Charles F. Wright, Frank M. Wallace; Archibald B. Millar, Secretary.

**Rhode Island Public Utilities Commission**—Providence. Wm. C. Bliss, Chairman; Samuel E. Hudson, Robt. F. Rodman.

**South Carolina Railroad Commissioners**—Columbia. B. L. Caughman, Chairman, Columbia; John G. Richards, Jr., Liberty Hill; G. McD. Hampton, Columbia; J. P. Darby, Secy., Columbia.

**South Dakota Railroad Commissioners**—Pierre. F. C. Robinson, Chairman; J. J. Murphy, W. G. Smith, Sidney; T. E. Cassill, Secretary.

**Tennessee Railroad Commissioners**—Nashville. B. A. Enloe, Chairman; Frank Avent, H. H. Hannah; Miss Willie Fields Secretary.

**Texas Railroad Commission**—Austin. Allison Mayfield, Chairman; Earle B. Mayfield, W. D. Williams; E. R. McLean, Secretary.

**Vermont Public Service Commission**—Robert C. Bacon, Chairman, Brattleboro; Wm. R. Warner, Vergennes.

*May resign if elected Mayor of New York City for which office he was nominated.

RAILROAD COMMISSIONS—*Continued.*

**Virginia State Corporation Commission**—Richmond. Robert R. Prentis, Chairman, Richmond; William F. Rhea, J. R. Wingfield; R. T. Wilson, Clerk.

**Washington**—Olympia. A. M. Godman, Chairman; Arthur A. Lewis, Frank R. Spinning; Frank M. Larned, Secretary.

**West Virginia Public Service Commission**—Charleston. Lee Ott, Chairman; Howard N. Ogden, C. H. Bronson, W. C. Kilmer; W. W. Whyte, Secretary.

**Wisconsin Railroad Commission**—Madison. John H. Roerner, Chairman; David Harlowe, Halford Erickson; Lewis E. Gettle, Secretary.

**Wyoming Board of Equalization**—Cheyenne. John L. Baird, President; Robert B. Forsyth, Secretary; Frank L. Houx.

# Railroad Statistics.

MILEAGE, ASSETS, LIABILITIES, EARNINGS, EXPENDITURES, AND TRAFFIC OF SURFACE STEAM RAILROADS IN THE UNITED STATES.

(From Report of Interstate Commerce Commission for 1912.)

| | |
|---|---|
| Mileage of Railroads, single track | 240,238.81 |
| Second Tracks and Sidings | 116,179.70 |
| Total Track | 356,418.51 |
| Locomotives | 61,250 |
| Cars, Passenger | 50,606 |
| " Company's Service | 114,924 |
| " Freight | 2,203,128 |
| Total Revenue Cars | 2,368,658 |

*Investment in Road and Equipment.*

The figures include returns for investment in road and equipment, shown by the operating roads, as well as by their subsidiary nonoperating roads (leased, operated under contract, etc.).

Investment to June 30, 1912, $15,895,657,969; investment to June 30, 1911, $15,518,264,612; increase 1912 over 1911, $377,393,357.

Expenditures for additions and betterments, $336,256,985; expenditures for new lines and extensions, $188,109,282; total expenditures during fiscal year 1912, $524,366,267.

Credits—Property retired or converted, $67,371,604; adjustments, $17,290,466; difference between record value of grantor and purchase price of grantee in case of roads sold, merged, consolidated, etc., $62,310,840; total, $146,972,910; net increase during year, $377,393,357.

| 9. On boats and wharves | .. | .. | .. | 24 | 1,348 | .. | .. | 24 | 1,348 |
| 10. At other places | .. | .. | .. | 46 | 5,446 | .. | .. | 46 | 5,446 |
| Total casualties in industrial accidents | .. | .. | .. | 400 | 92,363 | .. | .. | 400 | 92,363 |
| Total casualties in all accidents | .. | 318 | 16,386 | 3,635 | 142,442 | 6,632 | 10,710 | 10,585 | 169,538 |

NOTE—Items 1 to 5, inclusive, cover all accidents to and around trains, cars and engines, including, in general, all casualties resulting from train operation. "Industrial" accidents (items 6 to 10, inclusive) are those which do not involve train operation but occur to railroad employés other than trainmen on railroad premises.

The yearly tables show for the year ending June 30, 1911, the total number of casualties 160,555 (10,396 killed and 150,159 injured). Of this number, 430 killed and 79,237 injured were railroad employés, on railroad premises, by accidents in which the movement of cars or engines is not involved; 5,284 persons were killed and 5,614 injured while trespassing on the property of the railroads, principally while walking on the tracks or stealing rides on trains.

The number of passengers carried during the year ending June 30, 1912, was 994,158,591. The corresponding number for the year ending June 30, 1911, was 987,710,997. The passenger mileage, or the number of passengers carried one mile, in 1912, was 33,034,995,806.

# Traveler's Protective Association.

* Does not include mileage of switching and terminal companies for 1908, 1909, 1910 and 1911.
† Excludes mileage in Alaska and Hawaii, which in 1911 was 403.98 (unofficial) and 175.76, respectively.

## Railways of America "Grouped" by Capitalists.

THE great railroad systems of the United States have been reduced to a few "groups" by means of consolidation and reconsolidation. The following is a list of these groups, which comprise three-quarters of all the railroad lines of the country:

| Groups. | Mileage. | Stocks. | Bonds. |
|---|---|---|---|
| Vanderbilt | 25,970 | $625,327,000 | $761,963,000 |
| Pennsylvania | 21,312 | 779,510,000 | 576,300,000 |
| Harriman | 22,410 | 754,600,000 | 1,096,773,410 |
| Hill | 14,112 | 396,527,000 | 428,649,000 |
| Morgan | 13,987 | 573,613,000 | 544,987,000 |
| Gould | 22,114 | 537,246,000 | 819,528,000 |
| Moore-Reid | 29,110 | 370,116,000 | 487,710,000 |
| Rockefeller's | 17,934 | 257,847,000 | 316,114,000 |
| Walters' | 11,373 | 149,119,000 | 202,642,000 |
| Erb Syndicate | 12,980 | 344,698,000 | 523,370,000 |
| Independent | *34,623 | 652,607,000 | 485,347,410 |
| Total | 225,925 | $5,440,210,000 | $6,243,383,820 |

*In December, 1912, the U. S. Supreme Court held that ownership by the Oregon Short Line Railroad on behalf of the Union Pacific Railroad (controlled by the Harriman interests) of $126,650,000 of Southern Pacific Co. stock was in violation of the Sherman Anti-Trust Law act, and Oregon Short Line has disposed of its interest in the Southern Pacific, which system is now an independent line.

## The World's Principal Railroad Terminals.

# United States Steamboat Inspection Service.

THE Steamboat Inspection Service, by act of Congress approved February 14, 1903, was transferred from the Treasury Department to the Department of Commerce. The transfer went into effect July 1, 1903. The Supervising Inspector-General of the Steamboat Inspection Service, George Uhler, reported to the Secretary of Commerce for the fiscal year ended June 30, 1913: Number of annual certificates of inspection issued to domestic steam, motor, sail vessels, and barges, 7,515; number of certificates issued to foreign steamers, 450; total number of annual certificates of inspection issued to domestic and foreign, 7,965. Increase in number of certificates to domestic vessels over previous year, 117; increase in number of certificates to foreign vessels over previous year, 12, increase in number of certificates of all kinds of vessels over previous year, 129. Gross tonnage of domestic vessels, all kinds, inspected 5,644,678; gross tonnage of foreign steamers inspected, 3,427,314. Increase in gross tonnage of foreign steam vessels inspected over previous year, 42,409. Increase in tonnage of all kinds domestic vessels inspected over previous year, 274,303. Number of officers' licenses issued, 26,482. Decrease in number of officers' licenses issued from previous year, 1,554. Number of new life-preservers inspected, 233,683, of which number 3,289 were rejected. Decrease in number of new life-preservers inspected from previous year, 10,882. Increase in number of life-preservers rejected over previous year, 539. Number of marine boiler plates inspected at the mills by assistant inspectors, 3,208.

| Causes. | Accidents. | Lives Lost. |
|---|---|---|
| Fire | 4 | 7 |
| Collision | 22 | 45 |
| Explosions or accidental escape of steam | 13 | 33 |
| Snags, wrecks, and sinking | 27 | 135 |
| Accidental drowning | .. | 135 |
| Miscellaneous | .. | 81 |
| Total | 66 | 436 |

Increase in number of accidents from previous year, 27. Increase in number of lives lost from previous year, 172. (During the year 303,263,033 passengers were carried on vessels that are required by law to report the number of passengers carried. Taking the total loss of life as 436, it is seen that 695,557 passengers were carried for each life lost, whether of passengers or crew, and from all causes.)

# Railroad Pensions in the United States.

THE following table shows the estimated number of employés on the following roads now having pension systems in force. In general all the roads here shown base their pensions on a percentage of the employé's wages, multiplied by the number of years that he has been in service. For example, the rate on the Pennsylvania is 1 per cent. A man having worked 40 years received a pension equal to 40 per cent. of his average salary for the 10 years preceding retirement. Most companies include in their rules a reservation of the right to vary the rate of pensions if the total requirements of any one year shall demand more than a predetermined gross amount. All of the companies in counting time include years of service under other companies bought by or consolidated with the present one. Short breaks in the service not due to any fault of the employé, or due to a minor fault involving suspensions, are generally overlooked.

| Railroad. | No. of Employees. | Amount Appropri'd Yearly. | Number of Pensioners. | Yrs. of Con. Ser. Requi'd. | Age Limit of New Employees. | Age of Retirement. Compul'y | Age of Retirement. Optional. |

The U. S. Steel Corporation dedicated $8,000,000 for a fund with which to pension superannuated and disabled employés. This fund has been consolidated with the $4,000,000 fund created by Andrew Carnegie after he sold out his holdings in the Carnegie Steel Company to the U. S. Steel Corporation. The fund is known as "The United States Steel and Carnegie Pension Fund."

The Western Union Telegraph Company, on January 1, 1913, established a Plan for Employés' Pensions, Disability Benefits and Insurance, setting aside a fund of $1,000,000 for the purpose. Pensions are classified according to age and length of service. The minimum pension is $20 per month, except when otherwise directed. In cases of disability from sickness, full pay and half pay is allowed for various periods, depending upon length of service; provision is also made for disability resulting from accidents and for life insurance benefits, the amount of insurance depending upon length of service.

# New York Public Service Commissioners.

FIRST DISTRICT—Office, 154 Nassau Street, New York City.

Edward E. McCall, Chairman, Manhattan, New York; holds office until February 1, 1918. May resign if elected Mayor, for which office he was nominated.
George V. S. Williams, Brooklyn; holds office until February 1, 1917.
J. Sergeant Cram, Manhattan, New York; holds office until February 1, 1916.
Milo Roy Maltbie, Manhattan, New York; holds office until February 1, 1915.
John E. Eustis, Manhattan, New York; holds office until February 1, 1914.
*Secretary*—Travis H. Whitney.

SECOND DISTRICT—Office, The Capitol, Albany, N. Y.

Martin S. Decker, Chairman, New Paltz; holds office until February 1, 1915.
James E. Sague, New Hamburg; holds office until February 1, 1914.
Curtis N. Douglas, Albany; holds office until successor is appointed.
Devoe P. Hodson, Buffalo; holds office until February 1, 1918.
*Secretary*—Frank H. Mott, Jamestown.

The jurisdiction of the Public Service Commission of the First District extends to railroads and street railroads lying exclusively within that district, to any common carrier operating exclusively within tha district, and to the manufacture, sale and distribution of gas and electricity for light, heat and power in that district. In addition the Commission of the First District is to exercise the powers heretofore conferred upon the Board of Rapid Transit Railroad Commissioners. All jurisdiction not specifically granted to the Public Service Commission of the First District is granted to the Public Service Commission of the Second District. The annual salary of each Public Service Commissioner is $15,000; of their Secretary, $6,000, and of their counsel, $10,000.

NOTE—For complete summary of the jurisdiction and scope conferred by the New York Public Service act, see page 102 of 1912 ALMANAC.

## FASTEST RECORDED RUNS FOR SHORT DISTANCES.

| Date. | Railroad. | Terminals. | Distance, Miles. | Time, M. S. | Miles per Hour. |
|---|---|---|---|---|---|
| May, 1893. | N. Y. Central & H. R. | Crittenden—"Empire State Exp." | 1 | 0.32 | 112.5 |
| Aug., 1895. | Pennsylvania | Landover—Anacosta | 5.1 | 3.00 | 102 |
| Jan., 1899. | Burlington Route | Siding—Arion | 2.4 | 1.20 | 108 |
| Mar., 1901. | Plant System | Run from Fleming to Jacksonville. | 5 | 2.30 | 120 |
| Jan., 1903. | N. Y. Central & H. R. | Palmyra—Macedon | 7.29 | 4.00 | 109.35 |
| April, 1904. | Michigan Central | Crisman—Lake | 3.73 | 2.00 | 111.90 |
| July, 1904. | Phila. & Reading | Egg Harbor—Brigantine Junction. | 4.8 | 2.30 | 115.20 |
| Oct., 1904. | N. Y. Central & H. R. | Croton—Ossining | 3.51 | 2 00 | 105 |

The fastest time on record for a distance of over 440 miles was made by the Lake Shore and Michigan Southern R.R. from Buffalo to Chicago, in June, 1905, noted above. The fastest long-distance run less than 440 miles was on the New York Central R.R. September 11, 1895, from New York to Buffalo, 436 1-2 miles, in 407 minutes actual time. Average speed, 64 1-3 miles an hour, with two stops and 28 slow-ups, and on January 1, 1903, from Albany to Buffalo, 302 miles, in 295 minutes.

Among the fastest regular trains in the United States, for a shorter distance, are believed to be the New York Central "Empire State Express," between New York and Albany, 143 miles in 175 minutes, and the "Congressional Limited," on the Pennsylvania Railroad, which makes the run from Jersey City to Washington in 4 hours, 46 minutes, a distance of 227 miles. The "Pennsylvania Special" over P. R. R. which runs from Jersey City to North Philadelphia, 84 miles, in 83 minutes; from Jersey City to Harrisburg, Pa., 194 miles in 196 minutes. The Royal Blue Line from New York to Philadelphia (Reading Terminal) 91.1 miles in 1 hour, 50 minutes.

On August 15, 1898, on P. & R. and C. R. R. of N. J., "Royal Blue Line," between Elizabeth, N. J., and Jenkintown, a distance of 69 miles, in 61 minutes, including 2 slow-ups, some of the miles being traversed in 38 seconds.

Other notable long-distance fast runs: February 14-15, 1897—Pennsylvania Railroad and C., B. and Q., Jersey City to Denver, 1,937 miles, in 48 hours; average speed, 40.3 miles per hour. August 28-31, 1891—Canadian Pacific, Vancouver to Brockville, 2,302 miles, in 77 hours 9 minutes; average speed, 36.32 miles per hour.

The Jarrett and Palmer special theatrical train, Jersey City to Oakland (San Francisco), 3,311 miles, June, 1876, 83 hours 45 minutes; average speed, 39.53 miles per hour.

In October, 1905, the "Harriman Special" made the run from Oakland to Jersey City (3,239 miles) in 73 hours, 12 minutes, or 44.30 miles per hour. In May, 1906, the "Harriman Special" made the run from Oakland, Cal., to New York City in 71 hours, 27 minutes.

The "Scott Special" left Los Angeles, Cal., July 9, 1905, and arrived in Chicago (2,445.5 miles), July 11, having made the run in 44 hours 54 minutes, maintaining an average speed while in motion of 51 miles an hour.

On November 15, 1907, at Clayton, N. J., in a trial test on Pennsylvania R. R. between steam and electric locomotives, the steam engine made 93.6 miles an hour on a specially built seven mile curved track, while the electric locomotive made but 90 miles an hour.

A special train of an engine and two cars, which was run in January, 1911, to carry J. P. Morgan from Washington to New York over the Pennsylvania Railroad, made the trip of 226.3 miles in 3 hours, 55 minutes and 30 seconds, or at the rate of 57.8 miles an hour. The speed over the New York division, West Philadelphia to New York, 90.5 miles, averaged 67 miles an hour.

In February, 1911, the "Gates Special," from Yuma, Ariz., to New York, 2,787 miles, made the run in 74 hours 19 minutes, or an average of 40.41 miles per hour, including stops. From Albany to New York the trip, 143 miles, was made in 143 minutes.

A remarkable record was made in the run of a silk train between Seattle and New York in October, 1911. The distance is 3,178 miles, and the time made 82¼ hours. The average speed all the way across the continent, including stops and a delay of more than two hours in switching at Chicago, was 38½ miles per hour.

## SOME FOREIGN RAILWAY RUNS.

The Northern Railway runs a day express from Berlin to Paris, which covers the distance from Paris to St. Quentin (96¼ miles) in 93 minutes. The Eastern Railway Company has an afternoon express from Paris to Bale, which runs the first 104.37 miles in 107 minutes. The fastest train in Germany is the so-called "D-Zug 20" between Berlin and Hamburg, which maintains an average speed of 55.177 miles per hour. (U. S. Consul Report.)

# Railroad Equipment.

WEIGHT AND HORSE-POWER OF DIFFERENT TYPES OF LOCOMOTIVES, INCLUDING THE MODERN ELECTRIC TRACTOR, AND ALSO THE WEIGHT, SIZE AND COST OF FREIGHT CARS, ORDINARY COACHES, PARLOR AND SLEEPING CARS.

## RECENT HEAVY LOCOMOTIVES.

| Type. | Road. | Total Weight. (Pounds.) | Weight on Drivers. (Pounds.) | Diameter of Drivers. (Inches.) | Heating Surface. (Sq. Ft.) | Size of Cylinders. (Inches.) | Tractive Effort. (Pounds.) |
|---|---|---|---|---|---|---|---|
| *Mallet | Virginian | 540,000 | 479,200 | 56 | 6,760 | 28x44x32 | 115,800 |
| †Mallet | Erie | 800,000 | 740,000 | 63 | 6,750 | 36x32 | 160,000 |
| ‡Mountain | Chesap'ke & Ohio | 330,000 | 239,000 | 62 | 4,132 | 29x28 | 58,000 |
| Santa Fé | C. B. & Q. | 378,700 | 301,800 | 60 | 5,161 | 30x32 | 71,500 |
| §Mikado | Phila. & Reading | 331,000 | 249,000 | 61½ | 5,508 | 24x32 | 57,319 |
| §Pacific | Canadian Pacific | 224,500 | 147,000 | 75 | 2,945 | 22½x28 | 32,100 |
| Atlantic | Pennsylvania | 237,000 | 130,000 | 80 | 3,090 | 22x26 | ..... |
| Switching | Union Pacific | 145,700 | 145,700 | 51 | 1,557 | 19x26 | 27,300 |
| ¶Baltic | Chemin de Fer du Nord | 225,000 | 119,000 | 80 | 3,396 | 17½x25¼ & 24⅝x28¾ | 32,362 |

* This is not the heaviest locomotive, but is the most powerful locomotive in the world. The heaviest locomotive was built some years ago for the A. T. & S. F. and weighed a total of 616,000 lbs., but had a tractive effort of but 111,600 lbs. The Mallet for the Virginian, in every particular except weight, outclasses all other locomotives. These engines have ten wheels on each side and are 65 ft. 11¼ in. over all. They are used entirely in pusher service, and with two of these locomotives as helpers and one lighter locomotive at the head of the train, they take a train weighing 4,230 tons over Clarkes Gap, Va., which has a 2.07 per cent. grade on 11 miles and maximum curves of 12 deg.

†These figures are for a locomotive which is being designed for the Erie, which if built will be, of course, the most powerful locomotive in the world. It has many points of design which distinguish it from any other locomotive ever put in service. It has twelve pairs of drivers, twenty-four drivers in all, which are not only under the locomotive itself, but one set of drivers is placed under the tender, and the tender is made specially heavy so as to give the necessary adhesion to the rails.

‡These are the largest simple locomotives in the world and the largest passenger locomotives, with the exception of some Mallet locomotives that were built for the A. T. & S. F. as an experiment.

§These are now considered the standard locomotives for heavy freight and passenger service under ordinary conditions. The Mikado is replacing the old consolidation locomotive in freight service. The Pacific type is for heavy fast passenger business.

¶This is the largest passenger locomotive in Europe.

## HEAVY ELECTRIC LOCOMOTIVES.

| Road. | Weight on Drivers. (Pounds.) | Max. Guar. Speed (Miles per hour.) | Type. | Desig. for Trail. Load. (Tons.) |
|---|---|---|---|---|
| *New York Central | 200,000 | 60 | D. C. | 1,000 |
| Boston & Maine | 192,000 | 45 | A. C. | 730† |
| New Haven | 154,700 | ‡ | A. C. | ‡ |

*This is the newest type of electric locomotive in use and is an eight-motor articulated 600-volt locomotive.

†Includes weight of electric locomotive.

‡Develops 40,000 tractive power up to 6 miles per hour. The engine is for switching service and is unique in having a centre cab control.

## APPROXIMATE COST OF LOCOMOTIVES.

| Type. | Service. | Average Weight. (Pounds.) | Cost. | Type. | Service. | Average Weight. (Pounds.) | Cost. |
|---|---|---|---|---|---|---|---|
| Mallet | Freight. | 500 000 | $37,500 | Atlantic | Passenger. | 184,000 | $16,560 |
| Mikado | Freight. | 250.000 | 20,000 | Switching. | Switching. | 195,000 | 17,550 |
| Pacific | Passenger. | 280,000 | 25,300 | | | | |

## WEIGHT AND COST OF CARS.

| Type. | Weight. | Capacity. | Length. (Inside Dimensions.) | Width. (Inside Dimensions.) | Height. (Inside Dimensions.) | Cost. |
|---|---|---|---|---|---|---|
| *Box | 36,000 lbs. | 100,000 lbs. | 40 ft. 6 in. | 8 ft. 10 in. | 8 ft. | $1.400 |
| Steel Coal (gondola) | 46.000 lbs. | 110,000 lbs. | 46 ft. | 8 ft. 9 in. | 2 ft. 6¼ in. | 1,100 |
| Flat | 34,000 lbs. | 100,000 lbs. | 40 ft. 2 in. | 9 ft. | ..... | 700 |
| Day Coach (steel) | 112,000 lbs. | 80 Passeng's. | 78 ft. 3 in. | 10 ft. | 14 ft. 5 in. | 9,000 |
| Sleeping Car (wood) | 115.000 lbs. | 27 Berths. | 72 ft. 6 in. | 8 ft. 6 in. | 9 ft. 6 in. | 17,000 |
| Sleeping Car (steel) | 152,300 lbs. | 24 Berths. | 72 ft. 6 in. | 9 ft. 9 in. | 9 ft. 6 in. | 28,000 |

*Steel underframe, steel side frames and steel roof.

# Passenger Railway Rates in Europe.

PASSENGER rates differ considerably in the different countries. Most of the railroads are owned and operated by the state, but in some countries there are both State and private roads, and in England the railroads are all private corporations. The following are approximate passenger rates, reduced to cents per mile, in the various European countries:

| Ownership. | Class I. Cents. | Class II. Cents. | Class III. Cents. | Ownership. | Class I. Cents. | Class II. Cents. | Class III. Cents. |
|---|---|---|---|---|---|---|---|
| Germany, Government | 2.73 | 1.75 | 1.16 | Italy, Government | 3.60 | 2.52 | 1.62 |
| Belgium, Government | 2.91 | 1.98 | 1.17 | England— | | | |
| France, Government | 3.16 | 2.35 | 1.53 | Gt. East. Ry., min. | 4.02 | 3.02 | 2.01 |
| France, private | 3.48 | 2.34 | 1.53 | Gt. East. Ry., max. | 6.03 | 4.02 | 3.02 |
| Holland, Government | 3.29 | 2.47 | 1.65 | Southeast'n & Chatham Railway | 4.02 | 2.51 | 2.01 |
| Holland, private | 3.29 | 2.47 | 1.65 | | | | |

In Italy the rate per mile is higher than on any other Government-owned road, though a differential tariff offers some advantages that tend to reduce the price and to make the long-distance journeys as cheap as in other countries.

# Important Tunnels of the World.

Alberg—Under the Alps at the Arl Mountain and extends from Langen to St. Anton, 6¾ miles; opened 1884.

Andes Mountains—See "Trans-Andine."

Big Bend—Drains the Feather River in California, 2 miles; opened 1886.

Bitter Root Mountains (Montana and Idaho)—10,100 feet long.

Blackwell—Under River Thames, England, 1½ miles; opened 1897.

Cascade Mountain—Through the Cascade Mountains in Washington, 3 miles.

Continental Divide, for the Denver and Salt Lake R. R., 6.4 miles long (under construction).

Detroit (Michigan Central Ry.)—Under Detroit River.

Gunnison—Southwestern Colorado, 6 miles; opened 1909.

Hoosac—Through Hoosac Mountains, Mass., 4¾ miles; opened 1873.

Khojak Pass—India, from Quetta to Kandahar, 2 miles.

Loetschberg—Through the Alps, in Oberland, Switzerland, 9¼ miles; opened June 20, 1913, costling nearly $10,000,000.

Mt. Roberts—From the shore of Gastineau Channel at Juneau, Alaska, into Silver Bow Basin, 1 1-3 miles.

Mont d'Or—Between France and Switzerland was bored through October 2, 1913, and will be open for traffic it is expected in 1914. The tunnel pierces the Jura Mountains from Fresne to Vallorbe, and is 3¾ miles long.

Mont Cenis—Italy to France, under the Col de Frejus, 8 miles; opened 1871.

New Croton—Supplies water to New York City, 33 1-8 miles; opened 1888.

Otira—In New Zealand, 5 1-3 miles.

Rothschonberg—Drains the Felberg mines Saxony, 3½ miles; opened 1877.

St. Clair—Under St. Clair River from Sarnia, Ont., to Port Huron, Mich., 2 miles; opened 1891.

St. Gothard—Through the Alps, connects Goschenen with Airolo, in Switzerland, 9 1-3 miles; opened 1881.

Severn—From Monmouthshire to Gloucestershire, England, 4½ miles; opened 1886.

Simplon—Through the Alps, 12½ miles; opened 1905.

Strawberry—Through the Wasatch Mountains, 50 miles.

Sutro—Drains the Comstock Lode in Nevada, 4½ miles; opened 1879.

Trans-Andine Ry. tunnel—5 miles long, 12,000 feet above sea level and affords direct communication between Valparaiso and Buenos Ayres; opened April 5, 1910.

Wasserfluh—In the Alps, between Bunnadern and Lichtenstelg, Switzerland, 2 miles; opened 1909.

Woodhead—Between Manchester and Sheffield, England, 3 miles.

## TUNNELS IN AND ABOUT NEW YORK CITY.

(For Subways in and about New York City, see Index).

PENNSYLVANIA RAILROAD SYSTEM—Tunnels under Hudson River extend from Pennsylvania Railroad Station, New York, to Weehawken, N. J. There is no station at Weehawken, the electric trains from the Pennsylvania Station run to Manhattan Transfer, near Newark, N. J., without a stop. Work started April 1, 1904; completed in 1910. Two tubes of cast iron rings, 23 feet outside diameter and 21 feet 2 inches inside diameter; subaqueous portion 6,118 feet long.

Manhattan Cross-Town Tunnels from the Pennsylvania Railroad station, mentioned above, across New York under 32d and 33d Sts. to First Ave. Started July, 1905, completed in 1910. There are two tunnels, each with two tracks. The tunnels are built of concrete with the crown about 60 feet below the surface of the street.

East River Tunnels connect with the Cross-Town Tunnels and extend under the East River to Long Island City. Started September, 1904; completed in 1910. Four separate tubes with rings 23 feet outside diameter, each tube from the Manhattan shaft to the Long Island City shaft, 3,900 feet long.

HUDSON AND MANHATTAN RAILROAD SYSTEM—North tunnels under the Hudson River from Jersey City to Morton St., New York. Started November, 1874; the first in New York, officially opened February 25, 1908. Two single track tubes, with a minimum inside diameter of 15 feet 3 inches, and approximately 5,700 feet long.

Up-town tunnels connect with north tunnels at Morton St. and extend to Christopher St. thence to Sixth Ave, and up Sixth Ave. to 33d St. Started March, 1904, completed in 1910. Section from Morton to 12th Sts. shield construction, remainder cut and cover.

South tunnels under Hudson River from Jersey City to the Church St. Terminal Buildings (Cortlandt, Church and Fulton Sts.), New York. Started May, 1905; opened for traffic July, 1909. Two tubes about 5,950 feet long with cast iron rings, 16 feet 7 inches outside diameter and 15 feet 3 inches inside diameter.

Tunnels (consisting of two single track tubes) extend from the Hoboken terminal of the Lackawanna Railroad to Washington St., Jersey City, with connections to the north tunnels and to the Erie Railroad station. At Washington St. a branch runs to the Pennsylvania Railroad station at Jersey City, where connections are made with the south tunnels. West from Washington St. to a point east of Summit Ave. is a double track concrete tunnel with a centre wall dividing the tracks. Work started March, 1906; completed in July, 1911.

BELMONT TUNNEL under the East River from 42d St., New York, to Long Island City. Subaqueous portion two single track tubes with cast-iron ring 16 feet 10 inches outside diameter, and a clear inside diameter of 15 feet 6 inches. Through rock a horseshoe shaped concrete section is used and in other places a rectangular double track cross section with reinforced concrete lining. Construction started by New York and Long Island Railroad, July 12, 1905; practically completed January 1, 1908. (Commonly known as the Steinway Tunnel).

RAPID TRANSIT TUNNEL under the East River from the Battery, New York, to Joralemon St., Brooklyn, connecting the New York and Brooklyn Subways. Started April, 1903; trains running January 9, 1908. Two tubes, 6,784 feet long, with a finished inside diameter of 15 feet 6 inches.

BERGEN CUT of Erie Railroad through Bergen Hill, Jersey City, parallel to the present tunnel, which is 4,700 feet long. The Bergen cut was started March, 1906, and completed July 1, 1910. It has five four-track tunnels, with open cuts between the tunnels, making a total length of 4,300 feet. Tunnel sections 58 feet wide at the bottom and 21 feet high.

LACKAWANNA RAILROAD TUNNEL through Bergen Hill, Jersey City. Started February 28, 1906; completed February 14, 1909. Parallel to and 24 feet away from old tunnel and of the same length, viz., 4,283 feet. New tunnel is double tracked, lined with concrete, having inside dimensions 23 feet high by 30 feet wide. Bush track construction used.

Two tunnels, both under the East River from the Battery, Manhattan, to Brooklyn, will be built. These tunnels will form part of the new subway system now under construction.

A tunnel from Brooklyn to Staten Island, under the Narrows, is contemplated.

# Foreign Trade of the United States.

(Report of the Bureau of Foreign and Domestic Commerce of the Department of Commerce.)

## EXPORTS.

# Farmers' National Congress.

*President*—W. L. Ames, Oregon, Wis. *Secretary*—O. D. Hill, Kendalia, W. Va. *Treasurer*—Levi Morrison, Greenville, Pa.

A delegate body representing more than 3,000,000 farmers. Urges: General parcel post; liberal Federal aid for good roads and inland waterways; teaching of agriculture in the public schools; a Federal pure seed law; head tax and illiteracy test on immigration; a rural credit system not controlled by the banking power; also law to prevent imitation of butter; legislation to curb water-power monopolies; national and State control of land fraud agencies; protection of co-operative enterprises. Opposes: Ship subsidies; interstate liquor traffic into known dry territory; free distribution of seeds.

# Manufactures of Greater New York.

The Census Office in October, 1911, published the following tabular statement, giving aggregate regarding manufactures in Greater New York in 1909, compared with 1904:

| | Boroughs of Manhattan and the Bronx. 1909. | 1904. | Borough of Brooklyn. 1909. | 1904. | Total, Greater New York.* 1909. | 1904. |
|---|---|---|---|---|---|---|
| Number of establishments..... | 19,769 | 15,975 | 5,218 | 4,182 | 25,938 | 20,839 |
| Capital..... | $822,726,000 | $620,526,000 | $362,337,000 | $313,452,000 | $1,364,353,000 | $1,042,946,000 |
| Cost of materials used. | $725,456,000 | $507,030,000 | $235,132,000 | $230,809,000 | $1,092,155,000 | $818,029,000 |
| Salaries and wages.... | $332,438,000 | $238,839,000 | $89,474,000 | $68,056,000 | $445,772,000 | $321,156,000 |
| Miscellaneous expenses | $206,789,000 | $160,648,000 | $46,855,000 | $38,470,000 | $266,034,000 | $206,825,000 |
| Value of products.... | $1,431,089,000 | $1,043,252,000 | $417,223,000 | $373,463,000 | $2,029,693,000 | $1,526,523,000 |
| Value added by manufacture (prod'cts less cost of materials)... | $705,633,000 | $536,222,000 | $182,091,000 | $142,654,000 | $937,538,000 | $708,494,000 |
| Employés: | | | | | | |
| Number of salaried officials and clerks.. | 77,849 | 51,716 | 15,844 | 9,932 | 97,453 | 63,586 |
| Average number wage earners employed during the year.... | 399,792 | 339,221 | 123,883 | 104,995 | 554,002 | 464,716 |

* Including also the Boroughs of Queens and Richmond.

Only establishments conducted under the factory system were included in the census. Those distinguished as neighborhood, hand, and building industries, and small establishments having an annual product of less than $500 were excluded.

# Foreign Carrying Trade of the United States

## IN AMERICAN AND FOREIGN VESSELS.

TOTAL UNITED STATES IMPORTS AND EXPORTS.

(From Report of Bureau of Foreign and Domestic Commerce of the Department of Commerce.)

| Year Ended June 30. | By Sea. | | | | By Land Vehicles. | Total by Land and Sea. |
|---|---|---|---|---|---|---|
| | In American Vessels. | In Foreign Vessels. | Total. | Per Cent. in American Vessels. | | |

In the year 1865 merchandise carried in American vessels was 27.7 per cent. of total; in 1875, 26.2 per cent.; in 1885, 15.3 per cent.; in 1895, 11.7 per cent. Merchandise and specie to 1879, inclusive; merchandise only after 1879.

# Freight Traffic Movement.

PRODUCTS OF AGRICULTURE, ANIMALS, MINES, FORESTS AND MANUFACTURES.

(For the year ended June 30, 1911—United States.* From reports of the Interstate Commerce Commission.)

| Commodity. | Tonnage Originating on Road. | Commodity. | Tonnage Originating on Road. |
|---|---|---|---|
| Products of agriculture: | Tons. | Products of forests: | Tons. |
| Grain | 41,058,154 | Lumber | 59,900,800 |
| Flour | 8,633,781 | Other products of forests | 48,605,472 |
| Other mill products | 6,489,806 | | |
| Hay | 6,306,745 | Total | 108,506,272 |
| Tobacco | 934,174 | | |
| Cotton | 3,486,124 | Manufactures: | |
| Fruits and vegetables | 11,747,009 | Petroleum and other oils | 8,855,616 |
| Other products of agriculture | 6,910,260 | Sugar | 2,882,880 |
| | | Naval stores | 1,037,748 |
| Total | 85,566,053 | Iron, pig and bloom | 11,614,507 |
| Products of animals: | | Iron and steel rails | 3,831,030 |
| Live stock | 13,991,205 | Other castings and machinery | 10,080,717 |
| Dressed meats | 2,329,814 | Bar and sheet metal | 13,200,615 |
| Other packing-house products | 2,249,082 | Cement, brick and lime | 35,164,029 |
| Poultry, game and fish | 718,902 | Agricultural implements | 1,508,028 |
| Wool | 375,475 | Wagons, carriages, tools, etc | 1,234,400 |
| Hides and leather | 1,096,193 | Wines, liquors and beers | 3,769,382 |
| Other products of animals | 3,002,591 | Household goods and furniture | 1,887,210 |
| | | Other manufactures | 40,109,374 |
| Total | 23,763,262 | | |
| Products of mines: | | Total | 135,175,536 |
| Anthracite coal | 72,330,769 | | |
| Bituminous coal | 268,499,937 | Merchandise | 36,519,321 |
| Coke | 29,261,200 | Miscellaneous—other commodities | 38,447,567 |
| Ores | 81,460,695 | | |
| Stone, sand and other like articles | 74:512,676 | Grand total | †967,233,991 |
| Other products of mines | 13,190,703 | | |
| Total | 539,255,980 | | |

*Does not include returns for switching and terminal companies. †Of the total freight tonnage (1,718,014,118 tons), including tonnage received from connecting roads and other carriers, there were 63,623,836 tons unassigned.

Total all freight 1906—820,164,627 tons; 1907—893,184,972 tons; 1908—797,216,099 tons; 1909—826,492,765 tons; 1910—968,464,009 tons.

# National Rivers and Harbors Congress.

The objects of this Congress shall be collection, preparation and presentation to the Congress of the United States such statistics and other information bearing upon the question of the improvement of the rivers and harbors of all the Nation as will secure for such purpose an annual appropriation by the said Congress of not less than fifty million dollars. To educate the people to the importance of the fact that the National Government, having assumed the control and improvement of the rivers and harbors of the country, is unequivocally bound to discharge these obligations promptly and by sound business methods, chief among which is the placing of annual appropriations for rivers and harbors on a parity with other great appropriation bills.

The membership of this Congress shall consist of commercial, manufacturing and kindred organizations, waterway improvement associations, corporations, companies, and individual citizens engaged or interested in commercial or industrial enterprises, who may subscribe to this Constitution and contribute to the support and prosecution of the objects of the Congress. *President*—Hon. Joseph E. Ransdell, Lake Providence, La. *Secretary*—S. A. Thompson, Washington, D. C.

# Countries Excelling in Production

## OF PRINCIPAL STAPLES AND RESPECTIVE QUANTITIES PRODUCED THEREIN.

(Compiled by Bureau of Foreign and Domestic Commerce, Department of Commerce.)

*a* Including Asiatic Russia. *b* Actual production unknown. *c* Clean rice, equivalent to 3[illegible],952 million pounds of uncleaned rice. *d* Figures of domestic exports; no data of production. *e* Unofficial estimate. *f* 1910. *g* Production unknown; exports of raw, including wild silk but not waste, from China during 1912, 24,124,667 lbs. *h* Shipments from the Straits. *i* Commercial value.

# The Twelve Greatest Seaports.

The following table, prepared by the Bureau of Foreign and Domestic Commerce, Department of Commerce, shows the relative rank in tonnage movement of the principal ports of the world. Figures of coastwise trade are not included:

| Port. | Year. | Entered. Tons. | Cleared. Tons. | Port. | Year. | Entered. Tons. | Cleared. Tons. |
|---|---|---|---|---|---|---|---|
| New York *a* | 1913 | 14,464,161 | 14,370,619 | Shanghai *d* | 1911 | 9,170,309 | 9,429 996 |
| Antwerp *b* | 1911 | 13,330,699 | 13,325,781 | Marseilles | 1911 | 8,051,321 | 8,198,874 |
| London | 1911 | 11,973,249 | 9,004,974 | Liverpool | 1911 | 7,887,719 | 6,880,271 |
| Hamburg | 1911 | 13,567,913 | 13,837,076 | Singapore *e* | 1911 | 7,735,785 | 7,717,691 |
| Rotterdam | 1912 | 11,052,186 | 10,800,490 | Colombo *f* | 1911 | 7,087,747 | 7,083,035 |
| Hongkong-Victoria *c* | 1911 | 10,246,622 | 10,243,898 | Cardiff | 1911 | 5,526,426 | 8,328,047 |

*a* Fiscal year. *b* The figures for Antwerp are not strictly comparable with those for other ports as the Belgian methods of tonnage measurement differ from those adopted by other nations. *c* Exclusive of Chinese junks engaged in the foreign trade, and of steamers under 60 tons. *d* Tonnage of vessels entered and cleared at the Maritime Customs. *e* Exclusive of native craft, warships, transports, yachts, and sailing and steam vessels under 50 tons, but including vessels engaged in trade between the Settlements. *f* Excluding the tonnage of vessels that called for the purpose of coaling and for orders only.

# Imports and Exports of Principal Countries.

(Compiled by the Bureau of Foreign and Domestic Commerce, Department of Commerce from the official records of the various countries.)

(Years ending December 31, unless stated otherwise; imports for consumption and exports of domestic merchandise, gold and silver bullion and coin not included, unless stated otherwise.)

| New Orleans | 17,737,501 | 17,127,626 | 16,213,444 | 15,919,182 | 21,530,971 |
| ..... | ..... | ..... | ..... | ..... | ..... |
| Montreal, Canada | 41,006,738 | 43,551,119 | 45,427,290 | 50,539,637 | 59,393,707 |

Grain embraces wheat flour reduced to equivalent in wheat, corn, rye, oats, barley, malt and peas. Receipts at New York, Portland, Boston, Philadelphia and Baltimore include shipments from the West to foreign countries through these ports on through bills of lading. Receipts at Portland via Montreal are duplications of receipts reported at Montreal. Receipts at Baltimore include flour ground by city millers, and therefore duplicate an equivalent quantity of wheat received in grain.

# The Southern Commercial Congress.

*President*—Duncan U. Fletcher, Jacksonville, Fla. *First Vice-President*—David R. Francis, St. Louis, Mo. *Second Vice-President*—Thomas S. Southgate, Norfolk, Va. *Managing Director*—Clarence J. Owens, Riverdale Park, Md. *Treasurer and Resident Director*—William H. Saunders, Washington, D. C.

The headquarters of the Congress is at the Southern Building, Fifteenth and H Streets, Washington, D. C.; Clarence J. Owens, Managing Director.

Among the purposes of the organization are the following:

(*a*) To promote and develop the interests of the following sixteen States of the United States known as the "Southern States," to wit: Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia.

(*b*) To collect and disseminate information regarding the resources and conditions of the said States and the opportunities and advantages offered in them for the safe and profitable investment of capital; the attractions offered in the South to the homeseeker, artisan and laborer, and the importance to the National Government of enacting proper legislation looking to the conservation of the natural resources of the South and the improvement of its rivers, harbors and transportation facilities.

(*c*) To encourage, promote and foster the development of the resources of the South with its own capital and by its own inhabitants.

(*d*) To encourage and obtain the establishment in the South of commercial, manufacturing, industrial and other enterprises, and to foster those already existing therein.

(*e*) To encourage, promote and foster the creation and establishment of institutions and organizations whose energies shall be principally directed toward the development of the material resources of the South.

(*f*) To promote and develop proper immigration to the South and to promote and foster the establishment of such organizations as may bring about the development of desirable immigration to the South.

(*g*) To encourage the movement for the construction of good roads and for the extension of railroad and trolley transportation.

(*h*) To encourage, foster and develop patriotic and national sentiments throughout the South and elsewhere in the nation, and particularly to promote, encourage and foster the feeling and desire for a greater nation through a greater South.

(*i*) To promote the improvement of educational and other conditions which tend to develop the material resources and happiness of the residents of the South.

# Manufactures in the United States.

(From Census Bureau's Summary for 1909, issued April, 1912.)

Statement of the general results of the Thirteenth United States Census of Manufactures.

SUMMARY FOR THE UNITED STATES FOR 1909.*

| | Census. | | Per Cent. of Increase, 1904 to 1909. |
|---|---|---|---|
| | 1909. | 1904. | |
| Number of establishments | 268,491 | 216,180 | 24.2 |
| Persons engaged in manufactures | 7,678,578 | 6,213,612 | 23.6 |
| Proprietors and firm members | 273,265 | 225,673 | 21.1 |
| Salaried employés | 790,267 | 519,556 | 52.1 |
| Wage-earners (average number) | 6,615,046 | 5,468,383 | 21.0 |
| Primary horse-power | 18,680,776 | 13,487,707 | 38.5 |
| Capital | $18,428,270,000 | $12,675,581,000 | 45.4 |
| Expenses | $18,453,080,000 | $13,138,260,000 | 40.5 |
| Services | $4,365,613,000 | $3,184,884,000 | 37.1 |
| Salaries | $938,575,000 | $574,439,000 | 63.4 |
| Wages | $3,427,038,000 | $2,610,445,000 | 31.3 |
| Materials | $12,141,791,000 | $8,500,208,000 | 42.8 |
| Miscellaneous | $1,945,676,000 | $1,453,168,000 | 33.9 |
| Value of products | $20,672,052,000 | $14,793,903,000 | 39.7 |
| Value added by manufacture (value of products less cost of materials) | $8,530,261,000 | $6,293,695,000 | 35.5 |

*Not including Alaska, Hawaii or Porto Rico.

## MANUFACTURES BY INDUSTRIES.*

| Industries. | Average Number of Wage-Earners. | Value of Products. | Value Added by Manufacture. | Per Cent. Increase in Ten Years. | |
|---|---|---|---|---|---|
| | | | | (a) | (b) |
| Slaughtering and packing | 89,728 | $1,370,568,000 | $168,740,000 | 29.5 | 73.8 |
| Foundries and machine shops | 531,011 | 1,228,475,000 | 688,464,000 | 24.4 | 53.9 |

| All industries, total | 6,615,046 | $20,672,052,000 | $8,530,261,000 | 40.4 | 81.2 |

*In the year 1909. (a) Increase in average number of wage-earners, 1899-1909. (b) Increase in value of products, 1899-1909. † Decrease.

In the above table the industries are arranged in the order of their gross value of products. Some of the industries which hold a very high rank in gross value of products rank comparatively low in the average number of wage-earners employed and in the value added by manufacture. Where this is the case it indicates that the cost of materials represents a large proportion of the total value of products, and that therefore the value added by manufacture, of which wages constitute usually the largest item, is not commensurate with the total value of products.

VALUES OF PRINCIPAL ARTICLES OF DOMESTIC MANUFACTURES EXPORTED FROM THE UNITED STATES FROM 1903 TO 1913, YEAR ENDING JUNE 30.

NOTE.—These ten groups form about 75 per cent. of the total value of manufactures exported.

| YEAR | Iron and Steel Manufactures. | Copper Manufactures. | Agricultural Implements. | Wood Manufactures. | Mineral Oils, Refined. | Chemicals, Drugs, Dyes, and Medicines. | Leather, and Manufactures of. | Cotton Manufactures. | Books, Maps, Engravings, etc. | All Other Paper and Manufactures of |
|---|---|---|---|---|---|---|---|---|---|---|
| 1903.. | $96,642,467 | $39,667,196 | $21,006,622 | $63,236,807 | $50,923,634 | $12,581,471 | $31,617,339 | $32,216,304 | $4,442,653 | $7,180,014 |
| 1904.. | 111,948,586 | 57,142,079 | 22,749,635 | 60,955,120 | 72,487,415 | 14,480,323 | 33,980,615 | 22,402,713 | 4,347,304 | 7,543,728 |

| 1907.. | 181,630,871 | 94,762,110 | 26,936,456 | 79,704,395 | 78,228,819 | 20,373,036 | 45,476,969 | 32,305,412 | 5,813,107 | 9,856,733 |
| 1908.. | 183,982,182 | 104,064,380 | 24,344,398 | 77,183,519 | 97,651,326 | 20,873,155 | 40,658,619 | 25,177,758 | 6,107,053 | 8,064,706 |
| 1909.. | 144,951,357 | 85,290,186 | 25,694,184 | 64,540,573 | 99,092,112 | 19,131,811 | 42,974,795 | 31,878,356 | 6,351,445 | 7,663,139 |
| 1910.. | 179,133,186 | 88,004,397 | 28,124,033 | 74,920,918 | 93,813,031 | 21,415,935 | 52,646,755 | 33,397,097 | 7,088,994 | 8,994,277 |
| 1911.. | 230,725,452 | 102,813,110 | 35,973,398 | 87,701,832 | 92,698,003 | 22,007,414 | 53,673,056 | 40,851,918 | 8,853,998 | 10,361,501 |
| 1912.. | 268,154,962 | 113,958,919 | 35,640 005 | 92,867,764 | 105,640,733 | 25,117,217 | 60,756,772 | 50,769,511 | 8,840,683 | 10,617,367 |
| 1913.. | 364,605,797 | 140,164,913 | 40,572,352 | 115,704,777 | 129,666,995 | 26,574,519 | 63,893,351 | 53,743,977 | 10,092,719 | 11,686,584 |

For 1913, automobiles and parts of automobiles exported were $31,253,533; paraffin and paraffin wax, $9,679,273; manufactures of tobacco, $5,814,978; manufactures of wool, $4,483,506.

# Paper and Wood Pulp Industry.

(From a Report of the Census Bureau, August 5, 1913.)

Of the 177 establishments in the industry canvassed in 1909, more than two-thirds (538, or 69.2 per cent.) were engaged in the manufacture of paper exclusively; these establishments contributed products valued at $129,381,198, or 48.3 per cent. of the combined value of products reported for the industry as a whole.

The 81 establishments manufacturing pulp exclusively formed slightly more than one-tenth of the total number, and the value of their products represented about one-twelfth of the total value of products. The 158 establishments making both pulp and paper formed 20.3 per cent. of the total number in the industry as a whole and reported 43.6 per cent. of the total value of products.

These 777 establishments gave employment to an average of 81,473 persons, of whom 75,978 were wage-earners, and paid $50,314,643 in salaries and wages. There was comparatively little variation in the number of wage-earners from month to month. The largest number employed during any month of 1909 was 77,430 in December, and the smallest number, 74,517 in August, the minimum number forming 96.2 per cent. of the maximum. Nearly three-fourths (71.4 per cent.) of the wage-earners employed in the industry as a whole in 1909 were in mills, where the prevailing hours were 60 or more per week.

The cost of materials used was $165,442,341, or more than three-fifths (61.8 per cent.) of the total value of products, which was $267,656,964, and the value added by manufacture (that is, the value of products less cost of materials) was $102,214,623.

Paper was manufactured in this country near Philadelphia as early as 1690. The growth of the industry, however, was slow until within the last forty years, during which time the introduction of improved machinery and the use of wood fibre as a material have brought about a remarkable growth in the industry. In the decade 1899-1909 the value of products increased $140,330,802, or 110.2 per cent., this percentage being higher than that for any other decade since 1869. Some part of this increase, however, was due to advance in prices, particularly during the first half of the decade.

## THE LEADING STATES.

There are 31 States represented in the industry, although 79.8 per cent. of the total value of products was reported by the first eight leading States. New York was in 1909 the most important State as measured by value of products, but ranked second in the average number of wage-earners and in value added by manufacture. Massachusetts, which ranked second among the States in value of products, was first in average number of wage-earners and in value added by manufacture. Maine ranked third in each respect.

Of the eight States which reported products valued at $10,000,000 or over, Michigan shows the most rapid development in the industry during the period from 1899 to 1909, the number of wage-earners increasing 205.6 per cent. and the value of products 230.1 per cent. Still higher percentages of increase are shown for West Virginia and Virginia, in which States, however, the industry was of less importance, even in 1909. In general, the States held the same or nearly the same rank with respect to value of products in 1909 as in 1904.

## VALUE OF PRODUCTS.

The total value of all products for establishments engaged primarily in the manufacture of paper and wood pulp was $267,656,964 in 1909, as compared with $188,715,189 in 1904 and $127,326,162 in 1899, an increase of 110.2 per cent. during the decade.

In 1909, 6.4 per cent. of the establishments manufactured products valued at $1,000,000 or over, as against 3.9 per cent. in 1904. While such establishments represented a comparatively small proportion of the total number at both censuses, they reported 35 per cent. of the total value of products in 1909 and 25.1 per cent. in 1904. The average value of products per establishment increased from $247,983 in 1904 to $344,475 in 1909, and the average value added by manufacture from $101,792 to $131,550. The average number of wage-earners per establishment shows an increase from 86.7 in 1904 to 97.8 in 1909.

Up to 1899 native spruce and poplar were used almost exclusively for pulp wood. Since that time, however, the advancing price of the native stock has led to the increased importation of these woods from Canada and to the use of other and cheaper native woods. New York reported the largest absolute increase of any of the States in expenditures for pulp wood from 1899 to 1909, with Maine second, while Maine shows the highest relative increase, with Wisconsin second.

## WOOD PULP.

The total quantity of wood pulp used in the paper mills in 1909 was 2,826,591 tons, as compared with 1,172,880 tons in 1899, an increase during the 10-year period of 1,653,711 tons, or 141 per cent. Of the total quantity of wood pulp used, 56.1 per cent. was produced in 1909 by the establishments in which it was used, as compared with 45.1 per cent. in 1899. During the decade 1899-1909 the quantity of ground wood pulp used increased 753,084 tons, or 132.5 per cent.; that of soda fibre increased 125,266 tons, or 72.8 per cent.; and that of sulphite fibre, 781,759 tons, or 187.2 per cent. There was, however, a decrease of 6,398 tons, or 43.2 per cent., in the quantity of other chemical fibre. Of the entire quantity of wood pulp used in 1909, sulphite fibre constituted 42.4 per cent., as

PAPER AND WOOD PULP INDUSTRY—*Continued.*

compared with 35.6 per cent. in 1899. The total quantity of wood pulp purchased in 1909 was 1,241,914 tons, as compared with 877,702 tons in 1904 and 644,006 tons in 1899, an increase of 597,908 tons, or 92.8 per cent., during the decade.

The quantity of wood pulp produced in all mills in the industry in 1909 was 2,495,523 tons, as compared with 1,921,768 tons in 1904 and 1,179,535 tons in 1899, thus showing an increase during the decade of 1,315,988 tons, or 111.6 per cent. Of the total quantity of wood pulp produced in 1909, including that for sale and that used in the establishments where produced, ground wood formed 47.3 per cent.; soda fibre, 12 per cent., and sulphite fibre, 40.8 per cent.; as compared with 49.7 per cent., 15 per cent. and 35.3 per cent., respectively, in 1899. The output of sulphite fibre increased 144.6 per cent. during the decade, that of ground wood pulp 101.1 per cent., and that of soda fibre 68.6 per cent. A larger proportion of the wood pulp produced in 1909 was used in the establishments where produced than was the case in 1899. This is shown by the fact that the proportion of each of the three kinds of fibre manufactured for sale or for use in establishments other than where produced was smaller in 1909 than at the census 10 years earlier.

MANUFACTURE OF NEWS PAPER.

Of the 4,216,708 tons of paper of all kinds manufactured during the year 1909, 1,175,554 tons, or 27.9 per cent., was news paper. Book paper (including coated, plate and cover) formed 16.5 per cent.; cardboard, 1.2 per cent.; fine paper, 4.7 per cent.; wrapping paper, 18.1 per cent.; boards, 19.7 per cent.; tissue paper, 1.8 per cent.; blotting paper, two-tenths of 1 per cent.; building (roofing, asbestos and sheathing) papers, 5.4 per cent.; hanging papers, 2.2 per cent., and miscellaneous paper products, 2.3 per cent. The corresponding proportions of the 2,167,593 tons of all kinds of paper produced in 1899, were as follows: News paper, 26.3 per cent.; book paper, 14.9 per cent.; cardboard, 1.3 per cent.; fine paper, 5.2 per cent.; wrapping paper, 24.7 per cent.; boards, 16.9 per cent.; tissues, 1.3 per cent; blotting paper, two-tenths of 1 per cent.; building paper, 4.5 per cent.; hanging papers, 2.5 per cent., and miscellaneous paper products, 2.3 per cent.

# Electrical Machinery, Apparatus and Supplies.

THESE statistics of the electrical machinery, apparatus and supplies industry in the United States for 1909 are from a bulletin of October 23, 1913, issued by the Director of the Bureau of the Census.

This industry includes the manufacture of the machines and appliances used in the generation, transmission and utilization of electric energy, together with most of the parts, accessories and supplies for them. It does not include, however, the production of poles, whether of wood, iron or steel; nor does it include the manufacture of glass and porcelain ware made expressly for electrical purposes, that of bare iron and copper wire, or any of the group of electrochemical and electrometallurgical products.

The total number of establishments in the United States in 1909 engaged in the manufacture of electrical machinery, apparatus and supplies was 1,009. The total number of persons engaged in the industry was 105,600, of whom 102,950 were wage-earners. The total capital employed was $267,844,432, and the total value of products was $221,308,563. The industry in 1909 was largely centralized in the six States of New York, Pennsylvania, New Jersey, Massachusetts, Illinois and Ohio. These States together, reported 83.9 per cent. of the total average number of wage-earners, 82.6 per cent. of the total value of products, and 83.1 per cent. of the total value added by manufacture.

NEW YORK THE LEADING STATE.

New York was the leading State in the industry, ranking first at the censuses of 1909 and 1904. During 1909 this State produced electrical machinery, apparatus and supplies to the value of $49,289,815, or more than one-fifth of the total for the United States. The number of wage-earners employed in the State increased 83 per cent. during the decade ending with 1909, while the value of products and the value added by manufacture more than doubled.

Pennsylvania ranked second among the States in 1909 and 1904 in value of products and in value added by manufacture, though in the average number of wage-earners employed it dropped from second place in 1904 to fourth place in 1909. In 1909 New Jersey, which showed the most rapid development of any of the six leading States in the industry, ranked third in number of wage-earners employed and value of products, advancing from fourth place in number of wage-earners and from fifth place in value of products during the preceding five years. Michigan, which occupies a position of minor importance among the States in the industry, shows the largest percentages of increase in all three items, while Connecticut, Indiana and Wisconsin also show large relative gains.

FORM OF OWNERSHIP.

Establishments owned by corporations constituted more than two-thirds of the total number of establishments reported, and the value of their products represented 96.3 per cent. of the total value in 1909 and 95 per cent. in 1904. In 1909, 1,692 wage-earners, or 1.9 per cent of the total, were employed in establishments under individual ownership; 1,167, or 1.3 per cent., in those under firm ownership; and 84,397, or 96.7 per cent., in those owned by corporations.

Of the 1,009 establishments reported for 1909, 31 manufactured products valued at $1,000,000 or over. In 1904 there were 22 establishments of this class out of a total of 784. While such establishments represented but a comparatively small proportion of the total number at both censuses, they reported 57.1 per cent. of the total value of products in 1909, and 60.5 per cent. in 1904. The average value of products per establishment increased from $179,604 in 1904 to $219,335 in 1909, and the average value added by manufacture from $94,353 to $111,737. The average number of wage-earners per establishment increased from 77 in 1904 to 86 in 1909.

VALUE OF PRODUCTS.

In 1909 there were 16,791 dynamos of all kinds manufactured of a total value of $13,081,048. Of these, 13,882 were of direct current and 2,909 of alternating current. During the decade ending with 1909 there was an increase of 59.5 per cent. in the number, and of 143.2 per cent. in the total capacity, of dynamos produced. The average capacity per machine increased from 55 kilowatts in 1899 to 84 kilowatts in 1909.

There were 76,729 transformers manufactured, of a total value of $8,801,019. The production of switchboards in 1909 was valued at $5,971,804. Some 504,030 motors of a total horse-power of 2,733,418 and a value of $32,087,482 were manufactured in 1909.

The number, capacity and value of motors for transforming electric current into mechanical power were very much larger in 1909 than in 1899. The number of motors of all kinds produced increased 215.5 per cent. during the decade, their capacity 123.8 per cent., and their value, 64.5 per cent. The largest increases are shown in the case of the motors for operating stationary machinery. The general report on manufactures shows a large increase in the use of electric power. In 1909 there were 388,854 electric motors, with a capacity of 4,817,140 horse-power, installed in manufacturing establishments. In 1899 there were only 16,891 motors reported with a capacity of 492,936 horse-power.

ELECTRICAL MACHINERY, APPARATUS AND SUPPLIES—*Continued.*

The number of primary batteries manufactured in 1909 was 34,333,531, valued at $5,312,595; an increase in value of 498.7 per cent. since 1899. The production of batteries was valued at $4,243,984 for 1909, an increase of 65.8 per cent. during the decade.

The value of arc lamps manufactured in 1909 was $1,706,959, and the number 123,985. From 1899 to 1909 there was a decrease of 34,202, or 21.6 per cent. in the number of arc lamps manufactured and a decrease of $120,812, or 6.6 per cent., in their total value. The decrease is accounted for by the fact that while formerly arc lamps were used almost exclusively for street lighting and other purposes, the incandescent lamps have now replaced them to an appreciable extent

The production of incandescent lamps showed a valuation of $15,714,809 for 1909, and a total number of 66,776,997. About one-fifth of this total production was tungsten, the remainder being classified as carbon filament.

The value of insulated wire and cables manufactured in 1909, 1904, and 1899, constituted the largest single item in the total value of electrical machinery, apparatus and supplies reported, representing more than one-fifth of the total value of products for the industry at each census. Of the $51,624,737 reported as the total value of insulated wire and cables $40,250,572 was reported by establishments in the industry proper, and $11,374,165 by establishments engaged primarily in other industries. Only a small number of the establishments in the industry proper drew the wire which they insulated, while of the establishments outside the industry reporting this product the greater number were engaged primarily in wire drawing. New Jersey, Illinois and New York were the three States leading in this branch of the industry in 1909, reporting 63.8 per cent. of the total value in that year and 66.1 per cent. in 1904.

# Flour-Mill and Grist-Mill Industry.

(From a Report of the Census Bureau, Issued April 7, 1913.)

THE report on this industry distinguishes three classes of mills: (1) Merchant mills whose chief products are intended for human consumption; (2) merchant mills whose chief products are those commonly used as feed for live stock, and (3), mills engaged exclusively in custom grinding. Mills reporting the purchase of any part of the grain which they grind are classified as merchant mills, even though a large part of their business may consist in custom grinding. Custom mills, on the other hand, are those engaged exclusively in custom grinding, whether for toll or for a stipulated charge, including those where grain already ground is sometimes given in exchange for the grain to be ground. Practically all of the custom mills are very small, and so also are a considerable number of the merchant mills.

Of the 23,652 mills canvassed for 1909, more than half (11,961) were custom mills, but of the total value of products—$938,699,958—only $55,115,553, or 5.9 per cent., was contributed by this class of mills. More than three-fourths of the merchant mills were engaged chiefly in the manufacture of wheat flour and other products intended for human consumption, and the value of the products of these mills was $832,790,364, or 88.7 per cent. of the total for all mills combined.

The flour-mill and grist-mill industry is one in which the cost of materials constitutes a very large proportion of the total value of products, the process of manufacture itself being relatively simple and inexpensive. The total cost of the materials used by all mills in 1909 was $813,891,347, which was equal to about seven-eighths (86.7 per cent.) of the total value of products, while the value added by manufacture (that is, the value of products less the cost of materials) was only $124,808,611.

The flour-mills and grist-mills of all classes combined gave employment in 1909 to an average of 88,849 persons, of whom 46,467 were wage-earners, and paid out $35,167,693 in salaries and wages. The quantity of grain ground was 872,950,743 bushels, the greater part being wheat and corn.

Minnesota is by far the most important State in the flour-mill and grist-mill industry, ranking first at the censuses of both 1909 and 1904 in the average number of wage-earners employed in merchant mills, in value of products, and in value added by manufacture During 1909, 104,042,999 bushels of wheat and 12,340,167 bushels of other grains were used in the merchant mills of that State, and 22,737,404 barrels of wheat flour were produced or more than one-fifth of the total for the United States. The number of wage-earners employed in the merchant mills of that State increased 7.7 per cent. during the decade ending with 1909, and the value of products 67 7 per cent.

In New York, which ranked second among the States, the merchant mills used 30,073,407 bushels of wheat and 40,271,986 bushels of other grain in 1909 More corn, buckwheat and oats were ground in New York than in any other State. Larger percentages of increase from 1899 to 1909 are shown for New York than for Minnesota.

Kansas ranked third in value of products and in value added by manufacture in 1909. Of the nine States that led in respect to value of products, Kansas shows the most rapid development in the milling industry during the period from 1899 to 1909, the number of wage earners increasing 68 per cent. and the value of products 221.1 per cent. Still higher percentages of increase however, are shown for some of the States in which the industry has attained importance only during recent years, such as Oklahoma, Idaho, Louisiana, Wyoming, and Nevada.

## CORPORATIONS INCREASE.

In 1909, of the total number of merchant mills reported for the flour-mill and grist-mill industry, 19.4 per cent. were under corporate ownership, as compared with 17.2 per cent in 1904 While corporations thus controlled less than one-fifth of the total number of establishments, the value of the products of these establishments represented 66.6 per cent. of the total value of products for all merchant mills engaged in the industry in 1909, and 60.3 per cent. in 1904. These figures show an appreciable increase during the five-year period in the relative importance, as measured by value of products, of establishments under corporate ownership.

In 1909, of the total number of wage-earners reported for merchant mills, 9,053, or 22.9 per cent., were employed in establishments under individual ownership; 7,488, or 19 per cent., in those under firm ownership; and 22,912, or 58.1 per cent., in those owned by corporations.

There was considerable variation in the relative importance of the establishments operated by individuals, firms and corporations, respectively, in the different States. Thus in Minnesota, the principal flour-producing State, establishments controlled by corporations constituted 38 2 per cent. of the total number of establishments, gave employment to 85.3 per cent. of the wage-earners, and reported 87.2 per cent. of the total value of products In Pennsylvania, on the other hand, corporations controlled only 4 per cent. of the establishments, and these establishments gave employment to only 20.2 per cent. of the wage-earners, and contributed only 27.4 per cent. of the total value of products.

## VALUE OF PRODUCTS.

Of the 11,691 merchant mills reported for 1909, 138, or 1.2 per cent., manufactured products valued at $1,000,000 or over. In 1904 there were 87 establishments of this class out of a total of 10,051. While such establishments represented a comparatively small proportion of the total number

at both censuses, they reported a considerable proportion of the total value of products—36.1 per cent. in 1909 and 28.5 per cent. in 1904.

On the other hand, the small establishments—that is, those manufacturing products valued at less than $20,000—constituted more than one-half (51.2 per cent.) of the total number of merchant mills in 1909, but the value of their products amounted to only 6.2 per cent. of the total. The great bulk of the output of the merchant mills was turned out by establishments having products valued at $100,000 or over, such establishments reporting 72.6 per cent. of the total value of products in 1909 and 67.8 per cent. in 1904.

MORE GRAIN GROUND.

The total quantity of grain during 1909, 872,950,743 bushels, represented an increase of 37,807,118 bushels, or 4.5 per cent., over the amount reported for 1899. The merchant mills devoted primarily to the manufacture of products intended for human consumption used 84.3 per cent. of the total quantity reported for 1909; those producing mainly feed for live stock 8 per cent., and the mills engaged exclusively in custom grinding 7.6 per cent.

The value of breakfast foods manufactured in 1909 and included with "food preparations" approximated $37,000,000.

Of the total quantity ground in merchant mills, wheat constituted 61.6 per cent. in 1909 and 64.6 per cent. in 1899; corn formed 26 per cent. in 1909 and 24.8 per cent. in 1899; and oats formed 6.2 per cent. in 1909 and 6.5 per cent. in 1899.

The total quantity of wheat flour reported for 1909, 107,108,461 barrels, represents an increase of 3,584,367 barrels, or 3.5 per cent., over 1899. On the basis of the total quantity of wheat and wheat flour reported, an average of 4.7 bushels of wheat was used to produce a barrel of flour both in 1909 and 1899.

The number of mills producing wheat flour decreased from 7,685 in 1904 to 7,342 in 1909. Since in 1909 the total number of merchant mills was 11,691, it appears that a great many did not grind wheat.

Minnesota, the most important flour-producing State, shows a decrease of 68 in the number of wheat flour mills, and a decrease is shown for each of the five classes of mills except those producing less than 1,000 barrels. Decreases in the total number of mills which produced wheat flour took place also in New York, Ohio and Missouri, which ranked third, fifth and sixth, respectively, in the production of such flour in 1909, but the number increased slightly in Kansas and Illinois, which ranked second and fourth, respectively.

Summaries giving general statistics for the flour-mill and grist-mill industry for 1909 are presented in the following table:

| 1909. | Flour-Mills and Grist-Mills, Merchant and Custom. | | | |
|---|---|---|---|---|
| | Total. | Merchant Mills. | | Custom Mills. |
| | | Manufacturing Chiefly for Human Consumption. | Manufacturing Chiefly Feed for Live Stock. | |
| Number of establishments | 23,652 | 9,162 | 2,529 | 11,961 |
| Persons engaged in the industry | 88,849 | 59,188 | 6,866 | 22,795 |
| Proprietors and firm members | 30,204 | 14,365 | 3,205 | 15,634 |
| Salaried employés | 12,178 | 11,378 | 653 | 147 |
| Wage-earners (average number) | 46,467 | 36,445 | 3,008 | 7,014 |
| Primary horsepower | 1,126,347 | 853,584 | (1) | 272,763 |
| Capital | $370,410,289 | $326,654,430 | $22,497,349 | $21,258,510 |
| Expenses | $875,632,914 | $781,274,162 | $46,248,187 | $48,110,565 |
| Services | $35,167,693 | $32,062,511 | $1 918,642 | $1,186,540 |
| Salaries | $12,564,595 | $12,021,161 | $495,606 | $47,828 |
| Wages | $22,603,098 | $20,041,350 | $1,423,036 | $1,138,712 |
| Materials | $813,891,347 | $724,294,494 | $43,281,985 | $46,314,868 |
| Miscellaneous | $26,573,874 | $24,917,157 | $1,047,560 | $609,157 |
| Value of products | $938,699,958 | $832,790,364 | $50,794,041 | $55,115,553 |
| Value added by manufacture (value of products less cost of materials) | $124,808,611 | $108,495,870 | $7,512,056 | $8,800,685 |
| Grain ground, bushels | 872,950,743 | 736,013,881 | 70,234,080 | 66,702,782 |

(1) Included in total for merchant mills.

# Manufacture of Ice.

(From a Report of the Census Bureau Issued November 10, 1913.)

This industry includes all establishments engaged primarily in the manufacture of ice for sale, together with a few cold-storage houses making ice for sale in considerable quantities. For establishments such as breweries, cold-storage houses, and chemical factories, which manufacture ice solely for their own use, no statistics of any kind are included in this report.

In 1909 there were 2,004 establishments in the United States which were engaged in the manufacture of ice. The number of persons engaged in the industry was 21,107 of whom 16,114 were wage-earners. The capital invested amounted to $118,641,538, and the value of products was $42,953,055. The total amount of ice manufactured was 12,647,949 tons, an increase of 194.5 per cent. over 1899, and 75.7 per cent. over 1904.

While artificial ice was manufactured in the United States as early as 1866, the industry did not attain any considerable importance until the decade ending with 1889. In 1909 establishments were reported in 41 States and the District of Columbia. During the twenty years from 1889 to 1909 the value of products increased $38,052,072, or 776.4 per cent. the value added by manufacture, $27,675,273, or 698.8 per cent. and the average number of wage-earners, 13,288, or 470.2 per cent.

Pennsylvania ranked first at the censuses of 1909 and 1904 in average number of wage-earners, value of products, and value added by manufacture. Texas ranked second in 1909 in value of products and third in value added by manufacture, while New York ranked third in value of products, and second in value added by manufacture. Remarkable gains, especially in value of products, are shown by nearly all the States. The development for the decade 1899-1909 was most rapid in Oklahoma, the value of products for this State being more than eleven times as great in 1909 as in 1899. Kansas, Washington, California, and West Virginia also show very high percentages of increase.

No establishments in this industry were reported for 1909 from Maine, New Hampshire, Minnesota, North Dakota, South Dakota, Montana, or Wyoming.

MANUFACTURE OF ICE—*Continued.*

The largest number of wage-earners employed in the industry during any month of 1909 was 22,872, in July, and the smallest number 9,847, in January, the minimum number being equal to 43.1 per cent. of the maximum. The nature of the ice manufacturing industry is such that economical management calls for operation day and night, and practically all the larger plants are organized on the basis of two 12-hour shifts per day.

FORM OF OWNERSHIP.

In each of the States the number of establishments controlled by corporations greatly exceeded the number of those owned by individuals and firms combined, the number owned by corporations being over three times the combined number of the latter in four of the leading States. In value of products the establishments owned by corporations largely predominated in each of the States, their proportion of the total ranging from 77.9 per cent. in Indiana to 96.1 per cent. in California.

More than half of the total value of products for the industry was reported at each census by establishments having products valued at from $20,000 to $100,000. The average value of products per establishment increased from $18,023 in 1904 to $21,434 in 1909.

The cost of the ammonia used in the manufacture of ice for sale increased from $359,549 in 1899 to $1,021,913 in 1909, or 184.2 per cent. for the decade. The average cost of ammonia per pound varied but slightly from census to census, that for anhydrous ammonia being 26.5 cents in 1899 and 26.7 cents in 1909 and that of aqua ammonia 6 cents in 1899 and 5.7 cents in 1909. The quantity of anhydrous ammonia used increased from 1,056,535 pounds in 1899 to 3,466,284 in 1909, or 228.1 per cent. and that of aqua ammonia increased from 1,323,454 pounds to 1,670,698 pounds, or 26.2 per cent. during the same time. In 1909 the cost of ammonia represented but 9 per cent. of the total amount ($11,317,498) expended for materials.

The total quantity of ice reported in 1909 by establishments in the industry was nearly three times as great as that reported for 1899—12,647,949 tons, as compared with 4,294,439 tons. From 1899 to 1909 can ice showed a gain of 181.9 per cent. in quantity and 188.3 per cent. in value, and plate ice showed a gain of 531.3 per cent. in quantity and 536.2 per cent. in value. Plate ice, however, formed but a small proportion of the total quantity at either census—7.7 per cent. in 1909 and 3.6 per cent. in 1899.

In 1909 the production of the seven leading States, each of which reported more than 500,000 tons, aggregated 6,701,324 tons, or 53 per cent. of the total production. The largest absolute increase for the decade (935,548 tons) is shown by New York, and the next largest (904,918 tons) by Pennsylvania. Many of the States of smaller production, however, show very large relative gains.

The total number of establishments reporting ice made for sale as a secondary product in 1909 was 338, and the quantity of ice reported by them was 1,582,259 tons, with a value of $4,249,790. Thus the aggregate quantity of ice manufactured in the United States in 1909, exclusive of that made by establishments for their own use, was 14,230,208 tons, and its aggregate value $44,139,053.

AVERAGE VALUE PER TON.

The average value per ton of ice manufactured by establishments in the industry was $3.15. In most of the leading States the average value per ton was somewhat less than the average for the country as a whole; thus in Missouri the value per ton was $2.33; in New York, $2.55; in Ohio, $2.56; in Pennsylvania, $2.76, in Illinois, $2.85, and in California, $3.04. In Texas, however, the average value was $4.70. For the ice made as a secondary product in other industries the average value per ton was $2.68, this average being lower in most of the States than that for ice made as a primary product.

Of the 2,004 establishments engaged primarily in the manufacture of ice for sale in 1909, 1,616, or 80.6 per cent. used only the compressor system; 357, or 17.8 per cent. used the absorption system only, while 31 establishments used both systems. The increase in the number of establishments using the compressor system between 1899 and 1909 was 1,045, or 183 per cent. and in the number using the absorption system, 141, or 65.3 per cent.

# Steel Works and Rolling Mills.

(From a Report of the Census Bureau Issued July 19, 1913.)

STEEL works and rolling mills constitute one of the largest industries in the country, the total value of products for 1909 being $985,722,534. The number of establishments was 446, and the number of persons engaged in the industry was 260,762, of whom 240,076 were wage-earners, the amount paid in wages being $163,200,758.

The total number of establishments, including forges and bloomeries, has not varied greatly, the increase for the 40 years since 1869 being only 5.7 per cent. In the case of value of products, however, the amount for 1909 was over seven times that for 1869, and the average value of products per establishment shows a progressive increase with each census—from $325,991 in 1869 to $2,210,140 in 1909. The rate of increase in value of products for the successive decades has been quite uniform, ranging from a minimum increase of 50.6 per cent. for the decade 1869-1879, to a maximum of 79.3 per cent. for the decade 1889-1899. The increase in value of products from 1899 to 1909 is perhaps partly attributable to advance in prices, but for some of the more important products the prices—at least the quoted prices in trade journals—were substantially the same in both years.

The steel-works and rolling-mill industry is concentrated largely in the Middle Atlantic and East North Central States, and in the Panhandle of West Virginia. Of the 446 establishments in 1909, 362, or 81.2 per cent., were located in seven contiguous States—New York, New Jersey, Pennsylvania, West Virginia, Ohio, Indiana and Illinois. The value of products in these seven States amounted to $97,365,567, or 91 per cent. of the total for the United States.

The steel-works and rolling-mill industry comprises three classes of establishments: (1) Those equipped both with furnaces for making steel and with hot rolls for rolling it; (2) those equipped with steel furnaces but not with hot rolls; and (3) those equipped with hot rolls but not with steel furnaces. Most of the largest establishments belong to the first group. All steel plants operated in conjunction with blast furnaces are equipped also with rolling departments. On the other hand, no establishments of the second group have blast furnaces, but all buy pig iron and scrap for steel making. Establishments of the third group include those purchasing their material in the form of ingots, blooms, slabs or other shapes, pig iron for puddling furnaces, and also the few independent bloomeries.

In the country as a whole combined steel works and rolling mills produced 61.6 per cent. of the aggregate value of products in 1909; steel works without rolling mills, only 4.7 per cent.; and rolling mills without steel works, 33.8 per cent. These percentages, however, give a somewhat exaggerated idea of the importance of the latter class of mills, because the value of their product consists in considerable part of the value of the crude steel purchased by them from plants of the first two groups.

Pennsylvania in 1909 contributed over half (50.7 per cent.) of the total value of products; Ohio, about one-fifth (20.1 per cent.); Illinois, 8.8 per cent.; New York, 4 per cent., and Indiana, 3.9 per cent. The highest percentage of increase in value of products from 1904 to 1909 is shown for Cali-

fornia, which State, however, is of comparatively minor importance in the industry. Of the leading producing States, Indiana, owing to the recent great development at Gary, shows the highest percentages of increase—69.9 per cent. in number of wage-earners, 128.4 per cent in value of products, and 108.7 per cent. in value added by manufacture.

The average number of persons engaged in the industry in 1909 was 260,762, of whom 240,076, or 92.1 per cent., were wage-earners; 4,286, or 1.6 per cent., proprietors and officials, and 16,400, or 6.3 per cent., clerks. Individual proprietors and firm members were few in number, the industry being mainly controlled by corporations.

Of the total number of wage-earners in 1909, 34.2 per cent. were in establishments where the prevailing hours were 60 per week or 10 hours a day for six days in the week, while 34.4 per cent. were in establishments where the prevailing hours were over 60 per week, and 21.8 per cent. where they were 72 per week and over. The eight-hour day is not found to any large extent, only 9.3 per cent. of the wage-earners being employed in establishments where the prevailing hours were less than 54 per week. The proportion in establishments in which the prevailing hours of labor were 72 or more per week was especially high in Illinois, Wisconsin and Indiana.

SIZE OF ESTABLISHMENTS.

The tendency toward concentration in large establishments is very marked in the steel industry. There is no other industry in which so many plants of great size are found. In 1909, 41.7 per cent. of the establishments reported products valued at $1,000,000 or more each. as compared with 31.6 per cent. in 1904. This group of establishments in 1909 included 23, and in 1904, 15 with products in excess of $10,000,000 in value. The value of the output of the establishments with products valued at $1,000,000 or over formed 91 per cent. of the total for all establishments in 1909, as compared with 84.6 per cent. in 1904, and that of the establishments with products valued at $10,000,000 or over constituted 43.2 per cent. of the total in 1909, compared with 36.6 per cent. in 1904

The average number of wage-earners per establishment increased from 500 in 1904 to 538 in 1909, or 7.6 per cent.; the average value of products, from $1,624,000 to $2,210,000, or 36.1 per cent., and the average value added by manufacture, from $561,000 to $736,000, or 31.2 per cent. The increase in average value of products per establishments perhaps may be due partly to increase in prices of commodities, but is by no means wholly due to the cause.

In the distribution of the 19,276,237 tons of finished rolled products and forgings made by steel works and rolling mills in 1909, among the principal producing States Pennsylvania produced 51.4 per cent. of the total output of these products in 1909, as compared with 54.3 per cent. in 1904. Ohio increased its proportion of the output from 13 per cent. in the earlier to 16.1 per cent in the later year. Indiana and Illinois showed higher percentages of the total output in 1909 than in 1904; but the proportion reported by New York and West Virginia remained about the same.

There has been during each decade a marked increase both in the absolute and relative amount of open-hearth steel produced. Basic open-hearth steel constituted 1.3 per cent. of the total steel production in 1889, as against 56.2 per cent. in 1909. Bessemer steel, on the other hand, although the output increased 153.8 per cent. during this period, constituted only 39 per cent. of the total production in 1909, as compared with 86.6 per cent. in 1889.

PRODUCTION BY STATES.

Figures for the production of steel by States show that the most important of these, in 1909, in order of rank, were New York, Colorado, Maryland, Alabama, West Virginia and Kentucky. There was a relative decline from 1899 in the importance of Pennsylvania and Illinois as producers of steel and a relative gain in that of Ohio and Indiana. In Indiana practically all, and in Pennsylvania much the larger part of the steel produced in 1909 was made by the open-hearth process, but in Illinois and Ohio the Bessemer process still predominated.

# Butter, Cheese, and Condensed Milk Industry.

(From a Report of the Census Bureau Issued July 11, 1913.)

Of the 8,479 establishments engaged in the industry in the United States in 1909 56.4 per cent. reported butter as their product of chief value, 42 per cent. cheese, and 1.6 per cent condensed milk. Of the total value of products shown for the combined industry the butter factories contributed $194,999,198, or 71 per cent.; the cheese factories $44,263,177, or 16.1 per cent.; and the condensed milk factories $35,295,343, or 12.9 per cent.

In this industry the cost of materials constitutes a very large proportion of the total value of products, the process of manufacture being relatively simple and inexpensive. The cost of the materials used in 1909 was $235,546,064, forming 85.8 per cent. of the value of products, while the value added by manufacture (that is, the value of products less the cost of materials) was only $39,011,654. The factories of the industry gave employment to an average of 31,506 persons during 1909, and paid out in salaries and wages a total of $14,671,932. Of the persons engaged in the industry 18,431 were wage-earners, 5,056 were salaried employés, and 8,019 were proprietors and firm members.

The average number of persons engaged in the industry in 1909 was 31,506, of whom 19,380 were reported by the butter factories, 7,164 by the cheese factories, and 4,962 by the condensed milk factories. Of the total number of persons engaged in the combined industry 18,431, or 58.5 per cent., were wage-earners; 10,480, or 33.3 per cent., were proprietors and officials; and 2,595, or 8.2 per cent., were clerks and other subordinate salaried employés. Of the total number 29,095, or 92.3 per cent., were males, and 2,411, or 7.7 per cent., females.

The average number of female wage-earners in 1909 was 1,420, of whom 987, or 69.5 per cent., were in the condensed milk factories. Females formed 23.7 per cent. of the total number of wage-earners in this branch of the industry, as compared with 3.2 per cent. in the butter factories and 2.2 per cent. in the cheese factories.

THE PRODUCTION OF BUTTER.

In 1909 the combined production of butter in the factories of the butter, cheese and condensed milk industry and on farms in the United States amounted to 1,619,415,263 pounds, an increase of 127,662,661 pounds, or 8.6 per cent., over the production in 1899. During the decade the output of the factories increased 204,638,107 pounds, or 48.7 per cent., and the production on farms decreased 76,975,446 pounds, or 7.2 per cent. At both censuses the production of butter on farms greatly exceeded the factory output, but the proportion which it formed of the combined total decreased from 71.8 per cent. in 1899 to 61.4 per cent. in 1909.

The quantity of cheese produced in the United States in the factories of the industry and on farms during 1909 amounted to 320,532,181 pounds, an increase of 22,187,539 pounds, or 7.4 per cent., over the production in 1899. The production in the factories engaged in the industry increased 29,153,993 pounds, or 10.3 per cent., between 1899 and 1909, and the production on farms decreased 6,966,454 pounds, or 42.6 per cent. At both censuses the quantity made in factories was many times greater than the quantity made on farms, and the proportion which it formed of the combined total increased from 94.5 per cent. in 1899 to 97.1 per cent. in 1909.

In 1909 Wisconsin was the most important State in the combined industry as measured by value of products, having displaced New York, which had previously ranked first. In average

number of wage-earners and value added by manufacture, however, New York still held first place in 1909 and Wisconsin ranked second, but the percentages of increase for the decade in these items, as well as in the value of products, were less for New York than for Wisconsin. Iowa ranked third as regards value of products in 1909. Minnesota, which shows an increase of 96.5 per cent. in value of products for the five-year period, advanced from fifth place in 1904 to fourth in 1909, having exchanged positions with Illinois, which shows a gain of only 34.1 per cent. for this period.

Among the thirteen States which reported products for 1909 valued at more than $5,000,000 these show very large percentages of increase for the decade 1899-1909: Washington (511), Michigan (264.6), California (256.2), Nebraska (240.8), Minnesota (198.2), Wisconsin (167.6), and Ohio (154.4). Much higher percentages are shown for a number of other States, most of which, however, reported only a small proportion of the total value of products even in 1909. The States showing the highest percentages of increase were North Dakota (743.4), Oregon (670), Idaho (662.1), and Missouri (585).

Of the 8,479 establishments reported for 1909 only nine had products valued at $1,000,000 or over. Of the total number of establishments reported for the industry both in 1909 and in 1904, 15.5 per cent. were under corporate ownership. While corporations thus controlled a comparatively small percentage of the total number of establishments, the value of the products of the establishments represented 41.3 per cent. of the total for the industry in 1909 and 36.5 per cent. in 1904. Co-operative associations, as reported, controlled 32.7 per cent. of the establishments engaged in the industry in 1909, as compared with 27.3 per cent. in 1904, and reported 26.5 per cent. of the total value of products in 1909 and 24 per cent. in 1904.

The total quantity of milk reported for 1904 was slightly larger than that for 1899, but taking the decade as a whole the figures show a decrease of 15.3 per cent.—from 11,678,082,821 pounds in 1899 to 9,888,727,303 pounds in 1909. On the other hand, the quantity of cream reported shows a steady increase from 203,673,958 pounds in 1899 to 1,406,143,908 pounds, or nearly seven times as much, in 1909.

In all the States for which separate figures are given large increases took place during each five-year period in the amount of cream reported by the factories, except in Vermont, where the quantity decreased somewhat between 1904 and 1909. On the other hand, there were only four States—Wisconsin, New York, Michigan and Washington—in which the quantity of milk reported for 1909 was greater than that for 1899, and only two—Nebraska and Washington—in which it was greater than that for 1904. The most pronounced decrease during the decade in the quantity of milk was in Iowa, in which State there was a decrease of 1,111,222,632 pounds, or about five-eighths of the net decrease in the industry as a whole.

MORE BUTTER MADE.

In the quantity of butter manufactured in the factories of the industry there was an increase of 204,638,107 pounds, or 48.7 per cent., during the decade 1899-1909. Wisconsin ranked first in the production of butter in 1909, with 103,884,684 pounds; Minnesota was second, with 88,842,846 pounds; and Iowa was third, with 88,582,187 pounds. Although the manufacture of butter was reported from 43 States in 1909, the combined product of six States—Wisconsin, Minnesota, Iowa, New York, California, and Michigan—amounting to 400,002,143 pounds, represented 64 per cent. of the total of the industry.

The production of cheese in 1909 was 1.9 per cent. less than that in 1904, and only 10.3 per cent. greater than that in 1899, and since both of the other main products of this industry show a considerable increase for the period 1904-1909, as well as for the decade, it may be inferred that milk is less profitably used in the manufacture of cheese than in the manufacture of butter or condensed milk. By far the largest gain in any State during the decade 1899-1909 was that in Wisconsin, amounting to 70,316,968 pounds, or 90.4 per cent.

Condensed milk shows an increase in production for the decade 1899-1909 amounting to 307,874,757 pounds, or 164.7 per cent. The bulk of this product was reported by a small number of States. New York produced 24.4 per cent. of the total quantity in 1909, Illinois 23.1 per cent., and Washington 10.8 per cent., the combined output of these three States representing 58.4 per cent. of the total for the industry.

Detailed figures for the combined industry in the leading States follow:

| States. | Number of Establishments, 1909. | Value of Products. | | | | | |
|---|---|---|---|---|---|---|---|
| | | Amount, 1909. | Per Cent. of Total, 1909. | Rank. | | Per Cent. of Increase. | |
| | | | | 1909. | 1904. | 1899–1909. | 1904–1909. |
| United States | 8,479 | $274,557,718 | 100.0 | .. | .. | 109.9 | 63.2 |
| Wisconsin | 2,630 | 53,843,249 | 19.6 | 1 | 2 | 167.6 | 79.5 |
| New York | 1,552 | 42,458,345 | 15.5 | 2 | 1 | 59.9 | 36.7 |
| Iowa | 512 | 25,849,866 | 9.4 | 3 | 3 | 63.1 | * |
| Minnesota | 784 | 25,287,462 | 9.2 | 4 | 5 | 198.2 | 96.5 |
| Illinois | 295 | 17,798,278 | 6.5 | 5 | 4 | 38.2 | 34.1 |
| Michigan | 435 | 14,287,499 | 5.2 | 6 | 7 | 264.6 | 74.0 |
| Pennsylvania | 536 | 13,544,065 | 4.9 | 7 | 6 | 31.6 | 17.0 |
| California | 161 | 12,760,670 | 4.6 | 8 | 8 | 256.2 | 63.2 |

* Figures not comparable.

# Manufacture of Musical Instruments.

(From a Report Issued by the Census Bureau, August 1, 1913.)

THE establishments engaged primarily in the manufacture of pianos in 1909 turned out products to the value of $66,569,273, or 74.1 per cent. of the total value of products of the three branches of the industry combined. The value of the products reported by the establishments engaged chiefly in the manufacture of organs ($4,745,655) represented 5.3 per cent. of the total for all three branches;

MANUFACTURE OF MUSICAL INSTRUMENTS—*Continued.*

and the value of the products reported by the establishments engaged chiefly in the manufacture of piano and organ parts and materials ($18,474,616) represented 20.6 per cent of the total value of products for the three branches. The cost of the materials used in the three branches of the industry combined was $43,764,737, which is equal to 48.7 per cent. of the total value of products, while the value added by manufacture (that is, the value of products less the cost of materials) was $46,024,807.

The establishments in the three branches of the industry combined (pianos, organs, and piano and organ parts and materials), gave employment to 41,882 persons, of whom 38,020 were wage-earners, and paid out $28,313,754 in salaries and wages. Of the total number of persons engaged, 67.8 per cent. were employed in the piano branch of the industry, 6.6 per cent. in the organ branch, and 25.6 per cent. in the parts and materials branch.

The manufacture of pianos and organs has had an uninterrupted development since 1869, when products to the value of $11,886,444 were reported. In 1909 the value of products was more than seven times as great, $89,789,544. The largest increases are shown for the decade from 1899 to 1909, when the number of persons engaged in the industry increased 80.4 per cent. and the value of products 118.9 per cent. The large piano and organ factories are of comparatively recent development. In 1869 the average establishment gave employment to only 24 wage-earners and the average value of products was $46,797; in 1909 the average number of wage-earners was 75 and the value of products $177,100.

The decrease in the number of proprietors and firm members is no doubt due to the growth in the corporate form of ownership. On the other hand, there was an increase of 134.8 per cent. during the decade ending with 1909 in the number of salaried employés.

Although statistics are shown in the bulletin for 17 States separately, more than two-thirds (69 per cent.) of the total value of products was reported by New York, Illinois, and Massachusetts. New York reported 37.5 per cent of the total and Illinois 21.4 per cent. Wisconsin shows the greatest relative increase for the five-year period 1904-1909, advancing from 15th place in value of products in 1904 to 12th place in 1909. Michigan also shows a marked gain in rank during this period, advancing from eighth to fifth. Most of the States held the same, or nearly the same rank in 1909 as in 1904, and in general the States had in 1909 the same, or nearly the same rank in number of wage-earners and value added by manufacture as in value of products.

PRODUCTION OF PIANOS.

There has been a steady increase in the number and value of both upright and grand pianos manufactured since 1899. Of the total number of pianos reported in 1909, 97.7 per cent. were uprights. Of their total value, that of the uprights represented 93.2 per cent. The total production of pianos of both kinds reported in 1909 was 374,154, valued at $59,501,225, an increase in number of 203,143, or 118.8 per cent., and in value of $32,498,373, or 120.4 per cent., over the totals for 1899. Upright pianos show the greater percentage of increase in number, but grand pianos show the greater percentage of increase in value. New York and Illinois were two of the principal States in the manufacture of upright pianos at each of the last three censuses. In 1909, the number reported for these two States combined (244,994) formed 67 per cent. of the total for the United States, in the manufacture of grand pianos, New York and Massachusetts were the two most important States, reporting in 1909, 6,831, or 78.1 per cent. of the total number.

Of the total number of upright pianos manufactured, 34,495, or 9.4 per cent. were for or with player attachments. The value of the instruments for or with player attachments formed 16.7 per cent. of the total value of upright pianos. New York reported 18,917, or 54.8 per cent. of the upright pianos for or with player attachments. Of the 10,898 player attachments which were not attached to pianos, 2,789, or 25.6 per cent. were reported by establishments located in New York, but the value of the attachments made in New York was more than half of the total for the country, which was $1,474,630.

MANUFACTURE OF ORGANS.

In 1909, of the total number of reed and of pipe organs reported, 1.9 per cent. were pipe organs, but of the combined value 51.1 per cent. was contributed by pipe organs. In 1899, of the total number, only five-tenths of one per cent. were pipe organs, while of the total value they contributed 22.6 per cent. In the number of reed organs there was a decrease during the decade 1899-1909 of 39.9 per cent. and in their value a decrease of 35.8 per cent. For pipe organs there was an increase of 117 per cent. in number and of 130.5 per cent. in value. In the manufacture of reed organs, Illinois was the leading State in 1909 as in 1899, reported 37.5 per cent. and 41.3 per cent. respectively, of the total value. In the value of pipe organs manufactured, Massachusetts, New York, and Illinois reported about equal amounts in 1909, Illinois showing much the largest gain from 1899 to 1909, while a decrease took place in Massachusetts.

OTHER MUSICAL INSTRUMENTS.

The establishments assigned to this branch of the musical-instrument industry are those engaged chiefly in the manufacture of various kinds of musical instruments other than pianos and organs and phonographs and graphophones, or of materials for such instruments. The instruments made include cornets, trombones, tubas, and other brass instruments for band and orchestral use, cymbals, drums, xylophones, castanets, dulcimers, harps, lyres, guitars, lutes, banjos, mandolins, zithers, violins, violoncellos, flutes, flageolots, piccolos, etc., and parts of such instruments.

The value of products for this branch of the combined musical instrument industry does not show the general increase from census to census so noticeable in the two preceding branches. The value of products in 1909 was 7.3 per cent. less than in 1904, and 4.9 per cent. less than that in 1899. During the first half of the decade ending with 1909 there was considerable decrease in the number of establishments, accompanied by smaller decreases in the number of persons employed, capital invested, wages paid, and cost of materials, and an increase in the salaries, miscellaneous expenses, value of products, and value added by manufacture. During the last half of the decade there was a decrease in all of the items except the number of establishments, number of salaried employés, and salaries.

PHONOGRAPHS AND GRAPHOPHONES.

The establishments assigned to this industry were engaged chiefly in the manufacture of phonographs or graphophones for either disk or cylinder records, including those for office dictation; also the manufacture of records, blanks, horns, needles, or other supplies and materials used in the industry.

Each census since 1899 has shown an increase in the manufacture of phonographs and graphophones but, by far the greater development occurred during the five-year period 1899-1904, when there was an increase of 2,525, or 178.4 per cent. in the number of persons engaged in the industry, and of $7,990,801, or 355.7 per cent. in the value of products. While there was an increase of only seven in the number of establishments during the decade, the number of persons engaged in the industry in 1909 was more than four times and the value of products more than five times as great as the corresponding figures for 1899. In 1909, 16 of the 18 establishments were operated by corporations. New Jersey is by far the leading State in the industry, as measured by value of products, followed by Connecticut and New York in the order named.

Of the total value of products reported for the industry in 1909, $11,725,996, the value of complete instruments formed $5,406,684, or 46. per cent., and that of records and blanks $5,007,104, or 42.7 per cent. The remainder, $1,312,208, or 11.2 per cent. represented for the most part horns, needles, matrices, and other supplies used in the manufacture or operation of the instruments.

# Production of Lumber, Lath and Shingles.

(From a report issued by the Census Bureau, August 26, 1913.)

A PRELIMINARY statement of the output of lumber, lath and shingles in the United States during the calendar years 1912, 1911 and 1910. From data collected in co-operation with the Forest Service of the Department of Agriculture.

The number of active mills contributing to the totals were 29,648 in 1912; 28,107 in 1911, and 31,934 in 1910; while the reported production in these years was, in M feet board measure, 39,158,414, 37,003,207 and 40,018,282 respectively. The statistics cover the output of practically every commercial mill in operation during the whole or any part of this period. Annual returns from small neighborhood mills and others showing a total cut of less that 50 M feet board measure have not been included. Although the total reported cut was slightly less than in 1910, the average yield per mill was 5.3 per cent. greater than in that year, while the total production over 1911 was 2,155,207 M feet board measure, or nearly 6 per cent.

## LEADING STATES AND CENTRES.

Increases among the individual States were quite general, slight exceptions appearing in certain of the Eastern States and a few of the Western Mountain States, with of course the usual decrease in the output of the Lake States which has characterized the showing for several years, due directly to the rapidly decreasing supply of lumber material in this region. While both the principal lumber producing centres, namely, the Southern States and the Pacific Coast States, reported larger cuts in 1912 than in the preceding year, the increased production in the first-named group was substantially greater than for the United States as a whole. The development of the lumber industry in the Southern States during recent years has been rapid. At the census of 1900, 38.7 per cent. of the total production in the United States was reported from this region, while in 1907 it contributed 45.7 per cent. of the output, and in 1912, 51.4 per cent., or more than one-half of the total.

The production reported from Washington in 1912 was the largest recorded since 1906. Although for nearly a decade this State has led all others in the production of lumber and shingles, in 1912 it contributed more than one-tenth of all the lumber and nearly two-thirds of the shingles manufactured in the United States.

## SOFTWOODS AND HARDWOODS AND LEADING SPECIES.

Of the reported total lumber production, softwoods contributed 30,526,416 M feet board measure in 1912, as against 28,902,388 M feet in 1911, and 31,160,856 M feet in 1910. More than nine-tenths of the present stand of yellow pine—the softwood which is drawn upon most heavily for lumber material—is in the yellow pine belt, which comprises the Atlantic and Gulf Coast States from Virginia to Texas, inclusive, together with Missouri, Arkansas and Oklahoma. Under the term yellow pine are included the several species, long leaf, short leaf, loblolly, Cuban, etc. The reported cut from yellow pine timber in this territory during the year amounted to 14,470,617 M feet board measure, or about 98 per cent. of the total output from this species in the United States. Douglas fir, the species which ranked next to yellow pine among the conifers or softwoods, supplied material for 5,175,123 M feet board measure. The production from both of these species was greater in 1912 than in the preceding year. White pine ranked third among the softwoods in 1912, though the cut from this wood was smaller than in the preceding year, and has been declining steadily for several years past.

The reported cut of hardwood lumber in 1912 was 8,631,998 M feet board measure, as against 8,100,819 M feet in 1911, and 8,857,426 M feet in 1910. To this total oak, the leading hardwood species, contributed 3,318,952 M feet, or 38.4 per cent., and showed an increase over the output for the preceding year of 220,568 M feet, or 7.1 per cent. Maple, red gum, tulip poplar, chestnut, beech and birch followed oak in the order named.

The production of lath and shingles in 1912 did not differ materially from the output of these products during the preceding calendar year, although each was reported in slightly smaller quantities than in 1910.

The comparative summary follows:

| State. | Lumber Production (M Feet Board Measure). | | | State. | Lumber Production (M Feet Board Measure). | | |
|---|---|---|---|---|---|---|---|
| | 1912. | 1911. | 1910. | | 1912. | 1911. | 1910. |
| United States | 39,158,414 | 37,003,207 | 40,018,282 | Ohio | 499,834 | 427,161 | 490,039 |
| | | | | N. Hampshire | 479,499 | 388,619 | 443,907 |
| Washington | 4,099,775 | 4,064,754 | 4,097,492 | Missouri | 422,470 | 418,536 | 501,691 |

* Includes Kansas, Nebraska and Nevada.

# The Cotton Supply.

## CROP OF THE UNITED STATES FOR TWENTY YEARS.

THE following statements are furnished by the New York "Commercial and Financial Chronicle:"

| YEAR. | Bales. | YEAR. | Bales. | YEAR. | Bales. | YEAR. | Bales. |
|---|---|---|---|---|---|---|---|
| 1894 | 7,527,211 | 1899 | 11,235,383 | 1904 | 10,123,686 | 1909 | 13,828,846 |
| 1895 | 9,892,766 | 1900 | 9,439,559 | 1905 | 13,556,841 | 1910 | 10,650,961 |
| 1896 | 7,162,473 | 1901 | 10,425,141 | 1906 | 11,319,860 | 1911 | 12,132,332 |
| 1897 | 8,714,011 | 1902 | 10,701,453 | 1907 | 13,550,760 | 1912 | 16,043,316 |
| 1898 | 11,180,960 | 1903 | 10,758,326 | 1908 | 11,581,829 | 1913 | 14,128,902 |

The returns are for the years ending September 1. The average net weight, per bale, for 1913 is 493.59 pounds.

# Cotton Goods Made in the United States.

A CENSUS Bureau report issued June 17, 1911, showed that the number of establishments engaged in the manufacture of cotton goods in the United States in 1909 was 1,206, an increase of 24 per cent. since 1899, and that the value of the products was $616,297,000, an increase of 85 per cent. since 1899. The following is a tabular statement of the kinds of products of cotton goods by kind, quantity and value in 1909:

| Products. | 1909. | Products. | 1909. |
|---|---|---|---|
| Total value | *$628,391,813 | Mosquito and other netting— | |
| WOVEN GOODS: | | Square yards | 59.100,819 |
| Square yards | 6,348,568,593 | Value | $2,103,560 |
| Value | $456,089,401 | Upholstering goods— | |
| Plain cloths for printing or converting— | | Square yards | 94,840,051 |
| Square yards | 2,224,677,848 | Value | $14,882,842 |
| Value | $111,097,889 | Tapestries (piece goods and curtains)— | |
| Brown or bleached sheetings and shirtings— | | Square yards | 10,657,385 |
| Square yards | 1,484,353,529 | Value | $4,723,907 |
| Value | $88,802,985 | Lace and lace curtains— | |
| Twills and sateens— | | Square yards | 81,007,314 |
| Square yards | 388,314,961 | Value | $8,922,082 |
| Value | $34,274,107 | Other— | |
| Fancy woven fabrics— | | Square yards | 3,175,352 |
| Square yards | 426,710,359 | Value | $1,236,853 |
| Value | $47,498,713 | Bags and bagging— | |
| Ginghams— | | Square yards | 63,107,568 |
| Square yards | 537,430,463 | Value | $4,862,451 |
| Value | $37,939,040 | Cotton towels and towelling— | |
| Duck— | | Square yards | 52,778,170 |
| Square yards | 162,476,322 | Value | $6,037,075 |
| Value | $27,485,892 | Tape and webbing, value | $5,531,674 |
| Drills— | | Yarns for sale: | |
| Square yards | 238,869,407 | Pounds | 470,370.995 |
| Value | $17,750,151 | Value | $109,314,953 |

| Square yards | 264,870,508 | Pounds | 23,700,957 |
| Value | $27,350,162 | Value | $20,516,269 |
| Cottonades— | | Twine: | |
| Square yards | 25,676,286 | Pounds | 13,715,771 |
| Value | $3,343,533 | Value | $2,417,391 |
| Napped fabrics— | | Cordage and rope: | |
| Square yards | 305,655,864 | Pounds | 7,603,907 |
| Value | $25,695,367 | Value | $1,164,526 |
| Corduroy, cotton, velvet and plush— | | Cotton waste, for sale: | |
| Square yards | 19,706,438 | Pounds | 310,513,348 |
| Value | $6,965,634 | Value | $10,874,386 |
| | | All other products, value | $22,483,213 |

The number of wage-earners engaged in cotton manufacture in 1909 was 371,120.

* In addition, cotton goods to the value of $2,224,096 were made by establishments engaged primarily in the manufacture of products other than those covered by the industry designation.

# American Wood-Preservers' Association.

*President*—A. E. Larkin, Minneapolis, Minn. *Vice-President*—J. H. Waterman, Galesburg, Ill. *Secretary-Treasurer*—F. J. Angier, Baltimore, Md.

The objects and purposes of the association shall be to advance the wood-preserving industry in all its branches; to afford its members opportunities for the interchange of ideas with respect to improvements in the wood-preserving industry, and for the discussion of all matters bearing upon the industry of wood preserving; to maintain a high business and professional standard in all respects, and to standardize specifications for wood preservatives and their introduction into the materials to be preserved.

The means to be employed for this purpose shall be meetings for the presentation and discussion of appropriate papers, and for social and professional intercourse; the publication of such papers and discussions as may be deemed expedient; co-operation with other societies, associations and organizations in the work of standardizing specifications affecting the wood-preserving industry, and all other things incidental or conducive to the attainment of the objects of the association or any of them, and as the members may from time to time consider advisable.

Next annual convention will be held in New Orleans, January 20-22, 1914.

# Manufacture of Woollen Goods.

THE number of establishments in the United States in 1909 engaged in the manufacture of woollen goods and worsted goods (exclusive of carpets, felt goods, wool hats, hosiery and knit goods), according to the census report issued in April, 1911, was 913, employing capital of $415,463,000 and producing goods valued at $419,826,000. The value of products increased in five years 76 per cent.

The quantities and values of the different products manufactured in 1909 are as follows:

| PRODUCTS. | 1909. |
|---|---|
| Total value | *$419,743,521 |

| 1912-13..... | 195,293,255 | 4,423,161 | 80,883,313 | 109,986,781 | 304,043,400 | 494,913,494 | 384,926,713 | 21.01 |

Wools of Classes I, and II. are used for the manufacture of cloths, dress goods, and similar fabrics. Domestic wools are of these two classes. Class III. wools are used principally in the carpet manufacture, and are practically not grown in the United States. The domestic wool shown in the above table is the quantity in its greasy state as shorn from the sheep. Fleece wool is wool shorn from living sheep. Pulled wool is wool removed from the skin of slaughtered animals.

Reduced to the scoured condition fit for use in manufacture, the annual production and total value based on the price in Boston in October of each year for the years 1901-1912, inclusive, are as follows:

| Year. | Fleece and Pulled. Scoured. | Total Value. | Value per Pound. Fleece. | Value per Pound. Pulled. | Year. | Fleece and Pulled. Scoured. | Total Value. | Value per Pound. Fleece. | Value per Pound. Pulled. |
|---|---|---|---|---|---|---|---|---|---|
| | Pounds | | Cents. | Cents. | | Pounds. | | Cents. | Cents. |
| 1901..... | 126,314,690 | $51,164,709 | 41.1 | 36.7 | 1907..... | 130,359,118 | $78,263,165 | 62.3 | 50.2 |
| 1902..... | 137,912,085 | 60,679,127 | 45.2 | 39.7 | 1908..... | 135,360,648 | 61,707,516 | 46.6 | 41.6 |

| 1906..... | 129,410,942 | 73,721,583 | 63.8 | 54.3 | 1912..... | 136.866,652 | 75,819,251 | 55 4 | 56 |

The wool statistics in above tables were prepared by Wm. J. Battison, of Boston, for the National Association of Wool Manufacturers.

Number of sheep in the world according to the most recent available statistics and estimates: North America, 59,047,680; South America, 109,693,142; Europe, 179,516,437; Asia, 110,058,-874; Africa, 51,429,279; Oceania, 117,026,774, total world, 626,872,186.

## Interest Paid by Farmers on Loans.

In March, 1913, the Bureau of Statistics of the Department of Agriculture mailed nearly 3,000 letters to country banks of the United States, containing the following request and explanation:

This bureau proposes to make an inquiry each year concerning the average rate of interest paid by farmers on loans, the reports to be compiled into averages by States, and so published in the *Crop Reporter*, a publication of this department. The purpose of the inquiry is to show the average differences which prevail in the different States, and, as the inquiry proceeds, t show the change in the average rates from year to year. It is hoped that you will assist us by reporting for your community.

Question 1. What is the average of the current rates of interes paid to banks by farmers for 3 to 6 months' loans. (Rate which will represent as nearly as possible the average of all such loans, secured and unsecured.)

Question 2. What was the average for similar loans a year ago?

About 90 per cent. of the banks repl ed. Their replies were tabulated and averaged, with the following results:

[Averages of answers to questions quoted above.]

The production of sugar in 1911-1912 by sugar-growing countries, in tons of 2,240 pounds, as reported by Willett & Gray, was:

| COUNTRIES. | Cane Sugar. | COUNTRIES. | Cane Sugar. | COUNTRIES. | Beet Sugar. |
|---|---|---|---|---|---|
| Louisiana | 316,000 | Java | 1,395,000 | United States | 541.101 |
| Porto Rico | 320.000 | Hawaii | 531.480 | Germany | 1,505,479 |
| Cuba | 1,895,984 | Queensland | 173,296 | Austria | 1,154,606 |
| British West Indies | 113,392 | Mauritius | 165,585 | France | 516.618 |
| Hayti and S. Domingo. | 96.046 | Demerara | 83,294 | Russia | 2,058.635 |
| Peru | 144,000 | Argentina | 180,092 | Belgium | 246,220 |
| Brazil | 235,000 | Philippines | 190,702 | Holland | 267,607 |

Beet sugar production in the United States in 1911-12, by States, in tons of 2,240 pounds: Michigan, 119,790; Wisconsin, 17,857; Colorado, 111,703; Utah, 49,821; Idaho, 23,866; California, 146,357; all others, 71,707. Total, 541,101 tons.

CONSUMPTION OF SUGAR.

Licht's estimate of consumption of sugar of all kinds in various countries in 1911-12 per capita in pounds was: Germany, 41.35; Austria, 24.82; France, 39.41; Spain, 13.16; England, 85.54; Switzerland, 70,68; United States (W. & G.), 81 30; Russia, 22.81; Netherlands, 46.42; Denmark, 98.30; Italy, 10.47; Belgium, 33.10; Turkey, 18.62.

The consumption of sugar in the United States in the calendar year 1912, estimated by Willett & Gray, of New York, was:

| | | | |
|---|---|---|---|
| Imported (including 526,281 tons Hawaiian, 285,556 Porto Rican, and 131,932 Philippine sugar) | 2,608,632 | Domestic Maple | 7,000 |
| Domestic, manufactured from imported molasses | 8,155 | Domestic Beet | 516,851 |
| Domestic Cane | 257,194 | Domestic Total | 789,200 |
| | | Total product consumed in the U. S. | 3,504,182 |

or 81.30 pounds per capita.

## Production of Poultry and Eggs.

THE Census of 1910 gave the production of poultry in the United States, in 1909, as 488,468,354. The enumeration covered chickens, guinea fowls, turkeys, geese, ducks, pigeons and peafowls. The total value of fowls raised during 1909 was reported at the Census of 1910 to be $202,506,272, or an increase of 47.9 per cent. over the total value reported ten years earlier.

According to the Census of 1910, Illinois was the leading State in the number of fowls raised during 1909, the number being 32,352,888. Missouri ranked second in this respect, reporting the number of fowls raised in 1909 as 31,913,210. Iowa ranked third and reported the production of 29,990,147 fowls in 1909.

The production of eggs during the calendar year 1909 for the United States as a whole was 1,591,311,371 dozen. The production for the leading States was as follows: Missouri, 111,816,693; Iowa, 109,760,487; Ohio, 100,889,599; Illinois, 100,119,418; Kansas, 81,659,304; Indiana, 80,755,437; Texas, 77,845,047; Pennsylvania, 74,729,705; New York, 72,349,034; Michigan, 59,915,851.

The report of the Census of 1910 shows the production in 1909 of 5.31 fowls per capita, and 17.3 dozen of eggs per capita per annum for the United States.

## Dairy Products.

THE Thirteenth Census presented the following condensed analysis of the dairy industry of the United States for the census year 1909:

| | | |
|---|---|---|
| Cows kept for milk on farms | number.. | 20,625.432 |
| Cows kept for milk not on farms | " | 1.170,338 |
| Total number of cows kept for milk | | 21,795,770 |
| Milk produced on farms | gallons. | 5,813.699.474 |
| Butter made on farms | pounds.. | 994,650,610 |
| Butter made in factories | " | 624,764,653 |
| Total pounds of butter made | | 1,619,415,263 |
| Cheese made on farms | pounds.. | 9,405,864 |
| Cheese made in factories | " | 311,126.317 |
| Total pounds of cheese made | | 320,532.181 |
| Condensed milk produced | pounds.. | 494,796.544 |

The quantity of milk reported was produced on farms reporting 16 069,298 dairy cows and does not include estimates for 4,556,134 cows reported as dairy cows by farmers but for which no statement was given of quantity of milk prdouced. In many cases the reason for not giving the quantity of milk produced was that the farmers were unable to make even a rough estimate. Generally speaking, however, these cows were on farms in the Western and Southern parts of the United States where the production is likely to be less than the average for other parts of the country. Also, many cows reported as dairy cows are as a matter of fact milked only a very small part of the year. No estimate is included for the "cows kept for milk" *not* on farms.

# The American Hog and other Live Stock.

(From a Statement in the Crop Reporter, of the Dept. of Agriculture.)

The combined receipts of hogs, cattle, and sheep at Chicago, Kansas City, Omaha, St. Louis, Sioux City, St. Joseph, and St. Paul, yearly, since 1900, were as follows:

| Year. | Cattle. | Hogs. | Sheep. | Year. | Cattle | Hogs. | Sheep. |
|---|---|---|---|---|---|---|---|
| 1900 | 7,179,344 | 18,573,177 | 7,061,466 | 1907 | 9,590,710 | 19,544,617 | 9,857,877 |
| 1901 | 7,708,839 | 20,339,864 | 7,798,359 | 1908 | 8,827,360 | 22,863,701 | 9,833,640 |
| 1902 | 8,375,408 | 17,289,427 | 9,177,050 | 1909 | 9,189,312 | 18,834,641 | 10,284,905 |
| 1903 | 8,878,789 | 16,780,250 | 9,680,692 | 1910 | 9,265,412 | 15,685,435 | 12,406,767 |
| 1904 | 8,690,699 | 17,778,827 | 9,604,812 | 1911 | 8,768,456 | 20,806,479 | 13,556,108 |

* Less than one-tenth of 1 per cent.

# World's Crops.

In September, 1913, the International Institute of Agriculture at Rome, Italy, announced its estimates of world-crop production as follows:

Wheat, 3,333,000,000 bushels, total production in 19 countries.
Rye, 1,496,000,000 bushels, total production in 14 countries.
Barley, 1,225,000,000 bushels, total production in 17 countries.
Oats, 3,426,000,000 bushels, total production in 17 countries.
Corn—2,766,000,000 bushels total production in 9 countries, including United States, Hungary proper, Italy, Russia in Europe, Bulgaria and Spain, the names being given in the relative order of importance in production. The crop of Hungary is estimated at 184,758,000 bushels; that of Italy at 98,422,000.

The International Institute of Agriculture gives the estimated production of Rice for Japan at 16,662,000,000 pounds, an increase of 5.1 per cent. over the crop of last year.

# Tea, Coffee and Cocoa.

(Compiled by the Bureau of Foreign and Domestic Commerce, Department of Commerce.)

**Coffee.**—Sources of supply in 1911. Exports from coffee-growing countries in pounds. (From the Year Book of the Department of Agriculture):

| | | | |
|---|---|---|---|
| Brazil | 1,489,137,000 | Porto Rico | 40,146,000 |
| Central America | 212,576,000 | Jamaica | 6,726,000 |
| Venezuela | 97,659,000 | British India | 27,002,000 |
| Colombia, Ecuador, Peru and Bolivia | 95,478,000 | Dutch East Indies | 48,190,000 |
| Hayti and Santo Domingo | 57,650,000 | Other countries | 45,380,000 |
| Mexico | 70,000,000 | Total | 2,189,944,000 |

Consumption of leading countries in pounds:

| | | | |
|---|---|---|---|
| United States (1913) | 858,941,000 | Sweden (1912) | 65,995,000 |
| Germany (1912) | 370,721,000 | Italy (1912) | 59,754,000 |
| France (1912) | 245,403,000 | Norway (1911) | 29,376,000 |
| Austria-Hungary (1912) | 124,537,000 | United Kingdom (1912) | 28,003,000 |
| Belgium (1912) | 110,434,000 | British South Africa (1912) | 26,004,000 |
| Netherlands (1912) | 74,798,000 | Russia (1911) | 25,417,000 |

Imports of coffee into the United States, year ending June 30, 1913, were: From Brazil, 639,262,011 pounds, value $87,867,451. Colombia and Venezuela, 139,355,574 pounds, value $18,768,632. Central America, 32,172,524 pounds, value $4,115,720. Mexico, 26,121,439 pounds, value $4,090,909. The remainder came in smaller quantities from other countries, with 2,149,875 pounds of domestic coffee from Hawaii and 773,626 pounds from Porto Rico.

**Tea.**—Sources of supply: Production of the principal tea-growing countries in pounds. (Figures for China, Ceylon and Java show exports only):

| | | | |
|---|---|---|---|
| British India (1912) | 296,303,000 | Japan (1912) | 72,571,000 |
| China (1912) | 197,560,000 | Java (1912) | 61,818,000 |
| Ceylon (1911) | 186,594,000 | Formosa (1911) | 39,598,000 |

Consumption of leading countries, in pounds:

| | | | |
|---|---|---|---|
| United Kingdom (1912) | 295,409,000 | Netherlands (1912) | 12,141,000 |
| Russia (1911) | 153,288,000 | Germany (1912) | 9,096,000 |
| United States (1913) | 93,911,000 | New Zealand (1911) | 8,071,000 |
| Canada (1913) | 40,296,000 | Austria-Hungary (1912) | 3,793,000 |
| Australia (1911) | 32,797,000 | France (1912) | 2,888,000 |

Imports of tea into the United States during the year ending June 30, 1913, were 94,812,800 pounds, valued at $17,433,688. Of this 44,381,278 pounds were imported from Japan and 23,728,418 pounds from China.

**Cocoa.**—World's production of cocoa, 1912, in pounds: Gold Coast, 87,190,000; St. Thomas (Portuguese), 78,290,000; Ecuador, 72,780,000; Brazil, 61,072,000; Santo Domingo, 45,928,000; Trinidad, 41,618,000; Venezuela, 18,755,000; Grenada, 12,167,000; all other countries, 90,971,000. Total production, 508,771,000 pounds.

Consumption of leading countries, in pounds: United States, 146,723,000; Germany, 121,440,000; England, 61,826,000; France, 59,284,000; Holland, 54,941,000; Switzerland, 22,800,000; Belgium, 15,414,000; Austria-Hungary, 14,601,000; Spain, 11,574,000; all other countries, 41,678,000. Total consumption, 550,281,000. (Data from the "Gordian.")

Imports of raw cocoa into the United States in the fiscal year 1912-13 amounted to 140,039,172 pounds, valued at $17,389,042.

# Reports of the Principal Express Companies for 1912.

Statement compiled from the annual reports filed with the Interstate Commerce Commission by the companies named:

| Year Ended June 30, 1912. | Adams. | American. | United States. | Wells Fargo & Co. |
|---|---|---|---|---|
| Gross receipts from operation | $34,191,955.71 | $43,714,874.32 | $21,131,508.39 | $32,465,970.55 |
| Express privileges—Dr. | 17,833,972.09 | 21,076,806.20 | 9,927,777.05 | 15,439,708.15 |

Production of 1911 in pounds: United States, 905,109,000; Cuba, 66,930,000; Mexico (1906), 34,711,000; Santo Domingo (1910), 42,000,000; Argentina (1910), 15,178,000; Brazil (exports), 40,761,000; Hungary, 160,025,000; France, 40,433,000; Germany, 64,385,000; Russia (including Asiatic), 195,002,000; Turkey (European, 1907), 49,177,000; Java (exports, 1910), 116,000,000; Sumatra, East Coast of, 51,395,000; Japan, 93,787,000. Grand total, 2,626,985,000.

# Production of Coal.

United States, 310,297 sq. miles, not including 160,705 sq. miles of which little is known, but which may contain workable coal, and 31,805 sq. miles where coal lies under heavy cover and is not at present available. Estimated available supply at close of 1912 (short tons), 3,061,173,914,600.

In regard to the coal supplies of the countries outside of the United States, the Geological Survey does not know of any official estimates, with the exception of those of Great Britain, which have been placed by the Royal Commission of Coal Supplies at approximately 180,000,000,000 short tons. A statement by the Secretary of the Bituminous Coal Trade Association, places the German supply at 164,344,000,000 short tons; Canada's known supplies at 100,000,000,000 short tons; Japan at 50,000,000,000 short tons. Estimates in short tons for the other countries of Europe are as follows: France, 25,000,000,000; Austria-Hungary, 30,000,000,000; Belgium, 20,000,000,000; Spain, 4,000,000,000.

The same authority places the contents of the Chinese fields at 1,500,000,000,000 short tons. His estimates of the areas in square miles of the countries outside of the United States are as follows: China, 232,500; Canada, 65,000; India, 35,000; New South Wales, 24,000; Russia, 20,000; Great Britain, 12,000; Spain, 5,500; Japan, 5,500; France, 2,500; Austria-Hungary, 1,800; Germany, 1,700; Belgium, 500; Siberia, Central Asia and Africa, 180,000.

A monograph of the Coal Resources of the World was compiled by the executive committee of the Twelfth International Congress of Geology, which met at Toronto, Canada, August 7th to 14th, 1913. The total resources are estimated at 7,397,533 million tons, of which 4,000,000 million tons are bituminous, 3,000,000 million tons brown coal, and the remainder anthracite.

* Production is for calendar year preceding the fiscal year. † Export statistics for the fiscal years ending June 30. ‡ Residuum—tar, pitch, and all other from which the light bodies have been distilled. In 1905 this amounted to 48,949,362 gallons, in 1906 to 75,031,924 gallons, in 1907 to 66,228,009 gallons, in 1908 to 70,581,822 gallons, in 1909 to 103,188,033 gallons, in 1910 to 124,055,263 gallons, in 1911 to 123,398,188 gallons, in 1912 to 168,339,478 gallons, and in 1913 to 348,043,493 gallons.

Figures of production furnished by the United States Geological Survey; exports compiled from the Report of Bureau of Foreign and Domestic Commerce, Department of Commerce.

Over 351,000,000 barrels (of 42 gallons) of petroleum, according to the United States Geological Survey, were produced in the world in 1912. Of this amount 222,113,218 barrels were produced in the United States, 68,019,208 in Russia, and the remainder was distributed among a dozen countries, Galicia producing 8,535,174; Sumatra, Java and Borneo, 10,846,624; Rumania, 12,921,913; India, 7,115,672; Mexico, 16,558,215; Japan, 1,671,405; Peru, 1,751,143; Germany, 995,764.

# Production of Copper, Tin, and Zinc.

The production of copper in the world in 1912, stated in pounds, was as follows: United States, 1,243,268,720; Mexico, 158,760,000; Japan, 146,853,000; Spain and Portugal, 131,175,450; Australia, 105,399,000; Chile, 83,569,500; Canada, 77,775,600; Russia, 73,867,500; Germany, 53,581,500; Peru, 60,858,000; Sweden and Norway, 25,578,000; Cape Colony, 14,112,000; Servia, 16,317,000; German Southwest Africa and other Africa, 22,491,000; Austria-Hungary, 8,820,000; Italy, 5,071,500; Bolivia, 8,158,500; Newfoundland, 1,102,500; Turkey, 1,102,500; Cuba, 8,820,000; Miscellaneous, 4,630,500. Total, 2,251,311,770.

The copper production of the United States in 1912 was distributed as follows (figures are in pounds): Alaska, 31,926,209; Arizona, 359,322,096; California, 31,516,471; Colorado, 7,963,520; Idaho, 7,182,185; Maryland, 53,043; Michigan, 231,112,228; Missouri, 440,725; Montana, 308,770,826; Nevada, 83,413,900; New Mexico, 29,170,400; North Carolina, 63,766; Oregon, 311,860; Pennsylvania, 248,378; South Dakota, 23,657; Tennessee, 18,395,256; Texas, 964; Utah, 132,150,052; Virginia, 96,753; Washington, 1,069,938; Wyoming, 25,080; Undistributed, 11,413. Total, 1,243,268,720.

The world's tin deliveries for 1912, which approximate both consumption and production, as compiled by the New York Metal Exchange, were as follows (figures are short tons): London, 20,823; Continent of Europe, 29,820; Cornwall (production), 6,160; Bolivia (shipments), 23,744; South Africa (shipments), 3,472; China (shipments), 2,576; United States (receipts), 57,557. Total, 144,152. Deducting 9,598 tons of Straits, etc., tin from Continent, English, Bolivian, etc., delivered in the United States, makes the total marketed product approximately 134,554 short tons.

The production of zinc (spelter) in the world in 1912, in short tons, was as follows: Australia, 2,531; Austria and Italy, 21,609; Belgium, 220,678; France and Spain, 79,543; Germany, 298,794; Great Britain, 63,086; Holland, 26,380; Norway, 8,959; Poland, 9,659; United States, 338,805. Total, 1,070,045.

Figures for Copper, Tin and Zinc were furnished by the United States Geological Survey.

(*a*) Marketed production of iron ore. 1912: 57,017,614 long tons; value at mines, $107,050,153. (*b*) By "spot" value is meant value at the point of production. (*c*) Ferro-alloys include ferromanganese and spiegeleisen, ferrosilicon and ferrophosphorus, ferromolybdenum, ferrotitanium, ferrotungsten, and ferrovanadium. The ferro-alloys are made chiefly of foreign ores. (*d*) Average price per troy ounce in 1912, 61.5 cents. (*e*) Coining value, per troy ounce; $20.671834625323. (*f*) The product from domestic ores only. (*g*) Of 75 avoirdupois pounds net. (*h*) No production from domestic ores in 1912. (*k*) Including brown coal and lignite, and anthracite mined elsewhere than in Pennsylvania. Coke, 1912: 43,983,599 short tons; value at ovens, $111,736,696. (*l*) Value of clay mined and sold as unmanufactured clay 1912: $3,946,020. (*m*) Includes limestone for iron flux, but not grindstones. (*n*) Included under feldspar and quartz. (*o*) Includes zinc oxide. (*q*) Includes nitrate of soda, carbonate of soda, sulphate of soda, and alum clays used by paper manufacturers; and cadmium, rutile, selenium, and uranium and vanadium minerals, estimated together at $500,000 in 1912. (*r*) Barrels of 42 gallons. (*s*) Barrel, 280 lbs. (*t*) Barrel, 380 lbs. (*u*) 2,240 lbs.

# Liquor Traffic.

## LIQUOR LICENSES AND FEES.

**Alabama**—Since the repeal of the Prohibition law a number of counties have held local option elections, the majority of them deciding for a licensed liquor traffic.

**Alaska**—Local option under acts of Congress, License, $1,000.

**Arizona**—Local option, quarterly fee, United States license $25 annually. County and State $300 annually.

**Arkansas**—On Oct. 13, 1913, the State Supreme Court sustained the validity of the Going Prohibition bill, making Arkansas a Prohibition State Jan. 1, 1914.

**California**—Local option, fee by authorities.

**Colorado**—Voted on State-wide Prohibition in November, 1912, defeating it by 40,000.

**Connecticut**—Local option, fee $150—$450.

**Delaware**—New Castle County and city of Wilmington, licensed. Kent and Sussex Counties, local option, fee $200—$300.

**District of Columbia**—Licenses issuable at discretion of Excise Board, except within certain prescribed areas in which public institutions are located; except within certain distances of churches and educational institutions, and subject to other restrictions in the interest of public order and the diminution of temptation. Wholesale fee until November, 1914, $500 per annum; bar-room fee, $1,000 per annum; after November 1, 1914, wholesale fee, $800; bar-room fee, $1,500 per annum.

**Florida**—Local option, fee $1,000.

**Georgia**—The Prohibition law is practically a dead letter in the cities and poorly enforced in the country districts,

**Hawaii**—License by commissions appointed by the Governor.

**Idaho**—Local option by counties, fee $750.

**Illinois**—Local option license by city council or village or county board, fee not less than $500.

**Indiana**—City and township. Whenever 20 per cent. of the voters of the county petition the county commissioners the latter shall be a "yes" or "no" vote as to prohibiting the sale of intoxicants by saloons within the county.

**Iowa**—License by petition of voters, fee $600 up.

**Kansas**—Prohibition.

**Kentucky**—County local option, except cities of the first, second and third classes may vote separately; fee $150.

**Louisiana**—Local option, fee $200 up.

**Maine**—Prohibition.

**Maryland**—Local option, fee $18—$450.

**Massachusetts**—Local option, fee for first-class license not less than $1,000; number limited, one to one thousand inhabitants; in Boston, one to five hundred.

**Michigan**—Local option; license, warehouse and agency, $50; manufacturer, $65; wholesale or retail, $500; at wholesale and retail, $800.

**Minnesota**—License fee, $500—$1,000.

**Mississippi**—Prohibition.

**Missouri**—The counties (and cities of 2,500 population, or more) may, by majority vote, pass the local option law, and if this is not done the county courts may grant a license and fix a tax of not less than $200 nor more than $400 per year for State and not less than $500 nor more than $800 for county purposes.

**Montana**—Semi-annual fee, $150—$300.

**Nebraska**—Local option, fee $500—$1,000.

**Nevada**—State license $50 per annum wholesale, $100 per annum retail, drug store $12 per annum, county $30 per quarter.

**New Hampshire**—License by majority of voters, fees based on population, maximum $1,200.

**New Jersey**—Local option, fee $100—$1,000.

**New Mexico**—License by local authorities in incorporated cities and towns, by county commissioners in unincorporated towns. License fee $100—$1,500, varying in different municipalities.

**New York**—Local option in towns, fee $1,500—$1,200, according to population.

**North Carolina**—Prohibition.

**North Dakota**—Prohibitionists of North Dakota are opposed to the adoption of the initiative and referendum amendment to the Constitution, but it is probable it will be submitted at the general election in November, 1914. North Dakota is a Prohibition State

**Ohio**—Local option, fee $1,000. The State Supreme Court on Oct. 14, 1913, in interpreting the initiative and referendum section of the new Constitution decided that the court cannot pass on the constitutionality of an initiated bill before it has been voted on by the people. The liquor interest contends that the anti-saloon league initiated bill prohibiting the carrying of liquor into dry territory was unconstitutional, but the Supreme Court ordered the measure placed on the ballot for a vote in November, 1913.

**Oklahoma**—Express companies are prohibited from carrying shipments of liquor in the part of Oklahoma known as Indian Territory prior to Statehood and over which Prohibition for twenty-one years was established by the Federal Goverment, according to a decision handed down by the United States Circuit Court of Appeals.

**Oregon**—Local option, fee $400.

**Pennsylvania**—License under control of courts, fee $100—$1,100.

**Rhode Island**—Local option, fee $300—$1,500.

**South Carolina**—Local option, county control or Prohibition. In August, 1913, the question of the re-establishment of dispensaries was voted on in certain "dry" counties, and there was a gain of seven counties to the dispensary system.

**South Dakota**—License by local authorities, fee $400—$600.

**Tennessee**—State-wide Prohibition under a four-mile law, but is not being enforced in the four large cities by the local authorities, and the Governor has had the question of law enforcement up before regular and special sessions of the Legislature,

**Texas**—License for State and county issued by the County Clerk; fees, State $375, county $187.50, city $187.50; city license issued by city tax collector.

**Utah**—License granted by local authorities, fee $400—$2,000.

**Vermont**—License local option act was approved December 11, 1902, and took effect March 3, 1903.

**Virginia**—Control of local courts, malt liquor bar license $250, retail ardent spirits $550, wholesale ardent spirits $1,250, wholesale malt liquors $500, retail and shippers $1,000, local option provided for.

**Washington**—Local option, fee $300—$1,000.

**West Virginia**—State-wide Prohibition goes into effect on July 1, 1914.

**Wisconsin**—Local option, fee $100—$200, with power in voters to increase from $200—$500.

**Wyoming**—Wholesale dealer, $300; retail, $1,000.

# The National Temperance Society.

*President*—Rev. David S. Dodge. *Editor and Lecturer*—Prof. A. A. Hopkins, Ph. D. *Treasurer*—John W. Cummings.

The National Temperance Society and Publication House was organized in 1865 for the special work of creating and circulating sound temperance literature to promote the cause of total abstinence from all intoxicants, and to unify and concentrate the temperance and Christian sentiment of the nation against the drink habit and the drink traffic. The headquarters of the society is at 373 Fourth Avenue, New York City.

## LIQUOR TRAFFIC IN NEW YORK CITY.

Comparative table showing the number of licenses issued and net receipts under excise boards for year ending April 30, 1896 (old law), also number of liquor tax certificates in force, net revenue, State's share net revenue, boroughs' share net revenue, benefit to boroughs by diminished State tax, together with total benefit to each borough comprising the city of New York, for the year ending September 30, 1912 (new law).

| Boroughs. | Number of Licenses Issued, 1895-96 (Old Law). | Number of Certificates in Force Sept. 30, 1912 (New Law). | Net Receipts Under Excise Boards, 1895-96 (Old Law). | Net Revenue Year Ending Sept. 30, 1912 (New Law). | State's Share Net Revenue Year Ending Sept. 30, 1911 (New Law). | Boroughs' Share Net Revenue Year Ending Sept. 30, 1912 (New Law). | Benefit to Boroughs by Diminished State Tax Year Ending Sept. 30, 1912 (New Law). | Total Benefit to Each Borough Year Ending Sept. 30, 1912. (New Law). |

## WHEN TO SERVE BEVERAGES.

(From Osborn's Vintage and Production of Wines and Liquors.)

Appetizer—Dry Pale Sherry plain or with a dash of bitters, Vermouth plain or a Cocktail.
With Oysters—Rhine Wine, Moselle, Dry Sauternes, Chablis or Capri; cool.
With Soup—Sherry, Madeira, or Marsala; cool.
With Fish—Sauternes, Chablis, Rhine Wine, Moselle or Capri; cool.
With Entrées—Claret or Chianti.*
With Roast—Claret, Burgundy, or Chianti.*
With Game—Champagne (cold), Old Vintage Champagne; cool.
With Pastry—Madeira; cool.
With Cheese—Port.*
With Fruit—Tokay, Malaga, or Muscat.*
With Coffee—Brandy or Cordial.*

*Temperature of room.

# Banana Production.

A report upon the world production and consumption of bananas was published in the Daily Consular and Trade Reports of December 26, 1912. According to this report, Jamaica was far ahead of all other countries in the exportation of bananas during the calendar year 1911, having shipped a total of 16,497,385 bunches, valued by Colonial officials at $7,088,451, or more than one-half of the total value of all exports from the island in that year. Costa Rica ranked second, with exports of 9,309,586 bunches, and then came Honduras with 6,500,000 bunches, Colombia 4,901,894, Panama 4,261,500, Canary Islands 2,648,378, Cuba 2,500,000, Nicaragua 2,250,000, Guatemala 1,755,704, Mexico 750,000, British Honduras 525,000, Santo Domingo 400,000, Dutch Guiana 387,516, and other countries 250,000, making a grand total of 52,936,963 bunches of bananas exported.

While Jamaica exported nearly twice as many bananas last year as any other country, the United States imported more than five times as many as any other country. For the fiscal year ended June 30, 1912, the bananas imported into the United States reached the enormous total of 44,520,539 bunches, valued at $14,368,330, an average of 32.3 cents a bunch, as the market value shown in American consular invoices certified at the shipping ports. Great Britain imported during the calendar year 1911 a total of 6,714,479 bunches, value $8,943,099, an average of $1.33 a bunch, the value fixed at the importing ports. During the same year the value of bananas (including banana food products) imported into Germany amounted to $1,974,046. It should be stated that some of the bananas imported into Great Britain are sent to Germany and other countries of northern Europe, and that Hamburg, which is a great distributing centre, ships bananas arriving at that port to Scandinavia and elsewhere. France and other countries of southern Europe receive very few bananas.

The banana supply of the United States was received from the following countries: Jamaica, 15,467,918 bunches; Honduras, 7,151,178; Costa Rica, 7,053,664; Panama, 4,581,500; Cuba, 2,478,581; Nicaragua, 2,270,100; Guatemala, 2,017,650; Colombia, 1,542,988; Mexico, 817,006; British Honduras, 557,160; Dominican Republic, 304,000; Dutch Guiana, 261,548; and other countries, 17,246 bunches. Estimating the average number of bananas at 140 to the bunch, it appears that the people of the United States consume over 6,000,000,000 bananas a year, or more than 5 dozen for every man, woman and child in the United States, including Alaska and Hawaii.

## United States Brewers' Association.

*President*—Edward A. Schmidt, Philadelphia, Pa. *First Vice-President*—Gustave Pabst, Milwaukee, Wis. *Second Vice-President*—Louis B. Schram, Brooklyn, N. Y. *Third Vice-President*—John Gardiner, Philadelphia, Pa. *Treasurer*—Gustav W. Lembeck, Jersey City, N. J. *Secretary*—Hugh F. Fox, New York, N. Y.

## Society of the Chagres.

*President*—Col. W. C. Gorgas, U.S.A. *Vice-President*—R. H. Wardlaw. *Secretary-Treasurer*—Wm. F. Shipley, Cristobal, Canal zone.

Membership in the society is limited to white employés of the Isthmian Canal Commission or of the Panama Railroad Company, who have earned the Roosevelt Canal Medal and two bars prior to the official opening of the Canal. The Roosevelt Canal Medal and two bars is only conferred on American citizens who serve six years continuously on the Isthmus of Panama for the Isthmus Canal Commission or Panama Railroad Company.

The society was organized October 7, 1911, and consists of about 620 members.

## Some 1913 Records.

FIVE babies were born to Mrs. Charles Smith, Utica, N. Y., April 8, all healthy and promising to live. Records at THE WORLD office show that since 1890 there have been sixteen cases of quintuplets in the United States reported, two of sextuplets and three of septuplets.

Four boys were born to Mr. and Mrs. Pearl Yates at Centralia, on September 26, all healthy.

At Barrow, Lancashire, England on February 24, the wife of a workman gave birth to a son. Six weeks later on April 4, the same woman gave birth to a daughter.

The village of Paris, Ohio, on the evening of May 25, having but seventeen families as inhabitants was the scene of eight births in eight families—five boys and three girls. The mothers were Mrs. Robert Ely, Mrs. Henry Gutber, Mrs. Clyde Shidler, Mrs. Elmer Haynam, Mrs. George Anthony, Mrs. Peter Lantenhaser, Mrs. Oscar Irwin and one family name not reported.

Dr. William Warren of St. Joseph, Mo., made application August 6, to the Commissioner of Pensions for an increase of his pension. The application recorded that he had been the father of twenty-five children by three wives, all of whom were sisters. Most of the children were twins. Thirteen of the children were boys, all of whom were soldiers. At the time of the application all of the twenty-five children were dead.

Melissa Cooper, a negress who died at Grayson, Gwinnett County, Ga., March 15, weighed 613 pounds. Her weight for forty years had been 150 pounds, but five months previous to her death she began to put on flesh at the rate of about one hundred pounds a month. She was outweighed, though, by Mrs. Lizzie Glon of Cleveland, Ohio, who weighs 750 pounds. Her husband weighs less than 150 pounds.

Frank Blake, a clerk at a railway station at Cairo, Ill., on June 21, won a wager by eating 61 eggs at a meal. The world's previous record was reported at 60 eggs. The eggs eaten by Blake were cooked as follows: scrambled 15, soft boiled 16, hard boiled 15, fried 15.

Fadiana Betcheriak, a Russian woman who was exiled to Siberia for life in August, had a record of having married 18 husbands between the years of 16 and 40. She ran away from most of them and had a child by only one.

W. C. Boschen of New York, caught a sword-fish off Catalina Island, Cal., on August 23, weighing 355 pounds, after a fight lasting 92 minutes. It was 12 feet in length with a sword four feet long and seven inches wide at the base.

Eugene Kinney landed a trout near Stroudsburg, Pa., May 23, 28 inches long and weighing seven and a half pounds.

A family reunion took place at Palisade, Col., on October 21, there being present the parents, thirteen children and thirty-nine of forty-three grand-children. All the children weighed over 200 pounds each, and with their parents weighed a ton and a half. The family was that of Mr. and Mrs. John Charles Worth.

## Pauperism.

PAUPERS in almshouses in the United States on January 1, 1910, 83,944. The number admitted during the year 1910 was 106,457, and the number discharged or dying during that year was 100,858. On January 1, 1904, the pauper population was 81,764 (native white, 42,205; foreign-born white, 32,136; colored, 6,910; undefined, 513); the admissions during the year were 81,412; and the discharges or deaths 77,886.

PAUPERISM IN ENGLAND AND WALES.

Indoor paupers (December, 1911), 278,298; outdoor paupers (December, 1911), 392,596. Total, 670,894; ratio per 1,000 inhabitants, 18.05. The British figures are from the *Economist*.

## Suicides.

THE suicide rate of the registration area of the United States in 1911 was 16.2 per 100,000 of population. The estimated number of suicides in the entire United States, but excluding insular possessions, in 1913 was 15,000. The most common means of self-destruction in 1911, according to the mortality reports of the Census, were: Poisoning, 2,927; fire arms, 2,859; hanging or strangulation, 1,373; asphyxiation, chiefly illuminating gas, 1,013; cutting or piercing instruments, 623; drowning, 536; jumping from high places, 146, and by crushing, 70.

The suicide rate of large American cities for 1912, according to Frederick L. Hoffman, Statistician, Prudential Insurance Company of America, was 18.8 per 100,000 of population. The number of suicides in 100 American cities in the ten years ending with 1912 was 40,794. The average suicide rates for 20 leading cities for the decade ending with 1911 were as follows: San Francisco, 50.2; San Diego, 40.7; Sacramento, 37.7; Hoboken, 34.1; Los Angeles, 32.3; St. Louis, 31.5; Oakland, Cal., 31.0; Springfield, Ill., 29.9; Denver, 29.6; Seattle, Wash., 28.3; Davenport, Ia., 27.6; Newark, N. J., 24.0; Salt Lake City, 23.9; Pueblo, Col., 23.8; Indianapolis, 23.7; McKeesport, Pa., 23.7; Omaha, Neb., 23.6; Milwaukee, 23.1; Auburn, N. Y., 22.7; Portland, Oregon, 22.2. The rate for Manhattan and the Bronx was 20.2.

The number of suicides during the decade ending with 1912 was 8,026 for Greater New York, 4,571 for Chicago, 2,380 for Philadelphia, 1,951 for San Francisco, and 2,136 for St. Louis.

The average suicide rates for large foreign cities for recent years were 31.4 for Berlin, 24.8 for Paris, 16.0 for Buenos Ayres, 11.6 for London, and 10.6 for Sydney, New South Wales.

The average annual suicide rates for the more important countries have been as follows: Ireland, 3.4; Scotland, 5.7; Netherlands, 6.7; Norway, 6.4; England and Wales, 10.2; Australia, 11.6; Belgium, 12.4; Sweden, 12.4; U. S. Registration Area, 16.0; Austria, 17.3; Japan, 18.9; Hungary, 19.2; Denmark, 19.4; Germany, 21.3; Switzerland, 22.7, and France, 22.8.

# Mortality Statistics.

(From Census Bulletin 112, Transmitted March 15, 1913, by the Director of the Census to the Secretary of Commerce.)

## DEATHS IN THE REGISTRATION AREA OF THE UNITED STATES, 1911.

(From Annual Report of Bureau of the Census.)

| Area. | Total | Male. | Female | Area. | Total. | Male. | Female |
|---|---|---|---|---|---|---|---|

| Montana | 4,009 | 2,629 | 1,380 | | | | |

*The "registration area" includes only those States in which the records of deaths are sufficiently complete to be accepted by the Census Bureau, together with returns from certain cities in non-registration States. The total number of deaths in the United States cannot be known until all States enforce complete registration of deaths.

The following table shows the changes in mortality that have occurred in the eleven years from 1900 to 1911 in the group of registration States as constituted in 1900. This area embraced about one-fourth of the total population of the United States in 1911 and hence the results are of much significance as showing the general tendency of mortality for the country as a whole.

STANDARDIZED DEATH RATES, BY COLOR AND NATIVITY.

A difficulty that does not enter into the treatment of European statistics affects the comparability of American death rates, namely, the differences in the populations of States and cities with respect to color, nativity, and parent nativity. How such differences may affect the crude and corrected death rates for the aggregate population may be inferred from the following table:

| Sex and Age Group.* | Death Rate† Per 1,000 Population, Registration States, 1900. | | | | | |
|---|---|---|---|---|---|---|
| | | Native White. | | | | |
| | Total Population. | Total. | Native Parents. | One or Both Parents Foreign-Born. | Foreign-Born White. | Colored. |
| Both sexes (all ages) | 17.2 | 16.5 | 15.7 | 17.8 | 18.9 | 25.0 |
| Under 5 years | 49.9 | 49.1 | 42.8 | 55.8 | 40.2 | 106.4 |
| 5 to 9 years | 4.7 | 4.5 | 4.2 | 4.9 | 5.7 | 8.9 |
| 10 to 14 years | 3.0 | 2.9 | 2.9 | 2.9 | 2.9 | 9.0 |

| 65 to 74 years | 53.7 | 46.3 | 45.5 | 55.7 | 66.0 | 66.9 |
| 75 years and over | 139.3 | 134.5 | 132.2 | 171.0 | 151.0 | 134.3 |

* Population and deaths at unknown age not distributed. † Exclusive of stillbirths.

Among the colored population, which is chiefly negro, higher death rates are shown for both sexes and for all age groups than among the white population, except in the case of females 75 years of age and over. The death rates of the foreign-born whites are in the majority of cases higher than those of the native whites born of either native or foreign parents, although important exceptions will rate of foreign-born children under 5 years is almost certainly understated. On the basis of an be noted, some of which may be due to transfer of deaths from one class to another. The low death assumed death rate of 85 per 1,000 for foreign-born males under 5 years of age and 75 for foreign-born females under that age—rates which are probably lower than those for the countries from which the immigration during the years 1896-1900 was chiefly derived—the corrected death rates would be as follows:

| Sex. | Death Rate* Per 1,000 Population, Registration States 1900. | | | | | |
|---|---|---|---|---|---|---|
| | | Native White. | | | | |
| | Total Population. | Total. | Native Parents. | One or Both Parents Foreign-Born. | Foreign-Born White. | Colored. |
| Both sexes: | | | | | | |
| Crude rate | 17.2 | 16.5 | 15.7 | 17.8 | 18.9 | 25.0 |
| †Corrected rate | 17.0 | 16.0 | 14.5 | 19.1 | 17.2<br>‡21.7 | 29.1 |
| Males: | | | | | | |
| Crude rate | 17.9 | 17.3 | 16.0 | 19.4 | 19.2 | 25.6 |
| †Corrected rate | 17.6 | 16.7 | 14.8 | 20.3 | 17.5<br>‡22.4 | 29.9 |
| Females: | | | | | | |
| Crude rate | 16.5 | 15.6 | 15.3 | 16.2 | 18.6 | 24.4 |
| †Corrected rate | 16.5 | 15.4 | 14.2 | 18.1 | 16.9<br>‡21.0 | 28.3 |

* Exclusive of stillbirths. †Based on standard million of England and Wales, 1901, for each element of the population. ‡ In computing this corrected death rate an assumed death rate of 85 per 1,000 for foreign-born males under 5 years of age and of 75 per 1,000 for foreign-born females under that age was used.

* Foreign countries arranged in the order of their standardized or corrected death rates for persons of both sexes. † The standardized or corrected death rate is the death rate at all ages that would have resulted from the rates for the various age groups if the sex and age constitution of the population of the given area had been identical with that of England and Wales as enumerated at the census of 1901. ‡ In this computation persons whose ages were not stated were excluded. ¶ Corrected rates for the United States added by the Bureau of the Census. ‖ Of specified area bears to that of England and Wales taken as 1,000.

## Statistics of Cremation.

Modern cremation originated in 1866. To-day, after forty-five years of agitation, there are eighty crematories in Europe. Of these, twenty-two are in Germany, seven in Switzerland and thirty in Italy. About 13,000 bodies were cremated in Europe during 1909. In the United States, from 1876 to 1900, there were 13,012 cremations recorded. In Boston, the substitution of crematories for potter's fields has long been agitated. In New York, the bodies of immigrants dying of infectious diseases at the quarantine station are cremated, unless the surviving relatives have religious scruples against this method.—*Journal of the American Medical Association.*

## Birth Statistics.

In France, according to the *Journal Officiel*, there were in 1910 309,289 marriages, 13,049 divorces, 774,358 living children born, and a total of 703,777 deaths, not including those of stillborn children, which numbered 35,944. The net excess of births over deaths was therefore 70,581. In 1909 the excess of births over deaths was only 13,424, but the decided improvement shown in the figures for 1910 was largely due to a decrease of 52,768 in the deaths of that year. The excess of births over deaths in Paris and the Department of the Seine was 2,670, or 804 less than the excess in the Department of Seine Inferieure, which contains the cities of Rouen and Havre.

For the five-year period from 1901 to 1905, inclusive, the number of births per 1,000 of population in six leading countries of Europe was as follows: In Holland 155, in Germany 149, in Great Britain 121, in Austria 113, in Italy 106, and in France 18.

## THE NATIONAL REFORM ASSOCIATION.

*President*—Henry C. Minton, D. D. *Corresponding Secretary*—Thos. D. Edgar, D. D. *Treasurer*—James S. Tibby. The official organ is *The Christian Statesman*, published monthly. Headquarters, 603 Publication Building, 209 Anderson Street, Pittsburgh, Pa.

## AMERICAN HUMANE ASSOCIATION.

A federation of societies and individuals "for the prevention of cruelty, especially cruelty to children and animals." The officers are: *President*—Dr. William O. Stillman, Albany, N. Y. *Secretary*—N. J. Walker, Albany, N. Y. *Treasurer*—Edgar McDonald, Brooklyn, N. Y.

# The Defective Classes.

**The Insane.**—From a report for 1908 issued by the Commissioner of Immigration, the number of inmates of institutions for the insane in the United States were: Aliens, 25,610; naturalized citizens, 25,130; native-born persons, 121,450; total, 172,190. These figures include 100 insane persons in institutions in Alaska, 210 in Hawaii, and 340 in Porto Rico.

The total number of insane in the United States enumerated at the Census of 1890 was 106,485, of whom 74,028 were in hospitals. In the collection of statistics of the insane in 1903 (Census Special Report), only the insane in hospitals were considered. These had increased to 150,151 on December 31, 1903 and to 187,791 on January 1, 1910 (a ratio of 204 per 100,000 population). The number of hospitals for the insane increased from 162 in 1890 to 328 in 1903 and to 367 in 1910.

In 1910 the number of insane males in hospitals was 98,695, and insane females 89,096. The maximum concentration was on the ages from thirty-five and forty-nine years. Female insane live longer than male insane, and white insane than negro insane.

More than one-eighth, 12.7 per cent. of the hospital insane had been inmates less than one year, more than one-tenth, 10.8 per cent. had been in hospitals at least twenty years, 21.7 per cent. were engaged before admission in manufacturing and mechanical pursuits; 20.7 per cent. in agriculture; 14.9 per cent. in domestic service; 7.6 per cent. in trade and 5.3 per cent. in professional service. Of the hospitals for the insane, 250 were public and 117 private in character.

**The Feeble-Minded.**—The number of feeble-minded in institutions on January 1, 1910, was 20,731, on January 1, 1905, the number was 15,318. The total number of feeble-minded in the United States has been estimated at not less than 150,000. Of the feeble-minded in institutions 47.2 per cent. were under twenty years of age, and 76.4 per cent. were under thirty years of age.

**The Deaf and Dumb.**—The total number of deaf in the United States in 1900 was 89,287, of this number 51,871 were deaf from childhood. It is probable that a certain number of persons who were not totally deaf were included in this total by the enumerators. The number of males among the deaf was 46,915 and the number of females, 42,372; 84,361 were white and 4,926 colored; of the whites, 69,865 were natives, 17,786 were foreign-born, while for 6,280 the nativity was not reported.

**The Blind.**—The total number of blind in the United States in 1900 was 64,763, of whom 35,645 were totally blind and 29,118 were partially blind—whites, 56,536; negroes, 8,228; males, 37,054; females, 27,709; native-born whites, 45,479; foreign-born whites, 10,694, and in 362 cases the nativity was unknown.

The number of insane persons in England and Wales in 1908, according to Webb-Mulhall, was 126,084, or 356.7 per 100,000 population—Germany (in 1901), 120,870; France (in 1906), 94,400; Belgium (in 1905), 16,940; Holland (in 1906), 9,670.

# Mother's Day.

## SECOND SUNDAY IN MAY.

Its object—An all-nations and simultaneous observance for the well-being and honor of the home.

How observed—Through some distinct act of kindness, visit, letter, gift or tribute, show remembrance of the Mother and Father to whom grateful affection is due. Mother's Day is equally a Father's Day, and is designed to deepen and perpetuate all family ties. The Day is so-called because in most countries no national celebration is in special honor of the home and noble Motherhood.

Its slogan—In honor of "The Best Mother Who Ever Lived" the mother of your heart. The badge is a white carnation. Time of observance is the second Sunday in May by churches of all creeds, etc. Schools celebrate on Friday, and business and other organizations on Saturday preceding second Sunday in May.

On May 10, 1913, a resolution passed the United States House of Representatives and the Senate commending Mother's Day for observance by the House and Senate, the President of the United States and his Cabinet and other heads of Government departments. In 1913 the Legislature of Nebraska made Mother's Day a State flag day in honor of the patriotism of Nebraska's true homes and mothers. In May, 1913, the Legislature of Pennsylvania made Mother's Day a State holiday. Since 1912, Governor Colquitt of Texas has made it an annual custom to pardon a number of prisoners on Mother's Day.

Mother's Day International Association has been organized to promote and protect the observance of Mother's Day in all countries, and to carry forward the work.

In the United States ex-Presidents Roosevelt and Taft and President Wilson are honorary national officers of the association. In each State a Governor or other person of prominence is an honorary Vice-President.

Mother's Day and the Mother's Day International Association were founded by Anna Jarvis of 2031 North 12th Street, Philadelphia, Pa.

# The Procreation Commission.

This Commission, created by an act of the Legislature of New York State, is to examine into the mental and physical condition and the record and family history of the feeble-minded, epileptic, criminal and other defective inmates confined in the State hospitals, reformatories, charitable and penal institutions; and if in the judgment of the majority of the board procreation by any such person would produce children with an inherited tendency to crime, insanity, feeble-mindedness, idiocy, or imbecility, and there is no probability of an improvement in their condition, then the board shall appoint one of their number to perform such operation for the prevention of procreation that shall be decided to be most effective. All orders made under this law are subject to review by the Supreme Court.

The board, as appointed by Governor Dix, consists of Dr. Charles H. Andrews, Buffalo, N. Y., surgeon; Dr. Leomon Thompson, Glens Falls, N. Y., neurologist; Dr. Charles C. Duryea, Schenectady, N. Y., practitioner.

# Medical Progress in 1913.

BY W. C. RUCKER, ASSISTANT SURGEON GENERAL, UNITED STATES PUBLIC HEALTH SERVICE.

THE advance of medicine during the year 1913 has been along conservative lines. In remedial medicine greater precision has been reached in diagnosis. In the treatment of disease, search has been continued for specific remedies. The tendency in surgery has been toward improvement of technique. In preventive medicine an enormous forward stride has been made both by the medical profession and the general public. There has been an increased activity among the official and unofficial public health bodies. The cause of several diseases has been discovered during the year, and our knowledge of the control of infectious diseases has increased. Carrel's work in the cultivation of living tissues in vitro, in the transplantation of organs and in the repair of blood vessels has given an enormous impetus to experimental and practical surgery. The foundation of the American College of Surgeons on May 5, 1913, has done much to standardize the practice of surgery in America.

In surgery, the advance has been along the line of improved technique and the treatment of organs hitherto avoided in surgical practice. The surgery of the pancreas, spleen and thyroid gland has received particular attention at the hands of Wm. Mayo, who has also devoted some time to single or horseshoe kidney. The ligation of the pulmonary artery has been successfully practised and the removal of the pituitary body for the cure of acromegaly has been done. Experimental evidence obtained during the year seems to prove that this is a functionating organ, the importance of which is sufficient to merit a book on the subject by Cushing. The restitution of functional activity in joints rendered useless by ankylosis, and the osteo plastic treatment of fractures has been treated in extenso by Murphy. There has been considerable improvement of the technique of tendon transplantation to relieve deformities the result of poliomyelitis. The subject of anaesthesia, particularly nitrous oxide-ether anaesthesia, has received much attention, and Crile has brought forward the theory of anoci-association as an explanation of surgical shock. Modern military surgery has profited by the lessons learned from the recent Chinese civil war and the war in the Balkans. Radiography has advanced along the line of visceral studies and Belfield has made radiographs of the seminal ducts. The first successful case of resection of the thoracic portion of the oesophagus has been reported by Torek.

Mallory, Hornor and Henderson have proven by Koch's postulates that the Bordet-Gengou bacillus is the cause of whooping-cough, and that it is discharged in the sputum and nasal secretions. Metchnikoff and Besredka have reproduced typhoid fever and cholera in apes, thus proving by Koch's postulates that the typhoid bacillus and the cholera spirillum are the causes of the respective diseases. Nicolle has produced experimental mumps in monkeys, thus affording an increased opportunity to study and experiment with this disease, and possibly to discover its causative organism. Noguchi has succeeded in cultivating the organism of poliomyelitis, and has recently announced his success in cultivating the organism of rabies. Not content with these two important discoveries, he has grown the treponema pallidum (the cause of syphilis) from the brain tissue of a patient suffering with general paresis, thus confirming the experimental evidence that general paralysis of the insane is usually due to syphilis. Wernstadt, Kling and Petterson have made valuable additions to the epidemiology of poliomyelitis by proving the presence of the virus in the nasal and mouth secretions of persons having the disease, convalescents from the disease, those who have had an abortive attack of the disease, or who have been exposed but have not had the disease. McDonagh and E. H. Ross have followed out the life cycle of several spirochetes, thus adding important facts to the knowledge of the life history of these organisms.

Studies of cancer have been continued, but without discovering the causative organism. The Clinical Congress of Surgeons of North America has appointed a committee for the purpose of educating the medical profession and the general public as to the necessity for early diagnosis and early operation in all cases.

Abel at Johns Hopkins University has reported interesting and valuable work on the elimination of poisons from the body by the establishment of an external circulation. This work is still in the experimental stage, but gives much promise.

Virgil Moon has reported the treatment of dogs with developed rabies by quinine with good results.

Stimulated by the International Congress of Hygiene and Demography, which held its fifteenth annual meeting in Washington, D. C., September 23 to 28, 1912, there has been an enormous activity in public health work during the year. Epidemic sore throat has been investigated by Theobald Smith, T. A. Mann, W. H. Frost and others, and the spread of the disease by infected cream and milk has been proven. The collected evidence indicates that the causative agent is streptococcus.

The study of pellagra has been actively carried on in the United States by Lavinder, Francis and Grimm of the Public Health Service, and Siler and Garrison of the Thompson-McFadden Commission. The disease has been proven to exist in England by Sambon, who is of the opinion that the disease is spread by an insect, the simulium reptans. The causative agent of the disease has not been discovered, nor have any of the various theories as to its causation and spread been proven. Lavinder has mapped out the distribution of the disease in the United States. Harris of New Orleans has announced the reproduction of the disease in monkeys.

The work on typhoid fever has consisted in the eradication of local epidemics by improvement of water supplies and the extermination of insects, and in an endeavor to determine the method of controlling chronic bacillus carriers. Uhlenhuth and Messerschmidt have succeeded in producing chronic carriers in rabbits. Besredka has brought forward an anti-typhoid serum with which Andriescu and Cinco claim to have secured good results. Alcock claims to have cured chronic typhoid carriers by the use of sensitized vaccines.

The studies of Anderson and Goldberger proving the identity of Brill's disease with typhus fever have been very generally applied, and it is now known that typhus fever exists in many localities in the United States. These authors have continued their experiments, actually demonstrating the infecting agent of measles in the nasal and mouth secretions. Many boards of health have modified their quarantine regulations to meet these discoveries.

Fricks of the United States Public Health Service, working in Montana, discovered that sheep rid land over which they were grazed of ticks, which became entangled in their wool. He has applied this knowledge in the eradication of Rocky Mountain spotted fever in the Bitter Root Valley with good results. Levy at Richmond has developed a practical method of controlling the breeding of flies. Terry of Jacksonville has published important data on drug addiction in the United States. Von Ezdorf has made valuable studies on the malarial index of Alabama.

One of the most brilliant pieces of sanitary work accomplished during the year was the eradication of bubonic plague from Porto Rico by Creel of the United States Public Health Service.

There has been a very general increase in the attention paid to the subject of eugenics, and several statistical studies have been made with regard to the number of mental defectives in the United States. Reports made during the year show the percentage of these to be very high. Occupational diseases have also received considerable attention, particularly at the International Exhibition of Safety and Sanitation held in the city of New York, December 11-20, 1913. School

MEDICAL PROGRESS IN 1913—*Continued.*

hygiene received a decided stimulus from the International Congress on Medicine held at London on August 6-13, 1913, and the Congress on School Hygiene held in Buffalo, August 25-30, 1913.

Studies have been made with regard to the distribution of trachoma in the United States, and it has been found to exist in considerable frequency in the State of Kentucky and among the Indian tribes on the various reservations. Many attempts have been made to cure the disease, and Coover and others have announced satisfactory treatment of the disease by grattage of the conjunctiva with strips of sterilized sand paper.

Epidemiological studies of endemic goitre have been announced by McCarrison, who claims that the disease is spread by polluted water and in many cases is curable by thymol. Much experimental work on the thyroid has been carried out during the year and has led to various and oftentimes contradictory findings.

Blue has pointed out the prevalence of leprosy in the United States and the necessity for a national home for lepers.

Golf ball explosions have been numerous during the year. Chemical examination of the cores have shown them to consist of various caustic substances dangerous to the eyes and skin.

In the field of therapeutics attention has been focused on a search for specific remedies, doubtless due to the stimulation from Ehrlich's discovery of salvarsan. This drug and neo-salvarsan have been extensively experimented with during the year. Flexner, reporting on the results of the treatment of 1,300 cases of epidemic meningitis, states that if his serum is given by subdural injection in suitable doses at proper intervals, it will reduce the period of illness, prevent in a large measure the chronic lesions, and bring about a complete restoration of health. The vaccine treatment of disease has been widely extended during the year, in many instances, however, on empirical grounds only. The Friedmann vaccine treatment for tuberculosis has been reported on by a considerable number of observers, and does not seem to have added anything to the armamentarium against the disease. Anti-typhoid vaccination has proven a success, and Hunt and others have reported instances in which its use, during the course of an epidemic, has greatly assisted in its eradication. The vaccine treatment of whooping-cough is still in the experimental stage, but according to the reports of Wilson, Sill and Scott the outlook is rather promising. The treatment of cancer with colloidal copper has not seemed to yield good results. The use of the animal extracts has been reported on, particularly pituitrin, which seems to be of value in delayed labor.

# Benevolent Institutions in the United States.

(From a Report Issued January 30, 1913, by the Census Bureau in Connection with the Thirteenth Census).

THE total number of institutions reported is 5,397, classified as follows: institutions for the care of children, 1,152; societies for the protection and care of children, 212; institutions for the care of adults and children, 1,442; institutions for the education and care of the blind and deaf, 119; hospitals, classed as benevolent, 1,896; and dispensaries, classed as benevolent, 576.

In these institutions, or under their care, there were at the close of the year 380,337 persons, apportioned as follows: institutions for children, 107,401; societies for the protection and care of children, 35,279; institutions for adults or adults and children, 121,876; institutions for the blind and deaf, 651; hospitals, 28,869. The movement of inmates during the year is indicated by the fact that 82,011 children were received into institutions, while 37,825 were placed in families or institutions, mostly families, and chiefly by societies for their care; 788,691 persons were received into institutions for adults or adults and children, and 2,554 into institutions for the blind and deaf; 1,975,838 patients were treated in hospitals, and 2,439,059 in dispensaries.

As compared with the previous report, that for 1904, the number of institutions reported shows an increase of 1,346 (day nurseries, of which 166 were reported in 1904, were not included in 1910) inmates of institutions at close of year, an increase of 95,975; children received into institutions during the year, an increase of 11,186; patients treated in hospitals, an increase of 911,326; and in dispensaries, of 827,408. There was a decrease of 109,319 in the number of persons received into institutions for adults or adults and children, and of 4,471 in the number received into institutions for the blind and deaf.

Whether the increase indicates greater need, or greater care and more complete provision is a question which must await a more careful study of the situation; as also the question as to the decrease. Two items are of special interest: the collection for the first time of data in regard to the placing-out of children in families, and the notably increased interest manifested in the treatment of tuberculosis, which accounts to a very considerable degree for the increase in the number of dispensaries and to some degree of hospitals and sanitariums. Thus the net number of dispensaries added to the list is 420, and of these nearly 200 are county dispensaries established in the State of Pennsylvania by the Department of Health for the treatment of tuberculosis. The decrease of 109,319 in the number of persons received into institutions for the care of adults or adults and children is chiefly confined to institutions for the temporary care of men who are destitute.

Noting the distribution of institutions in the States, it appears that New York leads with 797, an increase of 200 over the figures in 1904; Pennsylvania has 692, an increase of 301; Massachusetts, 359, an increase of 104; Illinois, 324, an increase of 39; Ohio, 311, an increase of 52; and New Jersey, 207, an increase of 58. Almost all the States show an increase (generally in about the same proportion), which would indicate that the interest in the problem of caring for those who may be called "wards of the State," is by no means limited to the centres of population, but extends throughout the entire country.

# The Prison Association of New York.

*President*—Eugene Smith. *Treasurer*—J. Seely Ward. *Gen. Secretary*—O. V. Lewis. Headquarters, 135 E. 15th Street, New York City.

Chartered in 1846. Its objects are to secure: 1. The protection of society against crime. 2. The reformation of the criminal. 3. Protection for those unjustly accused. 4. Probation for first offenders. 5. Improvement in prisons and prison discipline. 6. Employment, and, when necessary, food, tools, and shelter for discharged prisoners. 7. Necessary aid for prisoners' families. 8. Supervision of those on probation and parole. 9. Needed legislation and correction of abuses in our penal system.

## Statistics of Homicide.

Josiah Strong's "Social Progress" for 1906 gives the following table of homicides and the annual average:

| | Tried. | Convicted. | | Tried. | Convicted. | | Tried. | Convicted. |
|---|---|---|---|---|---|---|---|---|
| Italy | 3,606 | 2,805 | England | 318 | 151 | Hungary | ... | 625 |
| Austria | 689 | 499 | Ireland | 129 | 54 | Holland | 35 | 28 |
| France | 847 | 580 | Scotland | 60 | 21 | Germany | 567 | 476 |
| Belgium | 132 | 101 | Spain | 1,584 | 1,085 | | | |

The average number of murders in the United States annually during the twenty years, from 1885 to 1904, was 6,597. In 1896 the murders reached high-water mark, 10,662, and in 1895 there were 10,500. For 1910, the Census Bureau reported the number of homicides in the registration area of the United States—58.3 per cent. of the total population—as 3,190, and in 1911 as 3,907.

According to Frederick L. Hoffman, the average homicide rates per 100,000 of population for 30 representative American cities were as follows: For the years 1883-1892, 4.9; for 1893-1902, 4.9; and for 1903-1912, 7.5. The homicide rates for the ten years ending with 1911 were as follows: For 9 Southern cities, 15.7; for 3 Western cities, 9.6; for 7 Central cities, 8.1; and for 11 Eastern cities, 4.5. The homicide rate for Memphis, Tenn., was 52.7; for New Orleans, La., 23.1; for Louisville, Ky., 16.0; for San Francisco, Cal., 11.3; for Chicago, Ill., 8.8; for Manhattan and the Bronx, 5.4; for Boston, Mass., 4.7; for Philadelphia, Pa., 3.9, and for Milwaukee, Wis., 1.9.

The excessive mortality from homicide among the colored race is indicated by the following data: In New Orleans, for the last available five-year period, the colored death rate from homicide was 67.6 per 100,000 of population, as against 11.9 for whites; in Savannah, Ga., the comparative rates were 32.4 for the colored, against 15.8 for the whites; and in Charleston, S. C., 51.4 for the colored, against 13.1 for the white population.

## Prisoners' Commutation Table.

The following table shows the time subtracted for uniformly good conduct from the terms to which prisoners are sentenced under the regulations in force in the State prisons of New York:

| Sentence. | Commutation. | | | Remaining Short Term. | | | Sentence. | Commutation. | | | Remaining Short Term. | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Years. | Months. | Days. | Years. | Months. | Days. | | Years. | Months. | Days. | Years. | Months. | Days. |
| Years. | | | | | | | Years. | | | | | | |
| 1 | .. | 2 | .. | .. | 10 | .. | 11 | 3 | 11 | .. | 7 | 1 | .. |
| 1½ | .. | 3 | .. | 1 | 3 | .. | 11½ | 4 | 1 | 15 | 7 | 4 | 15 |
| 2 | .. | 4 | .. | 1 | 8 | .. | 12 | 4 | 4 | .. | 7 | 8 | .. |
| 2½ | .. | 6 | .. | 2 | .. | .. | 12½ | 4 | 6 | 15 | 7 | 11 | 15 |
| 3 | .. | 8 | .. | 2 | 4 | .. | 13 | 4 | 9 | .. | 8 | 3 | .. |
| 3½ | .. | 10 | .. | 2 | 8 | .. | 13½ | 4 | 11 | 15 | 8 | 6 | 15 |
| 4 | 1 | .. | .. | 3 | .. | .. | 14 | 5 | 2 | .. | 8 | 10 | .. |
| 4½ | 1 | 2 | 15 | 3 | 3 | 15 | 14½ | 5 | 4 | 15 | 9 | 1 | 15 |
| 5 | 1 | 5 | .. | 3 | 7 | .. | 15 | 5 | 7 | .. | 9 | 5 | .. |
| 5½ | 1 | 7 | 15 | 3 | 10 | 15 | 15½ | 5 | 9 | 15 | 9 | 8 | 15 |
| 6 | 1 | 10 | .. | 4 | 2 | .. | 16 | 6 | .. | .. | 10 | .. | .. |
| 6½ | 2 | .. | 15 | 4 | 5 | 15 | 16½ | 6 | 2 | 15 | 10 | 3 | 15 |
| 7 | 2 | 3 | .. | 4 | 9 | .. | 17 | 6 | 5 | .. | 10 | 7 | .. |
| 7½ | 2 | 5 | 15 | 5 | .. | 15 | 17½ | 6 | 7 | 15 | 10 | 10 | 15 |
| 8 | 2 | 8 | .. | 5 | 4 | .. | 18 | 6 | 10 | .. | 11 | 2 | .. |
| 8½ | 2 | 10 | 15 | 5 | 7 | 15 | 18½ | 7 | .. | 15 | 11 | 5 | 15 |
| 9 | 3 | 1 | .. | 5 | 11 | .. | 19 | 7 | 3 | .. | 11 | 9 | .. |
| 9½ | 3 | 3 | 15 | 6 | 2 | 15 | 19½ | 7 | 5 | 15 | 12 | .. | 15 |
| 10 | 3 | 6 | .. | 6 | 6 | .. | 20 | 7 | 8 | .. | 12 | 4 | .. |
| 10½ | 3 | 8 | 15 | 6 | 9 | 15 | 30 | 11 | 10 | .. | 18 | 2 | .. |

2 months off first year, 2 months off second year, 4 months off third year, 4 months off fourth year, 5 months off fifth year and 5 months off each subsequent year after five years.

## Prisoners in the United States.

From a report for 1908, issued by the Commissioner-General of Immigration, showing the number of persons confined in penal institutions in the United States:

| Groups of States, Including Territories. | Numbers in Penal Establishments. | | | |
|---|---|---|---|---|
| | Foreign Born. | | Native Born. | Total. |
| | Aliens. | Naturalized. | | |
| North Atlantic | 9,340 | 4,360 | 32,830 | 46,530 |
| South Atlantic | 480 | 330 | 25,750 | 26,560 |
| North Central | 2,610 | 2,410 | 32,690 | 37,710 |
| South Central | 640 | 130 | 24,310 | 25,080 |
| Western | 2,060 | 690 | 9,920 | 12,670 |
| Total | 15,130 | 7,920 | 125,500 | 148,550 |
| Alaska | 17 | 14 | 42 | 73 |
| Hawaii | 173 | 73 | 313 | 559 |
| Porto Rico | 10 | .. | 709 | 719 |
| Grand total | 15,330 | 8,007 | 126,564 | 149,901 |

According to the preliminary count the prison population on January 1, 1910, was 109,311; the admissions or commitments to prisons during the year 1910 were 462,530, and the number of prisoners discharged during that year on account of expiration of sentence, or other reasons, including also deaths, was 458,996. In the final census report the prisoners will be classified with reference to the offence for which sentenced and the term of sentence imposed.

The number of juvenile delinquents reported at the census of 1910 in institutions for that class was 22,903. This differs but little from the number reported in 1904, which was 23,034.

COMPILED FROM THE CODES OR REVISED STATUTES OF THE

WITHIN the limits of the subjoined table showing the penalties prescribed by the respective States for the offences enumerated it is impossible to attain complete accuracy in comparing the several penalties, for the reason that the provisions of the several States defining these very familiar crimes are not identical. Especially is this true in regard to crimes classified in degrees, some States making but little attempt in that direction, leaving it to the discretion of the trial court to adapt the severity of the punishment to the gravity of the offence, while other States provide a minute classification into degrees, depending on the several possible circumstances attending the commission of the crime.

**Murder in the First Degree**—in the table below—may be generally defined to be the unlawful intentional and premeditated killing of a human being, or such a killing resulting from the commission or attempt to commit one of the graver crimes such as arson, burglary, rape or robbery.

**Murder in the Second Degree** is such a killing without premeditation, or resulting from the attempt to commit some lesser crime.

**Manslaughter** may be defined as a killing either unintentionally resulting from the careless or unlawful doing of some otherwise lawful act or from the commission of some unlawful act of comparatively trivial character, or intentionally, in the heat of passion and without premeditation.

**Arson**—where classified in degrees—though the number and exact definition of degrees varies greatly—is in general classified with reference to two conditions. First, the character of the building burned, whether a dwelling house or structure likely to or containing a human being; and, second, whether the crime is perpetrated by day or night. Thus the most serious offence is the burning of an inhabited dwelling by night, and the least serious, the burning of an uninhabited structure by day. Often intermediate degrees are recognized, such as burning a dwelling by day or an uninhabited building by night.

**Burglary**—The classification of burglary or house breaking depends on substantially the same

| | State. | Murder. | | Manslaughter. | | Assault with Intent to Kill | Robbery. |

| 24 | Missouri.... | Death or life imprisonment | Not less than 10 | Not less than 5 | 3—5 (cc) | Not over 10 | Not less than 5 |

SEVERAL STATES AS AMENDED BY SUBSEQUENT LEGISLATION.

elements as that of arson, namely the building entered, whether a dwelling or other building, and whether the offence was committed by day or night.

**Robbery** may be generally defined as the theft of property from the *person or immediate presence* of the victim, accomplished by force or fear. Where degrees of robbery are recognized, the distinction is generally determined by whether the thief be armed or unarmed, though some States also distinguish the second from the first degree, where the theft is accomplished by means of threats of future rather than immediate injury.

**Grand Larceny** is simple theft, of property above a fixed value, generally $25 to $50—most States also classify as grand larceny theft of property from the person of the victim irrespective of value, though of course, accomplished without the force or fear which constitute the crime of robbery.

Assault with intent to kill, bigamy, forgery, perjury and rape, are not subdivided into degrees in the subjoined table.

Where crimes are divided into several degrees it is generally within the province of the jury in convicting, to fix the degree of the crime, and in almost every case in which a crime is punishable by death or imprisonment, it is the province of the jury to determine the punishment, except upon a plea of guilty, when the duty devolves upon the court.

Where the classification of a crime in a particular State does not approximately agree with the definitions given above, note is made of the fact.

The District of Columbia has no distinct penal code, but in general the provisions given in the table for Alaska would apply.

NOTE — In the table below, after the figures given, "years" is understood, unless otherwise stated. Where two figures are given, separated by a dash, as 1—7, the provision should be understood as "not less than one year nor more than seven," where a sum of money is given in the table the provision should be understood as meaning a fine of not exceeding the sum mentioned.

## EXPLANATORY NOTES.

(a) Alabama—Perjury on trial of a felony (3-20 years). (b) Alaska—(rape of daughter, sister or female under 12 years) life imprisonment. (c) Alaska—(perjury in trial of capital offence 2-20 years). (d) Connecticut—The punishment of larceny of over $2,000 is not more than 20 years; the figure given in the table is larceny of over $50 and below $2,000 in value. (e) In Delaware, besides imprisonment and graduated fines, the pillory or whipping or both are prescribed for most of the offences scheduled. (f) In Florida the punishment for a lesser degree of arson is not over 10 years and for a lesser degree of burglary not over 5 years. (g) In Georgia various grades of larceny are recognized, for theft of horses, cattle, etc. (h) Also fine not over twice value of property destroyed or stolen. (i) Assault with intent to rape punishable by not over 20 years, lesser assault by not over 5 years. (j) Iowa recognizes two lesser degrees of arson punishable respectively by not over 10 years and not over 15 years, according to the definition given above. (k) In Iowa perjury on trial of capital offence is punishable by not less than 10 years—up to life. (l) In Kansas lesser

## LYNCHINGS AND LEGAL EXECUTIONS.

**Lynchings**—The total number of lynchings in the United States from 1885 to November 12, 1913, was 3,458. In 1913 to November 12, there were 45 lynchings, of which 42 occurred in the South and 3 in the North; all were males. Of the lynched, 45 were negroes, no whites. The offences for which they were lynched were: Murder, 23; rape, 7; murderous assault, 6; insulting white women, 2; unnamed, 2; theft, 1; race prejudice, 1; attempted rape, 1; alleged rape, 1; alleged murder, but proved innocent, 1. The States in which the lynchings occurred and the number in each were as follows: Alabama, 2; Arkansas, 2; Florida, 3; Georgia, 7; Illinois, 2; Kentucky, 1; Louisiana, 2; Mississippi, 9; Montana, 1; North Carolina, 1; Oklahoma, 5; South Carolina, 1; Tennessee, 2; Texas, 7.

**Legal Executions**—In 1908 to November 15, there were 92, in 1909 there were 107, in 1910 there were 104, in 1911 there were 61, in 1912 to November 15, there were 128, and in 1913 to November 12, there were 81, of which 51 were in the South and 30 in the North. 47 were whites and 34 negroes. All were males. The crimes for which they were executed were: Murder, 75; rape, 5; attempted rape, 1. The States in which the executions in 1913 to November 12, took place, and the number in each was as follows: Arizona, 2; Alabama, 8; Arkansas, 6; California, 3; Colorado, 3; Connecticut, 1; Florida, 2; Georgia, 5; Kentucky, 3; Massachusetts, 1; Maryland, 2; Mississippi, 5; New York, 10; New Jersey, 2; Nebraska, 1; Nevada, 1; New Mexico, 3; Oregon, 4; Pennsylvania, 6; South Carolina, 4; Texas, 4; Utah, 1; Virginia, 4; District of Columbia, 3.

## NATIONAL COMMITTEE ON PRISON LABOR.

*Chairman*—Thomas Mott Osborne. *Treasurer*—R. Montgomery Schell. *Chairman Executive Committee*—E. Stagg Whitin. Headquarters, 319 University Hall, Columbia University, New York.

"The object of this organization is to study the whole problem of labor in prisons and correctional institutions, with a view to securing legislation among the States of the Union, to the end that all prisoners may be so employed as to promote their welfare and at the same time to reimburse the institutions for expense of maintenance, while preventing unfair competition between prison-made goods and the products of free labor, and securing to their dependent families a fair proportion of the rightful earnings of prisoners."

## Embezzlements.

THE fidelity department of the Fidelity and Casualty Company of New York keeps a record of embezzlements reported in the United States. The following are the figures for five calendar years:

| | 1908. | 1909. | 1910. | 1911. | 1912. |
|---|---|---|---|---|---|
| Banks and trust companies.. | $5,933,971 | $3,840,576 | $6,263,185 | $2,666,549 | $4,630,785 |
| Beneficial associations..... | 281,511 | 404,601 | 509,598 | 477,858 | 143,295 |
| Public service..... | 1,044,741 | 1,007,028 | 743,552 | 1,736,428 | 187,449 |
| General business..... | 2,402,982 | 1,908,051 | 2,001,353 | 4,417,250 | 1,767,405 |
| Insurance companies..... | 581,233 | 1,296,981 | 35,115 | 60,279 | 51,683 |
| Transportation companies... | 544,526 | 287,466 | 216,256 | 310,551 | 50,304 |
| Court trusts..... | 242,608 | 865,970 | 487,864 | 356,836 | 188,395 |
| Miscellaneous..... | 534,107 | 1,041,387 | 475,042 | 1,456,300 | 214,140 |
| Total..... | $11,565,679 | $10,652,060 | $10,731,965 | $11,482,051 | $7,233,456 |

The total amount of embezzlements reported by the same authority for each year from 1896 to 1912, inclusive, was as follows: 1896, $9,113,030; 1897, $11,154,530; 1898, $9,236,351; 1899, $5,873,086; 1900, $8,090,878; 1901, $7,734,250; 1902, $6,933,516; 1903, $10,312,793; 1904, $10,068,971; 1905, $12,623,536; 1906, $18,883,709; 1907, $9,367,964; 1908, $11,565,679; 1909, $10,652,060; 1910, $10,731,965; 1911, $11,482,051; 1912, $7,233,456; total, $171,057,825.

THE WORLD of July 31, 1910, said: Amount stolen from banks in past five years, $28,000,000. Banker convicts in Federal Penitentiary, Fort Leavenworth, Kan., exceeded every other class of prisoners except burglars and mail robbers. Records show that a majority of embezzlers stole money to gamble in Wall Street. Total thefts of $28,000,000 do not represent complete record of losses, because banks conceal them whenever possible. Temptation to try and repeat performances of the few men who have made quick fortunes in Wall Street is held responsible for increasing embezzlements among bank employés.

## Federal Prisons

Are located at Atlanta, Ga.; Fort Leavenworth, Kan.; McNell's Island, Wash.; *Mare Island, Cal.; *Boston, Mass., and *Portsmouth, N. H. *Naval Prisons.

## New York State Hospitals for the Insane.

THE State Hospitals for the Insane are located as follows:

Binghamton.
Buffalo.
Central Islip.
Gowanda.
Hudson River State Hospital at Poughkeepsie.
Kings Park.
Long Island State Hospital at Flatbush.
Manhattan State Hospital at New York.
Mohansic State Hospital at Yorktown Heights.
Middletown State Homoeopathic Hospital at Middletown.
St. Lawrence State Hospital at Ogdensburg.
Rochester.
Utica.
Willard.

Matteawan State Hospital at Matteawan; Dannemora State Hospital at Dannemora.

State Prisons—Auburn Prison at Auburn; Clinton Prison at Dannemora; Great Meadow Prison at Comstock; Sing Sing Prison at Ossining; State Farm for Women at Valatie.

## New York State Probation Commission.

THE State Probation Commission, created by Chapter 430, Laws of 1907, consists of seven members. Four are appointed by the Governor for terms of four years each; one is appointed by the State Board of Charities from among its members; one is appointed by the State Commission of Prisons from among its members; and the State Commissioner of Education is a member *ex-officio*. Commissioners serve without compensation, but are entitled to necessary travelling expenses.

The general duties of the commission are to exercise general supervision over the work of probation officers and to keep informed as to their work; to collect and publish statistical and other information as to the operations of the probation system; to inquire from time to time into the conduct and efficiency of probation officers, and when advisable to conduct a formal investigation of the work of any probation officer; to make recommendations and to secure the effective application of the probation system and the enforcement of the probation law in all parts of the State. The commission makes an annual report to the Legislature showing its proceedings and the results of the probation system as administered in the various localities in the State, and making suggestions and recommendations. The commission in the discharge of its duties has access to all offices and records of probation officers, and may direct formal investigation of the work of any probation officer.

*President*—Homer Folks, New York. *Secretary* — Charles L. Chute. The commission has its office in the Capitol, at Albany.

## Wills.

A WILL OR TESTAMENT is a final disposition of a person's property to take effect after his death. A codicil is an addition or alteration in such disposition. All persons are competent to make a will except idiots, persons of unsound mind, and infants. In many States a will of an unmarried woman is deemed revoked by her subsequent marriage. A nuncupative or unwritten will is one made *orally* by a soldier in active service, or by a mariner while at sea.

In most of the States a will must be in writing, signed by the testator, or by some person in his presence, and by his direction, and attested by witnesses, who must subscribe their names thereto in the *presence* of the testator. The form of wording a will is immaterial as long as its intent is clear.

AGE at which persons may make wills is in most of the States 21 years. Males and females are competent to make wills at 18 years in the following States: California, Connecticut, Hawaiian Islands, Idaho, Montana, Nevada, North Dakota, Oklahoma, South Dakota, Utah; and in the following States only females at 18 years: Colorado, District of Columbia, Illinois, Maryland, Missouri, Washington, Wisconsin.

In the following States persons of 18 years may dispose of personal property only: Alabama, Arkansas, Missouri, Oregon, Rhode Island, Virginia, West Virginia; in Georgia any one over 14 years and in Louisiana any one over 16 years is competent to make a will. In Colorado persons of 17 years, and in New York males of 18 and females of 16 years may dispose of personalty. WITNESSES—Most of the States require two witnesses, except in Connecticut (3), Maine (3), Massachusetts (3), New Hampshire (3), South Carolina (3), Vermont (3).

# Law of Contracts.

**A contract is an agreement of two or more parties,** by which reciprocal rights and obligations are created. One party acquires a right, enforceable at law, to some act or forbearance from the other, who is under a corresponding obligation to thus act or forbear.

Generally speaking, all contracts which are made between two competent parties, for a proper consideration, without fraud and for a lawful purpose, are enforceable at law.

**To the creation of a valid contract** there must be:

1. Precise agreement. The offer of one party must be met by an acceptance by the other, according to the terms offered.

2. There must be a consideration. Something of value must either be received by one party or given up by the other.

3. The parties must have capacity to contract. The contracts of insane persons are not binding upon them. Married women are now generally permitted to contract as though single, and bind their separate property. The contracts of an infant are generally not binding upon him, unless ratified after attaining his majority. The contracts of an infant for "necessaries" may be enforced against him to the extent of the reasonable value of the goods furnished. It is incumbent upon one seeking thus to hold an infant to show that the goods furnished were in fact necessary to the infant, and that he was not already supplied by his parents or guardians.

4. The party's consent must not be the result of fraud or imposition, or it may be avoided by the party imposed upon.

5. The purpose of the parties must be lawful. Agreements to defraud others, to violate statutes, or whose aim is against public policy, such as to create monopolies, or for the corrupt procurement of legislative or official action, are void, and cannot be enforced by any party thereto.

**Contracts in general are equally valid, whether made orally or in writing,** with the exception of certain classes of contracts, which in most of the States are required to be attested by a note or memorandum in writing, signed by the party or his agent sought to be held liable. Some of the provisions, which are adopted from the old **English Statute of Frauds,** vary in some States, but the following contracts very generally are required to be thus attested by some writing:

Contracts by their terms not to be performed within a year from the making thereof.

A promise to answer for the debt, default, or miscarriage of another person.

Contracts made in consideration of marriage, except mutual promises to marry.

Promise of an executor, or administrator, to pay debts of deceased out of his own property.

Contracts for the creation of any interest or estate in land, with the exception of leases for a short term, generally one year.

Contracts for the sale of goods above a certain value, unless a portion of the price is paid or part of the goods delivered. The required value of the goods sold varies in different States from $30 to $200. In a number of the States no such provision exists.

In many of the States declarations or conveyances of trust estates.

In many States representations as to the character, credit, or responsibility of another person.

**Partial performance of the contract** is generally held to dispense with the necessity for a writing.

**If the damages liable to result from the breaking of a contract are uncertain** the parties may agree upon a sum to which either may be entitled as compensation for a breach, which will be upheld by the courts, but if the sum so fixed is not designed as a fair compensation to the party injured, but as a penalty to be inflicted, it will be disregarded.

**A party is generally excused for the failure to perform** what he has agreed only by the act of God or the public enemy. Except in cases involving a personal element in the work to be performed, such as the rendition of services, when the death or sickness of the party contracting to perform them is a valid excuse, or contracts for the performance of work upon a specified object, when its destruction without the fault of the party sought to be held liable is a sufficient excuse.

# Arrest in Civil Action.

WHILE imprisonment for debt as it formerly existed in English and American law, by which a debtor might be arrested and imprisoned for mere inability to pay his creditor, no longer exists in the United States, the statutes of the majority of the States provide for the arrest of a defendant in a civil action under varying conditions. A large number of States determine the right of arrest by the character of the claim on which suit is brought, allowing it in actions for fraud or the injuries known in the law as "torts," such as an injury to the person or property, conversion or embezzlement, libel, slander or the like. Other States only allow arrest to prevent or punish the escape of a defendant from the State and the concealment or transfer of his property with intent to defraud creditors. Still other States combine these two theories or modify them in different ways.

The following synopsis shows a grouping of the States along lines of approximately similar legislation.

In the following States no civil arrest is allowed: Alabama, Arizona, District of Columbia, Florida, Maryland, Minnesota, Mississippi, Missouri, Nebraska, Tennessee and Texas.

In the following States the right to arrest depends upon the nature of claim in suit: In actions for fraud or torts, Connecticut; for fraud, libel, slander or violent injury to person or property, Delaware; for fraud only, Iowa and Kansas; only after verdict of jury, finding malice, fraud or wilful deceit, Colorado; for torts, breach of promise to marry, misconduct or embezzlement in office or professional capacity, Michigan, Pennsylvania, New York (also for fine or penalty or to recover property concealed from Sheriff); only after judgment for fraud or personal injuries, New Mexico.

In the following States arrest is only allowed against a defendant about to remove from State or about to conceal, transfer or remove his property to avoid plaintiff's claim or defraud creditors, irrespective of the nature of the claim: Indiana, Kentucky, Louisiana, New Hampshire, Utah, Virginia.

In the following States arrest is allowed in contract actions where the defendant is about to depart from the State, or conceal or remove his property, and also in actions for fraud or torts of various kinds, though the provisions are not identical: Arkansas (fraud only), California, Idaho, Illinois, Maine, Massachusetts, Montana, Nevada, New Jersey, North Carolina, North Dakota, Oregon, South Carolina, South Dakota, Vermont, Washington, West Virginia (fraud only), Wisconsin.

In Georgia arrest only allowed against attorneys, sheriffs or other officers of the Court for failure to pay over money collected, and in certain circumstances against defendant who conceals property from Sheriff.

In Wyoming and Ohio (only after judgment) in actions for fraud, or money lost at gambling, or where defendant has removed or concealed property to avoid judgment.

In Rhode Island, allowed in all actions except to recover debt or taxes.

# Administration of Deceased Persons' Estates.

## INHERITANCE TAX LAWS.

THE following is a synopsis of several of the laws of the various States affecting the administration of the estate of a deceased person:

1. Who to Administer.—(a) If the deceased leaves a will, the duty of administration falls upon the executor. If no executor is named, or in the event of the death or refusal of the executor to act, the Court will grant administration under the will to some suitable person, generally selected from those most largely interested under the provisions of the will, such as the residuary legatees, if any. (b) If the deceased died intestate, letters of administration are granted to the following persons in practically all the States:

First—To the surviving husband or widow.
Second—To one or more of the next of kin entitled to share in the estate.
Third—If none of the above consent to act, to one of the creditors of the estate, except in localities where there is provided by law a Public Administrator, who is preferred to creditors.

In practically all the States an administrator is required to give bond for the faithful performance of his duties in double the value of the estate to be administered.

In most of the States, if so provided by the will, no bond is required of an executor, except that in some States an executor is required to give a bond to cover the probable amount of the debts of the estate, and in practically all the States, in the discretion of the Court, for cause shown, an executor may be required to give a bond.

2. Claims of Creditors.—The procedure in the several States in presenting creditors' claims against the estate varies very considerably. In the majority of the States the executor or administrator is required promptly to give public notice to creditors to present their claims to him, and the creditors are required so to present their claims supported by an affidavit that the same are justly due and owing from the estate, above any offsets or counter claims, within a period limited generally to six months or a year. The law of each State should be consulted for more specific details. Most of the States direct a final closing of the estate by the executor or administrator within a year or eighteen months after his appointment, though the time limit may be extended by the Probate Court if conditions require it.

3. The following table contains an analysis of the laws of the several States, covering:

(1) The inheritance or succession tax upon property received either by intestate laws, last will, or by gift or transfer, designed to take effect at death, excepting legacies for religious, charitable or educational purposes, which are tax exempt in most of the States. In the great majority of the States no distinction as to tax is made between real estate and personal property.

(2) The various classes of estate obligations given priority over other claims in case of the insolvency of the estate.

| STATE. | Inheritance Tax. | Preferred Obligations. |
|---|---|---|
| Alabama..... | None. | 1. Funeral expenses.<br>2. Administration expenses.<br>3. Expenses of last sickness.<br>4. Taxes.<br>5. Wages of servants or employés. |
| Arizona..... | To grandfather, grandmother, parents, husband, wife, child, brother, sister, son-in-law, or daughter-in-law, or adopted child, 1%; $5,000 exempt to each beneficiary above named. Estates less than $10,000 exempt.<br>To uncle, aunt, nephew, niece or descendant thereof, 2%; $2,000 exempt to each beneficiary named. Estate less than $5,000 exempt.<br>To others, 3% up to $10,000; 4% from $10,000 to $20,000; 5% from $20,000 to $50,000; 6% above $50,000. $500 exempt. | No statutory provision. |
| Arkansas..... | On amounts not exceeding $5,000 the rate is 1% to parents, husband or wife, child or adopted child, brother, sister, son-in-law or daughter-in-law. To all others the rate on the same amount is 3%. $3,000 passing to widow or minor child and $1,000 passing to the other immediate relatives mentioned is exempt. The exemption to others more remote is $500.<br>On amounts in excess of $5,000 the primary rates (1% and 3% respectively) are increased as follows: From $5,000 to $10,000, twice the primary rates; from $10,000 to $30,000, 3 times the primary rates; from $30,000 to $50,000, 4 times; $50,000 to $100,000, 5 times; $100,000 to $500,000, 6 times; $500,000 to $1,000,000, 7 times; above $1,000,000, 8 times. | 1. Funeral expenses.<br>2. Expenses of last sickness.<br>3. Wages of servants.<br>4. Judgments which are liens on land of deceased. |
| California..... | For the purpose of determining the rate of tax, beneficiaries are divided into five classes: (a) husband, wife or children; (b) brothers, sisters or their descendants, also son-in-law or daughter-in-law; (c) uncles, aunts or their descendants; (d) great-uncles, great-aunts or their descendants; (e) others more remote. The tax also varies with the amount of the estate or legacy. On amounts not exceeding $25,000 the rates for the five classes of beneficiaries are respectively 1%, 2%, 3%, 4% and 5%.<br>On amounts from $25,000 to $50,000 the above rates are multiplied by 2. On amounts from | 1. Funeral expenses.<br>2. Expenses of last sickness.<br>3. Wages due within sixty days.<br>4. Debts preferred by U. S. laws.<br>5. Judgments, mortgages and other liens. |

| STATE. | Inheritance Tax. | Preferred Obligations. |
|---|---|---|
| California..... *Continued.* | $50,000 to $100,000 the original rates are multiplied by 3. On amounts from $100,000 to $500,000 they are multiplied by 4, and on amounts in excess of $500,000 they are multiplied by 5.<br>Amounts exempt from taxation are as follows: To widow or minor child, $24,000; to other beneficiaries in class (a), $10,000; to beneficiaries in class (b), $2,000; to beneficiaries in class (c), $1,500; to class (d), $1,000; to class (e), $500. | |
| Colorado..... | To parents, husband or wife, child, brother or sister, wife or widow of son, husband of daughter, lineal descendant, or adopted child the rate is 2%, with $10,000 exempt.<br>To uncle, aunt, nephew or niece or their descendants, 3%.<br>To all others above $500: On $500 to $10,000, tax is 3%; $10,000 to $20,000, 4%; $20,000 to $50,000, 5%; $50,000 to $500,000, 6%; above $500,000, 10%. | 1. Moneys held in a fiduciary capacity.<br>2. Administration expenses.<br>3. Expenses for funeral and last sickness.<br>4. Allowances to widow and orphans. |
| Connecticut.... | To parents, husband, wife, descendant, adopted child or descendant thereof, 1% up to $100,000; $100,000 to $300,000, 2%; above $300,000, 3%; $5,000 exempt.<br>To brother or sister, son-in-law or daughter-in-law, 1% up to $100,000; above $100,000 3%; $3,000 exempt.<br>To others, 5% up to $100,000; above $100,000, 6%. $500 exempt. | 1. Funeral and administration expenses.<br>2. Expenses of last sickness.<br>3. Taxes.<br>4. Wages within three months.<br>5. Other preferred claims by State laws. |
| Delaware..... | Exempt to parents, grand-parents, husband, wife, descendants, adopted child. To others exempt to $500 and taxable on excess as follows: To brothers, sisters or their descendants, 1%; to uncles, aunts or their descendants, 2%; to great-uncles, great-aunts or their descendants, 3%; to those more remote in blood, 5%. | 1. Funeral expenses.<br>2. Expenses of last sickness.<br>3. Wages to servants and laborers.<br>4. Rent (not over one year).<br>5. Judgments.<br>6. Obligations of record.<br>7. Obligations under seal.<br>8. Contracts for payment of money or delivery of goods. |
| District of Columbia.... | None. | 1. Judgments or decree of Court.<br>2. Other debts. |
| Florida..... | None. | 1. Administration expenses.<br>2. Funeral expenses.<br>3. Expenses of last sickness.<br>4. Judgments and debts due to State. |
| Georgia..... | None. | 1. Year's support of family.<br>2. Expenses of funeral and last sickness.<br>3. Administration expenses.<br>4. Taxes.<br>5. Fiduciary obligations.<br>6. Judgments, mortgages and other liens.<br>7. Rent.<br>8. Liquidated demands. |
| Idaho..... | Tax on estates less than $25,000 at following rates:<br>(a) To husband or wife, lineal issue or ancestor, 1%; exempt to widow or minor child, $10,000; to others of Class A, exempt. $4,000.<br>(b) To brother or sister, or their descendants, or wife or widow of son, or husband of daughter, 1½%; exempt, $2,000.<br>(c) To uncles, aunts or descendants, 3%; exempt, $1,500.<br>(d) To great-uncles, great-aunts or descendants, 4%; exempt, $1,000.<br>(e) To more distant relatives or strangers in blood, 5%; exempt, $500.<br>On larger estates than $25,000 the above rates are multiplied as follows: $25,000 to $50,000, 1½ times above; $50,000 to $100,000, 2 times above; $100,000 to $500,000, 2½ times above; $500,000 and upward, 3 times above. | 1. Funeral expenses.<br>2. Expenses of last sickness.<br>3. Debts preferred by U. S. laws.<br>4. Judgments and mortgages. |
| Illinois..... | To parents, husband, wife descendant, adopted child, brother, sister, wife of son, husband of daughter, on amounts from $20,000 to $100,000 the rate is 1%; above $100,000, 2%; exempt below $20,000.<br>To uncle, aunt, niece, nephew or their descendants the rate is 2% on amounts less than $20,000; 4% on amounts in excess of $20,000; exempt below $2,000.<br>To all others the rates vary with amounts as follows: Up to $10,000, 3%; $10,000 to | 1. Funeral and administration expenses.<br>2. Allowance to widow and children.<br>3. Expenses of last sickness, except doctor's bill and wages to servants.<br>4. Debts to common school or township funds.<br>5. Doctor's bill, last sickness.<br>6. Money owed in fiduciary capacity. |

| STATE. | Inheritance Tax. | Preferred Obligations. |
|---|---|---|
| Illinois..... *Continued.* | $20,000, 4%; $20,000 to $50,000, 5%; $50,000 to $100,000, 6%; above $100,000, 10%; exempt to $500. | |
| Indiana..... | On amounts not exceeding $25,000, the primary rates are:<br>(1) To husband, wife, ancestor, descendant, adopted child, 1%. Exempt $10,000 to widow and $2,000 to other parties just named.<br>(2) To brother, sister or their descendants, or to son-in-law or daughter-in-law, 1½%; exempt $500.<br>(3) To uncle, aunt or their descendants, 3%, exempt $250.<br>(4) To great uncle, great aunt or their descendants, 4%; exempt $100.<br>(5) To others more remote, 5%.<br>On larger amounts the primary rates are multiplied as follows: (1) from $25,000 to $50,000, 1½ times; (2) from $50,000 to $100,000 twice; (3) from $100,000 to $500,000, 2½ times; (4) above $500,000 3 times. | 1. Administration expenses.<br>2. Funeral expenses.<br>3. Expenses of last sickness.<br>4. Taxes.<br>5. Debts secured by liens on real estate.<br>6. Wages, not over $50. |
| Iowa..... | Property passing to parents, husband or wife, lineal descendants, adopted child or issue thereof is exempt.<br>To others 5% tax above $1,000.<br>To alien non-residents of the State tax is 20%, unless alien is brother or sister, when tax is 10%. | 1. Debts preferred by U. S. laws.<br>2. Public rates and taxes.<br>3. Wages within 90 days of death.<br>4. Claims filed within six months after notice. |
| Kansas..... | Repealed. | 1. Funeral expenses.<br>2. Expenses of last sickness. Administration expenses. Wages of servants.<br>3. Debts due to State.<br>4. Judgments.<br>5. All demands presented within one year after letters of administration.<br>6. Demands presented after one year and before two years. |

# The Bankruptcy Law.

EXTRACTS FROM THE UNITED STATES BANKRUPTCY ACT OF JULY 1, 1898, AS AMENDED BY ACT OF JUNE 25, 1910.

SEC. 4. WHO MAY BECOME BANKRUPTS.—(*a*) Any person except a municipal railroad, insurance or banking corporation shall be entitled to the benefits of this act as a voluntary bankrupt.

The bankruptcy of a corporation shall not release its officers, directors, or stockholders, as such, from any liability under the laws of a State or Territory or of the United States.

(*b*) Any natural person, except a wage-earner or a person engaged chiefly in farming or the tillage of the soil, any unincorporated company and any moneyed business, or commercial corporation, except a municipal railroad, insurance or banking corporation, owing debts to the amount of one thousand dollars or over, may be adjudged an involuntary bankrupt upon default or an impartial trial and shall be subject to the provisions and entitled to the benefits of this act.

SEC. 7. DUTIES OF BANKRUPTS.—(*a*) The bankrupt shall (1) attend the first meeting of his creditors, if directed by the court or a judge thereof to do so, and the hearing upon his application for a discharge, if filed; (2) comply with all lawful orders of the court; (3) examine the correctness of all proofs of claims filed against his estate; (4) execute and deliver such papers as shall be ordered by the court; (5) execute to his trustee transfers of all his property in foreign countries; (6) immediately inform his trustee of any attempt, by his creditors or other persons, to evade the provisions of this act, coming to his knowledge; (7) in case of any person having to his knowledge proved a false claim against his estate, disclose that fact immediately to his trustee; (8) prepare, make oath to, and file in court within ten days, unless further time is granted, after the adjudication if an involuntary bankrupt, and with the petition if a voluntary bankrupt, a schedule of his property, showing the amount and kind of property, the location thereof, its money value in detail, and a list of his creditors, showing their residences, if known (if unknown that fact to be stated), the amount due each of them, the consideration thereof, the security held by them, if any, and a claim for such exemptions as he may be entitled to, all in triplicate, one copy of each for the clerk, one for the referee, and one for the trustee; and (9) when present at the first meeting of his creditors, and at such other times as the court shall order, submit to an examination concerning the conducting of his business, the cause of his bankruptcy, his dealings with his creditors and other persons, the amount, kind, and whereabouts of his property, and, in addition, all matters which may affect the administration and settlement of his estate; but no testimony given by him shall be offered in evidence against him in any criminal proceedings.

Provided, however, that he shall not be required to attend a meeting of his creditors, or at or for an examination at a place more than one hundred and fifty miles distant from his home or principal place of business, or to examine claims except when presented to him, unless ordered by the court, or a Judge thereof, for cause shown, and the bankrupt shall be paid his actual expenses from the estate when examined or required to attend at any place other than the city, town, or village of his residence.

Act of March 3, 1911 (Judicial Code) 36 Stat. 1134, as follows:

SEC. 24. Original jurisdiction in district courts.

"SEC. 130. The Circuit Courts of Appeals shall have the appellate and supervisory jurisdiction conferred upon them by the act entitled 'An act to establish a uniform system of bankruptcy throughout the United States,' approved July first, eighteen hundred and ninety-eight, and all laws amendatory thereof, and shall exercise the same in the manner therein prescribed."

SEC. 252 states the appellate jurisdiction of the Supreme Court conferred upon it by the Bankruptcy act of July 1, 1898.

# Distribution of Intestate's Personal Estate.

THE following is a synopsis of the laws of the various States providing for the distribution of the personal estate of a deceased after the payment of funeral expenses and other debts where there is no will:

In many of the States the widow and children are entitled to receive a small portion of the estate, generally varying from $100 to $500, before the claims of creditors are paid. Aside from such exempt portion of the estate, the property to be distributed to the widow or relatives is that remaining after all creditors' claims have been satisfied.

The following is the plan of distribution of a male's property. The same rules apply to a female's estate, except in some States, where the rights of a husband in the estate of his deceased wife differ from those of a wife in the estate of her deceased husband, which will be shown in a separate table.

I. In all States where the deceased leaves a child or children, or descendants of any deceased child, and no widow, the children or descendants take the entire estate, to the exclusion of all other relatives. The children take equal shares, and in most States the descendants of a deceased child together take the share of their parent, except where the descendants are all in equal degree to the deceased (all grandchildren, no children surviving), when they share equally and do not take their proportionate share of their parent's interest.

No statement is given in this synopsis of the law of Louisiana, which, being founded on the provisions of the French code and Roman law instead of the English common law, which is the underlying principle in the other States, differs in many respects from the principles followed in the other States, especially on the question of the rights of a husband and wife in each other's property and in the property acquired by the husband and wife during their married life. The provisions of the law of Indiana are also not included, for the reason that for an accurate statement of its provisions a reading of the entire statute is necessary, together with the decisions of the Indiana courts construing its provisions, which would occupy too much space for a statement here.

II. (a) If deceased leaves a widow, and no children or descendants, the widow takes all. This is the rule in Alabama, Arizona, Colorado, Florida, Georgia, Illinois, Kansas, Minnesota, Mississippi, New Jersey, New Mexico, Ohio, Oregon, Tennessee, Texas, Washington, West Virginia and Wisconsin.

(b) In the following States the widow takes one-half, the residue being taken by the other relatives in the manner and proportion in which they take the entire estate when the deceased leaves neither widow or descendants (given below): Arkansas, California, Delaware, District of Columbia, Idaho, Iowa, Kentucky, Maine, Maryland, Missouri, Montana, Nebraska, Nevada, North Carolina, Oklahoma, Rhode Island, Texas, Washington, West Virginia and Wisconsin.

(c) In Massachusetts, North Dakota, Pennsylvania and Utah the widow takes the entire estate up to $5,000 and one-half of the residue.

(d) In Connecticut the widow takes the entire estate up to $2,000 and one-half of the residue.

(e) In New York, if there be a father or mother of deceased surviving, the widow takes one-half; if there be no father or mother, but a brother or sister, nephew or niece surviving, the widow takes $2,000 and one-half residue; if there be no parent, brother, sister, nephew or niece, the widow takes all. The residue after the widow's share passes in each case in accordance with the provisions applying where no widow or issue survive.

(f) In New Hampshire the widow takes $1,500, and, if the estate exceeds $3,000, one-half of the residue.

(g) In Wyoming the widow takes the entire estate up to $10,000 and three-fourths of the residue.

(i) In Michigan the widow takes the entire estate up to $3,000 and one-half of the residue.

(j) In Vermont the widow takes entire estate if not exceeding $2,500; if more than $2,500, widow takes that sum and one-half of residue.

III. (a) When the deceased leaves a widow and children, or descendants, the widow takes one-third and the children share equally in the residue in the following States: Arizona, Arkansas, Connecticut, Delaware, District of Columbia, Illinois, Iowa, Maine, Maryland, Massachusetts, Minnesota, New Hampshire, New Jersey, New York, Ohio (one-half if less than $400), Pennsylvania, Rhode Island, South Carolina, Texas, Vermont, Virginia, and West Virginia.

(b) In the following States, if there be but one child, the widow takes one-half and the child one-half; if two or more children or their descendants, the widow takes one-third, as above, and the children or their descendants the residue: California, Florida, Idaho, Michigan, Montana, Nevada, North Dakota, Oklahoma, South Dakota, and Utah.

(c) In the following States the widow takes one-half and the children, or descendants, the residue: Colorado, Kansas, Kentucky, Oregon, Washington and Wyoming.

(d) In the following States the widow takes the same share as each of the children: Mississippi, Missouri, Tennessee and Wisconsin.

(e) In North Carolina, if there are less than three children, the widow takes one-third and the children the residue: if there are three or more children, the widow takes the same share as each of the children.

DISTRIBUTION OF INTESTATE'S PERSONAL ESTATE—*Continued.*

(f) In Alabama, if there is but one child, the widow takes one-half and the child one-half; if there are more than one child and less than five children, the widow takes the same share as each of the children; if there are five or more children, the widow takes one-fifth and the children or their descendants share equally in the residue.

(g) In Georgia, if there are less than five children, the widow takes the same share as each of the children; if there are five or more children, the widow takes one-fifth and the children or their descendants share equally in the residue.

In Nebraska if widow is not the parent of all the children of the deceased and there be more than one child, widow takes one-fourth and children the residue. If widow is parent of all children of the deceased, she takes one-half if there be but one child and the child the residue; if there be more than one child the widow takes one-third and the children the residue.

(h) In New Mexico, the widow takes one-half of the estate acquired during marriage, otherwise than by gift (by purchase, for example) and the children or their descendants share equally in the residue; the widow also takes one-fourth of the estate acquired before marriage, or by gift or legacy during marriage, the children or their descendants taking the residue.

IV. (a) When the deceased leaves no widow, children or descendants, the parents take the entire estate in equal shares in the following States: Alabama, Arizona, California, Colorado, Connecticut, Idaho, Iowa, Kansas, Kentucky, Maine, Massachusetts, Michigan, Minnesota, Montana, Nebraska, New Hampshire, Oklahoma, Pennsylvania, Texas, Utah, Vermont, Washington, Wisconsin and Wyoming.

In all of the States just mentioned, except Alabama, Arizona, Maine, and Texas, if one parent is dead, the surviving parent takes the entire estate, to the exclusion of brothers and sisters. In Alabama, Arizona, Maine, and Texas the surviving parent takes one-half and the brothers and sisters, or their descendants, take the residue.

In all of them, if both parents are dead, the brothers and sisters and their descendants take the entire estate.

(b) In the following States the father, if living, takes the entire estate; if the father is dead, then to the mother and brothers and sisters, or their descendants equally; and if both parents are dead, then to the brothers and sisters, or their descendants: Florida, New Jersey, New York, North Carolina, Oregon, Rhode Island, South Dakota, Tennessee, Virginia and West Virginia.

(c) In the following States the father, if living, takes the entire estate; if the father is dead, then to the mother; and if both parents are dead, then to the brothers and sisters or their descendants: Arkansas, District of Columbia, Nevada and North Dakota.

(d) In the following States the parents, if living, and the brothers and sisters, or their descendants, take the entire estate, sharing equally. Georgia, Illinois, Mississippi, Missouri, and South Carolina.

(e) In Delaware, Ohio and Maryland (where the property did not descend to intestate from either parent), the brothers and sisters, or their descendants, take the entire estate in preference to the parents, who only inherit if there are no brothers or sisters or lawful issue of any deceased brothers or sisters.

DISTRIBUTION OF FEMALE'S ESTATE.

In the following States, if the deceased was a married woman, the rights of her surviving husband in her personal estate differ from the rights of a widow in the estate of her deceased husband as shown in the above synopsis.

(a) In Delaware, District of Columbia, New Jersey, North Carolina, Rhode Island, and Virginia the husband takes the entire personal estate, whether there is any issue of the marriage or not.

(b) In New York, if there are no children or descendants of children, the husband takes the entire estate.

(c) In Florida, Georgia, and Pennsylvania, if there are no children or descendants, the husband takes the entire estate; if there are children, the husband takes the same share as each child.

(d) In Ohio the husband takes the entire estate if there are no children or descendants; if there are children or descendants, they take the entire estate.

(e) In Alabama the husband takes one-half of the estate, the children, or descendants, taking the residue.

(f) In North Carolina, where surviving husband is not also the father of all the children of decedent, if there be one child the husband takes one-half and the child one-half; if there be more than one child, husband takes child's share.

# Law Examinations in New York State.

To entitle an applicant to an examination as an attorney and counsellor he shall pay to the examiners a fee of $15, and he must prove (15 days in advance) to the satisfaction of the State Board of Law Examiners: 1. That he is a citizen of the State, twenty-one years of age, and that his residence for six months prior to the examination is actual and not constructive, which proof must be made by his own affidavit. 2. That he has studied law in the manner and according to the conditions prescribed for a period of four years, except that if the applicant is a graduate of any college or university his period of study may be three years instead of four, and except also that persons who have been admitted as attorneys in the highest court of original jurisdiction of another State or country, and have remained therein as practicing attorneys for at least three years, may be admitted to such examination after a period of law study of one year within this State. 3. That the applicant has passed the regents' examination or its equivalent must be proved by the production of a certified copy of the regents' certificate filed in the office of the Clerk of the Court of Appeals.

Address communications concerning law examinations to F. M. Danaher, Secretary, Albany, N. Y.

# Acknowledgment of Deeds.

AN ACKNOWLEDGMENT is the act of declaring the execution of an instrument before an officer authorized to certify to such declaration. The officer certifies to the fact of such declaration, and to his knowledge of the person so declaring. Conveyances or deeds of land to be entitled to be recorded must first be acknowledged before a proper officer. Most of the States have forms of acknowledgments, which should be followed.

Acknowledgments may be taken in general by Notaries Public, Justices of the Peace, Judges or Clerks of Courts of the higher grades, Registers, Masters in Chancery, Court Commissioners, Town Clerks, Mayor and Clerks of incorporated cities, within their respective jurisdictions.

The requisites to a valid deed are the same in general as other contracts, but the appointment of an attorney to execute a deed for another person must in general be executed with the same formalities requisite to the deed itself.

SEALS or their equivalent (or whatever is intended as such) are necessary in Alaska, Connecticut, Delaware, District of Columbia, Florida, Idaho, Illinois, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, North Carolina, Oregon, Pennsylvania, South Carolina, Vermont, Virginia, West Virginia, Wisconsin, Wyoming. In almost all the States deeds by corporations must be under seal. FORMS are prescribed or indicated by the statutes of most of the States except Connecticut, Florida, Louisiana. SEPARATE ACKNOWLEDGMENT by wife is required in Alaska, Arkansas, Delaware, District of Columbia, Florida, Georgia, Idaho, Kentucky, Louisiana, Montana, Nevada, New Jersey, North Carolina, Oregon, Pennsylvania, South Carolina, Tennessee, Texas. ONE WITNESS to the execution of deeds is required in District of Columbia, Maine (customary), Maryland, Nebraska, New Jersey (usual), Oklahoma, Utah, Wyoming. TWO WITNESSES to the execution of deeds are required in Arkansas, Connecticut, Florida, Georgia, Louisiana, Michigan, Minnesota, New Hampshire, Ohio, Oregon, South Carolina, Texas, Vermont, Wisconsin.

# Promissory Notes and Checks.

**Negotiable instruments,** the common forms of which are promissory notes, checks, or other bills of exchange, while having the same general requisites as other contracts, have certain distinct features. The purpose of the law is to facilitate as much as possible their free passing from hand to hand like currency. The assignment of an ordinary contract leaves the assignee in no different position for enforcing his rights than that of his assignor, but one who takes a negotiable instrument from a prior holder, without knowledge of any defences to it, before its maturity, and gives value for it, holds it free of any defences which might have been set up against his predecessors, except those defects that were inherent in the instrument itself.

**To be negotiable** an instrument must be in writing and signed by the maker (of a note) or drawer (of a bill or check).

**It must contain** an unconditional promise or order to pay a sum certain in money.

Must be payable on demand, or at a fixed future time.

Must be payable to order or to bearer.

In a bill of exchange (check) the party directed to pay must be reasonably certain.

Every negotiable instrument is presumed to have been issued for a valuable consideration, and want of consideration in the creation of the instrument is not a defence against a bona-fide holder.

**An instrument is negotiated,** that is completely transferred, so as to vest title in the purchaser, if payable to bearer, or indorsed simply with the name of the last holder, by mere delivery, if payable to order by the indorsement of the party to whom it is payable and delivery.

One who transfers an instrument by indorsement warrants to every subsequent holder that the instrument is genuine, that he has title to it, and that if not paid by the party primarily liable at maturity, he will pay it upon receiving due notice of non-payment.

**To hold an indorser liable** the holder upon its non-payment at maturity must give prompt notice of such non-payment to the indorser and that the holder looks to the indorser for payment. Such notice should be sent within twenty-four hours.

**When an indorser is thus compelled to pay** he may hold prior parties through whom he received the instrument liable to him by sending them prompt notice of non-payment upon receiving such notice from the holder.

One who transfers a negotiable instrument by delivery, without indorsing it, simply warrants that the instrument is genuine, that he has title to it, and knows of no defence to it, but does not agree to pay it if unpaid at maturity.

**The maker of a note is liable** to pay it if unpaid at maturity without any notice from the holder or indorser.

Notice to one of several partners is sufficient notice to all.

**When a check is certified** by a bank the bank becomes primarily liable to pay it without notice of its non-payment, and when the holder of a check thus obtains its certification by the bank, the drawer of the check and previous indorsers are released from liability, and the holder looks to the bank for payment.

**A bona-fide holder** of a negotiable instrument, that is, a party who takes an instrument regular on its face, before its maturity, pays value for it and has no knowledge of any defences to it, is entitled to hold the party primarily liable responsible for its payment, despite any defences he may have against the party to whom he gave it, except such as rendered the instrument void in its inception. Thus, if the maker of a note received no value for it, or was induced to issue it through fraud or imposition, they do not defeat the right of a bona-fide holder to compel its payment from him.

**The following States have enacted** a similar Negotiable Instrument law: Alabama, Arizona, Colorado, Connecticut, Dist. of Columbia, Florida, Idaho, Iowa, Kansas, Kentucky, Louisiana, Maryland, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Oregon, Pennsylvania, Rhode Island, Tennessee, Utah, Virginia, Washington and Wisconsin—and the same general rules apply in all the States.

# Marriage and Divorce Laws.

(Revised to December 1, 1913.)

**Marriage Licenses.**—Required in all the States and Territories except Alaska. California, and New Mexico require both parties to appear and be examined under oath, or submit affidavit.

**Marriage, Prohibition of.**—Marriages between whites and persons of negro descent are prohibited and punishable in Alabama, Arizona, Arkansas, California, Colorado, Delaware, Florida, Georgia, Idaho, Indiana, Kentucky, Louisiana, Maryland, Mississippi, Missouri, Nebraska, North Carolina, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Virginia, and West Virginia.

Marriages between whites and Indians are void in Arizona, North Carolina, Oregon, and South Carolina; and between whites and Chinese in Arizona, California, Mississippi, Oregon, and Utah.

Marriage between first cousins is forbidden in Alaska, Arizona, Arkansas, Illinois, Indiana, Kansas, Missouri, Nevada, New Hampshire, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Dakota, Washington, and Wyoming, and in some of them is declared incestuous and void, and marriage with step-relatives is forbidden in all the States except Florida, Hawaiian Islands, Iowa, Kentucky, Minnesota, New York, Tennessee, Wisconsin.

Connecticut and Minnesota prohibit the marriage of an epileptic, imbecile, or feeble-minded woman under 45 years of age, or cohabitation by any male of this description with a woman under 45 years of age, and marriage of lunatics is void in the District of Columbia, Kentucky, Maine, Massachusetts, Nebraska; persons having sexual diseases in Michigan.

California prohibits divorced persons from marrying anywhere within a year by granting only an interlocutory decree at first and final decree one year later.

| States. | Residence Required. | Causes for Absolute Divorce. *In addition to adultery, which is cause for divorce in all the States.* * |
|---|---|---|
| Alabama. ... | 1-3 yrs. | Abandonment two years, crime against nature, habitual drunkenness, violence, pregnancy of wife by other than husband at marriage, physical incapacity, imprisonment for two years for felony, if husband becomes addicted to cocaine, morphine or similar drugs. |
| Alaska ..... | 3 years. | Felony, physical incapacity, desertion two years, cruelty, habitual drunkenness. |
| Arizona..... | 1 year. | Felony, physical incapacity, desertion one year, excesses, cruelty, neglect to provide one year, pregnancy of wife by other than husband at marriage, conviction of felony prior to marriage unknown to other party, habitual drunkenness. |
| Arkansas..... | 1 year. | Desertion one year, felony, habitual drunkenness one year, cruelty, former marriage existing, physical incapacity. |
| California .... | 1 year. | Cruelty, desertion one year, neglect one year, habitual drunkenness one year, felony. |
| Colorado..... | 1 year. | Desertion one year, physical incapacity, cruelty, failure to provide one year, habitual drunkenness one year, felony, former marriage existing. |
| Connecticut .. | 3 years. | Fraudulent contract, wilful desertion three years with total neglect of duty, habitual drunkenness, cruelty, imprisonment for life, infamous crime involving violation of conjugal duty and punishable by imprisonment in State prison, seven years' absence without being heard from. |
| Delaware..... | 2 years. | Desertion two years, habitual drunkenness for two years, cruelty, bigamy, felony followed by a continuous imprisonment for at least two years—and at the discretion of the Court, fraud, want of age, neglect to provide three years. |
| D. of Columbia | 3 years. | Marriages may be annulled for former existing marriage, lunacy, fraud, coercion, physical incapacity, and want of age at time of marriage. |
| Florida ..... | 2 years. | Cruelty, violent temper, habitual drunkenness, physical incapacity, desertion one year, former marriage existing, relationship within prohibited degrees. |
| Georgia ..... | 1 year. | Mental and physical incapacity, desertion three years, felony, cruelty, force, duress, or fraud in obtaining marriage, pregnancy of wife by other than husband at marriage, relationship within prohibited degrees. |
| Idaho ..... | 6 mos. | Cruelty, desertion one year, neglect one year, habitual drunkenness one year, felony, insanity. |
| Illinois..... | 1 year. § | Desertion two years, habitual drunkenness two years, former existing marriage, cruelty, felony, physical incapacity, attempt on life of other party, divorced party cannot marry for one year. |
| Indiana..... | 2 years. | Abandonment two years, cruelty, habitual drunkenness, failure to provide two years, felony, physical incapacity. |
| Iowa..... | 1 year. | Desertion two years, felony, habitual drunkenness, cruelty, pregnancy of wife by other than husband at marriage, unless husband has illegitimate child or children living of which wife did not know at time of marriage. The marriage may be annulled for the following causes existing at the time of the marriage: Insanity physical incapacity, former existing marriage, consanguinity. |
| Kansas..... | 1 year. | Abandonment one year, cruelty, fraud, habitual drunkenness, gross neglect of duty, felony, physical incapacity, pregnancy of wife by other than husband at marriage, former existing marriage. |
| Kentucky .... | 1 year. | Separation five years, desertion one year, felony, physical incapacity, loathsome disease, habitual drunkenness one year, cruelty, force, fraud or duress in obtaining marriage, joining religious sect believing marriage unlawful, pregnancy of wife by other than husband at marriage or subsequent unchaste behavior, ungovernable temper. |
| Louisiana..... | ..... | Felony, habitual drunkenness, excesses, cruelty, public defamation of other party, abandonment, attempt on life of other party, fugitive from justice. |
| Maine..... | 1 year. | Cruelty, desertion three years, physical incapacity, habits of intoxication by liquors, opium, or other drugs, neglect to provide, insanity under certain limitations. |
| Maryland .... | 2 years. | Abandonment three years, unchastity of wife before marriage, physical incapacity, any cause which renders the marriage null and void *ab initio.* |

* Exclusive of South Carolina, which has no divorce law. § Not required for offence within State.

MARRIAGE AND DIVORCE LAWS—*Continued.*

| States. | Residence Required. | Causes for Absolute Divorce. *In addition to adultery, which is cause for divorce in all the States.* * |
|---|---|---|
| Mass'chusetts | 3-5 yrs. | Cruelty, desertion three years, habits of intoxication by liquors, opium or other drugs, neglect to provide, physical incapacity, imprisonment for felony, uniting for three years with religious sect believing marriage unlawful. |
| Michigan..... | 1 year. | Felony, desertion two years, habitual drunkenness, physical incapacity, and in the discretion of the Court for cruelty or neglect to provide. |
| Minnesota.... | 1 year. | Desertion one year, habitual drunkenness one year, cruelty, physical incapacity, imprisonment for felony. |
| Mississippi.... | 1 year. | Felony, desertion two years, consanguinity, physical incapacity, habitual drunkenness by liquor, opium, or other drugs, cruelty, insanity at time of marriage, former existing marriage, pregnancy of wife by other than husband at marriage. |
| Missouri..... | 1 year. | Felony, absence one year, habitual drunkenness one year, cruelty, indignities, vagrancy, former existing marriage, physical incapacity, conviction of felony prior to marriage unknown to other party, wife pregnant by other than husband at marriage. |
| Montana..... | 1 year. | Cruelty, desertion, neglect one year, habitual drunkenness one year, felony, innocent party may not remarry within two years and guilty party within three years of the divorce. |
| Nebraska..... | 1 year. † | Abandonment two years, habitual drunkenness, physical incapacity, felony, failure to support two years, cruelty. |
| Nevada..... | 1 year. § | Desertion one year, felony, habitual drunkenness, physical incapacity, cruelty, neglect to provide one year. |
| N.Hampshire | 1 year. | Cruelty, felony, physical incapacity, absence three years, habitual drunkenness three years, failure to provide three years, treatment endangering health or reason, union with sect regarding marriage unlawful, wife separate without the State ten years, not claiming marital rights, husband absent from United States three years intending to become citizen of another country without making any provision for wife's support. |
| New Jersey.. | 2 years. | Desertion two years, cruelty. No divorce may be obtained on grounds arising in another State unless they constituted ground for divorce in the State where they arose. The marriage may be annulled for the following causes existing at the time of the marriage: Want of legal age, former existing marriage, consanguinity, physical incapacity, idiocy. |
| New Mexico. | 1 year. | Abandonment, cruelty, neglect to provide, habitual drunkenness, felony, physical incapacity, pregnancy of wife by other than husband at marriage. |
| New York.... | (‡) | Adultery only. The marriage may be annulled for such causes as rendered the relationship void at its inception. |
| N. Carolina... | 2 years. | Pregnancy of wife by other than husband at marriage, physical incapacity, husband and wife living apart for ten years and having no issue. |
| North Dakota | 1 year. | Cruelty, desertion one year, neglect one year, habitual drunkenness one year, felony. The marriage may be annulled for the following causes existing at the time of the marriage: Former existing marriage, insanity, physical incapacity, force or fraud inducing the marriage, or want of age. |
| Ohio..... | 1 year. | Absence three years, cruelty, fraud, gross neglect of duty, habitual drunkenness three years, felony, former existing marriage; procurement of divorce without the State by one party, which continues marriage binding upon other party; physical incapacity. |
| Oklahoma.... | 1 year. | Abandonment one year, cruelty, fraud, habitual drunkenness, felony, gross neglect of duty, physical incapacity, former existing marriage, pregnancy of wife by other than husband at marriage. |
| Oregon..... | 1 year. | Felony, habitual drunkenness one year, physical incapacity, desertion one year, cruelty or personal indignities rendering life burdensome. |
| Pennsylvania | 1 year. | Former existing marriage, desertion two years, personal abuse or conduct rendering life burdensome, felony, fraud, relationship within prohibited degrees, physical incapacity and lunacy. |
| Rhode Island. | 2 years. | Cruelty, desertion five years, habitual drunkenness, excessive use of morphine, opium, or chloral, neglect to provide one year, gross misbehavior, living separate ten years, physical incapacity. Either party civilly dead for crime or prolonged absence. The marriage may be annulled for causes rendering the relationship originally void or voidable. |
| S. Carolina.... | ..... | No divorces granted. |
| South Dakota | 1 year. | Cruelty, desertion one year, neglect one year, habitual drunkenness one year, felony. The marriage may be annulled for the following causes existing at the time of the marriage: Want of age, former existing marriage, insanity, physical incapacity, force or fraud inducing marriage. |
| Tennessee.... | 2 years. | Former existing marriage, desertion two years, felony, physical incapacity, attempt on life of other party, refusal of wife to live with husband in the State and absenting herself two years, pregnancy of wife by other than husband at marriage; at the discretion of the Court for cruelty, indignities, abandonment, or neglect to provide, habitual drunkenness. |
| Texas ..... | 6 mos. | Abandonment three years, physical incapacity, cruelty, excess, or outrages rendering life together insupportable, felony. |
| Utah..... | 1 year. | Desertion one year, physical incapacity, habitual drunkenness, felony, cruelty, permanent insanity. |
| Vermont..... | 1 year. | Imprisonment three years, intolerable severity, desertion three years, neglect to provide, absence seven years without being heard from. |
| Virginia..... | 1 year. | Insanity at marriage, felony, desertion three years, fugitive from justice two years, pregnancy of wife by other than husband at marriage, wife a prostitute, or either party convicted of felony before marriage unknown to other, physical incapacity. |

* Exclusive of South Carolina, which has no divorce law. † Two years for causes arising out of State. ‡ Actual residence.
§ Unless both parties reside in the State at time cause of divorce accrues.

MARRIAGE AND DIVORCE LAWS—*Continued.*

| States. | Residence Required. | Causes for Absolute Divorce. *In addition to adultery, which is cause for divorce in all the States.** |
|---|---|---|
| Washington.. | 1 year. | Abandonment one year, fraud, habitual drunkenness, refusal to provide, felony, physical incapacity, incurable insanity, cruelty or indignities rendering life burdensome, other cause deemed sufficient by the Court. |
| West Virginia | 1 year. | Desertion three years, felony, physical incapacity, pregnancy of wife by other than husband at marriage, husband a licentious character or wife a prostitute unknown to other party, either party convicted of felony before marriage unknown to other. The marriage may be annulled for the following causes existing at the time of the marriage: Former existing marriage, consanguinity, insanity, physical incapacity, miscegenation, want of age. |
| Wisconsin.... | 1 year. | Felony (imprisonment three years), desertion one year, cruelty, physical incapacity, habitual drunkenness one year, separation five years. In the discretion of the Court for cruelty or neglect to provide. The marriage may be annulled for the following causes existing at the time of the marriage: Want of age, or understanding, consanguinity, force or fraud inducing marriage; where marriage was contracted with former marriage existing the second marriage is void without any divorce proceedings. |
| Wyoming..... | 1 year. | Felony, desertion one year, habitual drunkenness, cruelty, neglect to provide one year, husband a vagrant, physical incapacity, indignities rendering condition intolerable, pregnancy of wife by other than husband at marriage, either party convicted of felony before marriage unknown to other. The marriage may be annulled for the following causes existing at the time of the marriage: Want of age, force or fraud. The marriage is void without divorce proceedings, consanguinity, insanity, former existing marriage. |

*Exclusive of South Carolina, which has no divorce law.

# Divorce Statistics.

THE Bureau of the Census issued in 1909 a report of the results of a compilation of statistics of divorces of married people granted by the courts in the United States for a period of forty years; being from 1867 to 1906, both years inclusive, and which are shown in 1912 ALMANAC, pages 197–199.

## COMPARISON WITH FOREIGN COUNTRIES.

The following table shows how the divorce rate in the United States compares with that in certain foreign countries.

It should, perhaps, be stated that this comparison is affected slightly by the fact that the figures for foreign countries include as a rule only absolute divorces, while those for the United States include both absolute and limited divorces. This difference is, however, of almost no practical importance, for in the United States less than 1 divorce in 100 is a limited divorce. If it is assumed that exactly 1 divorce in 100 is a limited divorce the ratio of the United States would become 72 per 100,000 population instead of 73, an immaterial difference.

| Country. | Census Year. | Population. | Divorces: Annual Average.* | |
|---|---|---|---|---|
| | | | Number. | Per 100,000 Population. |
| Australia, Commonwealth of | 1901 | 3,773,248 | 359 | 10 |
| Austria | 1900 | 26,150,708 | 179 | 1 |
| Belgium | 1900 | 6,693,548 | 705 | 11 |
| Bulgaria | 1900 | 3,744,283 | †396 | 11 |
| Denmark | 1901 | 2,449,540 | 411 | 17 |
| France | 1901 | 38,961,945 | 8,864 | 23 |
| German Empire | 1900 | 56,367,178 | 8,680 | 15 |
| Prussia | 1900 | 34,472,509 | 5,291 | 15 |
| Saxony | 1900 | 4,202,216 | 1,209 | 29 |

| Switzerland | 1900 | 3,315,443 | 1,053 | 32 |
| United States | 1900 | 75,994,575 | 55,502 | 73 |

*For the 5-year period of which the census year given is the median year except for Bulgaria and Servia. †Average annual number of divorces 1896-1900. ‡Annual average less than 1. Only 1 divorce granted during the 5-year period. ¶Annulments included with divorces. **Legal separations. ††Exclusive of Maoris.

## FROM 1910 CENSUS REPORT.

The number of divorced persons in the United States when the census was taken in 1910 was 156,176 men and 185,101 women—3 per cent. of the total male population and 4 per cent. of the total female population. There were 14 boys and 33 girls less than 15 years old who were divorced.

The statistics of the number of divorced persons 15 years old and over in New York State are: Men—native white of native parentage, 3,784; native white of foreign or mixed parentage, 1,692; foreign-born white, 1,775; negro, 164; total, 7,415. Women—native white of native parentage, 4,950; native white of foreign or mixed parentage, 2,347; foreign-born white, 2,609; negro, 292; total, 10,208.

# State Legislation in 1913.

THE following summary of legislation by States in 1913, up to September 1, is compiled by permission from the appendix to the annual address of President Frank B. Kellogg, of the American Bar Association, delivered at Montreal, September 1, 1913. Only the principal new legislation of current interest is covered by this summary. Much of the legislation in the States consists of amendments of existing laws:

**Alaska**—First legislative session; report not in when ALMANAC was printed;

**Arizona**—Inheritance Tax law; Pure Food law; Alien Land law; Eight-Hour law for Women.

**Arkansas**—Employers' Liability act extended to all corporations; commission form of government for cities having population between 18,000 and 40,000; method of executing death penalty changed from hanging to electrocution; Uniform Negotiable Instruments law; Stringent Anti-Tipping act; Stringent White Slave law; Blue Sky law; Corrupt Practices act. Candidates for Congress or United States Senator not to expend more than income of office for one year; modification of Anti-Trust law permitting fire insurance companies to join in employment of common rate expert; Anti-Trust act of 1905 construed to prohibit doing business within State by any concern which was a member of a combination elsewhere, although there was no showing of unfair practices within State.

**California**—Alien Land law; Blue Sky law; State civil service; mothers' pensions; abatement of disorderly houses; Water Conservation act; Eight-Hour law for Underground Workers; Sixteen-Hour law for Train and Enginemen; extension of Workmen's Compensation act to establish an automatic insurance system; weights and measures and net container laws for protection of purchasers.

**Colorado**—Recall of all elective officers, including judges (constitutional amendment); recall of certain judicial decisions (constitutional amendment); Parents' Pension act; Headless Ballot act; Civil Service act; eight-hour laws for women and underground workers; Loan Shark law; Anti-Trust act; act directing Supreme Court to prescribe rule of practice and procedure in all courts of record, which rules shall supersede any statute in conflict therewith; Employers' Liability act; minimum wage commission for women and minors; public utilities commission; uniform law as to wills made without the State.

**Connecticut**—Workmen's Compensation act.

**Delaware**—Act to regulate employment of child labor and creating a Child Labor Commission; act to regulate hours of labor of females (maximum of 10 hours per day or 55 hours per week in certain employments).

**District of Columbia**—Public Utilities Commission act which is very comprehensive and gives to the commission authority to fix rates and generally to supervise all public utilities. Loan Shark law.

**Florida**—A "General Primary Election law."

**Hawaii**—Public Utility Commission; Family Desertion law; Direct Primary law.

**Idaho**—Public Utilities Commission; mothers' pensions; commission form of government for cities of over 15,000; general revision of Insurance law; Blue Sky law; sections of existing law prohibiting Chinese or persons of Mongolian descent not born in United States from acquiring land were repealed; Eight-Hour law for Workmen on Public Works.

**Illinois**—Suffrage extended to women to the extent of voting for presidential electors; mothers' pensions; municipal ownership of public utilities; Public Utilities Commission; new Workmen's Compensation act; primary election laws amended in many respects, including provision for presidential preference primaries.

**Indiana**—Public Utilities Commission; graduated Inheritance Tax law; Loan Shark law; Uniform Negotiable Instruments act; time for appeal to Supreme and Appellate Courts cut down from one year to six months.

**Iowa**—Employers' liability and workmen's compensation; Presidential Primary act; unfair competition and discrimination; Blue Sky law; arbitration of industrial disputes.

**Kansas**—Inheritance Tax law repealed; granting of injunctions in labor disputes restricted; Eight-Hour law for Workmen on Public Works; State Department of Labor and Industries created; White Slave law; commission form of government for certain cities; civil service in cities of the first class; primary elections in cities of first and second classes.

**Maine**—Anti-Trust act; Public Utilities act.

**Massachusetts**—Mothers' pensions; "Uniform Child Labor law"; weights and measures; licensing aviators, inspection of aeroplanes, "law of the road" in flight, etc; uniform marriage law; one day's rest in seven in certain manufacturing and mercantile employments; granting of preliminary injunctions and restraining orders restricted.

**Minnesota**—Five-sixths of jury may return verdict in civil cases after 12 hours' deliberation; abatement of disorderly houses; Uniform Negotiable Instruments act; Blue Sky law relating to insurance companies only; Workmen's Compensation act; ten hours per day and fifty-eight hours per week maximum for employment of women in certain occupations, and nine hours per day and fifty-four hours per week in other occupations; presidential preference primaries; Loan Shark law—1 per cent. per month limit on loans of $200 or less; mothers' pensions; constitutional amendment submitted providing for initiative, referendum and recall of all public officials.

**Missouri**—Blue Sky law; Mothers' Pension law extended; White Slave act; Public Service Commission with very broad powers over all public utility corporations and persons; primary election system extended to nomination of all elective city offices in cities having more than 400,000 inhabitants; "County Unit law," which is regarded as practically assuring prohibition throughout the State outside of the large cities; Loan Shark law; drastic statute on subject of pools, trusts, conspiracies and discriminations.

**Montana**—Nine-hour day for women in certain employments; Department of Labor created; anti-trust and anti-discrimination laws; Loan Shark law with 12 per cent. maximum; all public service corporations subjected to jurisdiction and control of State Railroad Commission; Blue Sky law; presidential preference primary and election of delegates to presidential conventions and nomination of presidential electors by direct vote; Stringent Corrupt Practices act.

**Nevada**—Workmen's Compensation act; act prohibiting child labor; divorce residence period changed from 6 months to 1 year; Food and Drugs act; Inheritance tax law; Corrupt Practices act limiting candidates to expenditure of 20 per cent. of one year's salary.

**New Hampshire**—Mothers' pensions; Family Desertion act; Department of Agriculture created; laws for suppression of tuberculosis; board established for arbitration of labor disputes; primary election of delegates to presidential conventions; registration of foreign corporations doing business in State.

**New Jersey**—Anti-trust and anti-discrimination acts; corporations prohibited from acquiring stock or securities of other corporations; Employers' Liability Commission created; Eight-Hour law for workmen on public works.

**New Mexico**—White Slave law; Local Option law; commission form of government for cities; comprehensive act relating to weights and measures.

STATE LEGISLATION IN 1913—*Continued.*

**New York**—See separate article entitled "Legislation of New York in 1913."

**North Carolina**—Peremptory challenges permitted a defendant charged with a capital felony reduced from 23 to 12, and instead of change of venue court may draw jury from another county.

**North Dakota**—Act to prevent procreation by confirmed criminals, insane, idiots, defectives and rapists; by act regulating practice in District and Supreme Courts all exceptions on trial are made unnecessary, exceptions being required only to charge to jury; Inheritance Tax law.

**Ohio**—Lobbyists must file statement with Secretary of State and obtain certificate, and must also file statements of disbursements; in civil actions a jury may render a verdict upon the concurrence of three-fourths or more of its number; Legislative Reference Bureau established; indeterminate sentences to penitentiary for all felonies except treason and murder in first degree; stringent White Slave law; wages must be paid at least each calendar month by all employers who employ five or more regular employés in the State; ten-hour day for females in certain employments; various State boards having to do with labor and industrial matters are abolished and in their place is created an Industrial commission composed of three members with very broad powers; Eight-Hour law for workmen on public works; Agricultural Commission established; Torrens Land Title act; Corrupt Practices act; system of primary elections for members of Congress and State offices; act providing for the use of school grounds and houses and other State buildings as social centres for the entertainment and education of the people; censorship of motion picture films by a State board; a public utilities commission of three members created.

**Oklahoma**—Unfair competition and discrimination; certain corporations must pay employés every two weeks.

**Oregon**—Laws for suppression of tuberculosis; mothers' pensions; Public Utilities law; abatement of disorderly houses; male applicants for marriage license must produce physician's certificate as to freedom from certain diseases; sterilization of habitual criminals and degenerates authorized; industrial commission created; Eight-Hour law for workmen on public works.

**Pennsylvania**—Public Utilities act; maximum of ten hours per day and 54 hours per week for women in certain employments; Department of Labor and Industries created; semi-monthly wage payments, unless otherwise stipulated in contract; State-wide primaries providing for direct nominations of all public officers from United States Senators and Governor down; constitutional amendment submitted providing for woman suffrage; electrocution as death penalty instead of hanging; a number of pure food laws, including stringent Cold Storage law; State Board of Censors for motion pictures; Mothers' Pensions act; Loan Shark act; abatement of disorderly houses.

**Porto Rico**—Eight-hour day and otherwise regulating employment of women and children; laws for suppression of tuberculosis; registration of foreign corporations required.

**Rhode Island**—Maximum of ten hours per day and 54 hours per week for women and minors in certain employments; employment of children under fourteen years of age prohibited in certain employments, and restrictions placed on hours and conditions of employment of children over that age.

**Tennessee**—Parole of convicts; Department of Workshop and Factory Inspection created; disabilities of married women on account of coverture removed; Vital Statistics act.

**Texas**—Laws for suspended and indeterminate sentences in criminal cases and parole of convicted persons; Presidential primaries; Bureau of Child and Animal Protection created; Eight-Hour law for workmen on public works; ten hour day and fifty-four hour week for women in certain employments; tuberculosis laws; cities of less than 5,000 permitted to adopt commission form of government.

**Utah**—Indeterminate sentences of persons convicted of crime; unfair competition and discrimination; mother's pensions.

**Vermont**—Uniform Negotiable Instruments act; Blue Sky law; State Board of Conciliation and Arbitration created for adjustment of labor disputes; eleven-hour day and fifty-eight hour week for women and minors in certain employments; capital punishment by electrocution provided; regulation and licensing of pawnshops.

**Washington**—Constitutional amendment proposed removing restrictions against resident aliens holding lands within municipalities; Industrial Welfare Commission established, with power to fix minimum wages for women; Mothers' Pensions act; Juvenile Court act; State Humane Bureau created, to provide for protection of incompetents, children and minors; Family Desertion act; abatement of disorderly houses; death penalty for murder abolished; Department of Agriculture created.

**West Virginia**—Inheritance Tax act; Public Utilities act; Workmen's Compensation act; State-wide prohibition; Blue Sky law; Anti-Trust and Monopoly law relating to common carriers; laws regulating insurance rates.

**Wisconsin**—Unfair competition and discrimination; compensation to persons erroneously convicted of crime; abatement of disorderly houses.

**Wyoming**—Eight-hour day for workmen on public works; act prescribing liability of railroad companies for injuries to and death of employés; marriage of white persons with negroes, mulattoes, Mongolians or Malays are declared to be void; act restraining sale of cocaine and other drugs.

---

# Socialist Party National Committee.

WALTER LANFERSIEK, Executive Secretary, 111 North Market Street, Chicago, Ill. This organization, known nationally as the Socialist Party, is officially known as the Social Democratic Party in Wisconsin, and the Public Ownership Party in Minnesota, to conform to the election laws in those States. The National Executive Committee is composed of five members, elected by the National Committee. The Executive Secretary is elected in like manner. The term of office is one year. The following are the Executive Committee: Victor L. Berger, Milwaukee, Wis.; J. Stitt Wilson, Berkeley, Cal.; George H. Goebel, Newark, N. J.; James H. Maurer, Reading, Pa.; Adolph Germer, Denver, Col. The National Committee is composed of representatives from each organized State or Territory, of which there are 47. Representation is as follows: The National Committee consists of the State Secretaries of all organized States and Territories, or such other person as the members of the party in the State elect by referendum vote, with one additional member from each State or Territory for every three thousand members in good standing in such State or Territory. For the purpose of determining the representation to which each State or Territory may be entitled, the National Secretary computes the beginning of each calendar year the average dues-paying membership of such State or Territory for the preceding year. Three years' consecutive membership in the party is necessary to qualify for membership in the National Committee.

# Legislation of New York in 1913.

THE Legislature of 1913 in addition to passing laws also approved of four proposed amendments to the Constitution.

Amendment No. 1 was in relation to the method of ascertaining compensation on taking private property for public use and empowering the Legislature to authorize municipalities to condemn property in excess of the amount actually needed for public parks, streets and places.

Amendment No. 2, provided that there shall be no Constitutional limitation upon the power of the Legislature to enact laws for the protection of the lives, safety or health of employees; for the payment of compensation for injuries to or death of employees resulting from such injuries; and for the adjustment of issues arising under such legislation.

Amendment No. 3, provided for an increase of two in the number of County Judges in Kings County; and also providing that the Legislature may increase the number of County Judges in any county, not to exceed a total of one Judge for every 200,000 population or major fraction thereof.

Amendment No. 4, provided for the use by the State of not to exceed three per centum of the forest preserve lands for the construction and maintenance of State-controlled reservoirs for municipal water supply; for the canals of the State and for the regulation of the flow of streams and imposing regulations for the apportionment between property and municipalities benefited of the expense thereof.

A direct State tax of 5805-10000 of a mill for the canal and highway sinking funds, the equivalent of nearly 6-10 of a mill, which it is estimated will place between $6,000,000 and $7,000,000 in the State Treasury, was imposed.

The sum of $75,000 was appropriated to pay the expenses of the impeachment trial of Gov. Sulzer

The sum of $75,000 was appropriated to pay various deficiencies in legislative funds and $225,000 for the purpose of paying indemnity for cattle condemned, appraised and slaughtered by order of the Commissioner of Agriculture.

The sum of $9,406,206.74 was appropriated from various sinking funds.

The Legislature in the General Appropriation act appropriated $29,825,897.29, of which the Governor approved—he disallowed $411,090.

The Legislature in the Supply bill appropriated $4,182,905.73, of which the Governor approved—he disallowed $2,738,416.87.

Special appropriations were made by the Legislature, of which the Governor approved, amounting to $13,715,365.47.

The total approved appropriations, including all the appropriations from the general fund, amounted to $47,774,168.49. There were in addition sums appropriated from the highway improvement fund, the military record fund and from the prison hospital fund to the amount of $444,722; which brought up the grand total of appropriations for the support and maintenance of the State departments and institutions to $48,168,890.49. The corresponding appropriations of the year 1912 were $45,558,598.86; an increase in the total appropriations from the general fund of the year 1913 over that of 1912 amounting to $2,610,291.68.

The combined appropriation and supply bills contained items for the support of the State hospitals for the insane aggregating $752,649.38 more than provided in 1912. The appropriations for the support of the State charitable institutions amounted to $533,323.22 more than in 1912.

Special bills made appropriations for new buildings and repairs of old buildings for the State hospitals and charitable institutions amounting to $2,213,273.

The appropriations for the maintenance and repair of State highways were $913,141.59 larger than in 1912.

There was an increase of appropriations for the State Labor Department and the State Health Department amounting to $530,561.39.

The additional contributions to educational work amounted to $869,000, distributed as follows: College of Agriculture at Cornell University, $334,000; College of Forestry at Syracuse, $250,000; Long Island College of Agriculture, $190,000; College of Agriculture at Delhi, $50,000; Schoharie School of Agriculture, $20,000; farm bureaus, $25,000.

Appropriations for the celebration of the battle of Lake Erie, of the battle of Plattsburg, of the anniversary of the battle of Gettysburg and for the acquisition of the Bennington battlefield and some smaller items amounted to $161,000.

For the work of continuing the reconstruction of the Capitol and also to finish the new Educational Building the sum of $1,689,500 was appropriated.

The chief measures of legislation were as follows:

Amending the Highway law in relation to punishment for its violation, in the operation of motor vehicles; and prescribing the amount of the bail bonds.

Appropriating $50,000 for the compensation of persons appointed by the Governor to investigate departments, boards, bureaus and commissions of the State.

Authorizing the Adjutant-General to remove the clerks, employees and laborers employed by him at his discretion.

Incorporating the Harriman Research Laboratory for the purpose of conducting, assisting and encouraging scientific investigation, experimentation and research in the sciences and arts of hygiene, medicine, surgery, physics, bacteriology and allied subjects, in the nature and causes of disease.

Limiting to one year authority granted to a foreign insurance corporation to do business in this State.

Inserting in the Insurance law a new section providing for the issuance by the Superintendent of Insurance of certificates of authority to persons, partnerships or corporations to do business as insurance brokers.

Amending the Penal law so as to permit processions with music on Sunday by organizations of the National Guard or Naval Militia attending religious services.

Authorizing all villages to provide for public band concerts.

Amending the Insurance law in relation to requiring adjusters of loss or damage by fire to procure a certificate of authority from the Superintendent of Insurance.

Providing that no corporation shall hereafter be organized under the laws of this State with the word "casualty," "surety," or "fidelity" as part of its name unless it is formed under the Banking or Insurance law.

Amending the Insurance law in relation to rate making associations by giving investigating power to the Superintendent of Insurance over such associations, by preventing discriminations and improper increases in insurance rates.

Making it possible to organize a general mutual fire insurance company.

Authorizing the city of New York to acquire a farm site outside the territorial limits of the city for use as a part of the New York City Reformatory for misdemeanants.

Amending the Greater New York Charter by providing that the Commissioners of the Sinking

LEGISLATION OF NEW YORK IN 1913—*Continued.*

Fund upon the written request of the Comptroller may authorize the latter to annual assessments for local improvements prior to June 9, 1900.

Extending the time of the Commissioners designated to consolidate, codify and revise the laws relating to the estates of deceased persons to February 15, 1914.

Providing that the Board of Supervisors of a county may make an appropriation for the maintenance of a tuberculosis hospital

Prohibiting the business of undertaking by other than licensed undertakers.

Amending the Highway law by providing for a single State Commissioner of Highways in place of an existing State Highway Commission, composed of the State Superintendent of Highways, the State Engineer and the Superintendent of Public Works, at a salary not to exceed $10,000; with authority to divide the State into nine divisions instead of six and assign to them nine engineers; and providing that no patented material should be contracted for except under such circumstances as should give a fair opportunity for competition.

Amending the Labor law in relation to cleanliness of rooms in factories by making the provisions of existing law more stringent.

Amending the Labor law, in relation to protecting the health and morals of females employed in factories by providing that no woman shall be permitted to work before 6 o'clock in the morning or after 10 o'clock in the evening.

Appropriating $18,765.88 for payment of the expenses incident to the proceeding entitled: "The people of the State of New York, ex-rel Mary C. Thaw against John W. Russell, Medical Superintendent of Matteawan State Hospital."

Providing that an employers' liability, fidelity and credit guaranty corporation shall have at least $250,000 capital stock, fully paid in cash, if it transacts one of these kind of businesses.

Providing that with the approval of the Superintendent of Banks the trustees of any savings bank by an affirmative vote of three-fourths of their number may remove trustees of such institutions.

Making it a felony for any officer of a bank to abstract or wilfully misapply any of the bank's money or property, or to wilfully misapply its credit.

Providing that the stockholders of a trust company may at any time direct that such trust company be closed for the purpose of winding up its affairs.

Amending the Code of Civil Procedure by providing that an injunction order may also be granted or continued by the Appellate Division or a Justice thereof pending appeal to the Court or to the Court of Appeals from an order of judgment denying or vacating an injunction.

Amending the Greater New York Charter by providing that per diem employees may be given a two weeks' vacation during September, as well as during June, July and August.

Providing that voters entitled to vote on propositions to raise money for towns must be the owners of property in the town affected.

Providing that in the construction of State and County highways in villages the consent of the owners of abutting property shall not be necessary for the improvement.

Approoriating $50,000 to continue the work of the Factory Investigation Commission and authorizing that Commission to inquire into the wages of all industries and employments, into the advisability of fixing minimum rates and wages and other legislation relating to wages or conditions of labor.

Prohibiting the formation of cemetery associations to operate in Nassau County and the acquiring or using of land for cemetery purposes in said county except for family cemeteries.

Providing that the Supreme Court as well as the General Sessions Court of New York or the County Court of any other county may issue an order compelling a person to support a poor relative.

Amending the Labor law by providing that in every case before an employment certificate is issued the physical fitness of the applicant shall be determined by a medical officer of the Department of Labor or the Board of Health.

Reorganizing the State Department of Labor, extending the department's jurisdiction over mercantile establishments in cities of the second class, and creating an Industrial Board.

Amending the Railroad law by prescribing the minimum number of employees to be employed in the operation of railroad trains and engines.

Providing that a person who wilfully sets fire to a building, which at the time is insured, with intent to prejudice the insurer shall be guilty of arson in the second degree.

Including county detectives among "peace officers."

Appropriating $1,000 for the purchase of appropriate badges for officers and enlisted men who served in the army and navy of the United States during the Spanish, Philippine and China campaigns.

Authorizing Boards of Supervisors to seize property condemned for use as a site of a county tuberculosis hospital.

Creating a commission to control the Newtown Battlefield Reservation and appropriating $10,000 for the support of the reservation.

Authorizing the establishment and maintenance of temporary schools in lumber camps and other places of temporary habitation.

Extending the prohibition against discriminations and rebates by life insurance companies to assessment life insurance associations.

Prescribing additional provisions for the standard fire insurance policy and providing for the appointment of an umpire by the court for the adjustment of losses.

Providing for a State Board of Geographic Names, consisting of five members, of which the Commissioner of Education and the State Geologist shall be ex-officio members.

Authorizing the acquisition by the United States of lands in the Borough of Queens, New York City, as a site for a life saving station.

Changing the name of the "New York State Interstate Bridge Commission" to the "New York State Bridge and Tunnel Commission"; and providing that such Commission in co-operating with the New Jersey Interstate Bridge and Tunnel Commission shall consider the subject of tunnel communication between the city of New York and the State of New Jersey.

Making an appropriation of $150,000 to aid in the celebration of the One Hundredth Anniversary of the battle of Lake Erie and the erection of a memorial to Commodore Perry and his men.

Prohibiting smoking in factories and providing that notice of such prohibition shall be posted in every entrance hall and in every elevator car, store hall and room, and that baled waste material may be stored in fireproof enclosures for a period not to exceed one month.

Amending the Labor law by providing that every factory employer shall maintain living quarters in a thoroughly sanitary condition and authorizing the Commissioner of Labor to inspect such quarters.

Authorizing the Industrial Board to make rules and regulations for the ventilation, temperature and humidity in factories and special means for removing impurities or reducing excessive heat.

Providing that seats for waitresses in restaurants shall be provided with proper backs where practicable.

LEGISLATION OF NEW YORK IN 1913—*Continued*

Authorizing the State Industrial Board to make special rules and regulations for dangerous employments.

Providing that all children between 14 and 16 years of age employed in factories shall submit to a physical examination whenever required by a physical inspector of the State Labor Department and providing for a cancellation of employment certificate if the child is found to be physically unfit.

Making provisions for the enclosure of elevators and hoisting shafts in factory buildings and authorizing the Industrial Board to make rules and regulations for the construction, equipment and operation of elevators and machinery connected therewith.

Requiring the installation of fire alarm signal systems in every factory building over two stories in height in which more than twenty-five persons are employed above the ground floor and providing that fire drills in factories shall be under the supervision of the Fire Commissioner in New York City and of the State Fire Marshal in other parts of the State.

Amending the Insurance law by providing that the State Fire Marshal shall have jurisdiction over the inspection of the adequacy and sufficiency of water supply and fire apparatus and their inspection for fire-fighting purposes.

Extending the provisions of law relative to the collection of school taxes, now applicable to railroad corporations, to telegraph, telephone, electric light, gas companies, and natural gas companies.

Appropriating $25,000 for making surveys for extending the Black River Canal, and constructing a canal between Flushing River and Jamaica Bay and a canal from Newtown Creek to the Flushing Bay Canal.

Amending the Education law by providing that the voters of a school district may provide grounds to be used for playgrounds or for athletic and social centre purposes; or for agricultural purposes; also permitting the use of school houses for social, civic and recreational meetings; and when authorized by a vote of the district for political meetings, registration, primaries and elections.

Amending the Conservation law so as to permit any number of municipalities, including water districts, within contiguous counties, to join in the formation of a union water district.

Providing for the creation in the Department of Agriculture of a bureau of supervision of co-operative associations.

Prohibiting the operation of bucket shops and the making of "wash" or "margin" sales of stock.

Inserting in the General City law a new article, granting to every city power to regulate, manage and control its property and local affairs, and all the rights, privileges and jurisdiction necessary and proper for carrying such power into execution; and specific powers to be exercised subject to the Constitution and general laws of the State.

Amending the Penal law by providing that the manipulation of securities and conspiring movements to deceive the public as to stocks, bonds or other evidences of debt of a corporation, company or association, shall constitute a felony.

Prohibiting the manufacture or repair for a factory of any article of food, dolls' clothing and children's or infants' apparel in a tenement house; and providing for the issue of permits by the Labor Commission to owners of factories for whom articles are manufactured in tenement houses.

Amending the Civil Rights law by providing that any written or printed communication denying accommodations or privileges in places of public accommodation, resort or amusement to any person because of race, creed or color shall be presumptive evidence in any action that the statement was authorized.

Establishing a State Department of Efficiency and Economy, with one Commissioner at its head with a salary of $12,000 yearly; the Commissioner to make a careful study of each State office, institution and department and from time to time make recommendations to the Governor and to the departments affected touching the efficiency and economy of the work.

Establishing a State Board of Estimate, consisting of the Governor, Lieutenant-Governor, President pro tempore of the Senate, Chairman of the Finance Committee of the Senate, Speaker of the Assembly Chairman of the Ways and Means Committee of the Assembly, State Comptroller, Attorney-General and the Commissioner of Efficiency and Economy; with the duty of preparing an estimate for a budget of the amounts required to be appropriated by the Legislature for the conduct of the public business of the State.

Requiring railroads in New York City desiring to acquire title to real property to first obtain the consent to such a purchase of the Public Service Commission of the First District.

Amending the Education law so as to provide 3,000 scholarships for the education of boys and girls in colleges.

Striking out of the Greater New York Charter a $75,000 limitation on the amount which may be expended for the relief of the poor adult blind.

Amending the Greater New York Charter by providing that heads of departments, other than Police and Fire Commissioners, may rehear charges against, and, upon the approval of the Municipal Civil Service Commission, may reinstate persons dismissed.

Appropriating $25,000 for protecting forests from fire and for the enforcement of the fire provisions of the Conservation law.

Incorporating Cornelius Vanderbilt, Herman Ridder, Louis Annin Ames, August Belmont, Union W. Bethell, Henry L. Bogert and others as the New York Commercial Ter-Centenary Commission, to celebrate the Three Hundredth Anniversary of the beginning of the regularly chartered commerce of what is now the State of New York under the auspices of the State's General of the United Netherlands in 1614.

Amending the Labor law by providing that whenever an employer shall require a physical examination by a physician or surgeon as a condition of employment the party to be examined, if a female, shall be entitled to have such examination before a physician or surgeon of her own sex.

Appropriating $100,000 for the maintenance and government of a school in the city of New York for the education and training of pupils from various counties of the State in the science and practice of navigation, seamanship, steam and electrical engineering.

Providing that all maps of the Boroughs of Greater New York shall show the location of playgrounds now existing and authorizing the Board of Estimate and Apportionment to change the maps or plan of the city for the purpose of laying out new playgrounds.

Ratifying an agreement made July 21, 1911, between New York City and the Long Island Railroad Company for the elimination of grade crossings and for the payment by the city toward the expense thereof.

Extending to May 1, 1916, the life of the Commission to investigate and consider means for protecting the waters of New York Bay and vicinity against pollution.

Authorizing the Board of Aldermen of New York to name or rename parks and all public places under the jurisdiction of the Park Board.

Providing that Surrogates may admit a will to probate and reserve the question of construction or effect for future consideration and decree.

LEGISLATION OF NEW YORK IN 1913—*Continued.*

Amending the Labor law by providing for separate wash rooms and dressing rooms in factories where more than ten women are employed.

Authorizing any municipal corporation maintaining a hospital or sanitarium for the treatment of tuberculosis to establish and maintain workshops in connection therewith for the production of articles or supplies required by such hospital or sanitarium or by any other institution or department of such municipality.

Providing that all State contracts exceeding $1,000 in amount shall first be approved by the State Comptroller and filed in his office.

Extending the jurisdiction of the Public Service Commissions to baggage companies and transfer companies.

Amending the Penal law by providing that articles of food may be sold, supplied, served and delivered at any time on Sunday before 10 o'clock in the morning; and that meals may be sold to be eaten on the premises where sold at any time of the day on Sunday.

Appropriating $250,000 for the Panama-Pacific Exposition.

Appropriating $50,000 for the purchase or condemnation by the Armory Commission of lands within the State for rifle practice and other military or naval purposes.

Extending to Feb. 1, 1915, Feb. 1, 1917 and Feb. 1, 1919, the terms of office of the existing Civil Service Commission; and also increasing the salaries of the three Commissioners from $3,000 to $5,000 each.

Excepting from the provisions of the Transfer Tax law the bonds of New York State registered in the name of the decedent or trustees of such decedent.

Increasing from 1 to 1½ per cent. of the par value of bonds bearing not exceeding 3 per cent. interest the amount of credit to be given on franchise taxes to the purchasers of State bonds.

Reappropriating $6,600,809.03, unexpended balances, for constructing or improving public highways.

Reappropriating $774,850.28, unexpended balance, for improving the Cayuga and Seneca Canals.

Providing that the Major-General of the National Guard shall receive an annual salary equal to the amount paid to a Major-General of the United States Army.

Appropriating $20,000 for the dedication of the monument erected by the State at Andersonville to commemorate the heroism of the New York soldiers who were confined there during the civil war.

Establishing the "New York State Commission for the Blind," consisting of five persons to be appointed by the Governor.

Providing that the man who refuses to pay the fine imposed by a military court may be dishonorably discharged from the service.

Conferring upon the Palisades Interstate Park the management and control of the State rifle range at Blauvelt, Rockland County.

Providing that every fire insurance company shall report monthly by mail to the State Fire Marshal all fire losses on property insured in such company, giving the date of the fire, amount of probable loss, character of property destroyed or damaged and the supposed cause, and also the amount of loss as adjusted on each fire.

Requiring boards of directors of every bank and trust company to examine twice a year particularly into loans or discounts made to officers or directors.

Repealing the charter of the Long Sault Development Company and appropriating $36,320 for the repayment of certain moneys paid by the company.

Providing for the incorporation of co-operative corporations for the purpose of conducting a general producing, manufacturing and merchandising business in articles of common use, including farm products.

Providing that all persons, firms, associations or corporations receiving, selling or offering for sale on commission within this State any kind of farm produce shall pay a license fee of $10 and furnish a bond of $3,000 with surety.

Providing for fire escapes and exits in existing factories and for the future construction of factory buildings and for the limitation of the number of occupants in factories

Amending the Labor law by providing that ten hours shall constitute a legal day's labor in the operation of electric and subway railroads, as well as steam surface and elevated roads.

Prohibiting cellar bakeries in the future, requiring all bakers to obtain a sanitary certificate before doing business and placing the jurisdiction over bakeries in first class cities exclusively with the health department of such cities.

Prohibiting the employment of children in the operation of dangerous machinery and in trades, occupations or processes of manufacture dangerous or injurious to their health.

Amending the Labor law in relation to the employment of women in canning establishments by providing that no female minor under 21 years of age shall be employed in any factory before 6 A. M. or after 9 P. M., but a female 18 years of age or upward may be employed in canning establishments between June 15 and Oct. 15 for not more than 6 days or 60 hours in any one week, nor more than 10 hours in any one day; and authorizing the Industrial Board to permit the employment of women 18 years of age and upward in such establishments between June 25 and Aug. 5 for not more than 6 days nor more than 66 hours a week, nor more than 12 hours in any one day where the need of the industry requires such employment and no serious injury to the health of the women may result.

Providing that any person employed as signalman, towerman, telegraph or telephone operator in a railroad signal tower or public railroad station to transmit messages or train orders for the movement of trains and who works 8 hours or more in any 24 each and every day continuously must have at least 2 days of 24 hours each in every calendar month for rest with regular compensation.

Fixing the minimum wage for laborers and mechanics employed on the canals of the State or in the construction of the improved waterways at $2 a day.

Providing that the making of false statements or advertisements as to the securities or financial condition of a corporation, company, or association shall constitute a felony.

Providing that the reporting or publishing of fictitious transactions in securities with intent to deceive shall constitute a felony.

Prohibiting stock and other exchanges from making an agreement to prevent the members of an exchange from dealing at the regular rates of commission with members of any other exchange.

Incorporating the Rockefeller Foundation, with incorporators consisting of John D. Rockefeller, John D. Rockefeller, Jr., Frederick T. Gates, Harry Pratt Judson, Simon Flexner Starr, J. Murphy, Jerome A. Greene, Whitecliffe Rose and Charles O. Heydt, to receive and maintain a fund and apply the income and principal thereof to promote the wellbeing of mankind throughout the world.

Amending the Labor law by providing that in mercantile establishments in second-class cities

the hours of labor for females shall not exceed 54 hours in any one week, 9 hours in any one day or after 6 o'clock in the evening of any day except Saturdays.

Authorizing the Public Service Commissions to fix by order standards for measuring the purity of gas and of the illuminating power of gas and for measuring the heating power of gas.

Amending the Insurance law by providing that employers may take out policies collectively for the benefit of such as may suffer loss from injury, death or disablement resulting from sickness.

Authorizing any licensed private institution for the insane to receive inebriates for commitment and care.

Amending the section of the Labor law prohibiting the employment of children under 14 years of age in a "factory" by extending the definition of "factory" to include all buildings used for or in connection therewith as a factory.

Appropriating $25,000 to provide for an exhibition and celebration in New York City to commemorate the fiftieth anniversary of the Emancipation Proclamation, and creating a commission to conduct the same.

Providing that a trial juror in New York County may be excused from service during a period not exceeding one year instead of for three months in any one jury year.

Appropriating $1,500,000 for reconstructing the State Capitol.

Providing for the appointment by the Governor of a commission of three members to be known as the New York Monuments Commission for the Battlefields of Gettysburg, Chattanooga and Antietam.

Providing for the incorporation of "credit unions" for the purpose of promoting thrift among their members and making loans to their members at reasonable rates, with or without security.

Amending the Election law so as to provide for the enrolment of the members of a new political party.

Amending the Penal law by providing that the keeping or maintaining of disorderly houses and the leasing of property for such purposes by the owner or agent shall constitute a misdemeanor.

Amending the Penal law by providing that trading by brokers against customers' orders in the stocks, bonds or other evidences of debt of a corporation, company or association shall constitute a felony.

Amending the Penal law by requiring brokers to deliver to customers memoranda describing the securities purchased or sold, and also giving the name of the person or corporation from which they were purchased or to which they were sold.

Providing for the relief, at their homes, of women nurses who served in the civil war, the Spanish-American war or the war of the Philippine insurrection.

Prohibiting the use of tenements or any parts thereof for purposes of prostitution or assignation.

Amending the Penal law by making it a felony for a person to carry or possess a bomb or bombshell and providing for the issuance by a Magistrate of a license for carrying a concealed weapon to any warden of a penal institution and also to any householder, merchant, storekeeper or bank messenger; and also to any other person of good moral character where proper cause exists for the issuance of a license.

Amending the Liquor Tax law by providing that the State Commissioner of Excise may sell liquors seized and forfeited for unlawful traffic to the highest bidder at public auction.

Providing that no male child under 12 years of age, instead of 10 years as heretofore, and no girl under 16 years of age, shall in any city of the first, second or third class sell newspapers, magazines, periodicals or shine shoes in any street or public place.

Incorporating the Eastern Association School for the purpose of conducting a school for the training of men in Christian work.

Exempting from the Inheritance Tax a transfer of pictures, works of art, books, antiques and other similar personal property, if such transfer is made within two years to the State or a municipal corporation of the State for educational purposes.

Authorizing a report by the State Historian relative to the unveiling of the monument to be erected in commemoration of the centenary of the birth of Horace Greeley and appropriating $1,500 for this purpose.

Authorizing the Governor to appoint three Commissioners to act with Commissioners appointed by the States of Maine, Vermont, New Hampshire, Massachusetts, Rhode Island, Connecticut, New Jersey, Pennsylvania, Delaware and Maryland to ascertain whether laws of such States and New York State relative to defining motor vehicles, and making other provisions relative to registering, licensing, penalties, etc., can be so amended as to be made uniform.

Authorizing the Comptroller to issue bills or notes, at not exceeding 5 per cent. interest, maturing within one year in anticipation of the sale of bonds.

Appropriating $3,353,000 for the maintenance and repair of public highways improved or constructed by State aid.

Appropriating $5,000,000 for the construction and improvement of public highways.

Appropriating $10,000 for the purchase by the Commissioners of the Land Office of a farm site for the hygienic and anti-toxin laboratories of the State Department of Health.

Authorizing the Fiscal Supervisor to select an advisory committee, from the superintendents, stewards and purchasing officers of State institutions reporting to him, to determine the advisability of purchasing supplies in large quantities for storage or by contract, for future delivery.

Appropriating $10,000 for the preparation of an index of session laws and statutes by a commissioner to be appointed by the Governor, at a salary of $4,000.

Providing for the establishment of a State School of Agriculture and Domestic Science at Delhi, Delaware County, and appropriating $50,000 therefor.

Establishing the New York American Veterinary College as one of the schools of the New York University, New York City; the tuition to be free to one student for each Assembly District of that part of the State that is east of a line drawn from Port Jervis to Utica and thence to Ogdensburg.

Appropriating $250,000 for the erection of buildings for the New York State College of Forestry at Syracuse University and the acquisition of land on which to erect the same.

Providing that assessment rolls in New York City shall be prepared and corrected by the Board of Taxes and Assessment and not by the Board of Aldermen.

Providing that the head of any city, borough or county department in Greater New York may suspend an employee without pay for not more than one month pending a hearing and determination of charges against him.

Providing that the lease of Ward's Island to the State by the city of New York shall be for fifty years, from November 19, 1912.

Authorizing cities and incorporated villages to appoint "Planning Commissions," to whom

LEGISLATION OF NEW YORK IN 1913—*Continued.*

shall be referred all maps or plans for sewer or water systems, public water fronts, the location of any public building, bridge, monument, highway, parkway or playground.

Appropriating $10,000 for the celebration of the anniversary of the birth of Samuel J. Tilden on Feb. 9, 1914, and authorizing the Governor to appoint a commission of seven persons to take charge of the celebration.

Appropriating $50,000 for a revision of the Banking law by a commission of five or more persons appointed by the Superintendent of Banks.

Appropriating $21,000,000 for the improvement of the Erie, Oswego and Champlain Canals.

Authorizing the Superintendent of Insurance to prepare a thorough revision of the Insurance law, for submission, if possible, to the Legislature of 1914 and authorizing him to employ counsel and assistants at an expense of not to exceed $25,000.

Appropriating $190,000 for the purchase of lands, the erection and equipment of buildings for the New York State School of Agriculture on Long Island and other expenses connected with such school.

Appropriating $25,000 for the organization and support of county farm bureaus, no bureau to receive more than $600 a year and on condition that the County Supervisors shall raise at least $600.

Appropriating $25,000 for acquiring and preserving the historic tract known as the Bennington battlefield in the town of Hoosick, Rensselaer County.

Authorizing the Appellate Division of the Supreme Court, First Department, to appoint any Justice or former Justice of the New York City Court, after sixteen years of service, to the position of official referee for life.

Appropriating $150,000 for the celebration of the fiftieth anniversary of the battle of Gettysburg.

Appropriating $40,000 for the Conservation Commission to establish nurseries for the propagation of trees and reforesting lands within the State.

Appropriating $22,800 for the maintenance and improvement of buildings of the Schoharie State School of Agriculture at Cobleskill, Schoharie County.

Amending the Labor law by requiring factories and mercantile establishments to allow employees at least 24 consecutive hours of rest in every seven consecutive days.

Authorizing Boards of Supervisors to fix the terms of office of appointive county officers, as well as the mode of appointment and the number and grade of such offices.

Providing for evening vocational schools in cities, for part time or continuation schools for pupils over 14 years of age, and making other provisions relative to vocational schools.

Appropriating $348,000 for the construction, erection and equipment of buildings in connection with the College of Agriculture at Cornell University.

Naming a commission to provide a monument in New York City to commemorate the deeds of Meagher's Irish Brigade in the civil war; and appropriating $5,000 for its use.

Authorizing the Commissioners of the Land Office to negotiate with New York City in order to agree on terms and conditions in consideration of which the State shall quit claim and release to the city its title to lands on Randall's Island and to the Sunken Meadows in exchange for lands deeded by New York City.

Directing the Commissioner of Efficiency and Economy to investigate and gather statistics and report to the Legislature upon the subject of the cost of providing free text books in all schools supported by the State, and appropriating $25,000.

Amending the Greater New York Charter by providing that no stage or omnibus route shall be operated until a franchise therefor is obtained from the Board of Estimate and Apportionment.

Providing a Housing law for second class cities.

Providing that the American flag shall be displayed at all polling places in the State by the Board of Inspectors while such boards are in session, the flag to be 3 by 5 feet in size.

Fixing the rate of interest on all bonds hereafter issued by the State for canal and highway improvement and barge canal terminal facilities at 4½ per cent.

Directing the Adjutant-General to organize and equip a colored battalion of infantry in New York City.

The Legislature approved of the amendment to the Constitution of the United States providing for the direct election of United States Senators.

The Legislature also passed for the first time and approved an amendment of the Constitution providing for Woman Suffrage. This amendment will have to be passed by another Senate before duly reaching the people at the polls.

The Legislature also passed an amendment to the Constitution providing that mature, dead or fallen timber may be removed from the forest preserve. This amendment will also have to be passed by another Senate before it reaches the people at the polls.

# Fourth of July Accidents.

THE *Journal of the American Medical Association* has kept a record of the accidents in the United States, due annually to the celebration of Independence Day, in the past ten years. The following are the figures:

| YEAR. | Killed. | Injured. | Total. | YEAR. | Killed | Injured. | Total. |
|---|---|---|---|---|---|---|---|
| 1904 | 183 | 3,986 | 4,169 | 1910 | 131 | 2,792 | 2,923 |
| 1905 | 182 | 4,994 | 5,176 | 1911 | 57 | 1,546 | 1,603 |
| 1906 | 158 | 5,308 | 5,466 | 1912 | 41 | 947 | 988 |
| 1907 | 164 | 4,249 | 4,413 | 1913 | 32 | 1,131 | 1,163 |
| 1908 | 163 | 5,460 | 5,623 | | | | |
| 1909 | 215 | 5,092 | 5,307 | Total, 10 years | 1,326 | 35,505 | 36,831 |

The decrease from 466 deaths in 1903 to 32 in 1913 was due to more intelligent methods of celebration, the most marked decrease taking place in States where the agitation for restrictive measures was strongest.

# Income Tax Law,

## INCLUDING CORPORATION TAX LAW.

### PERSONS SUBJECT TO TAX.

A. *Subdivision 1.* That there shall be levied, assessed, collected and paid annually upon the entire net income arising or accruing from all sources in the preceding calendar year to every citizen of the United States, whether residing at home or abroad, and to every person residing in the United States, though not a citizen thereof, a tax of 1 per centum per annum upon such income, except as hereinafter provided; and a like tax shall be assessed, levied, collected, and paid annually upon the entire net income from all property owned and of every business, trade, or profession carried on in the United States by persons residing elsewhere:

### RATE OF TAX. UNDIVIDED PROFITS TAXABLE. WHAT CONSTITUTES PRIMA FACIE EVIDENCE OF FRAUDULENT PURPOSE.

*Subdivision 2.* In addition to the income tax provided under this section (herein referred to as the normal income tax) there shall be levied, assessed, and collected upon the net income of every individual an additional income tax (herein referred to as the additional tax) of 1 per centum per annum upon the amount by which the total net income exceeds $20,000 and does not exceed $50,000, and 2 per centum per annum upon the amount by which the total net income exceeds $50,000 and does not exceed $75,000, 3 per centum per annum upon the amount by which the total net income exceeds $75,000 and does not exceed $100,000, 4 per centum per annum upon the amount by which the total net income exceeds $100,000 and does not exceed $250,000, 5 per centum per annum upon the amount by which the total net income exceeds $250,000 and does not exceed $500,000, and 6 per centum per annum upon the amount by which the total net income exceeds $500,000. All the provisions of this section relating to individuals who are to be chargeable with the normal income tax, so far as they are applicable and are not inconsistent with this subdivision of paragraph A, shall apply to the levy, assessment, and collection of the additional tax imposed under this section. Every person subject to this additional tax shall, for the purpose of its assessment and collection, make a personal return of his total net income from all sources, corporate or otherwise, for the preceding calendar year, under rules and regulations to be prescribed by the Commissioner of Internal Revenue and approved by the Secretary of the Treasury. For the purpose of this additional tax the taxable income of any individual shall embrace the share to which he would be entitled of the gains and profits, if divided or distributed, whether divided or distributed or not, of all corporations, joint-stock companies, or associations however created or organized, formed or fraudulently availed of for the purpose of preventing the imposition of such tax through the medium of permitting such gains and profits to accumulate instead of being divided or distributed; and the fact that any such corporation, joint-stock company, or association, is a mere holding company, or that the gains and profits are permitted to accumulate beyond the reasonable needs of the business, shall be prima facie evidence of a fraudulent purpose to escape such tax; but the fact that the gains and profits are in any case permitted to accumulate and become surplus shall not be construed as evidence of a purpose to escape the said tax in such case unless the Secretary of the Treasury shall certify that in his opinion such accumulation is unreasonable for the purposes of the business. When requested by the Commissioner of Internal Revenue, or any District Collector of Internal Revenue, such corporation, joint-stock company, or association shall forward to him a correct statement of such profits and the names of the individuals who would be entitled to the same if distributed.

### TAXABLE INCOME. PROCEEDS OF LIFE INSURANCE POLICIES NOT INCLUDED.

B. That, subject only to such exemptions and deductions as are hereinafter allowed, the net income of a taxable person shall include gains, profits, and income derived from salaries, wages, or compensation for personal service of whatever kind and in whatever form paid, or from professions, vocations, businesses, trade, commerce, or sales or dealings in property, whether real or personal, growing out of the ownership or use of or interest in real or personal property, also from interest, rent, dividends, securities, or the transaction of any lawful business carried on for gain or profit, or gains or profits and income derived from any source whatever, including the income from but not the value of property acquired by gift, bequest, devise, or descent: *Provided,* That the proceeds of life insurance policies paid upon the death of the person insured or payments made by or credited to the insured, on life insurance, endowment, or annuity contracts, upon the return thereof to the insured at the maturity of the term mentioned in the contract, or upon surrender of contract, shall not be included as income.

### DEDUCTIONS IN COMPUTING NORMAL TAX.

That in computing net income for the purpose of the normal tax there shall be allowed as deductions: First, the necessary expenses actually paid in carrying on any business, not including personal, living, or family expenses; second, all interest paid within the year by a taxable person on indebtedness; third, all national, State, county, school, and municipal taxes paid within the year, not including those assessed against local benefits; fourth, losses actually sustained during the year, incurred in trade or arising from fires, storms, or shipwreck, and not compensated for by insurance or otherwise; fifth, debts due to the taxpayer actually ascertained to be worthless and charged off within the year; sixth, a reasonable allowance for the exhaustion, wear and tear of property arising out of its use or employment in the business, not to exceed, in the case of mines, 5 per centum of the gross value at the mine of the output for the year for which the computation is made, but no deduction shall be made for any amount of expense of restoring property or making good the exhaustion thereof for which an allowance is or has been made: *Provided,* That no deduction shall be allowed for any amount paid out for new buildings, permanent improvements, or betterments, made to increase the value of any property or estate; seventh, the amount received as dividends upon the stock or from the net earnings of any corporation, joint stock company, association, or insurance company which is taxable upon its net income as hereinafter provided; eighth, the amount of income, the tax upon which has been paid or withheld for payment at the source of the income, under the provisions of this section, provided that whenever the tax upon the income of a person is required to be withheld and paid at the source as hereinafter required, if such annual income does not exceed the sum of $3,000 or is not fixed or certain, or is indefinite, or irregular as to amount or time of accrual, the same shall not be deducted in the personal return of such person.

The net income from property owned and business carried on in the United States by persons residing elsewhere shall be computed upon the basis prescribed in this paragraph and that part of paragraph G of this section relating to the computation of the net income of corporations, joint-stock and insurance companies, organized, created, or existing under the laws of foreign countries, in so far as applicable.

### NON-TAXABLE INCOME.

That in computing net income under this section there shall be excluded the interest upon the obligations of a State or any political subdivision thereof, and upon the obligations of the United States or its possessions, also the compensation of the present President of the United States during

the term for which he has been elected, and of the Judges of the Supreme and inferior courts of the United States now in office, and the compensation of all officers and employés of a State or any political subdivision thereof, except when such compensation is paid by the United States Government.

SPECIFIC DEDUCTION.

C. That there shall be deducted from the amount of the net income of each of said persons, ascertained as provided herein, the sum of $3,000, plus $1,000 additional if the person making the return be a married man with a wife living with him, or plus the sum of $1,000 additional if the person making the return be a married woman with a husband living with her; but in no event shall this additional exemption of $1,000 be deducted by both a husband and a wife: *Provided*, That only one deduction of $4,000 shall be made from the aggregate income of both husband and wife when living together.

TAX YEAR. DEDUCTION AT SOURCE. PARTNERS LIABLE INDIVIDUALLY.

D. The said tax shall be computed upon the remainder of said net income of each person subject thereto, accruing during each preceding calendar year ending December 31: *Provided, however*, That for the year ending December 31, 1913, said tax shall be computed on the net income accruing from March 1 to December 31, 1913, both dates inclusive, after deducting five-sixths only of the specific exemptions and deductions herein provided for. On or before the first day of March, 1914, and the first day of March in each year thereafter, a true and accurate return, under oath or affirmation, shall be made by each person of lawful age, except as hereinafter provided, subject to the tax imposed by this section, and having a net income of $3,000 or over for the taxable year, to the Collector of Internal Revenue for the district in which such person resides or has his principal place of business, or, in the case of a person residing in a foreign country, in the place where his principal business is carried on within the United States, in such form as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall prescribe, setting forth specifically the gross amount of income from all separate sources and from the total thereof, deducting the aggregate items or expenses and allowance herein authorized; guardians, trustees, executors, administrators, agents, receivers, conservators, and all persons, corporations, or associations acting in any fiduciary capacity, shall make and render a return of the net income of the person for whom they act, subject to this tax, coming into their custody or control and management, and be subject to all the provisions of this section which apply to individuals: *Provided*, That a return made by one of two or more joint guardians, trustees, executors, administrators, agents, receivers, and conservators, or other persons acting in a fiduciary capacity, filed in the district where such person resides, or in the district where the will or other instrument under which he acts is recorded, under such regulations as the Secretary of the Treasury may prescribe, shall be a sufficient compliance with the requirements of this paragraph; and also all persons, firms, companies, copartnerships, corporations, joint-stock companies or associations, and insurance companies, except as hereinafter provided, in whatever capacity acting, having the control, receipt, disposal, or payment of fixed or determinable annual or periodical gains, profits, and income of another person subject to tax, shall in behalf of such person deduct and withhold from the payment an amount equivalent to the normal income tax upon the same and make and render a return, as aforesaid, but separate and distinct, of the portion of the income of each person from which the normal tax has been thus withheld, and containing also the name and address of such person or stating that the name and address or the address, as the case may be, are unknown: *Provided*, That the provision requiring the normal tax of individuals to be withheld at the source of the income shall not be construed to require any of such tax to be withheld prior to the first day of November, 1913: *Provided further*, That in either case above mentioned no return of income not exceeding $3,000 shall be required: *Provided further*, That any persons carrying on business in partnership shall be liable for income tax only in their individual capacity, and the share of the profits of a partnership to which any taxable partner would be entitled if the same were divided, whether divided or otherwise, shall be returned for taxation and the tax paid, under the provisions of this section, and any such firm, when requested by the Commissioner of Internal Revenue, or any district collector, shall forward to him a correct statement of such profits and the names of the individuals who would be entitled to the same, if distributed: *Provided further*, That persons liable for the normal income tax only, on their own account or in behalf of another, shall not be required to make return of the income derived from dividends on the capital stock or from the net earnings of corporations, joint-stock companies or associations, and insurance companies taxable upon their net income as hereinafter provided. Any person for whom return has been made and the tax paid, or to be paid as aforesaid, shall not be required to make a return unless such person has other net income, but only one deduction of $3,000 shall be made in the case of any such person. The Collector or Deputy Collector shall require every list to be verified by the oath or affirmation of the party rendering it. If the Collector or Deputy Collector have reason to believe that the amount of any income returned is understated, he shall give due notice to the person making the return to show cause why the amount of the return should not be increased, and upon proof of the amount understated may increase the same accordingly. If dissatisfied with the decision of the Collector, such person may submit the case, with all the papers, to the Commissioner of Internal Revenue for his decision, and may furnish sworn testimony of witnesses to prove any relevant facts.

ASSESSMENT AND PAYMENT. PENALTY.

E. That all assessments shall be made by the Commissioner of Internal Revenue and all persons shall be notified of the amount for which they are respectively liable on or before the first day of June of each successive year, and said assessments shall be paid on or before the thirtieth day of June, except in cases of refusal or neglect to make such return and in cases of false or fraudulent returns, in which cases the Commissioner of Internal Revenue shall, upon the discovery thereof, at any time within three years after said return is due, make a return upon information obtained as provided for in this section or by existing law, and the assessment made by the Commissioner of Internal Revenue thereon shall be paid by such person or persons immediately upon notification of the amount of such assessment; and to any sum or sums due and unpaid after the thirtieth day of June in any year, and for ten days after notice and demand thereof by the Collector, there shall be added the sum of 5 per centum on the amount of tax unpaid, and interest at the rate of 1 per centum per month upon said tax from the time the same became due, except from the estates of insane, deceased, or insolvent persons.

DEDUCTION AT SOURCE. EXEMPTIONS. FOREIGN PAYMENTS.

All persons, firms, copartnerships, companies, corporations, joint-stock companies or associations, and insurance companies, in whatever capacity acting, including lessees or mortgagors of real or personal property, trustees acting in any trust capacity, executors, administrators, agents, receivers, conservators, employers, and all officers and employés of the United States having the control, receipt, custody, disposal, or payment of interest, rent, salaries, wages, premiums, annuities, compensation, remuneration, emoluments, or other fixed or determinable annual gains, profits, and income of another person, exceeding $3,000 for any taxable year, other than dividends on capital stock, or from the net earnings of corporations and joint-stock companies or associations subject to like tax, who

are required to make and render a return in behalf of another, as provided herein, to the Collector of his, her, or its district, are hereby authorized and required to deduct and withhold from such annual gains, profits, and income such sum as will be sufficient to pay the normal tax imposed thereon by this section, and shall pay to the officer of the United States Government authorized to receive the same; and they are each hereby made personally liable for such tax. In all cases where the income tax of a person is withheld and deducted and paid or to be paid at the source, as aforesaid, such person shall not receive the benefit of the deduction and exemption allowed in paragraph C of this section except by an application for refund of the tax unless he shall, not less than thirty days prior to the day on which the return of his income is due, file with the person who is required to withhold and pay tax for him, a signed notice in writing claiming the benefit of such exemption and thereupon no tax shall be withheld upon the amount of such exemption: *Provided*, That if any person for the purpose of obtaining any allowance or reduction by virtue of a claim for such exemption, either for himself or for any other person, knowingly makes any false statement or false or fraudulent representation, he shall be liable to a penalty of $300; nor shall any person under the foregoing conditions be allowed the benefit of any deduction provided for in subsection B of this section unless he shall, not less than thirty days prior to the day on which the return of his income is due, either file with the person who is required to withhold and pay tax for him a true and correct return of his annual gains, profits, and income from all other sources, and also the deductions asked for, and the showing thus made shall then become a part of the return to be made in his behalf by the person required to withhold and pay the tax, or likewise make application for deductions to the Collector of the district in which return is made or to be made for him: *Provided further*, That if such person is a minor or an insane person, or is absent from the United States, or is unable owing to serious illness to make the return and application above provided for, the return and application may be made for him or her by the person required to withhold and pay the tax, he making oath under the penalties of this act that he has sufficient knowledge of the affairs and property of his beneficiary to enable him to make a full and complete return for him or her, and that the return and application made by him are full and complete: *Provided further*, That the amount of the normal tax hereinbefore imposed shall be deducted and withheld from fixed and determinable annual gains, profits, and income derived from interest upon bonds and mortgages, or deeds of trust, or other similar obligations of corporations, joint-stock companies or associations, and insurance companies, whether payable annually or at shorter or longer periods, although such interest does not amount to $3,000, subject to the provisions of this section requiring the tax to be withheld at the source and deducted from annual income and paid to the Government; and likewise the amount of such tax shall be deducted and withheld from coupons, checks, or bills of exchange for or in payment of interest upon bonds of foreign countries and upon foreign mortgages or like obligations (not payable in the United States), and also from coupons, checks, or bills of exchange for or in payment of any dividends upon the stock or interest upon the obligations of foreign corporations, associations, and insurance companies engaged in business in foreign countries; and the tax in each case shall be withheld and deducted for and in behalf of any person subject to the tax hereinbefore imposed, although such interest, dividends, or other compensation does not exceed $3,000, by any banker or person who shall sell or otherwise realize coupons, checks, or bills of exchange drawn or made in payment of any such interest or dividends (not payable in the United States), and any person who shall obtain payment (not in the United States), in behalf of another of such dividends and interest by means of coupons, checks, or bills of exchange, and also any dealer in such coupons who shall purchase the same for any such dividends or interest (not payable in the United States), otherwise than from a banker or another dealer in such coupons; but in each case the benefit of the exemption and the deduction allowable under this section may be had by complying with the foregoing provisions of this paragraph.

All persons, firms, or corporations undertaking as a matter of business or for profit the collection of foreign payments by means of coupons, checks, or bills of exchange shall obtain a license from the Commissioner of Internal Revenue, and shall be subject to such regulations enabling the Government to ascertain and verify the due withholding and payment of the income tax required to be withheld and paid as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall prescribe; and any person who shall knowingly of such interest or dividends undertake to collect such payments as aforesaid without having obtained a license therefor, or without complying with such regulations, shall be deemed guilty of a misdemeanor and for each offense be fined in a sum not exceeding $5,000, or imprisoned for a term not exceeding one year, or both, in the discretion of the court.

Nothing in this section shall be construed to release a taxable person from liability for income tax, nor shall any contract entered into after this act takes effect be valid in regard to any Federal income tax imposed upon a person liable to such payment.

The tax herein imposed upon annual gains, profits, and income not falling under the foregoing and not returned and paid by virtue of the foregoing shall be assessed by personal return, under rules and regulations to be prescribed by the Commissioner of Internal Revenue and approved by the Secretary of the Treasury.

The provisions of this section relating to the deduction and payment of the tax at the source of income shall only apply to the normal tax hereinbefore imposed upon individuals.

PENALTY.

F. That if any person, corporation, joint-stock company, association, or insurance company liable to make the return or pay the tax aforesaid shall refuse or neglect to make a return at the time or times hereinbefore specified in each year, such person shall be liable to a penalty of not less than $20 nor more than $1,000. Any person or any officer of any corporation required by law to make, render, sign, or verify any return who makes any false or fraudulent return or statement with intent to defeat or evade the assessment required by this section to be made shall be guilty of a misdemeanor, and shall be fined not exceeding $2,000 or be imprisoned not exceeding one year, or both, at the discretion of the court, with the costs of prosecution.

CORPORATE NET INCOME. NON-TAXABLE ORGANIZATIONS. MUNICIPAL INCOME.

G. (a) That the normal tax hereinbefore imposed upon individuals likewise shall be levied, assessed, and paid annually upon the entire net income arising or accruing from all sources during the preceding calendar year to every corporation, joint-stock company or association, and every insurance company, organized in the United States, no matter how created or organized, not including partnerships; but if organized, authorized, or existing under the laws of any foreign country, then upon the amount of net income accruing from business transacted and capital invested within the United States during such year: *Provided, however*, That nothing in this section shall apply to labor, agricultural, or horticultural organizations, or to mutual savings banks not having a capital stock represented by shares, or to fraternal beneficiary societies, orders, or associations operating under the lodge system or for the exclusive benefit of the members of a fraternity itself operating under the lodge system, and providing for the payment of life, sick, accident, and other benefits to the members of such societies, orders, or associations and dependents of such members, nor to domestic building

and loan associations, nor to cemetery companies, organized and operated exclusively for the mutual benefit of their members, nor to any corporation or association organized and operated exclusively for religious, charitable, scientific or educational purposes, no part of the net income of which inures to the benefit of any private stockholder or individual, nor to business leagues, nor to chambers of commerce or boards of trade, not organized for profit or no part of the net income of which inures to the benefit of the private stockholder or individual; nor to any civic league or organization not organized for profit, but operated exclusively for the promotion of social welfare: *Provided further*, That there shall not be taxed under this section any income derived from any public utility or from the exercise of any essential governmental function, accruing to any State, Territory, or the District of Columbia, or any political subdivision of a State, Territory, or the District of Columbia, nor any income accruing to the government of the Philippine Islands or Porto Rico, or of any political subdivision of the Philippine Islands or Porto Rico: *Provided*, That whenever any State, Territory, or the District of Columbia, or any political subdivision of a State or Territory, has, prior to the passage of this act, entered in good faith into a contract with any person or corporation, the object and purpose of which is to acquire, construct, operate or maintain a public utility, no tax shall be levied under the provisions of this act upon the income derived from the operation of such public utility, so far as the payment thereof will impose a loss or burden upon such State, Territory, or the District of Columbia, or a political subdivision of a State or Territory; but this provision is not intended to confer upon such person or corporation any financial gain or exemption or to relieve such person or corporation from the payment of a tax as provided for in this section upon the part or portion of the said income to which such person or corporation shall be entitled under such contract.

DEDUCTIONS.

(b) Such net income shall be ascertained by deducting from the gross amount of the income of such corporation, joint-stock company or association, or insurance company, received within the year from all sources, (first) all the ordinary and necessary expenses paid within the year in the maintenance and operation of its business and properties, including rentals or other payments required to be made as a condition to the continued use or possession of property; (second) all losses actually sustained within the year and not compensated by insurance or otherwise, including a reasonable allowance for depreciation by use, wear and tear of property, if any; and in the case of mines a reasonable allowance for depletion of ores and all other natural deposits, not to exceed 5 per centum of the gross value at the mine of the output for the year for which the computation is made; and in case of insurance companies the net addition, if any, required by law to be made within the year to reserve funds and the sums other than dividends paid within the year on policy and annuity contracts: *Provided*, That mutual fire insurance companies requiring their members to make premium deposits to provide for losses and expenses shall not return as income any portion of the premium deposits returned to their policyholders, but shall return as taxable income all income received by them from all other sources plus such portions of the premium deposits as are retained by the companies for purposes other than the payment of losses and expenses and reinsurance reserves: *Provided further*, That mutual marine insurance companies shall include in their return of gross income gross premiums collected and received by them less amounts paid for reinsurance, but shall be entitled to include in deductions from gross income amounts repaid to policyholders on account of premiums previously paid by them and interest paid upon such amounts between the ascertainment thereof and the payment thereof, and life insurance companies shall not include as income in any year such portion of any actual premium received from any individual policyholder as shall have been paid back or credited to such individual policyholder, or treated as an abatement of premium of such individual policyholder, within such year; (third) the amount of interest accrued and paid within the year on its indebtedness to an amount of such indebtedness not exceeding one-half of the sum of its interest-bearing indebtedness and its paid-up capital stock outstanding at the close of the year, or if no capital stock, the amount of interest paid within the year on an amount of its indebtedness not exceeding the amount of capital employed in the business at the close of the year: *Provided*, That in case of indebtedness wholly secured by collateral the subject of sale in ordinary business of such corporation, joint-stock company, or association, the total interest secured and paid by such company, corporation, or association within the year on any such indebtedness may be deducted as a part of its expense of doing business: *Provided further*, That in the case of bonds or other indebtedness, which have been issued with a guaranty that the interest payable thereon shall be free from taxation, no deduction for the payment of the tax herein imposed shall be allowed; and in the case of a bank, banking association, loan or trust company, interest paid within the year on deposits or on moneys received for investment and secured by interest-bearing certificates of indebtedness issued by such bank, banking association, loan or trust company; (fourth) all sums paid by it within the year for taxes imposed under the authority of the United States or of any State or Territory thereof, or imposed by the government of any foreign country: *Provided*, That in the case of a corporation, joint-stock company or association, or insurance company, organized, authorized, or existing under the laws of any foreign country, such net income shall be ascertained by deducting from the gross amount of its income accrued within the year from business transacted and capital invested within the United States, (first) all the ordinary and necessary expenses actually paid within the year out of earnings in the maintenance and operation of its business and property within the United States, including rentals or other payments required to be made as a condition to the continued use or possession of property; (second) all losses actually sustained within the year in business conducted by it within the United States and not compensated by insurance or otherwise, including a reasonable allowance for depreciation by use, wear and tear of property, if any, and in the case of mines a reasonable allowance for depletion of ores and all other natural deposits, not to exceed 5 per centum of the gross value at the mine of the output for the year for which the computation is made; and in case of insurance companies the net addition, if any, required by law to be made within the year to reserve funds and the sums other than dividends paid within the year on policy and annuity contracts: *Provided further*, That mutual fire insurance companies requiring their members to make premium deposits to provide for losses and expenses shall not return as income any portion of the premium deposits returned to their policyholders, but shall return as taxable income all income received by them from all other sources plus such portions of the premium deposits as are retained by the companies for purposes other than the payment of losses and expenses and reinsurance reserves: *Provided further*, That mutual marine insurance companies shall include in their return of gross income gross premiums collected and received by them less amounts paid for reinsurance, but shall be entitled to include in deductions from gross income amounts repaid to policyholders on account of premiums previously paid by them, and interest paid upon such amounts between the ascertainment thereof and the payment thereof; and life insurance companies shall not include as income in any year such portion of any actual premium received from any individual policyholder as shall have been paid back or credited to such individual policyholder, or treated as an abatement of premium of such individual policyholder, within such year; (third) the amount of interest accrued and paid within the year on its indebtedness to an amount of such indebtedness not exceeding the proportion of one-half of the sum of its interest-bearing indebtedness and its paid-up capital stock outstanding at the close of the year, or if no capital

stock, the capital employed in the business at the close of the year which the gross amount of its income for the year from business transacted and capital invested within the United States bears to the gross amount of its income derived from all sources within and without the United States: *Provided*, That in the case of bonds or other indebtedness, which have been issued with a guaranty that the interest payable thereon shall be free from taxation, no deduction for the payment of the tax herein imposed shall be allowed; (fourth) all sums paid by it within the year for taxes imposed under the authority of the United States or of any State or Territory thereof or the District of Columbia. In the case of assessment insurance companies, whether domestic or foreign, the actual deposit of sums with State or Territorial officers, pursuant to law, as additions to guaranty or reserve funds shall be treated as being payments required by law to reserve funds.

TAXABLE YEAR.

(c) The tax herein imposed shall be computed upon its entire net income accrued within each preceding calendar year ending December 31: *Provided, however*, That for the year ending December 31, 1913, said tax shall be imposed upon its entire net income accrued within that portion of said year from March 1 to December 31, both dates inclusive, to be ascertained by taking five-sixths of its entire net income for said calendar year: *Provided further*, That any corporation, joint-stock company or association, or insurance company, subject to this tax may designate the last day of any month in the year as the day of the closing of its fiscal year and shall be entitled to have the tax payable by it computed upon the basis of the net income ascertained as herein provided for the year ending on the day so designated in the year preceding the date of assessment instead of upon the basis of the net income for the calendar year preceding the date of assessment; and it shall give notice of the day it has thus designated as the closing of its fiscal year to the Collector of the district in which its principal business office is located at any time not less than thirty days prior to the date upon which its annual return shall be filed. All corporations, joint-stock companies or associations, and insurance companies, subject to the tax herein imposed, computing taxes upon the income of the calendar year, shall, on or before the first day of March, 1914, and the first day of March in each year thereafter, and all corporations, joint-stock companies or associations, and insurance companies, computing taxes upon the income of a fiscal year which it may designate in the manner hereinbefore provided, shall render a like return within sixty days after the close of its said fiscal year, and within sixty days after the close of its fiscal year in each year thereafter, or in the case of a corporation, joint-stock company or association, or insurance company, organized or existing under the laws of a foreign country, in the place where its principal business is located within the United States, in such form as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall prescribe, shall render a true and accurate return under oath or affirmation of its president, vice-president, or other principal officer, and its treasurer or assistant treasurer, to the Collector of Internal Revenue for the district in which it has its principal place of business, setting forth (first), the total amount of its paid-up capital stock outstanding, or if no capital stock, its capital employed in business, at the close of the year; (second) the total amount of its bonded and other indebtedness at the close of the year; (third) the gross amount of its income, received during such year from all sources, and if organized under the laws of a foreign country the gross amount of its income received within the year from business transacted and capital invested within the United States; (fourth) the total amount of all its ordinary and necessary expenses paid out of earnings in the maintenance and operation of the business and properties of such corporation, joint-stock company or association, or insurance company, within the year, stating separately all rentals or other payments required to be made as a condition to the continued use or possession of property, and if organized under the laws of a foreign country the amount so paid in the maintenance and operation of its business within the United States; (fifth) the total amount of all losses actually sustained during the year and not compensated by insurance or otherwise, stating separately any amounts allowed for depreciation of property, and in case of insurance companies the net addition, if any, required by law to be made within the year to reserve funds and the sums other than dividends paid within the year on policy and annuity contracts: *Provided further*, That mutual fire insurance companies requiring their members to make premium deposits to provide for losses and expenses shall not return as income any portion of the premium deposits returned to their policyholders, but shall return as taxable income all income received by them from all other sources plus such portions of the premium deposits as are retained by the companies for purposes other than the payment of losses and expenses and reinsurance reserves: *Provided further*, That mutual marine insurance companies shall include in their return of gross income gross premiums collected and received by them less amounts paid for reinsurance, but shall be entitled to include in deductions from gross income amounts repaid to policyholders on account of premiums previously paid by them, and interest paid upon such amounts between the ascertainment thereof and the payment thereof, and life insurance companies shall not include as income in any year such portion of any actual premium received from any individual policyholder as shall have been paid back or credited to such individual policyholder, or treated as an abatement of premium of such individual policyholder, within such year; and in case of a corporation, joint-stock company or association, or insurance company, organized under the laws of a foreign country, all losses actually sustained by it during the year in business conducted by it within the United States, not compensated by insurance or otherwise, stating separately any amounts allowed for depreciation of property, and in case of insurance companies the net addition, if any, required by law to be made within the year to reserve funds and the sums other than dividends paid within the year on policy and annuity contracts: *Provided further*, That mutual fire insurance companies requiring their members to make premium deposits to provide for losses and expenses shall not return as income any portion of the premium deposits returned to their policyholders, but shall return as taxable income all income received by them from all other sources plus such portions of the premium deposits as are retained by the companies for purposes other than the payment of losses and expenses and reinsurance reserves: *Provided further*, That mutual marine insurance companies shall include in their return of gross income gross premiums collected and received by them less amounts paid for reinsurance, but shall be entitled to include in deductions from gross income amounts repaid to policyholders on account of premiums previously paid by them and interest paid upon such amounts between the ascertainment thereof and the payment thereof, and life insurance companies shall not include as income in any year such portion of any actual premium received from any individual policyholder as shall have been paid back or credited to such individual policyholder, or treated as an abatement of premium of such individual policyholder, within such year; (sixth) the amount of interest accrued and paid within the year on its bonded or other indebtedness not exceeding one-half of the sum of its interest-bearing indebtedness and its paid-up capital stock, outstanding at the close of the year, or if no capital stock, the amount of interest paid within the year on an amount of indebtedness not exceeding the amount of capital employed in the business at the close of the year, and in the case of a bank, banking association, or trust company, stating separately all interest paid by it within the year on deposits; or in case of a corporation, joint-stock company or association, or insurance company, organized under the laws of a foreign country, interest so paid on its bonded or other indebtedness to an amount of such bonded or other indebtedness not exceeding the proportion of its paid-up capital stock outstanding at the

close of the year, or if no capital stock, the amount of capital employed in the business at the close of the year, which the gross amount of its income for the year from business transacted and capital invested within the United States bears to the gross amount of its income derived from all sources within and without the United States; (seventh) the amount paid by it within the year for taxes imposed under the authority of the United States and separately the amount so paid by it for taxes imposed by the government of any foreign country; (eighth) the net income of such corporation, joint-stock company or association, or insurance company, after making the deductions in this subsection authorized. All such returns shall as received be transmitted forthwith by the Collector to the Commissioner of Internal Revenue.

ASSESSMENT AND PAYMENT. PENALTY.

All assessments shall be made and the several corporations, joint-stock companies or associations, and insurance companies, shall be notified of the amount for which they are respectively liable on or before the first day of June of each successive year, and said assessment shall be paid on or before the thirtieth day of June: *Provided*, That every corporation, joint-stock company or association, and insurance company, computing taxes upon the income of the fiscal year which it may designate in the manner hereinbefore provided, shall pay the taxes due under its assessment within one hundred and twenty days after the date upon which it is required to file its list or return of income for assessment; except in cases of refusal or neglect to make such return, and in cases of false or fraudulent returns, in which cases the Commissioner of Internal Revenue shall, upon the discovery thereof, at any time within three years after said return is due, make a return upon information obtained as provided for in this section or by existing law, and the assessment made by the Commissioner of Internal Revenue thereon shall be paid by such corporation, joint-stock company or association, or insurance company, immediately upon notification of the amount of such assessment; and to any sum or sums due and unpaid after the thirtieth day of June in any year, or after one hundred and twenty days from the date on which the return of income is required to be made by the taxpayer, and after ten days after notice and demand thereof by the Collector, there shall be added the sum of 5 per centum on the amount of tax unpaid and interest at the rate of 1 per centum per month upon said tax from the time the same becomes due.

RETURNS OPEN TO INSPECTION.

(d) When the assessment shall be made, as provided in this section, the returns, together with any corrections thereof which may have been made by the Commissioner, shall be filed in the office of the Commissioner of Internal Revenue and shall constitute public records and be open to inspection as such: *Provided*, That any and all such returns shall be open to inspection only upon the order of the President, under rules and regulations to be prescribed by the Secretary of the Treasury and approved by the President: *Provided further*, That the proper officers of any State imposing a general income tax may, upon the request of the Governor thereof, have access to said returns or to an abstract thereof, showing the name and income of each such corporation, joint-stock company, association or insurance company, at such times and in such manner as the Secretary of the Treasury may prescribe.

If any of the corporations, joint-stock companies or associations, or insurance companies, aforesaid, shall refuse or neglect to make a return at the time or times hereinbefore specified in each year, or shall render a false or fraudulent return, such corporation, joint-stock company or association, or insurance company, shall be liable to a penalty of not exceeding $10,000.

H. That the word "State" or "United States" when used in this section shall be construed to include any Territory, Alaska, the District of Columbia, Porto Rico, and the Philippine Islands, when such construction is necessary to carry out its provisions.

I. That sections thirty-one hundred and sixty-seven, thirty-one hundred and seventy-two, thirty-one hundred and seventy-three, and thirty-one hundred and seventy-six of the Revised Statutes of the United States as amended are hereby amended so as to read as follows:

DETAILS OF ADMINISTRATION.

"SEC. 3167. It shall be unlawful for any Collector, Deputy Collector, agent, clerk, or other officer or employé of the United States to divulge or to make known in any manner whatever not provided by law to any person the operations, style of work, or apparatus of any manufacturer or producer visited by him in the discharge of his official duties, or the amount or source of income, profits, losses, expenditures, or any particular thereof, set forth or disclosed in any income return by any person or corporation, or to permit any income return or copy thereof or any book containing any abstract or particulars thereof to be seen or examined by any person except as provided by law; and it shall be unlawful for any person to print or publish in any manner whatever not provided by law any income return or any part thereof or the amount or source of income, profits, losses, or expenditures appearing in any income return; and any offence against the foregoing provision shall be a misdemeanor and be punished by a fine not exceeding $1,000 or by imprisonment not exceeding one year, or both, at the discretion of the Court; and if the offender be an officer or employé of the United States he shall be dismissed from office and be incapable thereafter of holding any office under the Government.

"SEC. 3172. Every Collector shall, from time to time, cause his deputies to proceed through every part of his district and inquire after and concerning all persons therein who are liable to pay any internal revenue tax, and all persons owning or having the care and management of any objects liable to pay any tax, and to make a list of such persons and enumerate said objects.

"SEC. 3173. It shall be the duty of any person, partnership, firm, association, or corporation, made liable to any duty, special tax, or other tax imposed by law, when not otherwise provided for, in case of a special tax, on or before the thirty-first day of July in each year, in case of income tax on or before the first day of March in each year, and in other cases before the day on which the taxes accrue, to make a list or return, verified by oath or affirmation, to the Collector or a Deputy Collector of the district where located, of the articles or objects, including the amount of annual income charged with a duty or tax, the quantity of goods, wares, and merchandise made or sold and charged with a tax, the several rates and aggregate amount, according to the forms and regulations to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, for which such person, partnership, firm, association, or corporation is liable: *Provided*, That if any person liable to pay any duty or tax, or owning, possessing, or having the care or management of property, goods, wares, and merchandise, articles or objects liable to pay any duty, tax, or license, shall fail to make and exhibit a list or return required by law, but shall consent to disclose the particulars of any and all the property, goods, wares, and merchandise, articles, and objects liable to pay any duty or tax, or any business or occupation liable to pay any tax as aforesaid, then, and in that case, it shall be the duty of the Collector or Deputy Collector to make such list or return, which, being distinctly read, consented to, and signed and verified by oath or affirmation by the person so owning, possessing, or having the care and management as aforesaid, may be received as the list of such person: *Provided further*, That in case no annual list or return has been rendered by such person to the Collector or Deputy Collector as required by law, and the person shall be absent from his or her residence or place of business at the time the Collector or a Deputy

Collector shall call for the annual list or return, it shall be the duty of such Collector or Deputy Collector to leave at such place of residence or business, with some one of suitable age and discretion, if such be present, otherwise to deposit in the nearest post-office a note or memorandum addressed to such person, requiring him or her to render to such Collector or Deputy Collector the list or return required by law within ten days from the date of such note or memorandum, verified by oath or affirmation. And if any person, on being notified or required as aforesaid, shall refuse or neglect to render such list or return within the time required as aforesaid, or whenever any person who is required to deliver a monthly or other return of objects subject to tax fails to do so at the time required, or delivers any return which, in the opinion of the Collector, is false or fraudulent, or contains any undervaluation or understatement, it shall be lawful for the Collector to summon such person, or any other person having possession, custody, or care of books of account containing entries relating to the business of such person, or any other person he may deem proper, to appear before him and produce such books, at a time and place named in the summons, and to give testimony or answer interrogatories, under oath, respecting any objects liable to tax or the returns thereof. The Collector may summon any person residing or found within the State in which his district lies; and when the person intended to be summoned does not reside and can not be found within such State, he may enter any collection district where such person may be found and there make the examination herein authorized. And to this end he may there exercise all the authority which he might lawfully exercise in the district for which he was commissioned.

"SEC. 3176. When any person, corporation, company, or association refuses or neglects to render any return or list required by law, or renders a false or fraudulent return or list, the Collector or any Deputy Collector shall make, according to the best information which he can obtain, including that derived from the evidence elicited by the examination of the Collector, and on his own view and information, such list or return, according to the form prescribed, of the income, property, and objects liable to tax owned or possessed or under the care or management of such person, or corporation, company or association, and the Commissioner of Internal Revenue shall assess all taxes not paid by stamps, including the amount, if any, due for special tax, income or other tax, and in case of any return of a false or fraudulent list or valuation intentionally he shall add 100 per centum to such tax; and in case of a refusal or neglect, except in cases of sickness or absence, to make a list or return, or to verify the same as aforesaid, he shall add 50 per centum to such tax. In case of neglect occasioned by sickness or absence as aforesaid the Collector may allow such further time for making and delivering such list or return as he may deem necessary, not exceeding thirty days. The amount so added to the tax shall be collected at the same time and in the same manner as the tax unless the neglect or falsity is discovered after the tax has been paid, in which case the amount so added shall be collected in the same manner as the tax; and the list or return so made and subscribed by such Collector or Deputy Collector shall be held prima facie good and sufficient for all legal purposes."

J. That it shall be the duty of every Collector of Internal Revenue, to whom any payment of any taxes other than the tax represented by an adhesive stamp or other engraved stamp is made under the provisions of this section, to give to the person making such payment a full written or printed receipt, expressing the amount paid and the particular account for which such payment was made; and whenever such payment is made such Collector shall, if required, give a separate receipt for each tax paid by any debtor, on account of payments made to or to be made by him to separate creditors in such form that such debtor can conveniently produce the same separately to his several creditors in satisfaction of their respective demands to the amounts specified in such receipts; and such receipts shall be sufficient evidence in favor of such debtor to justify him in withholding the amount therein expressed from his next payment to his creditor; but such creditor may, upon giving to his debtor a full written receipt, acknowledging the payment to him of whatever sum may be actually paid, and accepting the amount of tax paid as aforesaid (specifying the same) as a further satisfaction of the debt to that amount, require the surrender to him of such Collector's receipt.

K. That jurisdiction is hereby conferred upon the District Courts of the United States for the district within which any person summoned under this section to appear to testify or to produce books shall reside, to compel such attendance, production of books, and testimony by appropriate process.

L. That all administrative, special, and general provisions of law, including the laws in relation to the assessment, remission, collection, and refund of internal revenue taxes not heretofore specifically repealed and not inconsistent with the provisions of this section, are hereby extended and made applicable to all the provisions of this section and to the tax herein imposed.

M. That the provisions of this section shall extend to Porto Rico and the Philippine Islands: *Provided*, That the administration of the law and the collection of the taxes imposed in Porto Rico and the Philippine Islands shall be by the appropriate internal-revenue officers of those Governments, and all revenues collected in Porto Rico and the Philippine Islands thereunder shall accrue intact to the general governments, thereof, respectively: *And provided further*, That the jurisdiction in this section conferred upon the District Courts of the United States shall, so far as the Philippine Islands are concerned, be vested in the courts of the first instance of said islands: *And provided further*, That nothing in this section shall be held to exclude from the computation of the net income the compensation paid any official by the Governments of the District of Columbia, Porto Rico, and the Philippine Islands or the political subdivisions thereof.

N. That for the purpose of carrying into effect the provisions of Section II of this act, and to pay the expenses of assessing and collecting the income tax therein imposed, and to pay such sums as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may deem necessary, for information, detection, and bringing to trial and punishment persons guilty of violating the provisions of this section, or conniving at the same, in cases where such expenses are not otherwise provided for by law, there is hereby appropriated out of any money in the Treasury not otherwise appropriated for the fiscal year ending June 30, 1914, the sum of $800,000, and the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, is authorized to appoint and pay from this appropriation all necessary officers, agents, inspectors, Deputy Collectors, clerks, messengers and janitors, and to rent such quarters, purchase such supplies, equipment, mechanical devices, and other articles as may be necessary for employment or use in the District of Columbia or any collection district in the United States, or any of the Territories thereof: *Provided*, That no agent paid from this appropriation shall receive compensation at a rate higher than that now received by travelling agents on accounts in the Internal Revenue Service, and no inspector shall receive a compensation higher than $5 a day and $3 additional in lieu of subsistence, and no Deputy Collector, clerk, messenger, or other employé shall be paid at a rate of compensation higher than the rate now being paid for the same or similar work in the Internal Revenue Service.

In the office of the Commissioner of Internal Revenue at Washington, District of Columbia, there shall be appointed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, one additional Deputy Commissioner, at a salary of $4,000 per annum; two heads of divisions, whose compensation shall not exceed $2,500 per annum; and such other clerks, messengers, and employés, and to rent such quarters and to purchase such supplies as may be necessary: *Provided*, That for a period of two years from and after the passage of this act the force of agents,

INCOME TAX LAW—*Continued.*

Deputy Collectors, Inspectors, and other employés not including the clerical force below the grade of Chief of Division employed in the Bureau of Internal Revenue in the city of Washington, District of Columbia, authorized by this section of this act shall be appointed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, under such rules and regulations as may be fixed by the Secretary of the Treasury to insure faithful and competent service, and with such compensation as the Commissioner of Internal Revenue may fix, with the approval of the Secretary of the Treasury, within the limitations herein prescribed: *Provided further*, That the force authorized to carry out the provisions of Section II. of this act, when not employed as herein provided, shall be employed on general internal-revenue work.

| Austria H | Gold | Crown | .20.3 | |
| Belgium | Gold | Franc | .19,3 | Member of Latin Union; gold is the actual standard. |
| Bolivia | Gold | Boliviano | .38,9 | 12½ bolivianos equal 1 pound sterling. |
| Brazil | Gold | Milreis | .54,6 | Currency: Government paper, convertible at $0.32,42 to the milreis. |
| British Colonies in Aus. and Africa | Gold | Pound sterling | 4.86,65 | |
| Canada | Gold | Dollar | 1.00,0 | |
| Cent. Amer. States: | | | | |
| B. H'nd's | Gold | Dollar | 1.00,0 | |
| Cos. Rica. | Gold | Colon | .46,5 | |
| Gua'mala | Silver | Peso | .43,5 | Currency: inconvertible paper, exchange rate 16 to 18 pesos—$1.00. |
| Hond'ras | Silver | Peso | .43,5 | Currency: bank notes, exchange rate March 20, 1912, $0.41,5. |
| Nica'gua | Silver | Peso | .43,5 | Currency: inconvertible paper, exchange rate 16¾ to 17 pesos—$1.00. |
| Salvador. | Silver | Peso. | .43,5 | Currency: convertible into silver on demand. |
| Chile | Gold | Peso | .36,5 | Currency: inconvertible paper; exchange rate, approximately, $0.22,30. |
| China | Silver | Tael { Shanghai / Haikwan / Canton | .65,1 / .72,6 / .71,1 | |
| Colombia | Gold | Dollar | 1.00,0 | Currency: inconvertible paper; exchange rate, approximately, $102 paper to $1 gold. |
| Denmark | Gold | Crown | .26,8 | |
| Ecuador | Gold | Sucre | .48,7 | |
| Egypt | Gold | Pound (100 piasters) | 4.94,3 | The actual standard is the British pound sterling, which is legal tender for 97½ piasters. |
| Finland | Gold | Mark | .19,3 | |
| France | Gold | Franc | .19,3 | Member of Latin Union: gold is the actual standard. |
| Germany | Gold | Mark | .23,8 | |
| Gt. Britain | Gold | Pound sterling | 4.86,65 | |
| Greece | Gold | Drachma | .19,3 | Member of Latin Union; gold is the actual standard. |
| Hayti | Gold | Gourde | .96,5 | Currency: inconvertible paper; exchange rate, approximately, $0.29,41. |
| India | Gold | Rupee | .32,44½ | (15 rupees equal 1 pound sterling.) |
| Italy | Gold | Lira | .19,3 | Member of Latin Union; gold is the actual standard. |
| Japan | Gold | Yen | .49,8 | |
| Liberia | Gold | Dollar | 1.00,0 | Currency: depreciated silver token coins; customs duties are collected in gold. |
| Mexico | Gold | Peso | .49,8 | |
| Neth'lands | Gold | Florin | .40,2 | |
| N'foundl'd | Gold | Dollar | 1.01,4 | |
| Norway | Gold | Crown | .26,8 | |
| Panama | Gold | Balboa | 1.00,0 | |
| Paraguay | Silver | Peso | .43,5 | Currency: depreciated paper, exchange rate, 1,550 per cent. |
| Persia | Gold | Kran | .17,04 | This is the value of the gold kran. Currency is silver circulating above its metallic value; exchange value of silver kran, approximately, $0.08,75. |
| Peru | Gold | Libra | 4.86,65 | |
| Philip. Isl. | Gold | Peso | .50,0 | |
| Portugal | Gold | Escudo | 1.08,0 | Currency: inconvertible paper; exchange rate, approximately, $0.93,94. |
| Rumania | Gold | Leu | .19,3 | |
| Russia | Gold | Ruble | .51.5 | |
| S. Domingo | Gold | Dollar | 1.00,0 | |
| Servia | Gold | Dinar | .19,3 | |
| Siam | Gold | Tical | 3.70,8 | |
| Spain | Gold | Peseta | .19,3 | Valuation is for the gold peseta; currency is silver circulating above its metallic value; exchange value, approximately, $0.17,94. |
| Straits Set. | Gold | Dollar | .56,77 | |
| Sweden | Gold | Crown | .26,8 | |
| Switz'land | Gold | Franc | .19,3 | Member of Latin Union; gold is the actual standard. |
| Turkey | Gold | Piaster | .04,4 | 100 piasters equal to the Turkish £. |
| Uruguay | Gold | Peso | 1.03,4 | |
| Venezuela | Gold | Bolivar | .19,3 | |

# Public Debt of the United States.

OFFICIAL STATEMENT OF OCTOBER 1, 1913.

INTEREST-BEARING DEBT.

| | |
|---|---|
| Consols of 1930, 2 per cent | $646,250,150.00 |
| Loan of 1908-1918, 3 per cent | 63,945,460.00 |
| Loan of 1925, 4 per cent | 118,489,900 00 |
| Panama Canal loan. Series of 1906. | 54,631,980.00 |
| Panama Canal loan. Series of 1908. | 30,000,000 00 |
| Panama Canal loan. Series of 1911. | 50,000,000.00 |
| Postal Savings, 1st, 2d, 3d, 4th Series. | 2,389,120.00 |
| Postal Savings, 1913-33, Fifth Series. | 1,116,880 00 |
| Aggregate of Interest-bearing debt.. | $966,823,490.00 |

DEBT ON WHICH INTEREST HAS CEASED SINCE MATURITY.

| | |
|---|---|
| Aggregate debt on which interest has ceased since maturity | $1,651,100.26 |

DEBT BEARING NO INTEREST.

For amount of the Principal of the Public Debt from 1793 to 1872, see WORLD ALMANAC for 1913, page 261.

# Representative Government League.

*President*—John E. Eastmond. *Secretary*—W. Ward Damon. *Treasurer*—Albert E. Woolf.

The objects of the league are to promote the perfection of representative institutions in the United States and dependencies, primarily by advocating the election of members of governing bodies in municipalities, the States and the nation by the effective vote or proportional representation, and the making of the rules of procedure of such assemblies promotive of publicity, prompt action and measures for the public good and not private gain, to the end that the people may rightly have confidence in their legislative bodies as true and fit instruments for accomplishing the popular will; to encourage the study of government, of governmental problems, the participation of citizens in public affairs, and the use of public buildings for public assemblies and social centres. Headquarters, 154 Nassau Street, New York City.

# Government Securities.

## AVERAGE ANNUAL NET PRICE OF GOVERNMENT BONDS OF ENGLAND, FRANCE, GERMANY AND UNITED STATES.

The quotations for English consols, French rentes and German imperial loans from 1881 to 1905 are taken from the "Materialien zur Beurteilung der Zusammenhange zwischen dem offentlichen Schuldenwesen und dem Kapitalmarkte," Berlin, 1908. Figures for more recent years compiled by the Bureau of Foreign and Domestic Commerce from returns of the Bank of England and data given in the Statistisches Jahrbuch des Deutschen Reichs. The quotations for United States bonds were compiled by the United States Treasury Department.

| Year. | English Consols. | | | French Rentes. | German Imperial Loans. | | | United States Bonds. | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | 3 per cent. | 2¾ per cent. | 2½ per cent. | 3 per cent. | 4 per cent. | 3½ per cent. | 3 per cent. | 4 per cent. of 1907. | 4 per cent. of 1925. | 2 per cent. of 1930. | 3 per cent. of 1908-1918. |

## NATIONAL ASSOCIATION OF CREDIT MEN.

The National Association of Credit Men has for its object the improving and safeguarding of the conditions under which credit is extended through the co-operation of its 17,300 members. It aims to secure the enactment of laws beneficial to the honest debtor and creditor. It strives for better mercantile agency service, the prevention of commercial fraud, the bettering of credit department methods, the dissemination of literature of general interest to credit men and the education of his customers in the use of the financial statement, observance of discount terms, etc.

The work is done through a number of standing committees appointed by the national organization, who work with the co-operation of similar committees appointed by ninety-four affiliated branches. A number of the local branches operate bureaus for the exchange of credit information between their members, and bureaus for the friendly adjustment of insolvent estates.

*President*—F. R. Salisbury, Minneapolis, Minn. *First Vice-President*—Chas. E. Meek, New York, N. Y. *Second Vice-President*—Enoch Rauh, Pittsburgh, Pa. *Secretary-Treasurer*—J. H. Tregoe, 41 Park Row, New York, N. Y.

## NEW YORK STOCK EXCHANGE SEATS.

THE following table, prepared by Dow, Jones & Co., Publishers of *The Wall Street Journal*, shows the high and low prices of New York Stock Exchange seats since 1868.

Sale of a seat on the New York Stock Exchange on July 17, 1913 for $37,000, lowest since 1899.

Before 1868, seats on the New York Stock Exchange were not transferred by purchase and sale. An initiation fee of $3,000 was, however, required from members duly elected by the board. In 1868, the transfer of seats began to have a market valuation, for in that year the present system of transfer was instituted.

| Receivable ... | For all public dues. | For all public dues. | For all public dues. | For all public dues. | For all public dues except customs |
| Exchangeable.. | For subsidiary and minor coin. | For silver and minor coin. | For subsidiary and minor coin. | For silver and minor coin. | For subsidiary silver and minor coin. |
| Redeemable... | In gold coin at the Treasury. | In silver dollars at the Treasury | In gold at the Treasury. | In gold at the Treasury. | In "lawful money" at the Treasury, or at bank of issue. |

"Lawful money" includes gold coin, silver dollars, United States notes and Treasury notes. United States notes are by regulation receivable for customs so long as they continue redeemable in coin. There are still in use small amounts of $1 and $2 national bank notes; also $500 and $1,000 silver certificates Treasury notes were issued for purchases of silver bullion, which was coined into dollars wherewith the notes are being redeemed as rapidly as practicable The issue of national bank notes is practically dependent upon the market price of United States bonds. When the premium is high it is not profitable to issue notes.

* "Emergency" issues based upon other bonds and upon commercial paper are authorized under certain conditions beyond the amount of the capital, under act of May. 1908. expiring May, 1914.

The above table was revised for THE WORLD ALMANAC by the Director of the Mint.

# Banking Statistics.

## THE NATIONAL BANKS OF THE UNITED STATES.

(From the Annual Report of the Comptroller of the Currency.)

Clearing-House returns prepared for The World Almanac by Assistant Manager W. J. Gilpin, of New York Clearing-House.

BANKING STATISTICS—*Continued.*

## BANKING STATISTICS OF EUROPE.

(From *The Economist*, London, October 25, 1913.)

SPECIE ON HAND. CIRCULATION OUTSTANDING AND AMOUNT OF DEPOSIT AND CURRENT ACCOUNTS OF PRINCIPAL FOREIGN BANKS OF ISSUE ON OR ABOUT OCTOBER. 1, 1913.

| Banks. | Gold. | Silver. | Circulation. | Deposits and Current Accounts. |
|---|---|---|---|---|
| Bank of England | £1,690,543 | ..... | £24,910,895 | £47,290,985 |
| Bank of France | 138,700,000 | £25,471,000 | 226,807,000 | 34,647,000 |
| Imperial Bank of Germany | 90,635,000 | ..... | 112,629,000 | 35,771,000 |
| Bank of Russia | 147,131,000 | 5,907,000 | 171,089,000 | 58,166,000 |
| Bank of Austria-Hungary | 50,890,000 | 10,562,000 | 96,373,000 | ..... |
| Bank of Netherlands | 12,364,000 | 626,000 | 24,93[illegible],000 | 279,000 |
| Bank of Italy | *48,884,000 | .. .... | 66 980,000 | 8,076,000 |
| Bank of Norway | 2,529,000 | ..... | 6,002 000 | 509,000 |
| Bank of Sweden | 5,698,000 | ..... | 11,924,000 | 3,082 000 |
| Swiss National Bank | 6,896,000 | 1,168,000 | 10,760,000 | 2,260,000 |
| Bank of Spain | 18,784,000 | 29,372,000 | 77,112,000 | 16,736,000 |
| National Bank of Belgium | 12,484,000 | ..... | 39,820,000 | 3,147,000 |

*Cash—not classified.

June 30, 1907, the Bank of Portugal had $5,690,000 in gold, $8,100,000 in silver, $74,500,000 circulation and $29,300,000 in deposits and current accounts; Imperial Ottoman Bank $12,300,000 in gold and silver, $6,100,000 in circulation, $58,000,000 in deposits and current accounts; Bank of Japan $10,800,000 in gold, $170,800,000 in circulation and $200,800,000 in deposits and current accounts; banks of the United Kingdom, including colonial and foreign joint-stock banks with London offices, circulation $306,100,000, deposits and current accounts $7,691,000,000.

## Premiums on Gold.

Gold sold first at a premium early in January, 1862, the New York banks having suspended specie payments December 28, 1861. The highest point reached was 285, July 11, 1864. The premium on gold disappeared at the end of 1878, just prior to resumption of specie payments.

Following is given a table of the high and low prices of gold from 1862 to 1878 inclusive:

| Date. | Low. | High. | Date. | Date. | Low. | High. | Date. |
|---|---|---|---|---|---|---|---|
| 1862....Mar. 25 | 101⅛ | 134 | Dec. 4 | 1871....April 8 | 110⅛ | 115 | Oct. 7 |
| 1863....Aug. 25 | 122⅛ | 172½ | Feb. 25 | 1872....Jan. 11 | 108½ | 115⅝ | Aug. 5 |
| 1864....Jan. 6 | 151½ | 285 | July 11 | 1873....Jan. 6 | 106⅛ | 119⅛ | April 5 |
| 1865....June 5 | 135¼ | 234¾ | Jan. 4 | 1874....July 31 | 109 | 114⅜ | April 15 |
| 1866....Mar. 24 | 124⅞ | 167¾ | June 18 | 1875....Jan. 15 | 111¾ | 117⅝ | Oct. 5 |
| 1867....Jan. 11 | 132½ | 146⅜ | Sept. 12 | 1876....Dec. 30 | 107 | 115 | Mar. 3 |
| 1868....Nov. 6 | 132 | 150 | Aug. 6 | 1877....Oct. 8 | 102½ | 107⅞ | April 17 |
| 1869....Nov. 30 | 121⅛ | 162½ | Sept. 24 | 1878 Dec. 17 to Dec. 31 | 100 | 102⅞ | Jan 2 |
| 1870....Nov. 4 | 110 | 123¼ | Jan. 10 | | | | |

Above table was prepared by James B. Colgate & Co., New York City.

## Cost of Membership in Leading Exchanges.

The *Investment Guide* of Henry Clews & Co. gives the following table of cost of membership in the leading exchanges of the world, as of November 1, 1913:

| | | | |
|---|---|---|---|
| Baltimore Stock Exchange | $3,500 | New Orleans Cotton Exchange | $2,050 |
| Berlin Bourse (entrance fee, not transferable) | 750 | New York Coffee Exchange | 1,425 |
| Boston Stock Exchange | 16,000 | New York Cotton Exchange | 14,000 |
| Chicago Stock Exchange | 1,200 | New York Produce Exchange | 400 |
| Cincinnati Stock Exchange | 3,100 | New York Stock Exchange | 41,000 |
| Cleveland Stock Exchange | 1,000 | Paris Bourse (appointments made and controlled by French Government) | .... |
| Consolidated Stock and Petroleum Exchange, New York | 750 | Philadelphia Stock Exchange | 6,000 |
| Liverpool Cotton Exchange | 6,000 | Pittsburgh Stock Exchange | 1,800 |
| London Stock Exchange (entrance fee, not transferable) | 2,000 | St. Louis Stock Exchange | 2,500 |
| Montreal Stock Exchange | 30,000 | Toronto Stock Exchange | 17,000 |
| | | Washington Stock Exchange | 4,500 |

The value of a membership in an exchange depends in a large measure upon the prevailing state of business and the market level of securities.

## National Republican League of the United States.

The National Republican League of the United States was organized in Chickering Hall, New York City, December 15-17, 1887, by delegates from about 350 Republican clubs of the United States, assembled in national convention, pursuant to a call issued by the Republican Club of New York City. It is composed of the Republican clubs of the United States, organized by States and united in a national organization. Its purpose is "Organization and Education." It aims to enlist recruits for the Republican party, particularly the younger men and the "first voters." National conventions have since been held at Baltimore, 1889; Nashville, 1890; Cincinnati, 1891; Buffalo, 1892; Louisville, 1893; Denver, 1894; Cleveland, 1895; Milwaukee, 1896; Detroit, 1897; Omaha, 1898 (biennial sessions afterward); St. Paul, 1900; Chicago, 1902; Indianapolis, 1904; Philadelphia, 1906; Cincinnati, 1908; New York, 1910. At the close of the campaign of 1908, the league, including the Taft campaign clubs, comprised approximately 4,000 clubs, with a membership of 1,500,000. *Officers*—President, John Hays Hammond, Gloucester, Mass.; Secretary-Treasurer D. B. Atherton, New York City.

## NATIONAL ASSEMBLY OF CIVIL SERVICE COMMISSIONS.

*President*—Frank A. Spencer, New York City. *Vice-Presidents*—Thomas F. Boyle, Boston, Mass.; W. R. Robinson, Springfield, Ill.; Wm. C. Keough, Cleveland, Ohio. *Secretary-Treasurer*—John T. Doyle, 1724 F Street N. W., Washington, D. C.

The assembly was organized in 1906. The objects are to enable all those charged with the administration of civil service laws to become acquainted and exchange ideas. To promote co-operation, uniformity and perfection of methods of the different commissions. To enable the commissions to profit by exchange of ideas with officers who are directing departments and to give such officers broader opportunity to inform themselves on the methods of the merit system.

The next meeting of the assembly will be held at Pueblo, Col., June 11-13, 1914.

The total receipts of the United States from the beginning of the Government, 1789 to 1913, have been: From customs, $12,335,140,814; internal revenue, $9,611,819,943; miscellaneous, $1,992,604,999; total, excluding loans and premiums, $25,064,698,847.

The total disbursements, excluding postal service, Panama Canal, and public debt, same period, have been: For civil and miscellaneous, $5,443,728,783; war, $7,479,479,686; navy, $3,077,296,055; Indians, $583,870,406; pensions, $4,794,741,151; interest, $3,323,223,792; total, $25,305,382,979.

* Disbursements in excess of receipts.

# United States Board of Mediation and Conciliation.

*Commissioner*—William L. Chambers. *Assistant Commissioner*—G. Wallace W. Hanger. *Members of Board*—William L. Chambers and Martin A. Knapp.

(Created by act of Congress, Approved July 15, 1913.)

The purpose for which the board was established is to settle by mediation, conciliation and arbitration all controversies concerning wages, hours of labor, or conditions of employment that may arise between any common carrier or carriers engaged in the transportation of passengers or property wholly by railroad, or partly by railroad and partly by water, for a continuous carriage or shipment from one State or Territory of the United States or the District of Columbia, to any other State or Territory of the United States or the District of Columbia, or from any place in the United States to an adjacent foreign country, or from any place in the United States through a foreign country to any other place in the United States, and their employes, which includes all persons actually engaged in any capacity in train operation or train service of any description, whether the cars upon or in which they are employed are owned or held and operated by the carrier under lease or other contract.

The Commissioner of Mediation and Conciliation is appointed by the President, by and with the advice and consent of the Senate, for a term of seven years, salary $7,500, and is the executive officer of the board, which consists of the Commissioner and not more than two other officials of the Government, who have been appointed by and with the advice and consent of the Senate, to be designated by the President.

The board as at present constituted consists of Commissioner William L. Chambers and United States Circuit Judge Martin A. Knapp. The Assistant Commissioner of Mediation and Conciliation is appointed by the President, by and with the advice and consent of the Senate, salary $5,000 per annum.

## THE UNITED STATES HAY FEVER ASSOCIATION.

*President*—Rev. Guy Roberts, Bethlehem, N. H. *Vice-President*—William M. Patterson, New York. *Secretary-Treasurer*—Percy F. Jerome, 125 East Twenty-seventh Street, New York City.

Forty years ago the United States Hay Fever Association came into existence as a joke. But very soon it was discovered that real service might be rendered hay fever sufferers through organization. The "joke" became a "practical" one and has so remained to date. The fortieth annual convention of the association was held at Bethlehem, N. H., in the White Mountains, on August 27, 1913.

The object of the association is the seeking for information which will serve to relieve sufferers with hay fever and their mutual benefit and comfort. Not only hay-feverites, but the townspeople and proprietors of hotels of places exempt from hay fever, the manufacturers of remedies for hay fever, and especially physicians who have made a study of this disease are invited to become members of the association, that all may work together for the best results.

Col. M. Richards Muckle of Philadelphia, who was for seven years President of the association and who is eighty-eight years of age, claims to be the oldest hay fever sufferer. He has had the disease seventy-five years.

# Comparative Wholesale Prices of Commodities.

## QUOTATIONS RULING FOR STANDARD GRADES, 1900 TO 1913.

THE following table from "Bradstreet's Journal" shows average ruling prices for 106 commodities in the United States at various periods from 1900 to 1913:
